Congressional Record

PROCEEDINGS AND DEBATES OF THE 95th CONGRESS, SECOND SESSION

SENATE—*Thursday, October 12, 1978*

(Legislative day of Wednesday, October 11, 1978)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by Hon. ROBERT MORGAN, a Senator from the State of North Carolina.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

From the rising of the sun unto the going down of the same the Lord's name is to be praised.

The Lord is high above all nations, and his glory above the heavens.—Psalms 113: 3, 4.

We thank Thee, O God, for Thy mercies which are new every morning.

Grant us, O Lord, a vision of our land, fair as she might be; a land of justice, where none shall prey on others; a land of plenty, where vice and poverty shall cease to fester; a land where people have rewarding work and time for play; a land of brotherhood, where success shall be founded on service, and honor be given to worth alone; a land of peace, where order need not rest on force, but on the love of all for their land, the great mother of our common life. Guide by Thy higher wisdom the President and all others in authority.

Give us grace and wisdom to complete the work in which we are now engaged. Renew us in our weariness and reinforce us when fatigued. Use us in hastening the day of Thy kingdom, through Jesus Christ our Lord. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., October 12, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT MORGAN, a Senator from the State of North Carolina, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. MORGAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF LEADERSHIP

Mr. ROBERT C. BYRD. Mr. President, does any Senator wish me to yield part of my time to him—the Senator from South Carolina, the Senator from Wisconsin?

I yield back my time.

The ACTING PRESIDENT pro tempore. Under the previous order, the minority leader is recognized.

Mr. STEVENS. Mr. President, we have no requests for time, unless the Senator from Wisconsin wishes time.

Mr. PROXMIRE. No. I have an order. I thank the Senator.

Mr. STEVENS. I yield back the minority leader's time.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Wisconsin (Mr. PROXMIRE) is recognized for not to exceed 5 minutes.

CAMBODIA, HISTORY, AND THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, it is indeed a sad fact of human history that men, time and time again, have attempted to destroy, in whole or in part, a racial, national, ethnic, or religious group. In the 20th century alone, we have witnessed the genocide of European Jews by Hitler, the Kurds by the Iraqis, the Armenians by the Turks, the Ukrainians by Stalin, and the Langi and Acholi Tribes by Idi Amin.The most recent addition—in fact, occurring right now—is the genocide in Cambodia under the new government of Democratic Kampuchea.

But, Mr. President, this is no ordinary genocide. There are no concentration camps and gas chambers disguised as showers. This is genocide without technology.

According to a former Khmer Rouge supporter, Jean Lacouture, in the March 31, 1977, New York Review of Books:

> Ordinary genocide (if one can ever call it ordinary) usually has been carried out against a foreign population or an internal minority. The new masters of Phnom Penh have invented something original, auto-genocide. After Auschwitz and the Gulag, we might have thought this century had produced the ultimate in horror, but we are now seeing the suicide of a people in the name of revolution; worse: in the name of socialism.

Mr. President, Francois Ponchaud, a Jesuit priest who lived and worked in Cambodia for 10 years, states in his book, "Cambodia—Year Zero", that—

> The Khmer revolution is irrefutably the bloodiest of our century.

And regrettably, Mr. President, the facts bear him out.

Since the Khmer Rouge assumed power, all traces of Buddhism and the monarchy have been erased. The concept of family totally obliterated. Staggering numbers—anywhere from 1 to 2 million people senselessly murdered.

And why, Mr. President, why? For what conceivable reason?

To create a new race of men, I am told.

And at what price? The destruction "of an art of living compounded of freedom, tolerance, and respect for life," responds Father Ponchaud.

Mr. President, the facts are obvious. Genocide, a loathsome blot on human history, seems destined to continue. Uganda yesterday, Cambodia today, who knows where tomorrow.

For the last 29 years, the U.S. Senate has failed to ratify the Genocide Convention. Only this body stands in the way of ratification. The President has pleaded for this convention, as has every previous President since President Truman. The House of Representatives has no voice in this. This is simply a responsibility of this body, the U.S. Senate. But we have not acted on this treaty, as I say, for nearly 30 years. This treaty

outlaws genocide, and its ratification would clearly proclaim to the world community this country's moral outrage at such atrocities.

For 29 years, Mr. President. Must we wait any longer?

As millions continue to suffer, our conscience demands that ratification of the Genocide Convention be a top priority for the 96th Congress.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from West Virginia is recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Mr. President, on my time, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

Mr. ABOUREZK. Mr. President, will the leader withhold that? I would like a couple of minutes.

Mr. ROBERT C. BYRD. I yield 2 minutes to the Senator from South Dakota.

BUDGET FOR THE SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. ABOUREZK. Mr. President, first, I thank the majority leader for giving me time to speak.

Second, I wish to say that there was much discussion last night about the extension of the Indian Committee. The Senate has, by virtually a 2-to-1 margin, extended the life of the Senate Select Committee on Indian Affairs for 2 years. I am very grateful to the Senate for doing that, and I know the Indian people of this country are as well.

The other part of it is that because of the original plan putting the Indian Committee in the Human Resources Committee, as a Subcommittee of Human Resources, the budget for the Indian Committee was to be shut off on December 31 of this year, whereupon the Human Resources Committee would operate the subcommittee, and they increased their budget correspondingly.

Now there is a request before the Senate Rules Committee that would authorize the expenditure of that money by the Select Committee on Indian Affairs beyond the 31st of December of this year, to enable the Indian Committee to continue functioning as the Senate indicated it wanted it to do.

I regret to say that the distinguished Senator from Nevada (Mr. CANNON) has a hold on the authorization of the budget for the Indian Committee, which, in effect, will make the Indian Committee expire, in spite of the will of the Senate, on December 31 of this year.

Further, there would be no Indian Committee. It would be there just in form only. There would be no substance to it, because there would be no staffs, no clerks, no nobody. Under the rule, it would not even go into the Human Resources Committee, so it would not even be an Indian Affairs Subcommittee, by virtue of the fact that Senator CANNON will not allow the budget to be authorized for the committee.

I just want to advise the Senate that that is the case. I do not know what to do about it. Senator CANNON will not release his hold. I do not know what to do except to tell you all, all of you, Senator HOLLINGS.

I thank the distinguished leader, and I yield back the remainder of my time.

Mr. ROBERT C. BYRD. I thank the Senator.

CARSON CITY SILVER DOLLARS

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate proceed to the consideration of Calendar Order No. 1217, H.R. 9937.

The ACTING PRESIDENT pro tempore. Is there objection to the motion of the Senator from West Virginia?

Mr. STEVENS. Mr. President, I do not have any objection, on the basis that is not going to be a vehicle for Regulation Q amendments that have not been cleared. It is my understanding Senator HOLLINGS will have an amendment.

We have no objection.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from West Virginia.

The motion was agreed to.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 9937) to amend the Bank Holding Company Act Amendments of 1970.

The Senate proceeded to the consideration of the bill.

Mr. PROXMIRE. Mr. President, the bill simply was unanimously approved by our committee and it simply provides for an opportunity for GSA to dispose of $24 million worth of Carson City coins at a gain to the Federal Government of $24 million. It has passed the House of Representatives. It is a bill which I think will pass easily.

I have discussed an amendment the Senator from South Carolina is anxious to put on the bill. I understand there is no objection to his doing that.

So I am happy to accept his amendment as he discussed it.

Mr. HOLLINGS. I thank my distinguished colleague.

UP AMENDMENT NO. 2058

Mr. President, I call up my amendment and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS, for himself and Messrs. BAKER, DURKIN, THURMOND, STONE, HUDDLESTON, HANSEN, Mrs. ALLEN, Messrs. ANDERSON, BIDEN, BUMPERS, ROBERT C. BYRD, CASE, CHAFEE, CHURCH, CURTIS, DOLE, EAGLETON, EASTLAND, FORD, GARN, HATCH, HATHAWAY, HEINZ, HELMS, HODGES, LAXALT, LEAHY, MCCLURE, MCINTYRE, MUSKIE, NUNN, PELL, RANDOLPH, RIEGLE, SASSER, SCOTT, SPARKMAN, STAFFORD, STENNIS, STEVENS, TALMADGE, TOWER, WALLOP, WEICKER, WILLIAMS, and YOUNG) proposes an unprinted amendment numbered 2058.

At the end of the bill, add the following new section:

SEC. . Section 127(b) of the Trade Act of 1974 (19 U.S.C. 2137) is amended by inserting immediately following "section 203 of this Act": ", section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), insofar as such section relates to textiles and textile products,".

Mr. STEVENS. Mr. President, may I inquire of the Senator from South Carolina, is this identical to the amendment that was adopted on the Export-Import Bank bill in the Chamber?

Mr. HOLLINGS. It was by a vote of 56 to 21, on Friday, September 29, 1978.

Mr. President, I ask unanimous consent that the arguments pro and con related in the RECORD of Friday, September 29, 1978, at page 32578 not be included but be related to this particular presentation at this time.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HOLLINGS. That is the same.

Mr. STEVENS. All right.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from South Carolina.

Mr. HOLLINGS. I move the adoption of the amendment.

The amendment was agreed to.

Mr. ROBERT C. BYRD. I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. THURMOND. Mr. President, I am strongly in support of the amendment offered by the junior Senator from South Carolina and of which I am a cosponsor. This amendment amends section 127 (b) of the Trade Act of 1974 (19 U.S.C. 2137) to prohibit the reduction or elimination in trade negotiations of duties or import restrictions on certain imported textiles and textile products.

As I am sure that my colleagues are aware, this amendment that we are considering today is the same amendment that was overwhelmingly approved 52 to 21 by the Senate on September 29. It now appears because of certain problems, that there is a danger that the Export-Import Bank bill may become stalled permanently in the Senate. Therefore, because of the vital importance of this amendment to the health of the textile industry, we are offering this amendment.

I cannot stress enough the need for this amendment to protect the textile and apparel industries from the growing onslaught of imports. In my home State of South Carolina, 188,000 people depend on the textile and apparel industries for their livelihood. This is over 50 percent of our manufacturing jobs. Nationwide, nearly 2.3 million people work in the fiber, textile, and apparel industries. If we cut tariffs by 50 percent as the President proposes, we will cut off the paychecks of 500,000 of these workers. We cannot permit this to happen.

It is the high and rising volume of textile imports, with the resulting trade deficit, that is one of the major causes of inflation. The textile apparel trade

deficit, which in 1977 was $3.4 billion, is estimated to be over $5 billion this year. We simply cannot bring inflation under control and stop the erosion of the dollar if the United States continues to follow, in Geneva, trade policies of tariff reduction.

Mr. President, I urge my colleagues to join me in supporting this amendment. We cannot continue to lose American textile and apparel jobs to imports, while giving no benefit to the American consumer. We must have a trade policy that works to reduce the trade deficit and strengthen the U.S. dollar. We should adopt this amendment today.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1303) explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

SUMMARY OF THE LEGISLATION

As reported by the committee, House Resolution 9937 authorizes the Administrator of the General Services Administration to conduct future sales of the Carson City silver dollars under such terms and conditions, and at such prices, as he deems proper.

HISTORY OF THE LEGISLATION

H.R. 9937 was introduced in the House of Representatives on November 3, 1977. Hearings were held by the Subcommittee on Coinage and Historic Preservation on April 3, 1978. The resolution was reported by the Committee on Banking, Finance and Urban Affairs on September 18, 1978, and passed by the House on September 26, 1978.

In the Senate, the resolution was referred to the Committee on Banking, Housing, and Urban Affairs. The committee agreed, by poll, to report the legislation without amendment on October 9, 1978.

EXPLANATION OF THE LEGISLATION

The legislation amends section 205 of Public Law 91–607 which authorized the public sale of approximately 3 million Carson City silver dollars by the General Services Administration under procedures established by the Joint Commission on the Coinage. Since 1970, when the legislation was enacted, approximately 2 million coins have been sold with receipts of $55.3 million. These receipts are deposited into the general fund of the Treasury and help reduce the national debt.

The General Services Administration advised the committee that the original sales procedures are too cumbersome for disposing of the remaining inventory of approximately 1 million coins with a potential sales value of $24 million. Since the life of the Joint Commission on the Coinage has expired, however, administrative revisions are not possible. Accordingly, the GSA recommended legislation authorizing its Administrator to conduct future sales in a less cumbersome manner than the currently authorized procedures. It would also permit a flexible approach to the marketing of these coins by permitting changes in the method of sale as marketing conditions may require, thus enabling the Government to maximize proceeds. With more flexible procedures, GSA estimates it can sell the remaining inventory in about 6 months for approximately $24 million.

COST OF THIS LEGISLATION

Enactment of this legislation will result in no new or additional costs to the Federal Government.

The ACTING PRESIDENT pro tempore. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

The ACTING PRESIDENT pro tempore. The bill having been read the third time, the question is, shall it pass?

So the bill (H.R. 9937), as amended, was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Orders Nos. 1185, 1197, 1201, 1204, and 1209, with the understanding that not more than 3 minutes will be consumed and that no amendments may be in order from the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DEPOSITS TO MINORITY-OWNED COMMERCIAL BANKS

The ACTING PRESIDENT pro tempore. The first Calendar No. 1185 will be stated by title:

The assistant legislative clerk read as follows:

A resolution (S. Res. 411) expressing the sense of the Senate that further efforts be made by Federal departments and agencies to channel additional deposits to minority-owned commercial banks, was considered and agreed to.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution which was reported from the Committee on Banking, Housing, and Urban Affairs, with amendments to the preamble.

Mr. PROXMIRE. Mr. President, the purpose of this resolution is to encourage Federal departments and agencies to channel additional deposits of funds under their control or administration into minority-owned commercial banks and savings and loan associations, under the auspices of the minority bank deposit program administered by the Treasury Department.

The minority bank deposit program is intended to assist the development of financial institutions which are established with the active participation of minority individuals. It recognizes the vital function these institutions perform in their communities. Currently, the program includes financial institutions which are under the ownership or majority control of blacks, Hispanic Americans, Indians and women. The program encourages the deposit of Federal moneys with the institutions in order to provide them with additional sources of funds, over and above their regular deposit base, which is generally not adequate to meet the full financial needs of the communities they serve.

The minority bank deposit program was begun in 1970. For several years, the level of Federal deposits in minority banks remained relatively static. Early in 1977, the Carter administration expressed a commitment to increasing the level of Federal deposits in minority banks, and the following figures indicate that this effort has met with some success.

Quarterly figures reflecting increasing Federal deposits in minority banks

Quarter ended:	Amount
June 30, 1972	$84.0
June 30, 1973	86.6
June 30, 1974	74.0
June 30, 1975	72.3
June 30, 1976	89.2
June 30, 1977	99.8
June 30, 1978	[1] 145.0

1. All figures in millions.
2. Figures for quarter ending date listed.

[1] Approximate.

Source: U.S. Department of Treasury.

In reporting this resolution, the Committee on Banking, Housing, and Urban Affairs expressed the view that this trend should continue and that the volume of Federal deposits in these financial institutions should be further increased. It appears that some of the cash management procedures which the Treasury Department requires Federal departments and agencies to observe, including competitive bidding, may have an adverse impact on the ability of minority financial institutions to attract Federal deposits. While not wishing in any way to discourage efficient cash management practices, the committee believed it was important not to lose sight of the basic goals of the minority bank deposit program.

Senate Resolution 411 is intended to provide a further stimulus to the ongoing efforts to channel additional Federal deposits into minority financial institutions. It states that in determining where these deposits are placed, Federal agencies and departments must give consideration to the role which minority institutions play in their respective communities and how that role can be fostered through the receipt of additional financial resources from the Federal Government, consistent with the application of good cash management policies.

At the present time, only commercial banks are recognized for participation in the minority bank deposit program. However, the resolution expressly refers to minority savings and loan associations as well. Now that these institutions have been made eligible to act as tax and loan account depositaries, under Public Law 95–147, there is every reason to include them in other programs as well. Indeed, the administration already has efforts underway to bring minority-owned savings and loan associations into the minority bank deposit program.

Furthermore, although it is not specifically stated in the resolution, there should be no bar to including minority-owned credit unions as well, since the Treasury Department already has the authority to do this. The inclusion of these additional institutions in the pro-

gram will make it still more imperative that the goals of this resolution be met and that the volume of Federal deposits in minority financial institutions be steadily increased.

● Mr. LUGAR. Mr. President, I am pleased to support passage of Senate Resolution 411, which I introduced on March 8, 1978, along with Senators BROOKE, MCINTYRE, PROXMIRE, RIEGLE, SCHMITT, and TOWER as original cosponsors. The purpose of this resolution is to express the sense of the Senate that further efforts be made by Federal departments and agencies to channel additional deposits to minority-owned commercial banks.

In 1970, the Treasury Department initiated a minority bank deposit program in order to assist and encourage the development of commercial banks which are established with the active participation of mincrity individuals. This program encourages the deposit of Federal moneys with these institutions in order to provide them with additional sources of funds. The minority bank deposit program recognizes the financial needs of the institutions involved, which serve a vital function in their communities by making credit available and accessible at a reasonable cost to all credit-worthy persons, including blacks, Hispanic-Americans, and other minorities.

Treasury Department figures demonstrate a relatively consistent increase in total minority bank deposits from June 30, 1972, to the present:

Source: U.S. Department of Treasury.

Treasury Department policy requires the 24 Federal departments and agencies that deposit Federal funds in commercial bank accounts to observe a variety of cash management procedures. Several departments and agencies have implemented cash management procedures whereby commercial banks must engage in competitive bidding for Federal Government deposits. If used exclusively, this process, which is intended to achieve more efficient cash management, could ignore as a factor the important role played by minority banks.

Senate Resolution 411 encourages all Federal departments and agencies to make every effort to channel additional deposits under their control or administration into minority financial institutions. The resolution states that in determining where Federal deposits are placed, agencies and departments must give consideration to the role these institutions play in their respective communities and how that role can be fostered through the receipt of additional financial resources, consistent with the application of good cash management policies.

The current minority bank deposit program includes financial institutions which are under the ownership or majority control of blacks, Hispanic-Americans, Indians, and women. Although only commercial banks now are recognized for participation in the program, the resolution expressly refers to savings and loan associations as well. In the past, savings and loan associations have been precluded from participating in the direct deposit program because of their inability to maintain demand deposits. In Public Law 95–147, the Congress made savings and loan associations eligible for the first time to act as Treasury tax and loan account depositories.

This change in Federal law indicates that Congress supports generally the concept of equal participation in Federal deposit programs by savings and loan associations. The resolution, as reported by the committee, recognizes that the Treasury already has the authority to include minority savings and loan associations in the minority bank deposit program.

I urge adoption of Senate Resolution 411.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1261), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXPLANATION OF THE RESOLUTION

In 1970, the Treasury Department initiated a minority bank deposit program in order to assist and encourage the development of commercial banks which are established with the active participation of minority individuals. This program encourages the deposit of Federal moneys with these institutions in order to provide them with additional sources of funds. The minority bank deposit program recognizes the financial needs of the institutions involved, which serve a vital function in their communities by making credit available and accessible at a reasonable cost to all creditworthy persons, including blacks, Hispanic-Americans, and other minorities.

The Federal sector of the administration's program, as administered and coordinated by the Treasury Department, is national in scope, with participants from every area of the country. A common denominator among the institutions involved, however, is their need for additional financial resources. This characteristic makes it difficult for them to meet the full financial needs of the communities they serve.

The committee believes that the trend toward a larger volume of deposits in financial institutions in the minority bank deposit program should continue unabated, and, in fact, be increased. Treasury Department policy requires the 24 Federal departments and agencies that deposit Federal funds in commercial bank accounts to observe a variety of cash management procedures. Several departments and agencies have implemented cash management procedures whereby commercial banks must engage in competitive bidding for Federal Government deposits. If used exclusively, this process, which is intended to achieve more efficient cash management, could ignore as a factor the important role played by minority banks.

The resolution encourages all Federal agencies to make every effort to channel additional deposits under their control or administration into minority financial institutions. The resolution states that in determining where Federal deposits are placed, agencies and departments must give consideration to the role these institutions play in their respective communities and how that role can be fostered through the receipt of additional financial resources, consistent with the application of good cash management policies.

The current minority bank deposit program includes financial institutions which are under the ownership or majority control of blacks, Hispanic-Americans, Indians, and women. Although only commercial banks now are recognized for participation in the program, the resolution expressly refers to savings and loan associations as well. In the past, savings and loan associations have been precluded from participating in the direct deposit program because of their inability to maintain demand deposits. In Public Law 95–147, the Congress made savings and loan associations eligible for the first time to act as Treasury tax and loan account depositories. This change in Federal law indicates that Congress supports generally the concept of equal participation in Federal deposit programs by savings and loan associations. The resolution, as reported by the committee, recognizes that the Treasury already has the authority to include minority savings and loan associations in the minority bank deposit program.

The amendments to the preamble were agreed to.

The preamble, as amended, was agreed to.

The resolution, with its preamble, as amended, reads as follows:

Whereas certain commercial banks and savings and loan associations are owned or controlled by minority Americans;

Whereas, these private financial institutions, by assuring the availability of and accessibility to credit at a reasonable cost to all credit-worthy persons, including blacks, Hispanic-Amercians, and other minorities, have contributed in a significant way to the economic health and development of the communities which they serve;

Whereas in an attempt to assist and encourage these institutions, moneys of the Federal Government have been deposited with them, pursuant to the minority bank deposit program initiated in 1971, in order to provide a stable source of funds;

Whereas Federal departments and agencies have available to them pursuant to Treasury Department policy a variety of cash management procedures;

Whereas several Federal departments and agencies have implemented cash management procedures whereby financial institutions must engage in competitive bidding for Federal Government deposits, thereby ignoring as a factor the important role played by minority banks and savings and loans associations; and

Whereas the President of the United States has urged all Federal departments and agencies, within the constraints of good cash management, to make efforts to channel a larger volume of deposits into minority-owned commercial banks and savings and loan associations: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) All Federal departments and agencies should make every possible effort to channel additional funds under their control or administered through their department or agencies into these financial institutions.

(2) In determining which deposits shall be channeled into these financial institutions Federal agencies and departments shall consider the vital role these institutions play in their communities consistent with the application of good cash management policies.

The title was amended so as to read:

A resolution expressing the sense of the Senate that further efforts be made by Federal departments and agencies to channel additional deposits in minority-owned commercial banks and savings and loan associations.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

REQUEST WITHDRAWN FOR CERTAIN CALENDAR ORDER

Mr. ROBERT C. BYRD. Mr. President, I withdraw my request temporarily with respect to Calendar Orders No. 1197, 1202, 1204, and 1209.

ENERGY TAX ACT OF 1978— CONFERENCE REPORT

Mr. LONG. Mr. President, I send to the desk a privileged matter and ask for its consideration.

The ACTING PRESIDENT pro tempore. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5263) to suspend until the close of June 30, 1980, the duty on certain bicycle parts, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

(The conference report will be printed in the proceedings of the House of Representatives.)

Mr. ABOUREZK. Mr. President, a parliamentary inquiry.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. ABOUREZK. Mr. President, is this what is known as the energy tax legislation?

Mr. LONG. Yes; it is.

Mr. ABOUREZK. Mr. President, I would like to have the clerk read that conference report.

The ACTING PRESIDENT pro tempore. The clerk will read the conference report.

The assistant legislative clerk proceeded to read the conference report.

Mr. ABOUREZK. Mr. President, I suggest the absence of a quorum.

Mr. ROBERT C. BYRD. Mr. President, that cannot be done while reading the conference report.

The ACTING PRESIDENT pro tempore. The clerk will proceed.

Mr. ABOUREZK. Mr. President, I submit we have to have a quorum here before we can transact any business.

Mr. ROBERT C. BYRD. Mr. President, I ask for the regular order.

The ACTING PRESIDENT pro tempore. The regular order is for the continued reading of the conference report.

The clerk will read.

The assistant legislative clerk continued the reading of the conference report.

Mr. ABOUREZK. Mr. President, a point of order——

Mr. LONG. Mr. President, the Senator is out of order. There is a paper being read by the clerk.

Mr. ABOUREZK. Mr. President, the papers are not here. It is out of order to even proceed with the consideration of the conference report.

The ACTING PRESIDENT pro tempore. The Chair cannot hear the Parliamentarian.

The regular order, I am advised, is that the clerk continue reading the report. The clerk will continue.

The assistant legislative clerk continued the reading of the conference report.

Mr. ABOUREZK. I suggest the absence of a quorum, Mr. President.

Mr. LONG. The Senator cannot do that, because the clerk is reading a paper.

The PRESIDING OFFICER. The Chair is advised that the regular order is to continue the reading of the conference report. The clerk will continue.

The assistant legislative clerk continued the reading of the conference report.

Mr. ROBERT C. BYRD. Mr. President, I ask that the clerk read louder. He may sit down and read. I want to hear what he is saying.

The legislative clerk resumed and concluded the reading of the conference report.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. ABOUREZK. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will call the roll.

The second assistant legislative clerk resumed and concluded the call of the roll and the following Senators answered to their names:

[Quorum No. 17 Leg.]

Abourezk	Griffin	Sarbanes
Byrd, Robert C.	Hansen	Stevens
Cannon	Hatch	Williams
Durkin	Melcher	

The PRESIDING OFFICER. A quorum is not present. The clerk will call the names of absent Senators.

Mr. ABOUREZK. I ask unanimous consent——

Mr. ROBERT C. BYRD. I ask that the Sergeant at Arms be instructed to request the attendance of absent Senators.

Mr. ABOUREZK. I was trying to get recognition.

Mr. ROBERT C. BYRD. The Chair already announced that a quorum is not present.

The PRESIDING OFFICER. A quorum call is in progress. The clerk will call the names of absent Senators.

Mr. ROBERT C. BYRD. Mr. President. I move that the Sergeant at Arms be instructed to request the attendance of absent Senators.

The PRESIDING OFFICER. The motion to have the Sergeant at Arms request the presence of absent Senators is a motion that is in order.

The question is on agreeing to the motion.

The motion was agreed to.

The second assistant legislative clerk proceeded to call the names of absent Senators.

Mr. ROBERT C. BYRD. Mr. Pesident, I move that the Sergeant at Arms be instructed to compel the attendance of Senators, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. CLARK), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from Hawaii (Mr. INOUYE), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from New Jersey (Mr. CASE), the Senator from New Mexico (Mr. DOMENICI), the Senator from North Carolina (Mr. HELMS), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from Virginia (Mr. SCOTT), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The PRESIDING OFFICER. Have all Senators in the Chamber voted?

Mr. CHURCH. Mr. President, am I recorded?

The PRESIDING OFFICER. The Senator from Idaho is recorded.

Mr. CHURCH. I thank the Chair.

The result was announced—yeas 78, nays 3, as follows:

[Rollcall Vote No. 481 Leg.]

YEAS—78

Abourezk	Glenn	Moynihan
Anderson	Griffin	Muskie
Bartlett	Hansen	Nelson
Bayh	Hart	Nunn
Bellmon	Hatch	Pearson
Bentsen	Hatfield, Mark O.	Pell
Brooke	Hatfield, Paul G.	Percy
Bumpers	Hayakawa	Proxmire
Burdick	Heinz	Randolph
Byrd, Harry F., Jr.	Hodges	Ribicoff
Byrd, Robert C.	Hollings	Riegle
Cannon	Humphrey	Roth
Chafee	Jackson	Sarbanes
Chiles	Javits	Sasser
Church	Johnston	Schmitt
Cranston	Kennedy	Schweiker
Culver	Laxalt	Sparkman
Curtis	Leahy	Stafford
Danforth	Long	Stennis
DeConcini	Lugar	Stevens
Dole	Magnuson	Stone
Durkin	McGovern	Talmadge
Eagleton	Melcher	Thurmond
Eastland	Metzenbaum	Wallop
Ford	Morgan	Williams
Garn		Young
		Zorinsky

NAYS—3

Goldwater	Huddleston	Weicker

NOT VOTING—19

Allen	Haskell	McIntyre
Baker	Hathaway	Packwood
Biden	Helms	Scott
Case	Inouye	Stevenson
Clark	Mathias	Tower
Domenici	Matsunaga	
Gravel	McClure	

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of Senators voting who did not answer the quorum call, a quorum is now present.

ENERGY TAX ACT OF 1978—CONFERENCE REPORT

Mr. ABOUREZK. Mr. President, may I be recognized?

The PRESIDING OFFICER (Mr. MELCHER). Is there objection to considering the conference report?

Mr. ABOUREZK. May I be recognized? I seek recognition. I seek recognition.

The PRESIDING OFFICER. Is there objection?

Mr. ABOUREZK. I object.

Mr. ROBERT C. BYRD. I move to proceed to consideration, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to proceed to the consideration of the conference report.

Mr. GOLDWATER. Parliamentary inquiry, Mr. President. What is the regular order?

The PRESIDING OFFICER. The Senator from Arizona asks what is the regular order. The regular order is a rollcall vote on the motion to proceed to the immediate consideration of the conference report. The yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Iowa (Mr. CLARK), the Senator from Colorada (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from Connecticut (Mr. RIBICOFF) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from New Jersey (Mr. CASE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Oregon (Mr. PACKWOOD), the Senator from Virginia (Mr. SCOTT), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The result was announced—yeas 77, nays 8, as follows:

[Rollcall Vote No. 482 Leg.]

YEAS—77

Abourezk	Gravel	Moynihan
Allen	Hart	Muskie
Anderson	Hatch	Nelson
Bayh	Hatfield, Mark O.	Nunn
Bentsen	Hatfield, Paul G.	Pearson
Brooke	Hayakawa	Pell
Bumpers	Heinz	Percy
Burdick	Helms	Proxmire
Byrd, Harry F., Jr.	Hodges	Randolph
Byrd, Robert C.	Hollings	Riegle
Cannon	Huddleston	Roth
Chafee	Humphrey	Sarbanes
Chiles	Inouye	Sasser
Church	Jackson	Schweiker
Cranston	Javits	Sparkman
Culver	Johnston	Stafford
Curtis	Kennedy	Stennis
Danforth	Laxalt	Stevens
DeConcini	Leahy	Stevenson
Dole	Long	Stone
Durkin	Lugar	Talmadge
Eagleton	Magnuson	Thurmond
Eastland	McGovern	Weicker
Ford	Melcher	Williams
Garn	Morgan	Young
Glenn		Zorinsky

NAYS—8

Bartlett	Griffin	Schmitt
Bellmon	Hansen	Wallop
Goldwater	Metzenbaum	

NOT VOTING—15

Baker	Haskell	McIntyre
Biden	Hathaway	Packwood
Case	Mathias	Ribicoff
Clark	Matsunaga	Scott
Domenici	McClure	Tower

So the motion to proceed to the consideration of the conference report was agreed to.

Mr. ROBERT C. BYRD and Mr. ABOUREZK addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, is the energy tax conference report now before the Senate?

The PRESIDING OFFICER. The Senator is correct.

CLOTURE MOTION

Mr. ROBERT C. BYRD. Mr. President, I do not lose the floor by sending a cloture motion to the desk.

Mr. ABOUREZK. Mr. President, I object. I seek recognition.

The PRESIDING OFFICER. The cloture motion is privileged.

The cloture motion having been presented under rule XXII, the Chair, without objection, directs the clerk to read the motion.

Mr. ABOUREZK. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ABOUREZK. Mr. President, I seek recognition.

Mr. ROBERT C. BYRD. Mr. President——

The PRESIDING OFFICER. Objection is heard. The Chair will read the cloture petition.

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the conference report on H.R. 5263, the Bicycle Parts Tariff Bill (Energy Tax).

Robert C. Byrd, Robert Morgan, Russell B. Long, Robert Dole, John A. Durkin, John Glenn, Harrison A. Williams, Jr., Charles H. Percy, James B. Pearson, Alan Cranston, Wendell H. Ford, Richard (Dick) Stone, Mike Gravel, Jennings Randolph, Daniel Patrick Moynihan, Henry M. Jackson, Frank Church, Warren G. Magnuson.

Mr. ABOUREZK. Mr. President, I seek recognition.

The PRESIDING OFFICER. The Senator from West Virginia still has the floor.

SUGAR STABILIZATION ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate proceed to the consideration of Calendar Order No. 1199, H.R. 7108.

Mr. ABOUREZK. Mr. President, I ask for the yeas and nays on that motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ABOUREZK. Mr. President, I seek recognition at this time.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. ABOUREZK. Mr. President, I do not know what calendar order number that was, but I would respectfully request that the majority leader, when he calls up these numbers, kindly inform the Senate what is the issue that is involved.

I am not yielding at this point but I would hope that the majority leader in the future, at least in the next 3 or 4 days, would kindly inform the Senate as to what is in these calendar orders he is calling up. There is no way that in this rush of last minute business we are going to be able to find out.

Mr. LONG. Will the Senator yield?

Mr. ROBERT C. BYRD. Mr. President, that is the reason——

Mr. ABOUREZK. I do not yield, Mr. President.

There is one other issue that I want to talk about at this point.

We just voted on the energy tax bill that the distinguished Senator from Louisiana called up. That is another point that kind of sticks in my craw and I want to discuss it for a few minutes, if I might.

Mr. ROBERT C. BYRD. Mr. President, I ask that the Pastore rule on germaneness be invoked.

Mr. ABOUREZK. Mr. President, I ask for order.

The PRESIDING OFFICER (Mr. FORD). The question is on the motion to proceed. The motion is debatable. Under the Pastore rule, debate must be confined to the matter that is pending before the Senate.

Mr. ABOUREZK. Mr. President, there is no way we can know what the matter is because the distinguished majority leader did not tell us when he called it up. I do not even know the calendar order number.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. ABOUREZK. Without losing my right to the floor.

Mr. ROBERT C. BYRD. The Senator

makes a very reasonable request and I should have stated for the information of the Senate what the title of the bill is. It is the sugar stabilization bill.

Mr. ABOUREZK. Well, Mr. President, with regard to sugar and sugar stabilization [laughter] one thing that the McGovern Committee on Nutrition and Human Needs talked about was the caloric content of sugar. If I had the report on the dietary aspects of sugar and the stabilization of sugar, I would be more than happy to read the entire report. There is a great deal of information in there on the question of sugar.

Without losing my right to the floor, may I propound a parliamentary inquiry, Mr. President?

The PRESIDING OFFICER. Without objection, the Senator may state the inquiry.

Mr. ABOUREZK. Mr. President, the energy tax legislation is now before the Senate; is that correct?

The PRESIDING OFFICER. Currently before the Senate is a motion to proceed on calendar order No. 1199.

Mr. ABOUREZK. Mr. President, I suggest the absence of a quorum.

Mr. CURTIS. Mr. President, will the Senator yield for a question only?

Mr. ABOUREZK. Without losing my right to the floor.

The PRESIDING OFFICER. The Senator may yield for a question.

Mr. CURTIS. Does the Senator realize the interest of the sugar beet farmers in this legislation?

The PRESIDING OFFICER. Will the Senator withhold?

Will the Senate come to order? Those Senators who are discussing and care to have a conversation will retire to the cloakroom. I think the colloquy on the floor is important.

Mr. ABOUREZK. Will the Senator repeat his question?

Mr. CURTIS. Does the Senator realize the great interest of the sugar beet farmers in getting this legislation passed at this session?

Mr. ABOUREZK. I do not realize it, but I would be happy to be told about it.

Mr. CURTIS. I ask unanimous consent that he might yield to me for 2 minutes without losing the floor.

The PRESIDING OFFICER. Is there objection?

Mr. ABOUREZK. And without making it a second speech on my part.

The PRESIDING OFFICER. Is there objection?

The Senator may proceed.

Mr. CURTIS. This bill would establish supports through a complicated system that would benefit both cane producers and sugar beet producers. The situation is chaotic. This would give to sugar beet producers an average price of about $29 a ton. Without it, it would be much lower than that. The Department of Agriculture is arguing for a formula that will give sugar beet farmers about $25.96 a ton.

They need that $29 a ton. If it is not passed now, irreparable damage will be done to sugar beet growers all over the country, including those in South Dakota. I urge the distinguished Senator to use all of his great influence in getting quick passage of this bill. We are in disagreement with the House. Yet it is very important that this legislation be completed.

I thank the Senator for yielding.

Mr. ABOUREZK. I express my deep gratitude to the Senator from Nebraska for explaining the bill. It is fortunate that he did so, because nobody else has bothered to bring up an explanation in this regard.

Mr. LONG. Will the Senator yield for a question at that point?

Mr. ABOUREZK. Without losing my right to the floor, under the same conditions, Mr. President.

The PRESIDING OFFICER. Without objection.

Mr. HEINZ. Reserving the right to object.

Mr. LONG. It does not require consent to yield for a question.

The PRESIDING OFFICER. The Senator may yield for a question.

Mr. LONG. Is not the Senator aware of the fact that the Senator from Louisiana is waiting his turn to make a speech explaining the sugar bill and explaining how important it is to the sugar beet farmers as well as to the sugar cane farmers that we pass this Sugar Act?

Mr. ABOUREZK. I was not aware of that. I am very happy to hear that the Senator from Louisiana is prepared to explain it. I should be very happy to let him do it.

Mr. HEINZ. Before the Senator concludes, will he yield to me without losing his right——

Mr. ABOUREZK. Yes.

Mr. HEINZ. And for the purpose of making a point of order?

Mr. ABOUREZK. No.

To object to the motion to proceed?

Mr. HEINZ. Yes.

Mr. ABOUREZK. Yes, I yield for that purpose.

Mr. HEINZ. Mr. President, I make a point of order against the motion to proceed to consideration of H.R. 7108, based on the fact that it violates the 3-day rule, the report not having been available until Monday afternoon.

Mr. LONG. Mr. President, is this not Thursday?

The PRESIDING OFFICER. The Senator raised the issue as it relates to the sugar legislation?

Mr. HEINZ. I raise it in regard to H.R. 7108, on which there is a motion pending, to proceed to consideration of H.R. 7108.

The PRESIDING OFFICER. It is the opinion of the Chair that it would be proper to proceed 72 hours after the report was available to the Senators.

Mr. HANSEN. Will the President repeat his observation? I did not hear it.

The PRESIDING OFFICER. The Chair indicates that it would be proper to proceed with consideration 72 hours after the report was available to the Senators.

Mr. HEINZ. Mr. President, I stipulate that the report was not available to the Senators, it has not been available to the Senators, for 72 hours. Therefore, I press my point of order.

Mr. LONG. Mr. President, if I may speak to the point, the Senator has no power to stipulate for anybody except himself. I do not stipulate that at all. I do not stipulate that the report was not available the required period of time.

Mr. ROBERT C. BYRD. Mr. President, without the Senator losing his right to the floor, it is my understanding that that report was printed and made available to Senators, in accordance with the rule, 72 hours before the motion has been made. We are checking to see if that mathematical calculation is accurate. I hope that——

Mr. ABOUREZK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senate will come to order. We have a question that needs to be resolved. The Chair will endeavor to do that.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, the committee report was made available at 9 a.m. on Monday, October 9, which was 74 hours ago.

The PRESIDING OFFICER. The Senator is correct. The law states, however, that——

Mr. ROBERT C. BYRD. I know what the law states.

The PRESIDING OFFICER. For the edification of the other Senators, it shall not be considered unless the report submitted on that measure has been available to Members of the Senate for at least 3 calendar days, excluding Saturdays, Sundays, and legal holidays. Monday was a legal holiday.

Mr. ROBERT C. BYRD. Now, Mr. President, I am going to—is the Chair ruling that because Monday was a legal holiday, notwithstanding the fact that the Senate was in session and doing business, the point of order will stand?

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. All right.

Now, I am going to appeal that ruling, for this reason, Mr. President.

The PRESIDING OFFICER. The Chair welcomes the appeal because it is a case of first impression.

Mr. ROBERT C. BYRD. The Chair is doing a magnificent job in the chair, I will say.

In addition thereto, the Chair is interpreting the rule as it reads. I find no fault with the Chair, but I think it is about time that we interpret the rule in the context of reality.

That rule was written at a time when the Senate did not meet on Saturdays very often, did not meet on Sundays except on extreme occasions, and did not meet on legal holidays.

Now, the purpose of the rule—which I am disliking more and more every day—is to allow Senators 3 days in which the Senate is in session to study a report on a matter that has been made available.

Now, the Senate was in session Satur-

day. The Senate was in session Monday. It was not a pro forma session; it was a full day's session in which the Senate transacted business.

That committee report was available and Senators had access to it.

Now, it is unreasonable—it is unreasonable—to say that if the Senate is in session on a legal holiday, or on a Saturday, all day long, not a pro forma session, that that day that the Senate is in session should not be counted as 1 of the 3 days in which the printed committee report is available to Senators.

Therefore, Mr. President, I appeal the ruling of the Chair on the basis of reason, and on the basis of pragmatism, and on the basis that the Senate was in session; 72 hours have expired in which Senators had full access to the printed committee report.

We are up to the end of a session and it is unreasonable to read that rule and interpret it in a way that makes it impossible for the Senate to work its will before another 24 hours have passed.

Mr. LONG. Will the Senator withhold?

Mr. ROBERT C. BYRD. Yes.

Mr. LONG. Also, the Senator is aware of the fact that the Senate was in session on Monday. That was Columbus Day.

Mr. ROBERT C. BYRD. Yes.

Mr. LONG. It was no holiday for the U.S. Senate, legal or otherwise, because the Senate went in that morning at 9:45 a.m. and it stayed in session until 11:13 p.m. that night.

Now, every Senator here had that report available to him. It was right here all day.

Mr. ROBERT C. BYRD. That is right.

Mr. LONG. And the Senators were here. Anybody that wanted to read it could read the report.

Mr. ROBERT C. BYRD. That is right.

Mr. LONG. To say the report has not been available 3 days when it was filed a week ago——

Mr. ROBERT C. BYRD. Yes.

Mr. LONG. Since it was filed a week ago, now to say that the report has not been available is ridiculous. It has been available for the whole 3 days, and some hours beyond that.

Of course, if Senators just do not want to vote on the Sugar Act, here is an excuse not to do so. But, as a practical matter, Monday was no holiday as far as the Senate was concerned.

At about midnight Monday night, I told the staff to take the rest of the day off.

Mr. ROBERT C. BYRD. Now, I bet the staff ignored the Senator's suggestion.

The PRESIDING OFFICER. Would the Senator from West Virginia do the Chair a favor?

Mr. ROBERT C. BYRD. Yes.

The PRESIDING OFFICER. Since there is a prior precedent holding that Saturday does not count even if the Senate is in session on that day, I ask the Senator to expand his motion to Saturdays, Sundays, and holidays, when the Senate is in session. Otherwise we would have a split precedent.

Mr. ROBERT C. BYRD. Yes.

Mr. ABOUREZK addressed the Chair.

Mr. ROBERT C. BYRD. Mr. President, I appeal the ruling of the Chair, the ruling being based on the literal reading of the Senate rule, the practicality of which has long ago expired, that rule stating that a committee report must be printed and available to Senators for 3 calendar days, excluding Saturdays, Sundays, and legal holidays.

I appeal that rule with respect to those three types of days so that we do not have a split decision; when the Senate is in session, not pro forma, but actually in session on a Saturday or on a Sunday or on a legal holiday, that that day is to count as 1 of the 3 calendar days.

Mr. WEICKER. Mr. President, I would like to be heard on the point of order.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I rise to strongly oppose that which the majority leader seeks to achieve here this morning. I do so because it is the epitome of something that has been going on with increasing repetition by all elements of our society, specifically, that we are going to become a government of men, rather than a government of laws; an amazing statement coming from a Member of this body that we will interpret the rules in the light of reality.

There are procedures to go ahead and change the rules of this body.

I think probably on the basis of what the majority leader has set forth, there is good reason to change this rule. I am not arguing that.

But, when it does not suit the purpose of the majority leader and his schedule, to then abandon the rulemaking process, the constitutional process, sets a very dangerous precedent.

What is at issue here is not the sugar bill. What is at issue here is not whether or not there is some time left, or little time left, between now and the schedule set by the majority leader. What is not at issue here are the other pieces of legislation stacked up behind which await our decision.

What is involved is whether or not the rules of this body will be achieved in the normal way, or when it suits any individual's purpose he will then so adjust the rules to his views.

It is almost like a statement of one of our recently departed personages on the Washington scene, who made the statement that, "As long as I say it is legal, it can't be illegal."

As far as I am concerned, why have any rules at all if, indeed, this is the process by which we are going to change them?

Again, I remind my colleagues that in the light of the facts of today, it well might be that this rule should be changed, but it should not be changed in this manner.

We have a Rules Committee. In the past, such rule changes as rule XXII involved considerable debate, compromise, and back-and-forth, not a spur of the moment performance like this to suit the tactics of the majority leader.

I cannot even believe Members of the majority side would adhere to the principle espoused here.

It well might be that they have the votes to go ahead and uphold an appeal. But those rules are there to protect you as well as to protect the minority. What bothers me most, Mr. President, as I say, is a disregard for the constitutional process or for the process which involves the making of our own rules within this body.

To make a statement on the floor that we are going to temper the rules according to the reality, then why is it not the right of anybody in this country, on the street, to go ahead and do whatever they want, to go ahead and do it according to whatever reality is to them?

We talk about law and order. I have never seen such a flagrant disregard of it. Sure, it is not in terms that are normally projected.

It is not somebody stabbing another person in the inner-city or mugging somebody. What you are talking about is a breaking of basic concepts of law—in this case, to suit our reality. I have no more sympathy for the breaking of law in the name of reality in this Chamber than I do down Pennsylvania Avenue, than I do on the streets of Hartford, Conn.

If everybody is just going to go out and do their own thing, then let us abandon May 1 as Law Day and substitute for it "Do Your Own Thing Day," because that is what the majority leader is doing right now—doing his own thing.

If that kind of example is set in the Senate of the United States, among the most educated of men and women, the most advantaged of men and women, then ask me why a better example should be set by those without education and without advantage.

I think the request of the majority leader in this particular instance is a disgrace to everything this body stands for and this Nation stands for.

Mr. DURKIN. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. DURKIN. Will the Senator yield?

Mr. HEINZ. I yield, without losing my right to the floor.

Mr. DURKIN. I thank the Senator.

This is the silly season, and we have heard enough pious nonsense, and we have everyone polishing their halo when the press gallery is full.

The American public is fed up with the asinine rules of the U.S. Senate that do not let us get our job done.

Houdini used to tie himself in knots, draw a crowd, and escape. We draw a crowd, tie ourselves in knots, and then say, "Don't expect anything from the U.S. Senate, because we're tied in knots."

The request of the majority leader is a very reasonable request. If we cannot temper rules with reason, we might as well close this place up. We might as well make this part of the Smithsonian Institute and let the tourists walk through, because this place is over as a functioning legislative body. Many people in this country are totally fed up with it.

Mr. WEICKER. Mr. President, will the Senator yield for a question?

Mr. DURKIN. I will yield in just a second.

The American public is totally fed up with the nonsense that goes on here under the guise of rules. Every cab driver in America is upset that we cannot pass an energy package. We cannot pass appropriations bills.

When the rule was written, we were in session 3 or 4 months a year. It was a gentleman's pursuit. Now we are full-time elected bureaucrats due to the change in the circumstances. That rule was made so that when we were out of town, when we were not in session on a Saturday, when we were not in session on a holiday, we could not pull a fast one.

We were in session Saturday. We were in session Monday, even though it was a holiday. I am not sure it was a holiday in my State. Our Governor has his own set of holidays.

The request of the majority leader is very reasonable, and it is not any abdication of the rule of law, with due respect to my friend from Connecticut.

Mr. WEICKER. Mr. President, will the Senator yield for a question?

Mr. DURKIN. I yield.

Mr. HEINZ. I yield.

Mr. WEICKER. Will the Senator respond to the following question: Would he please tell me which rules are asinine? That is the essence of the argument here. And who is to determine which rules are asinine? Is it the Durkin version or is it the Byrd version or is it the version as established by the rules, by the U.S. Senate? Will the Senator please tell me which rules are asinine?

Mr. DURKIN. I will be glad to send the Senator from Connecticut a memo on which rules I think are asinine. If I discussed all the rules I think are asinine, we will not adjourn Saturday night, the last Saturday in December.

Mr. WEICKER. Is adjournment important or are the laws and the rules of this Nation important?

Mr. DURKIN. We have heard enough of this pious nonsense—the rules, the rules, the rules. We cannot get anything done. The American public expects us to modify the rules, to get the agenda of the country done.

Mr. WEICKER. Well, that is what some of our disadvantaged people in this country have said from time to time; and when they say the rules are no good, they get thrown in the slammer.

I suggest to the Senator that we have to have some procedure in this Nation. That is all we are arguing for. We are not arguing the merits of this particular situation.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. HEINZ. I yield, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may withdraw the appeal.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Now, Mr. President, will the Senator allow me the floor? I have withdrawn the appeal.

Mr. HEINZ. I have no objection to the Senator's withdrawing the appeal.

Mr. ROBERT C. BYRD. Mr. President, I am not going to challenge this point of order. Therefore, the point of order stands. May I be recognized?

The PRESIDING OFFICER. The motion to proceed falls, and the Senator from West Virginia is recognized.

PUBLIC ASSISTANCE AMENDMENTS OF 1977

Mr. ROBERT C. BYRD. Mr. President, I move to proceed to the consideration of Calendar No. 527, H.R. 7200, an act to amend the Social Security Act to make needed improvements in the programs of supplemental security income benefits.

The PRESIDING OFFICER. Without objection, the clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 7200) to amend the Social Security Act to make needed improvements in the programs of supplemental security income benefits, aid to families with dependent children, child welfare services, and for other purposes.

The Senate proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment in the nature of a substitute.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. If I am recognized for a couple of minutes, so that I can explain——

The PRESIDING OFFICER. The Senate will come to order. The Senator deserves to be heard. Staff and Senators will take their seats.

Mr. ROBERT C. BYRD. Mr. President, I think that the liberal interpretation of the rule which requires a committee report to be available to Senators for 3 days, excluding Saturday, Sundays, and legal holidays, when the Senate is in session, is an unreasonable rule; but, literally, it has to be interpreted for what it says. Consequently, I will not be a party to changing the rule by the appeals procedure. It can be done. I have been arguing against this business of changing the rules by sleight of hand methods, myself; so I want to be held to my own rule.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Not yet.

Mr. HEINZ. I yielded to the Senator two or three times.

Mr. ROBERT C. BYRD. The Senator from West Virginia will yield to the Senator, but I would like to take my place at the mourners' bench. I want to have my soul fully cleansed, without interruption. [Laughter.]

Mr. President, I did not like the procedure that was used, which is going to be challenged at some point—the procedure that was used to change the rules of the Senate by a self-executing amendment to a bill which is still on the calendar, and which will probably never be called up, and which will die. I did not like that. I do not think that is the way the Senate should change its rules. I do not think the Senate should change its rules by the appeal procedure, either.

Let me say this: This is not the last we have heard of this 3-day rule. It is an unreasonable rule which makes the Senate, although it is in session on a Saturday or a Sunday or on a legal holiday, add an additional day—or if it is in session all 3 days, to add 3 additional days—before a matter can be called up. It is unreasonable. At the end of the session, it can mean the death of a very important bill or resolution.

So, at the beginning of the next session, we will proceed to see if we can change that rule.

Mr. HEINZ. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. HEINZ. First, I wish to commend the Senator from West Virginia, our majority leader, on recognizing what his appeal meant to the Senate, because he is quite right. I have heard him on many occasions argue that you cannot do indirectly what you cannot do directly. Indeed he made an eloquent speech as late as last night, rather late.

Mr. ROBERT C. BYRD. I went back and read that speech.

Mr. HEINZ. Rather late.

Mr. ROBERT C. BYRD. I went back and read that eloquent speech a few minutes ago and decided I should come in and kneel at the mourners' bench and beg the Senate to forgive me, and I do, for this act that I committed or was about to commit of going against my own eloquent, and persuasive speech.

Mr. HEINZ. If the Senator will permit me to continue, this indeed would be a very difficult thing for him to do.

Mr. ROBERT C. BYRD. I found it impossible.

Mr. HEINZ. Naturally. And I would only add if the Senator had not gone back and read his speech I would read it to the Senate because I thought it was such a good speech, and I thought my colleagues would want to know just how eloquent the majority leader is.

Let me say more seriously to the majority leader that I had two purposes in invoking the 3-day rule. The first purpose was to bring to the attention of the Senate that while the report was logged someplace at 9 a.m. we were unable to get it until late Monday afternoon. We tried. We could not obtain it. We could not obtain it until Monday afternoon.

So let me assure the Senator that in fact we were not dealing with a legal technicality. It was not my intention to deal with a legal technicality when I invoked the 3-day rule. I was trying to deal with substance. That does not mean that I agree with the Senator's idea that we should waive Christmas, Easter, Memorial Day, and July Fourth, if the Senate is in session on such religious holidays, as the rules change the Senator has in mind would imply.

Second, and I say this particularly to my colleagues, my intention is not, on the bill that was called up, H.R. 7108, to obstruct passage of the Sugar Act. There may be others who want to do that. I am not one of them. But I do not like a part of that bill which was added in

committee; namely, the extension of the countervailing duty waiver authority which currently under the 1974 treaty is supposed to expire on January 3. I think it should expire on January 3; otherwise, we will lose a very real bargaining chip at the Multilateral Trade Negotiations which were supposed to be concluded several months ago, and I am told by Mr. Strauss will be concluded no later than December 15.

So I see no reason to extend the countervailing duty waiver authority to the President.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator——

Mr. HEINZ. I appreciate the Senator's yielding.

Mr. ROBERT C. BYRD. To discuss the points of order, not the merits of the bill. I am very contrite and I make this honest confession in tears, and I trust that I may receive absolution.

Mr. DANFORTH addressed the Chair.

Mr. ROBERT C. BYRD. I thank the Chair, and I hope we can get on now with the matter.

Mr. DANFORTH. Will the majority leader yield for one question?

Mr. ROBERT C. BYRD. I yield.

Mr. DANFORTH. I am curious as to why H.R. 7200 was called up at this point in the session. If we are attempting to dispose of important business in the last 3 days and allow the Senate to work its will, as the majority leader continually insists we do, I am just curious as to whether the majority leader has considered what is in H.R. 7200, because as I can inform the Senator if he does not know, precisely the same issue, exactly the same issue on fiscal relief that we disposed of in the Senate last Friday is in H.R. 7200, exactly the same provision.

Mr. ROBERT C. BYRD. Mr. President, if the Senator will yield, I will answer the Senator.

Mr. DANFORTH. The Senate worked its will on the fiscal relief provisions of H.R. 7200 which is I am sure why it is coming up again. It is just an end run around what we did last Friday by rollcall vote in the Senate. Now it appears that we are going to just climb up that same mountain again.

I do not think I have been an obstructionist in my brief term in the Senate. I have not gone and asked for needless rollcalls or suggested the absence of a quorum or gotten Senators to run back and forth over the floor of the Senate to do this or that. But it seems to me that when you fight a battle and you win a battle, then to see exactly the same thing come up less than a week later, precisely the same issue, exactly the same charts with respect to how the money is divided up among the States, to have exactly the same issue come up less than a week later when we are supposed to be hurrying along making progress on Humphrey-Hawkins, I frankly do not understand it at all, and I would appreciate an explanation.

Mr. ROBERT C. BYRD. I yield to the manager of the bill.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. Mr. President, it is the intention of the chairman of the committee to move to strike everything after the enacting clause on H.R. 7200 and proceed to act on revenue measures, including the Sugar Act, as an amendment. That is what I have in mind. Of course, this is a revenue bill, and it would be subject to amendment. If Senators want, we can debate the same point the Senator had in mind. But H.R. 7200 is a revenue bill and has been out there on the calendar a very, very long time. It has long since exceeded the 3-day rule.

Mr. DANFORTH. I shall ask a question at this point then. Would this not, whether or not we strike everything from after the enacting clause, put H.R. 7200 in conference and resurrect the possibility of coming back with this fiscal relief question? I mean right now it is in conference. Right now it is not brought up in the tax bill and it is not in the tax bill in either the House version or the Senate version.

Mr. LONG. It absolutely would not. When we strike all after the enacting clause, we strike down not only the Senate committee language but we strike down the House language. The House language has no fiscal relief provision in it, so the provision that the Senator is worried about would not be in conference. The only provision that would be in conference from the House side would be those provisions that the House sent to us, some of which we have already put on the tax cut bill and sent back over to the conference on that bill anyway.

As a matter of fact, the best thing in H.R. 7200 as it came to us was added to the tax bill on which we go to conference this afternoon. I do not think the Senator will find much of anything in what the House put in H.R. 7200 that would be further subject to conference about which he would be upset. All the Senate language would be gone.

Mr. DANFORTH. My understanding is that the fiscal relief provisions that were in the Senate version of H.R. 7200 are not in the House version.

Mr. LONG. They are not there.

Mr. DANFORTH. It is the chairman's intention to move to strike everything after the enacting clause in H.R. 7200?

Mr. LONG. My amendment in the nature of a substitute would take away, so far as I know, everything to which the Senator has objected. You may have objection to something in the bill the House sent us, but much of H.R. 7200 as passed by the House has already been added, if not to other bills, then to the big tax bill on which the Senator is a conferee this afternoon. That will be considered in that conference anyway, so all we would have left would be whatever House language remains from H.R. 7200 as it came to us from the House bill.

In other words, what the Senator fears would not be the case.

Has the motion to proceed been agreed to, Mr. President?

The PRESIDING OFFICER. The question is on agreeing to the motion to proceed to the consideration of the bill.

The motion was agreed to.

UP AMENDMENT NO. 2059

(Purpose: To implement the International Sugar Agreement, to establish a domestic sugar program, and for other purposes)

Mr. LONG. Mr. President, I send to the desk an amendment in the nature of a substitute.

The PRESIDING OFFICER. The clerk will report.

Mr. LONG. I ask that this be substituted for the committee amendment. There is a committee amendment.

The PRESIDING OFFICER. In the nature of a substitute. This amendment is in order.

Mr. LONG. The committee amendment is in the nature of a substitute.

Now I wish to make a unanimous consent request. I am offering this in the nature of a substitute for the committee amendment. I want to protect the rights of Senators, and that being the case, I ask unanimous consent that the amendment in the nature of a substitute be substituted for the committee amendment and be considered as original text for the purposes of further amendment.

The PRESIDING OFFICER. Is there objection?

Mr. ABOUREZK. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. ABOUREZK. With respect to the nature of that unanimous-consent request, does that allow amendments in the third degree or does it shut them off by virtue of——

The PRESIDING OFFICER. It allows amendments in two more degrees.

Mr. ABOUREZK. As though it were an original measure?

The PRESIDING OFFICER. The Senator is correct.

Mr. ABOUREZK. I thank the Chair.

Mr. President, one further parliamentary inquiry, and I still reserve the right to object, is a nongermane amendment in order to this substitute?

The PRESIDING OFFICER. There would be no germaneness requirement at this time.

Mr. ABOUREZK. Nongermane amendments are in order?

The PRESIDING OFFICER. The Senator is correct.

Mr. ABOUREZK. May I just ask the distinguished Senator from Louisiana if he would be interested in amending his unanimous-consent request to prevent nongermane amendments from being added?

Mr. LONG. Senator, it is likely to be objected to. I would like to limit consideration to germane amendments, but I am not going to ask it at this point because someone might want to object that his rights would not be protected.

Mr. ABOUREZK. Would the distinguished Senator make the request?

Mr. LONG. Mr. President, I ask unanimous consent that further amendments to the bill be germane.

Mr. HEINZ. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. ABOUREZK. Then I object to his request.

The PRESIDING OFFICER. Objection is heard to the Senator's last unanimous-consent request.

The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Louisiana (Mr. LONG) proposes an unprinted amendment numbered 2059: strike out all after the enacting clause and insert in lieu thereof new language.

Mr. HEINZ. Mr. President, we would like to hear the amendment.

The PRESIDING OFFICER. The Senator from Pennsylvania is asking that the entire amendment be read?

Mr. HEINZ. I have not heard a motion to dispense with further reading. What is the regular order?

The PRESIDING OFFICER. The regular order would be to read the amendment.

Mr. LONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. ABOUREZK. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will continue reading.

Mr. ABOUREZK. Mr. President, may the clerk be seated while he is reading?

Mr. LONG. I object.

Mr. ABOUREZK. May the clerk remain standing? I ask unanimous consent that the clerk remain standing.

Mr. LONG. I object.

The PRESIDING OFFICER. The clerk will stand on his head and read.

[Laughter.]

The clerk will read the amendment.

The assistant legislative clerk proceeded to read the amendment.

Mr. ABOUREZK. Mr. President, could we have order, Mr. President, so we can hear it?

The PRESIDING OFFICER. If the Senator wants to come closer he is welcome.

Mr. ABOUREZK. May we then not have order, Mr. President, may we have disorder?

The PRESIDING OFFICER. If the Senator will get to his seat and use his microphone, which is the procedure of the Senate, he will be in order. The clerk may proceed.

The assistant legislative clerk resumed the reading of the amendment.

Mr. ABOUREZK. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, reserving the right to object, I wish to ask that the chairman of the Finance Committee——

The PRESIDING OFFICER. Will the Senator use his microphone.

Mr. HEINZ. I simply wish to ask the chairman of the Finance Committee what is contained in the amendment he has offered. I do not see any reason to proceed with reading it, but I would like to know what is in the amendment.

Mr. LONG. Senator——

The PRESIDING OFFICER. Is there objection to the request that further reading of the amendment be dispensed with?

Mr. HEINZ. I am reserving my right to object.

The PRESIDING OFFICER. The Senator cannot have an explanation with a reservation of his right to object.

Mr. LONG. Mr. President, I ask unanimous consent that I might explain to the Senator, subject to his right to reserve.

Mr. HEINZ. I do not object.

The PRESIDING OFFICER. Without objection, the further reading of the amendment is dispensed with.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Sugar Stabilization Act of 1978".

DECLARATION OF POLICY

SEC. 2. It is hereby declared to be the policy of Congress—

(1) to maintain a viable domestic sugar producing industry capable of continuing to provide the larger part of the sugar consumed in the United States;

(2) to protect the welfare of consumers and producers by providing such supplies of sugar as will be consumed at fair prices in the United States and in the world market;

(3) to achieve these prices and supply objectives through cooperation with sugar producing and consuming countries under the export quota system of the International Sugar Agreement and the operation of a complementary import management program for the United States market; and

(4) to promote the export trade of the United States with sugar producing countries of the world.

DEFINITIONS

SEC. 3. For the purposes of this Act—

(1) The term "person" means an individual, partnership, corporation, association, or other legal entity.

(2) The term "sugars" means any grade or type of saccharine product derived from sugar cane or sugar beets and containing sucrose, dextrose, or levulose.

(3) The term "sugar" means raw sugar or direct-consumption sugar.

(4) The term "raw sugar" means any sugars, whether or not principally of crystalline structure, which are to be further refined or improved in quality to produce any sugars principally of crystalline structure or liquid sugar.

(5) The term "direct-consumption sugar" means any sugars principally of crystalline structure and any liquid sugar which are not to be further refined or improved in quality.

(6) The term "liquid sugar" means any sugars (exclusive of syrup of cane juice produced from sugar cane grown in the United States) which are principally not of crystalline structure and which contain, or which are to be used for the production of any sugars principally not of crystalline structure which contain, soluble nonsugar solids (excluding any foreign substances that may have been added or developed in the product) equal to 6 percent or less of the total soluble solids.

(7) Sugars in dry amorphous form shall be considered to be principally of crystalline structure.

(8) The term "raw value" of any quantity of sugars means its equivalent in terms of ordinary commercial raw sugar testing 96 sugar degrees by the polariscope, determined in accordance with regulations issued by the Secretary. The principal grades and types of sugar and liquid sugar shall be translated into terms of raw value in the following manner:

(A) for direct-consumption sugar, derived from sugar beets and testing 92 or more sugar degrees by the polariscope, by multiplying the number of pounds thereof by 1.07;

(B) for sugar, derived from sugar cane and testing 92 sugar degrees by the polariscope, by multiplying the number of pounds thereof by 0.93;

(C) for sugar, derived from sugar cane and testing more than 92 sugar degrees by the polariscope, by multiplying the number of pounds thereof by the figure obtained by adding to 0.93 the result of multiplying 0.0175 by the number of degrees and fractions of a degree of polarization above 92 degrees;

(D) for sugar and liquid sugar, testing less than ninety-two sugar degrees by the polariscope, by dividing the number of pounds of the total sugar content thereof by 0.972; and

(E) the Secretary may establish rates for translating sugar and liquid sugar into terms of raw value for—

(i) any grade or type of sugar or liquid sugar not provided in the foregoing, and

(ii) any special grade or type of sugar or liquid sugar for which he determines that the raw value cannot be measured adequately under the provisions of subparagraphs (A) through (D).

(9) The term "quantitative restriction" means the total amount of sugar or liquid sugar, or that quantity of sugar-containing products, which may be entered from all foreign countries in the aggregate during any applicable period.

(10) The term "to enter" means to enter, or withdraw from warehouse, for consumption in the United States; the term "entered" means entered, or withdrawn from warehouse, for consumption in the United States; and the term "entry" means the entry, or withdrawal from warehouse, for consumption in the United States.

(11) The term "International Sugar Agreement" or "Agreement" means the International Sugar Agreement, 1977, signed at New York on December 9, 1977, and to which the Senate has given its advice and consent.

(12) The term "Secretary" means the Secretary of Agriculture.

(13) The term "sugar supply year" means the 12-month period beginning October 1 of any year and ending on September 30 of the following year, designated by the calendar year in which it commences.

(14) The term "United States", when used in a geographical context, means the several States, the District of Columbia, and the Commonwealth of Puerto Rico.

(15) The term "price range for free trade sugar" means the range between the price at which all export quota restrictions must be suspended and the price at which special stocks of sugar must first be made available for sale and delivery to the free market, in accordance with the provisions of article 44 of the International Sugar Agreement.

(16) The term "daily price for imported raw sugar" means the average of the daily prices for sugar in pounds, raw value, in bulk, landed and delivered at New York, including the cost of insurance, freight, loading, unloading, and applicable import duties and fees.

(17) The term "total sugar content" means the sum of the sucrose and the reducing or invert sugars in any grade or type of sugar or liquid sugar.

(18) The term "semiannual period" means the period beginning on October 1 and ending March 31 of any sugar supply year or on April 1 and ending on September 30 of any sugar supply year, as appropriate.

TITLE I—INTERNATIONAL SUGAR AGREEMENT

IMPLEMENTATION

SEC. 101. In order to carry out and enforce the International Sugar Agreement, the President may—

(1) limit the entry of any sugar from any country, territory, or area which is not a member of the International Sugar Organization;

(2) prohibit the entry of any quantity of sugar which is not accompanied by a valid certificate of contribution to the stock financing fund and other documentation as may be required under the Agreement;

(3) require the keeping of such records, statistics, and other information, and the

submission of such reports, relating to the entry, distribution, prices, and consumption of sugar and alternative sweeteners as he may from time to time prescribe;

(4) take such other action and issue such rules as he may consider necessary or appropriate to implement the rights and obligations of the United States under the Agreement; and

(5) delegate his authority under this title to such officer or officers of the United States as he may designate.

PENALTY

SEC. 102. (a) No person may—

(1) fail to make any report or keep any record required under section 101,

(2) make a false report or record required under such section, or

(3) knowingly violate any rule issued under such section.

(b) Violation of the provisions of subsection (a) shall be punishable by a fine of not more than $1,000 for each such violation.

REPORT

SEC. 103. The President shall submit to the Congress an annual report on the operation of the International Sugar Agreement. Such report shall contain full information on the operation of the Agreement, including full information with respect to the general level of prices of sugar and the relationship of the Agreement to any domestic program of the United States for sugar. The report shall also include a summary of the actions the United States and the International Sugar Organization have taken to protect the interests of United States consumers and producers.

EFFECTIVE DATE

SEC. 104. The provisions of this title shall take effect on the date the Agreement enters into effect for the United States.

TITLE II—DOMESTIC SUGAR PROGRAM

DOMESTIC MARKET PRICE OBJECTIVE

SEC. 201. (a) The market price objective for raw sugar during sugar supply year 1978 shall be equal to one cent less than the median of the price range for free trade sugar under the International Sugar Agreement. During the semiannual period beginning October 1, 1979, and each semiannual period thereafter, the market price objective in effect for such period (hereafter referred to as the "current period") shall be equal to the market price objective in effect during the immediately preceding semiannual period increased or decreased to maintain the same ratio between the market price objective for the current period and the simple average of—

(1) the parity price index (1967=100), and

(2) the wholesale price index (1967=100)

for the 3 calendar months immediately preceding the current period as the ratio that existed between—

(A) the market price objective for the sugar supply year 1978, and

(B) the simple average of such indices for the 12 calendar months immediately preceding July, 1978.

The market price objective, adjusted as necessary under the preceding sentence, shall be announced within 30 days after the beginning of each semiannual period.

(b) For purposes of subsection (a)—

(1) the term "parity index (1967=100)" means the Index of Prices Paid by Farmers for Commodities and Services, Including Interest, Taxes, and Farm Wages Rates, as published by the Department of Agriculture.

(2) The term "wholesale price index" means the wholesale price index for all commodities as determined monthly by the Department of Labor.

IMPORT FEE

SEC. 202. (a) If the Secretary determines that the simple average of the daily price for imported raw sugar during a semiannual period of any sugar supply year will be less than the market price objective in effect for such period under section 201, then the Secretary shall impose on each pound of sugar entered during such period a fee in an amount determined under this section. The Secretary shall announce his determination under the preceding sentence at the same time he announces his determination with respect to the market price objective under section 201. Notwithstanding the preceding sentence, the Secretary shall impose such fee for sugar supply year 1978 within 30 market days after the date of enactment of this Act.

(b) The amount of the fee imposed under subsection (a) during any semiannual period of a sugar supply year shall be equal to the amount (not in excess of 20 cents per pound) which the Secretary determines will, when added to the simple average of the daily price for imported raw sugar during such period, achieves the market price objective in effect for such period under section 201. The amount determined under the preceding sentence for the second semiannual period of any sugar supply year shall be—

(1) increased by the amount by which the simple average of the daily price for imported raw sugar plus import fee over the preceding semiannual period is less than the market price objective in effect for such period, or

(2) decreased by the amount by which such simple average plus import fee exceeds such objective.

(c) The fee imposed under subsection (a) shall be imposed on a per pound, raw value, basis. Such fee shall be considered to be a duty imposed under the Tariff Act of 1930 except for purposes of title V of the Trade Act of 1974.

QUANTITATIVE RESTRICTION ON IMPORTED SUGAR

SEC. 203. (a) If, at any time during a semiannual period of a sugar supply year, the Secretary determines that the market price objective in effect under section 201 will not be achieved by the import fee imposed under section 202 during that period, then the Secretary shall impose a quantitative restriction on the total amount of sugar which, may be entered during such period. The amount of sugar permitted entry under the quantitative restriction imposes under the preceding sentence shall be the amount the Secretary determines is necessary to achieve, in conjunction with the import fees imposed under section 202 during such period, the market price objective in effect during such period. For purposes of this subsection, if the Secretary makes his determination during the second semiannual period of a sugar supply year, then the amount of sugar permitted entry during such period shall be the amount the Secretary determines is necessary to achieve, in conjunction with such fees, the simple average of the market price objectives in effect for that period and the preceding semiannual period.

(b) If a quantitative restriction is in effect under this section, the Secretary shall review, from time to time, the effect of such restriction and make such adjustments in the restriction as may be required to achieve the revelant market price objective.

(c) A quantitative restriction imposed under subsection (a) shall be administered as a global quantitative restriction imposed in terms of raw values.

PROHIBITION OF IMPORTATION OF DIRECT-CONSUMPTION SUGAR

SEC. 204. (a) Except as provided in subsection (c), no direct-consumption sugar may be entered into the United States.

(b) Notwithstanding any other provision of this Act, if the Secretary determines that a lack of raw sugar refining capacity within the United States has created an imminent shortage of direct-consumption sugar for consumers in the United States, then he may impose a quantitative restriction permitting the entry of such quantity of direct-consumption sugar as is necessary to meet such imminent shortage. Determinations made under this section shall be made in accordance with section 553 of title 5, United States Code.

(c) The limitation imposed under subsection (a) may not be suspended under section 307 unless the President finds and proclaims that a national economic or other emergency exists with respect to sugar or liquid sugar which requires such a suspension.

ADJUSTMENTS TO QUANTITATIVE RESTRICTIONS AND FEES

SEC. 205. If the Secretary determines that the simple average of the daily price for imported raw sugar over any 20 consecutive market day period exceeds by more than 20 percent the market price objective in effect under section 201, then he shall suspend any quantitative restriction in effect under section 203 and any import fee in effect under section 202, or make such adjustments to such restriction or fee, or both, as may be required to achieve the market price objective. If the Secretary determines that the simple average of the daily price of raw sugar imports for 20 consecutive market days is less than the market price objective in effect under section 201, then he shall reimpose such quantitative restriction, import fee, or both, or such portion thereof, as may be required to achieve such price objective.

SUGAR-CONTAINING PRODUCTS

SEC. 206. (a) If the Secretary determines that the prospective entry of any sugar-containing product or mixture or of beet sugar molasses will substantially interfere with the attainment of the objectives of this Act, he may limit the quantity of such product, mixture, or molasses to be entered from any country or area to a quantity which he determines will not so interfere. Notwithstanding the preceding sentence, the quantity to be entered from any country or area during any sugar supply year may not be reduced below the average of the quantities of such product, mixture, or molasses entered each calendar year during such 3 consecutive year period as he may select for which reliable data on the entry of such product, mixture, or molasses are available.

(b) If the Secretary determines that the prospective entry of any sugar-containing product or mixture or beet sugar molasses will substantially interfere with the attainment of the objectives of this Act and there are no reliable data available on the entry of such product, mixture, or molasses for 3 consecutive years, then he may impose a quantitative restriction on the entry of such product, mixture, or molasses during a sugar supply year from any country or area in an amount equal to a quantity which the Secretary determines will not substantially interfere with the attainment of the objectives of the Act. In the case of a sugar-containing product or mixture, such quantity from any one country or area may not be less than a quantity containing 100 short tons, raw value, of sugar or liquid sugar.

(c) In determining whether the prospective entry of a quantity of a sugar-containing product or mixture will or will not substantially interfere with the attainment of the objectives of this Act, the Secretary shall take into consideration the total sugar content of the product or mixture in relation to other ingredients or to the sugar content of other products or mixtures used for similar purposes, the costs of the mixture in relation to the costs of its ingredients for use in the United States, the present or prospective volume of imports relative to past imports, the type of packaging, whether

it will be marketed to the ultimate consumer in the identical form in which it is imported, the extent to which it is to be further subjected to processing or mixing with similar or other ingredients, and other pertinent information which will assist him in making such determination. Determinations made under this section shall be made in accordance with section 553 of title 5, United States Code.

(d) Notwithstanding subsections (a), (b), and (c), the total quantity of sweetened chocolate, candy, and confectionery (provided for in items 156.30 and 157.10 of part 10, schedule 1, of the Tariff Schedules of the United States) which may be entered shall be subject to a quantitative restriction in an amount determined under this subsection. The quantity of such articles which may be entered during any calendar year shall be determined by the Secretary in the fourth quarter of the preceding calendar year. Such quantity shall be equivalent to the larger of—

(1) the average annual quantity of such articles entered during the 3 calendar years immediately preceding the year in which such quantity is determined, or—

(2) a quantity equal to 5 percent of the amount of sweetened chocolate, candy, and confectionery of the same description of United States manufacture sold in the United States during the most recent calendar year for which data are available.

Notwithstanding paragarph (9) of section 3, the total quantity to be entered under this subsection may be allocated to countries on such basis as the Secretary determines to be fair and reasonable, taking into consideration the quantity of sweetened chocolate, candy, and confectionery imported into the United States from such countries in past years. For purposes of this subsection, the Secretary shall use statistical data of the United States Department of Commerce as to the quantity of sweetened chocolate, candy, and confectionery of United States manufacture sold in the United States.

PROHIBITED ACTS

SEC. 207. No person may—

(a) enter into the Virgin Islands for consumption therein any sugar or liquid sugar produced from sugar cane or sugar beets grown outside the United States in excess of 100 pounds during any calendar year; or

(b) export to any foreign country any sugar or liquid sugar produced from sugar beets or sugar cane grown in the United States or entered, except as provided in section 208.

EXPORTATION OF SUGAR

SEC. 208. (a) Sugar entered under a bond, established under rules promulgated by the Secretary, for the purpose of subsequently exporting an equivalent quantity of sugar as such, or in manufactured articles, shall not be considered to be sugar entering the United States for purposes of section 203.

(b) Sugar exported under the provisions of sections 309 and 313 of the Tariff Act of 1930 (19 U.S.C. 1309 and 1313) shall be considered to be sugar entered under subsection (a).

EXCEPTIONS

SEC. 209. The provisions of this title shall not apply to—

(1) the first 10 short tons, raw value, of direct consumption sugar or liquid sugar entered from any foreign country in any sugar supply year;

(2) the first 10 short tons, raw value, of liquid sugar entered from any foreign country in any sugar supply year for religious, sacramental, educational, or experimental purposes;

(3) liquid sugar entered from foreign countries in individual sealed containers of such capacity as the Secretary may determine, not in excess of four liters each;

(4) any sugar or liquid sugar entered for the production (by distillation or other means) of alcohol or for livestock feed or the production of livestock feed, not including any such alcohol or resulting byproducts for human food consumption; or

(5) any sugar or liquid sugar entered for the production of polyhydric alcohols, except polyhydric alcohols for use as a substitute for sugar as a sweetener in human food consumption.

TITLE III—GENERAL PROVISIONS

FARM LABOR PROVISIONS

SEC. 301. (a) Beginning with sugar supply year 1978, every producer of sugar beets and sugarcane for sugar shall pay to each person employed on the farm in the production, cultivation, and harvesting of sugar beets and sugarcane wages as follows:

(1) When employed on a time basis, the rates per hour shall be not less than the following:

Sugar supply year:	*All areas except Hawaii and Puerto Rico* [1]
1978	$3.00
1979	3.20
1980	3.40
1981	3.60
1982	3.80

[1] Hawaii and Puerto Rico: As required by labor union agreement or Federal or local law.

Rates for field equipment operators shall be not less than 10 percent more than the above rates.

(2) When employed on a piecework basis, the rates shall be not less than the rates for the 1978 crop as published in the Federal Register of January 10, 1978 (42 F.R. 1476), increased for each sugar supply year beginning with sugar supply year 1979, in the same proportion as the hourly rates are increased in the above table.

(b) Any producer who fails to pay the wages provided for in subsection (a) of this section shall be liable to the employee or employees affected in the amount of their unpaid wages and in an additional equal amount as liquidated damages. An action to recover such liability may be maintained against any producer in any Federal or State court of competent jurisdiction by any one or more employees for and in behalf of himself or themselves and other employees similarly situated. No employee shall be a party plaintiff to any such action unless he gives his consent in writing to become such a party and such consent is filed in the court in which such action is brought. The court in such action shall, in addition to any judgment awarded to any plaintiff, allow a reasonable attorney's fee to be paid by the defendant, and costs of such action. The right provided by this subsection to bring an action by or on behalf of any employee, and the right of any employee to become a party plaintiff to any such action, shall terminate upon the filing of a complaint by the Secretary in an action under section 303 in which restraint is sought of any further delay in the payment of unpaid wages owing to such employee under subsection (a) of this section by a producer liable therefor under the provisions of this subsection.

(c)(1) The Secretary is authorized to supervise the payment of the unpaid wages owing to any employee or employees under this section, and the agreement of any employee to accept such payment shall upon payment in full constitute a waiver by such employee of any right he may have under subsection (b) of this section to such unpaid wages and an additional amount as liquidated damages. Any hearing on a claim for unpaid wages shall be conducted by an attorney designated by the General Counsel of the Department of Agriculture from among the attorneys employed in the Office of the General Counsel of that Department, and the decision of such attorney shall be issued promptly thereafter, to the extent possible within 30 days after the conclusion of the hearing. Within 30 days after the issuance of such decision, any person who is adversely affected by such decision may obtain a review of such decision by filing a petition with the judicial officer appointed by the Secretary pursuant to section 450d of title 5, United States Code. Any person who is adversely affected by a decision of the judicial officer hereunder may obtain judicial review of such decision by filing a complaint, within 30 days after such decision, with the United States district court for the district in which such person resides. Upon the filing of the complaint, the court shall have jurisdiction to affirm, set aside, or modify the decision of the judicial officer, and the findings of the judicial officer as to the facts, if supported by substantial evidence, shall be final and conclusive.

(2) The Secretary may bring an action in any court of competent jurisdiction to recover the amount of the unpaid wages and an equal amount as liquidated damages. The right provided by subsection (b) to bring an action by or on behalf of any employee and of any employee to become a party plaintiff to any such action shall terminate upon the filing of a complaint by the Secretary in an action under this subsection in which a recovery is sought of unpaid wages under subsection (a) or liquidated damages provided by this subsection owing to such employee by a producer under the provisions of subsection (b), unless such action is dismissed without prejudice on motion of the Secretary. Any sums thus recovered by the Secretary on behalf of an employee pursuant to this subsection shall be held in a speical deposit account and shall be paid, on order of the Secretary, to the employee or employees affected. Any such sums not paid to an employee because of inability to do so within a period of 3 years shall be covered into the Treasury of the United States as miscellaneous receipts.

(d) Actions for unpaid wages and liquidated damages under this section shall be forever barred unless commenced within 2 years after the cause of action accrued.

(e) All producers of sugar beets and sugarcane are hereby prohibited from discharging or in any other manner discriminating against any employee engaged in the production, cultivation, and harvesting of sugar beets or sugarcane on the farm because such employee has made a charge, testified, assisted, or participated in any manner in an investigation, proceeding, or litigation under this section. Any person knowingly violating this subsection shall, upon conviction, be punished by a fine of not more than $1,000 for each such violation.

(f) All producers of sugar beets and sugarcane are hereby prohibited from charging, or permitting to be charged, directly or indirectly, persons employed on the farm in the production, cultivation, or harvesting of sugar beets and sugarcane, any amount in excess of the reasonable cost for the furnishing to any such person of goods or services customarily furnished to employees engaged in the production, cultivation, or harvesting of sugar beets or sugarcane in the area. Any person knowingly violating this subsection shall, upon conviction, be punished by a fine of not more than $1,000 for each such violation.

(g) The Secretary shall issue such regulations as he deems necessary to assure that the producer shall furnish each person employed on the farm in the production cultivation, and harvesting of sugar beets and sugarcane workmen's compensation insurance during the time so employed. Such insurance coverage shall be deemed adequate if it meets the requirements of the law in States in

which such insurance is mandatory, or if it meets such standards as are established by law in States in which such insurance is not mandatory.

(h) Investigations of possible violations of provisions of this section shall be conducted by the Office of the Inspector General of the Department of Agriculture.

REGULATIONS AND DETERMINATIONS

SEC. 302. (a) The Secretary may make such rules as may be necessary to carry out the provisions of this Act. Knowing violation of any rule issued by the Secretary under this section is punishable by a fine or not more than $1,000 for each violation.

(b) Each determination by the Secretary under sections 201, 202, and 203 shall be promptly published in the Federal Register accompanied by a statement of the bases and considerations upon which such determination was made.

JURISDICTION OF COURTS

SEC. 303. The district courts of the United States shall have jurisdiction over any action to restrain any person from violating the provisions of this Act or of any order or rule made or issued pursuant to this Act and jurisdiction to review any rule issued or determination made under this Act in accordance with chapter 7 of title 5, United States Code. Upon the request of the Attorney General, each United States attorney shall institute proceedings to enforce this Act. The penalties provided for in this Act shall be in addition to, and not exclusive of, any other remedies or penalties under law or in equity.

CIVIL PENALTY

SEC. 304. No person may knowingly bring, attempt to bring, or aid the bringing of, sugar, liquid sugar, or sugar-containing products into the United States without the payment of any import fee imposed under section 202 or in excess of any quantitative restriction imposed under section 203. Violation of the preceding sentence is punishable by a monetary penalty in an amount equal to 3 times the market value, at the time of the commission of such violation, of that quantity of sugar, liquid sugar, or sugar-containing product on which no import fee is paid or by which any quantitative restriction is exceeded. Such penalty shall be recoverable in a civil action brought by the United States.

FURNISHING INFORMATION TO SECRETARY

SEC. 305. All persons engaged in the manufacturing, marketing, transportation, or industrial use of sugar and alternative sweeteners and having information which the Secretary deems necessary to enable him to administer the provisions of this Act, shall, upon the request of the Secretary, furnish him with such information. No person may willfully fail or refuse to furnish such information or willfully furnish false information to the Secretary. Violation of the preceding sentence is punishable by a fine of not more than $2,000 for each such violation. All information required to be furnished to the Secretary under this section shall be kept confidential by all officers and employees of the Department of Agriculture.

INVESTMENT BY OFFICIALS PROHIBITED

SEC. 306. No person acting in any official capacity in the administration of this Act may invest or speculate in sugar or liquid sugar, contracts relating thereto, or the stock or membership interests of any association or corporation engaged in the production or manufacturing of sugar or liquid sugar. Violation of this section shall be punishable by a fine of not more than $10,000, imprisonment for not more than 2 years, or both.

SUSPENSION

SEC. 307. If the President finds and proclaims that a national economic or other emergency exists with respect to sugar or liquid sugar, he shall by proclamation suspend the operation of the provisions of title II until such time as he finds and proclaims that the facts which occasioned such suspension no longer exist. The Secretary shall make such investigations and reports to the President as may be necessary to aid him in carrying out the provisions of this section.

SURVEYS AND INVESTIGATIONS

SEC. 308. (a) If the Secretary determines such action is necessary to effectuate the purposes of this Act, he may from time to time conduct such surveys and investigations as he deems necessary regarding the manufacturing, marketing, transportation, or industrial use of sugars and alternative sweeteners. In carrying out the provisions of this subsection, information shall not be made public with respect to the separate operations of any person or company from whom such information has been derived.

(b) The Secretary may conduct surveys, investigations, and research relating to the conditions and factors affecting the methods of accomplishing most efficiently the purposes of this Act. Notwithstanding any other provision of law, the Secretary may make public information he collects under this subsection as he deems necessary to carry out this Act.

(c) The Secretary shall, whenever the New York Coffee and Sugar Exchange is prevented for any reason from quoting daily spot prices for raw sugar, determine and announce the average daily price for imported raw sugar.

TERMINATION

SEC. 309. The provisions of titles I, II, and III of this Act shall terminate at the close September 30, 1983.

TITLE IV—COUNTERVAILING DUTY WAIVER EXTENSION

SEC. 401. Subsection (d) of section 303 of the Traffic Act of 1930 (19 U.S.C. 1303) is amended by adding at the end thereof the following new paragraph:

"(4)(A) The 4-year period specified in paragraph (2) shall be extended until the date provided in subparagraph (B) if, upon the recommendation of the Special Representative for Trade Negotiations, the President determines, and notifies both Houses of Congress of his determination, on or before January 2, 1979, that—

"(i) negotiations on an agreement or agreements establishing internationally agreed rules and procedures governing the use of agricultural and industrial subsidies have been concluded,

"(ii) the Multilateral Trade Negotiations as a whole, and agreements providing for the reduction or elimination of barriers to, or other distortions of, international trade, in particular, have been substantially concluded,

"(iii) failure to extend such 4-year period would be likely to jeopardize seriously the successful conclusion of such agreements, including the agreement or agreements on subsidies, and

"(iv) the agreement or agreements on subsidies establish—

"(I) new substantive rules on the use of internal and export subsidies which adequately protect United States agricultural and industrial trading interests insofar as they are adversely affected by such subsidies, and

"(II) more effective provisions on notification, consultation, and dispute settlement providing for timely resolution of disputes involving the use of subsidies in international trade.

"(B) The date to which the 4-year period shall be extended under subparagraph (A) is the earliest of the following:

"(i) the date on which either House of Congress defeats on a vote of final passage, in accordance with the provisions of section 151 of the Trade Act of 1974, implementing legislation with respect to a multilateral agreement or agreements governing the use of subsidies,

"(ii) the date of enactment of such implementing legislation, or

"(iii) September 1, 1979.

"(C) If the 4-year period specified in paragraph (2) is extended under subparagraph (A), any determination made under this subsection by the Secretary of the Treasury which is in effect on January 2, 1979, shall remain in effect until the earliest of the following:

"(i) the date to which the 4-year period is extended under subparagraph (A), notwithstanding any provision to the contrary in any such determination,

"(ii) the date such determination is revoked under paragraph (3), or

"(iii) the date if adoption of a resolution of disapproval of such determination under subsection (e)(2).".

The PRESIDING OFFICER. The Senator from Louisiana,

Mr. ABOUREZK addressed the Chair.

Mr. LONG. Mr. President, let me explain again what this amendment is. This is the Sugar Stabilization Act as reported by the committee with one change. Rather than insisting on a price of 17 cents, this amendment sets a price target of 16 cents. The reason for that change is that all of the discussion with members of the committee resulted in the prevailing view that we will not be able to prevail with the 17-cent price. It could not possibly become law because of the strong feelings of the President against a price that high. To be practical about the matter and to be realistic we will have to accept the lower price, even though we think the price should be 17 cents.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. Will the Senator suspend so we might have order?

Mr. LONG. Mr. President, I would like to broaden the parliamentary rights of Senators like the Senator from Pennsylvania so that they could offer amendments in both the first and second degree to the committee amendment. In order to do that, Mr. President, and in fairness, I think we should accept a unanimous-consent request that they may offer amendments in the first and second degree to an amendment I have offered here.

I discussed this and explained what I had in mind to the Senator from South Dakota (Mr. ABOUREZK), and he says he is not going to object.

I am going to ask again, because in all fairness it ought to be that way, because if consent is not given then one can offer an admendment to the House bill, he can offer an amendment to the committee substitute, but he is not in position to offer an amendment to the amendment, the substitute I have sent to the desk. That being the case, when the Senate votes on the substitute, which would no longer be subject to amendment, it wipes out any amendment to the committee substitute, and then when it votes on adding that to the bill it then wipes out all other amendments. That, frankly, would not be fair to other Senators.

The only reason why I would do it that way would be that I was left no choice. So, knowing of no one who wants to deny any Senator that opportunity and that flexibility, I now ask unanimous consent that the amendment which I have sent to the desk be regarded as original text—in other words, that the committee amendment be agreed to, and that the amendment to the committee amendment be agreed to, and that the amendment before us now be regarded as original text for the purpose of further amendment.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from South Dakota.

Mr. ABOUREZK. Mr. President, I ask to be recognized.

Mr. GOLDWATER. Mr. President, I have a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from South Dakota has the floor.

Mr. ABOUREZK. I am happy to yield to the Senator from Arizona.

Mr. GOLDWATER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. GOLDWATER. For example, can an amendment be offered to cover a hospital bill that has already been discussed?

The PRESIDING OFFICER. Will the Senator repeat his inquiry?

Mr. GOLDWATER. Could an amendment on health or hospitals be offered to this bill?

The PRESIDING OFFICER. The answer is yes. There is no requirement of germaneness at this point.

The Senator from South Dakota.

Mr. ABOUREZK. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. ABOUREZK. Is this request propounded by the Senator from Louisiana in the same form as the previous one he made? In other words, that we can amend it in two further degrees?

The PRESIDING OFFICER. The Senator is correct.

Mr. ABOUREZK. Second, I want to state that the reason why I objected before, as I have indicated to Senator LONG, is that I had no idea what was in the amendment he was offering. We had no printed copy to look at.

I have nothing against this legislation, nor do I think the other Senators who were objecting did. But at this late hour in the session, it would be helpful to all of us to know what is being called up, so that something we might be opposed to does not get slipped in.

So I would appreciate very much if the distinguished Senator from Louisiana might tell us what is in the amendment.

The PRESIDING OFFICER. Is there objection to the request?

Mr. DANFORTH. Reserving the right to object, what was the request?

The PRESIDING OFFICER. That this amendment be considered as original text of the bill so it can be amended in two degrees.

Mr. DANFORTH. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. DANFORTH. It is my understanding that the committee text, the Senate Finance Committee version of H.R. 7200 has been stricken in its entirety. Is that correct?

The PRESIDING OFFICER. If this motion is agreed to, the Senator is correct.

Mr. METZENBAUM. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. METZENBAUM. What is the motion?

The PRESIDING OFFICER. I have said "without objection" twice, but the question now——

Mr. METZENBAUM. Reserving the right to object, then.

The PRESIDING OFFICER. Does the Senator want to listen?

Mr. METZENBAUM. I am listening.

The PRESIDING OFFICER. The statement of the Chair has been that the unanimous-consent agreement makes it original text, and allows you to amend it in two degress, and there is no question of germaneness.

Mr. HEINZ. Mr. President——

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HEINZ and Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania.

Mr. HEINZ. I thank the Chair.

Mr. President, as I stated a moment ago, I am deeply concerned about the part of this bill which would grant to the President an authority he does not now have. That is the section of the bill that would extend the President's authority to waive a countervailing duty after January 1, 1979.

Mr. President, I do not believe, since there are many Senators here who want to talk about the Sugar Act, that it should be a part of this bill. I think the issue of whether or not the President should have any extension of his authority to waive countervailing duties should be decided at some other time, in some other way. I hope that the chairman of the Finance Committee would accept an amendment simply to strike that title from the bill, because otherwise I, for one, would be very reluctant to let this bill pass. I would do everything, I think, I possibly could and know how to do, to prevent its passage if the provision in the bill extending the President's countervailing duty waiver authority is included in it.

I do not wish to hold up the debate on the Sugar Act. There are many, many Senators who have amendments, who have ideas about the Sugar Act, and I think those ideas should be debated on their merits. I know how important it is to the Senators from Louisiana and how important it is to many Senators from agricultural States that this legislation involving the Sugar Act be taken up.

But it is equally important to my State and to a number of other States that the laws of this country against unfair trading practices be enforced. We have had a situation in industry after industry where the President of the United States has said, "I am going to enforce the Antidumping Act of 1921," or "I am going to enforce the countervailing duties section of the Tariff Act of 1930," but in fact, in all the cases that have come before the President—and there have been many—the President has in almost every instance waived the imposition of countervailing duties.

What are countervailing duties? Countervailing duties are those duties imposed when it has been determined that a foreign government is subsidizing a product exported from the foreign country and imported into the United States. It is one of the most fundamental laws against unfair trade. It has been on the books for quite some time.

It was the intent of Congress when we adopted the Trade Act of 1974 that the President's waiver authority not be extended past January 3 of next year. There is no justification for further extension of that authority, and I would hope, in order that we might proceed with discussion on the Sugar Act, that the chairman of the Finance Committee could agree simply to drop that provision.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. HEINZ. I yield without losing my right to the floor.

The PRESIDING OFFICER (Mr. HUDDLESTON). Without objection, it is so ordered. The Senator from Maine.

Mr. MUSKIE. Mr. President, I share the Senator's concern over the provisions that have been added to this bill. They have been added to the bill as a sweetener, I take it, to avoid a possible Presidential veto of the sugar bill. It is strange that a sugar bill should need additional sweeteners, but that, as I understand, is the purpose.

The President would like an extension of his waiver authority over countervailing duties, but it seems to me that is an issue that ought to be handled separately from the sugar bill. And there is legislation that has been introduced. The administration has asked that it be added to this bill, and we ought to have an opportunity to fully understand the implications of an extension of the waiver of the President's authority over countervailing duties.

For example, I understand there are eight countervailing duty cases pending with respect to the textile industry which are being considered on their merits. They are expected to be decided in November.

If this waiver provision were not in the law, and if these cases are decided favorably to the complainants in November, the waivers would terminate in January 1979, under the present law. But if the extension sought by this bill were written into law, the relief could not be granted until September 1, 1979.

With implications of that kind, it seems to me that this proposed waiver extension ought to be given considerable hearings and we ought to understand the implications for American industry.

Countervailing duties are applied when an American industry, as I understand it, has been injured by government subsidized foreign imports. That is unfair competition by any standard in my judg-

ment. Subsidies are applied by foreign governments in the interest of stimulating trade in their products. It seems to me that the countervailing duty is a protection which was written into law to protect American industry against that kind of unfair competition. We ought not to extend authority to waive that kind of protection casually and as a rider to a bill of this kind simply as a sweetener to make it more difficult for the President to veto the bill.

I share the Senator's concern about that provision and I wanted to state it at this point in the Senator's discussion of the issue. I ask the Senator whether or not his understanding of the issue is the same as mine.

Mr. HEINZ. I thank the Senator for his statement.

Yes, my understanding and what the Senator says are exactly the same. The Senator is entirely correct. The Senator correctly identifies the purpose of countervailing duties as being Government subsidies of exports into this country as imports. The fact is they injure American workers and industries. They make it impossible for our industries to modernize. It puts workers on unemployment because they lose their jobs. I know that in virtually every State we have had injury upon injury because of subsidized foreign imports into this country. I commend the Senator from Maine on his statement. I could not agree with him more.

This is not the time to bring up such a complex issue in the closing days of the Senate. This is why I insisted on making sure that Senators had the opportunity to see the report. I think if they even saw the report on this they would understand this is a complex issue, not one which can be dealt with at the same time as the Sugar Act, which in itself is very complex. It is not this Senator's desire to hold up discussion on the Sugar Act. I hope we will find a way to dispose of title IV of H.R. 7108, which is really the text we are dealing with.

Mr. DOLE. Will the Senator yield?

Mr. HEINZ. I yield without losing my right to the floor or a second speech rule being applied.

Mr. DOLE. I agree with the Senator from Maine. There is no doubt about it, that it was added to this bill as a sweetener or to give a little more leverage. There was a great deal of pressure from the administration for the extension of countervailing duty waiver authority, probably more interest in that than in the sugar bill itself.

It seemed to some of us from the sugar beet and cane producing areas a pretty good vehicle for the waiver authority if there was going to be one, that it would be in the sugar legislation.

I see my distinguished colleague, who is the chairman of the Subcommittee on International Trade, who probably can discuss it in greater length, standing up now.

But that was the purpose. I do not think there was any secret about it. It has clearly been identified by the Senator from Maine.

Some of us who supported that have the same reservations because we have the same problem in rural areas that we are having in industrial areas in Pittsburgh, in the steel industry. We have the same problems with reference to some agricultural commodities.

Finally, I would hope we would be able to resolve it because the legislation is important by itself. Both the sugar legislation and the waiver authority legislation are important. I would hope, as one who has great interest in both pieces of legislation, that we might be able to separate the two to deal with the sugar legislation and may be at some appropriate time deal with the waiver authority.

Mr. RIBICOFF. Will the Senator yield?

Mr. HEINZ. I am happy to yield without losing my right to the floor.

Mr. RIBICOFF. I was the sponsor of the countervailing duty extension proposal. It was not my intention to place it on the sugar bill. I do not think it belongs on the sugar bill. It should stand on its own merits. This is a very complex issue, not simplistic, affecting the interests of all trade and the complete success or failure of the GATT negotiation, which is supposed to conclude by December 15.

Personally, I have no objection to have the countervailing proposals go off the Sugar Act. As a matter of fact, it was placed on the Sugar Act so that the Sugar Act would hold it hostage.

I think, personally that the matter is of sufficient importance that this Chamber should debate and discuss whether it is in the best interests of our Nation to extend the countervailing duty provisions.

I wonder whether the Senator from Pennsylvania would have any objection to placing the countervailing duty provision on some other bill, some minor bill, some title, and I am sure the chairman of the Finance Committee can find one, under a time agreement where the Senate can debate it sufficiently and then make up its mind whether the extension of countervailing duty is good or bad for this Nation. Then it will not be tied to the sugar bill. The sugar bill can stand on its own and the countervailing duty provision can stand on its own.

I personally think that is the proper solution. That is the solution we should have had in the first place.

If we are going to have a move here not to even bring it up, then, of course, I do not have the slightest idea what the intentions of the chairman of the Finance Committee would be.

Mr. HEINZ. Let me say to my friend from Connecticut, I do not think it would be wise, and I do not think I could agree, to bring this up under a time agreement.

The fact is that I am totally opposed to title IV. I cannot accept it. I am not going to agree to a time agreement on it.

Further, it is an issue that we do not need to resolve.

The Senator from Connecticut, I know, knows that the administration will have completed negotiations on the multilateral trade negotiations by December 15. This is what he has been told; this is what I have been told. I have no reason to disbelieve that.

Second, the fact is that the expiration of present authority to waive countervailing duties has been anticipated now for 4 years. What justification can there be for extending the waiver authority for another 8 months on top of that when we know that the negotiations are going to be completed? This Senator sees no justification for it.

Mr. RIBICOFF. Will the Senator yield at that point?

Mr. HEINZ. I will be happy to yield without losing my right to the floor.

Mr. RIBICOFF. The justification is this: while an agreement will be concluded by December 15, it is estimated it will take the following timetable before the agreement can go into effect, because the agreement is not self-executing. When the agreement goes into effect the President has to send the Trade Act to the Congress. Let me give the Senator the timetable.

The House will have 60 working days, about 4½ months, to consider this bill. The Senate will then have 30 working days to consider the bill, about 2½ months. The President has 90 working days to send the implementing bill to Congress, which will take him into March.

So if we extend the waiver for anything less than 7 months, it is impossible to take up the trade bill.

The Congress is going to have to decide whether the trade bill is good or bad for this country.

It will have to vote the bill up or down. So when you talk about extending it for 2 months or cutting it off on January 3, it will be impossible to do business or try to work out a subsidy agreement to the countervailing duty agreement which is in the process of negotiation now. If we bind ourselves with the elimination of the countervailing duty, then we will not be able to work out an elimination or modification of the subsidization that now prevails, patently, throughout the rest of the world.

There can be a difference of opinion whether this is good or bad, but one would have to argue that out in the trade bill. I can understand that we can argue whether the countervailing duty provision should be extended, but to let it die by December 15, we would be taking the responsibility in this body of killing the trade negotiation and we will not have another one for another decade—another 10 years, and we are going to have the responsibility of deciding this in the last 2 days of the session.

I think this is a great responsibility for this body to take upon its own shoulders without understanding the implications and the consequences for the entire trade negotiations and our entire trade posture in the world.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennslyvania has the floor.

Mr. HEINZ. Mr. President, I think we are all clear on the facts. The facts are that the President has this countervailing duty waiver authority until January 3, 1979. Since we all know that the President and Ambassador Strauss, and the Senator from Connecticut has indicated as much, will have completed the negotiations by December 15 and every-

thing that is going to be negotiated will have been negotiated by December 15, I do not think I have to tell anybody that, in fact, if we adjourned at this very minute, sine die, it would not change one iota what the President is going to accomplish between now and December 15. There is no necessity for us to extend the countervailing duty waiver authority, and that is a fact.

The administration may want us to for some other reason. I suspect the reason is so that they can continue to waive countervailing duties as they have been doing. That is the reason the administration wants to do this. It is that simple: They want to allow subsidized foreign imports to keep coming into this country. That is the issue, pure and simple. It has very little to do with the multilateral trade negotiations, regardless of what anybody says.

Before we go any farther in this debate, I just want to be sure that we are all clear on what we are talking about. The term "countervailing duties" has a certain abstract neutral quality about it that disguises the true nature of the beast. What we are talking about is subsidies that foreign governments pay to their industries.

I yield to the Senator from Kansas for a unanimous-consent request without losing my right to the floor.

Mr. DOLE. Mr. President, as a member of the Budget Committee, I ask unanimous consent that the following Budget Committee staff members, who may be needed in reference to tax aspects of the sugar legislation, be granted the privilege of the floor during consideration of this legislation: Bob Boyd, Bob Fulton, George Merrill, Charlie McQuillan, Bill Stringer, and Barry Kinsey.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, these are subsidies which in turn allow those industries to export to the United States below fair value. The continuation of these subsidies, as well as other nontariff barriers, threatens to wreck the international free trading system. So there will be no illusions about the creativity of the European governments in creating them, I would like to provide some details of this practice as set out in the August 1978 issue of Dun's Review. The article is entitled "Europe's Subsidy Spree" and is subtitled "Largely to save jobs, West European governments are pouring huge sums into aid for a growing roster of industries. The United States is demanding that these subsidies be cut back."

It continues as follows:

The startling growth of government subsidies to industry in Western Europe, which is making it increasingly tough for American companies to compete, has become a major issue between the U.S. and the European Economic Community. The Americans finally wrung some concessions on subsidies out of the EEC in recent trade negotiations. But it remains to be seen whether or not they will be effetcive.

Of course, many basic industries in Europe have been state-owned for years. But government involvement has spread pervasively in the past two years—through loans, grants, equity purchases and a host of other aids. In large part, these are job-saving measures, growing out of deep European concern over high and rising unemployment. There are currently 5.8 million jobless (5.5% of the work force) in the EEC alone, and most forecasts suggest that without more vigorous economic growth, joblessness will keep rising well into the 1980s.

Compounding the unemployment problem, European industry is heavily burdened with overcapacity, and plant and equipment generally is less efficient than that in the U.S. and Japan. Left alone, many companies would collapse and consign still more workers to the unemployment lines. But government leaders are under strong political pressure to preserve jobs. And most of them take the view that whatever the marketplace logic, permitting companies employing thousands of workers to fold is simply not justifiable. Hence, while they are helping to streamline outdated plant and slim down work forces to some extent, instances where they are just shoring up sick industries keep multiplying.

Subsidization is most obvious in three sectors with massive overcapacity in steel and shipbuilding, control of many formerly private companies is passing into state hands, with most of the remaining firms relying heavily on subsidies to stay in business. And scores of textile and fiber manufacturers, hit by recession and cheap competition from the Far East, are surviving only with government help.

But aid is also pouring into a growing roster of other industries, including pulp and paper, heavy engineering, chemicals, plastics, machine tools, building materials, electronics and even food. Alongside government assistance to hundreds of small and medium-sized firms, major rescue operations are under way in almost every West European country.

SPENDING PROGRAMS

In France the government last year took a one-third share in Dassaulit, maker of the Mirage jet fighter, and Dassaulit will probably be merged with state-owned aircraft group Aerospatiale. This spring, the government launched a three-year development program in four industries—drugs, mechanical engineering, farm andfoodproducts—to be jointly funded by government and private capital, and it has pledged nearly $1 billion in aid for the pulp and paper industry, despite the refusal of the industry to cooperate in a restructuring program. The government plans to spend nearly $1 billion this year on undisguised job preservation.

Despite huge losses and debts Italy's giant state holding company, Instituto per la Ricostruizione Industriale (IRI), which has long dominated industry, continues to absorb even more private-sector companies in distress. The government has made new loans to IRI's huge food and confectionary subsidiary, which is deep in the red. Also being bolstered by loans is the mainly privately owned chemicals maker Moniedison SpA, which lost money heavily last year; and the company was dissuaded from laying off 6,000 textile workers by the government, which simply transferred the workers to its own payroll.

In the Netherlands the Dutch government last year handed out subsidies to 38 heavy-engineering companies. 25 textile firms, thirteen building materials and furniture manufacturers and more. It also purchased a controlling interest in the money-losing local subsidiary of AB Volvo, Sweden's leading carmaker. This year, as part of what it admits is the biggest rescue operation since World War II, the government is taking a stake in VMF Stork, the troubled heavy-engineering group, and in a division of a leading shipbuilding firm.

Germany despite its ideological commitment to marketplace disciplines, has always had a sizable public sector, and it is now beefing up government involvement through massive loans. It has earmarked $30 million to help revamp the steel industry in the Saar—plus $100 million more to subsidize nonsteel firms in the area. In the coal industry, on top of $2 billion already spent, it is planning to shell out $290 million a year through 1982 to guarantee investment and jobs. And Germany has a particularly generous program of job subsidization throughout industry.

Britain also is spending heavily on job-saving and on boosting weak but "strategic" industrial sectors. Hundreds of companies are receiving bonuses if they refrain from firing workers or take on new ones. Last year the government nationalized the entire shipbuilding and ship-repair industry. It is also keeping afloat the state-owned British Steel Corp., which lost $1.6 billion last year and is $9.7 billion in debt—and is currently a target of U.S. dumping charges. Meanwhile, the ill-starred, state-controlled British Leyland Corp., which lost $85 million last year, has received further state loans and equity capital. Its struggling competitor, Chrysler UK, is also being propped up by state funds in a job-saving move.

Denmark, despite high unemployment, has been alone among the Common Market nations in refusing to bolster ailing companies—partly because its industry is fairly efficient and flexible, partly because it simply cannot afford big handouts. As a result, it is urging the EEC Commission, and also its Scandinavian trading partners, to crack down on subsidization.

Mr. JOHNSTON. Will the Senator yield?

Mr. HEINZ. Mr. President, I would yield without losing my right to the floor, or without being subject to the implication of the second speech.

Mr. METZENBAUM. Mr. President, reserving the right to object, the Senator from Louisiana rises because——

Mr. JOHNSTON. To speak on behalf of the amendment of the Senator.

Mr. METZENBAUM. Not to offer an amendment?

Mr. JOHNSTON. No.

Mr. METZENBAUM. I have no objection.

Mr. HEINZ. I am not yielding for the purpose of offering an amendment.

The PRESIDING OFFICER. The Chair hears no objection. The Senator yields without losing his right to the floor.

Mr. JOHNSTON. I thank the distinguished Senator from Pennsylvania for yielding.

Mr. President, I rise in support of the amendment of my senior colleague from Louisiana.

This is a matter of critical importance to the sugar cane industry in my State, as well as the sugar industry nationwide. What this amendment would do, Mr. President, is establish a support level of 16 cents for sugar.

Now, quite frankly, Mr. President, this amendment in its orginal form, really the form that I support, and I believe the form that is necessary for the survival of the sugar industry, would require 17 cents and not 16 cents. The 16-cent level, I think, was arrived at by political necessity, by reason of the fact that 17 cents may be difficult to pass on the floor of this Senate.

But, Mr. President, it costs 17 cents a pound in my State to grow and process a pound of sugar.

The sugar industry is going out of business every day in my State. This is going to be the last year for most of it unless we can get some kind of protection.

Sugar farmers in my State now are getting 13½ cents or 14 cents a pound and have to pay 17 cents a pound to raise the sugar. They are simply not going to be able to make it. They are trying to hold on in hopes that the Congress will respond to what is a very great need.

Mr. President, at the present time, we are importing 44 percent of our sugar. It costs us $1 billion a year in balance of payments. Unless this bill passes, that 44 percent and that $1 billion will rise, will escalate dramatically.

The time for us to act is now. I hope we do not get involved with a lot of last-minute legislative problems and lose the chance to save the domestic sugar industry.

Sometimes, Mr. President, in the quiet of this Chamber, in the eye of this hurricane, we lose sight of the fact of how our actions affect people, farmers, sugar farmers, sugar workers. In this case, 140,000 workers, whose jobs are on the line, who are going to lose their jobs, if we do not act.

Mr. President, it is not too much to say that this may be the last year we have to act.

This bill provides for a parity level of only 57.1 percent. That is much lower than the parity level on most other goods.

Mr. President, 4,000 farmers in 18 rural south Louisianian parishes grow sugar cane. This is not a question of a few large conglomerates, but it is a question of 4,000 farmers in my State alone.

We have 28 sugar cane mills to process the cane and, in 1975, 14 of these mills were cooperatively owned. The sugar industry in Louisiana alone employs 25,000 workers in farming and in processing operations.

If the Louisiana sugar cane industry were to fail and these jobs lost, the taxpayer would have to foot a bill of up to $116.4 million in unemployment compensation.

Louisiana would also lose revenues if these sugar mills and farms went out of business. In 1976, sugarcane production alone was worth almost $100 million according to the Department of Agriculture. This is a considerable tax base to lose.

Nationwide, these costs would be much higher. Nearly 14,000 farm families in 18 States grow sugar beets and more than 5,300 farmers have an interest in planting and harvesting sugarcane in Florida, Louisiana, Texas, and Hawaii. About 4 percent of our corn crop is also used in sweetener production. To these jobs, you can add the more than 140,000 employees who work on sugar-producing farms, in sugarbeet processing plants, cane sugar mills, wet milling plants and in sugar distribution. I think you can draw your own conclusions about how severe the impact on employment would be nationwide—and the resultant costs to the taxpayer—if the sugar industry were to fail. Some who oppose this amendment seem to have forgotten the impact of this bill not only on farmers and on other people, but also on the economy of this country.

Mr. President, this amendment is not inflationary. The adjustment clause, in fact, follows inflation; it does not create it. The clause is simply a method, similar to methods employed by Congress for other purposes, to keep up with inflation caused in other sectors.

Mr. President, Secretary Bergland made the point very well about the rise in sugar prices. My colleagues will recall that while the cost of products into which sugar is put has risen 48 percent since 1973, the price of sugar has risen only 6 percent, or less than the price of inflation, during that same 5-year period.

Many large industrial sugar users justified price increases in 1974 when the price of sugar soared to 60 cents per pound. We have yet to witness any corresponding price decrease by major users, even though the price of sugar dropped by more than 50 cents per pound between 1974 and 1977. In fact, Secretary Bergland made this point on March 12, 1977, when he was interviewed by the National Journal:

> My point is when sugar prices were 65 cents, prices of these manufactured goods went up. Now sugar is nine cents—has there been any corresponding drop in cake mixes or soda pop or candy? No, of course not. And I'm going to say consumers have not gotten the benefit of the change in prices.

To put this in perspective, we should remember that a single 2-ounce candy bar today costs more than three times as much as the price a sugar farmer would receive, without import restrictions, for a full pound of sugar.

Finally, there is the problem of reliability. In 1977, 50 percent of our sugar imports came from the Dominican Republic, Brazil, and the Philippines. Given the social and political turmoil in the Dominican Republic and the Philippines, we have to wonder how dependable these supplies will be in the future.

Mr. President, the sugarcane industry is in deep trouble. Sugar farmers, under the corn program authorized in the 1977 farm bill, receive only 52.5 percent of parity, considerably less than received by other crops: milk, 80 percent; peanuts, 67 percent; corn, cotton, and wheat, 57 percent.

Many of these farmers told us they cannot make a living at these higher price objectives last winter, so it is easy to understand why sugar farmers are in deep trouble.

Mr. President, we are not going to make anyone rich with a price objective of 16 cents a pound or 57.1 percent of parity. But we might help hold down our balance-of-trade deficit, now running $1 billion a year in sugar alone and save 25,000 jobs in my State alone and 140,000 jobs nationwide.

Mr. President, we must act in this session of Congress. We must act on this amendment. If we do not, we risk losing the whole sugar industry; and once it is gone, it will not come back.

I hope my colleagues will support the amendment of the senior Senator from Louisiana.

Mr. INOUYE. Mr. President, in recent weeks two articles dealing with the pending sugar legislation have appeared in the Washington Post. I find it disappointing that neither of them touch upon some of the more critical issues surrounding the sugar industry in the United States.

We can argue the issue of comparative advantage and free trade all we want, but it does not solve the problem on the more human scale. For example, 29,400 people in Hawaii depend on the sugar industry for their jobs. Earnings from sugar and acreage in sugar exceeds by far that of any other agricultural crop in my State. Yet both earnings and acreage have been declining in recent years with the 1977 crop bringing in revenues of $144 million from 225,000 acres compared to $62.5 million in receipts from pineapple grown on 47,000 acres. Unfortunately, we cannot grow pineapple on sugar land. Neither can we look to vegetables, papaya, or other fruit crops as an alternative to sugar.

Alternative forms of employment for these people are very limited. Extensive studies have been conducted into alternative uses of land that is now in sugar. Hawaiian agriculture is hampered by shipping and marketing problems due to our isolated location, in addition to natural problems ranging from bugs and birds to winds and heavy rains, the cost of importing machinery and fertilizer, and the high cost of labor. Alternative agricultural production for our own island needs is limited because Hawaii is a pocket market and local farmers cannot economically compete with large-scale mainland growers for other markets. Moreover, it would require less than 3,500 additional acres of land to grow all the vegetables and fruits that are consumed in Hawaii.

We know how hard it is to find alternatives to sugar. For example, after the Kohala Sugar Co. went out of business in 1975, the State of Hawaii organized the Kohala Task Force to find substitute economic activities for the Kohala area. The State invested more than $6 million into new enterprises. The largest of these, a feed grain and feedlot operation, has gone bankrupt. A plastics firm has also failed; a hay-growing enterprise is running into great difficulties. Little has been achieved in providing employment for the Kohala area.

It is a misconception to think that only large corporations grow sugar in Hawaii. They grow the lion's share of our 225,000 acres in sugar but 500 small, independent growers are also involved. These growers are extremely hard working and a vital part of Hawaii's agricultural community. Most finance their crops on borrowed capital, expecting to repay their loans from returns when their crop is harvested 2 or more years after planting. Most will not be able to repay their loans for their 1978 crop and face the prospect of financing another crop without any assurance of being able to repay either loan when their next crop is harvested. They will not be around for another crop year without a Sugar Act which establishes the minimum price of sugar at a level above their average cost of production.

Extremely high expenditures for unemployment compensation, welfare. and food stamps seem to be the only short-term alternatives. Hawaii's welfare costs have risen 91 percent in the last 4

years, and are now running at $128 million a year. If even half of those supported by the sugar industry were forced to go on welfare, the State's cost would increase at least 50 percent, to nearly $200 million. This would represent almost one-fourth of the total State general fund budget. Some of this additional cost would be on the American taxpayer. Would this not be a greater burden than the consumer bears in supporting the price of sugar?

While the price of sugar at the present time is supported at 14.65 cents per pound, an increased price to 15 cents per pound as the administration has promised still would not reflect the average cost of sugar produced in Hawaii. For example, the Agriculture Department's figures do not reflect the high transportation differential of 0.46 cents per pound by which the Department is currently reducing the loan price to the Hawaii industry. Neither does it reflect the fact that the Western States market with its surplus of domestic source sugar is below the support price.

To compound problems, Hawaii's sugarcane growers are paying the highest agricultural labor rates in the world, must meet United States and Hawaii standards for working conditions and benefits, must comply with U.S. environmental requirements, and ship incoming supplies and outgoing sugar in American ships. Hawaii's sugar producers have been able to stay in business because they are efficient. In fact, our sugar producers achieve the highest yields per acre of any place in the world. It is this high level of productivity and extremely efficient farming system that makes the Hawaiian sugar grower among the most cost effective producers in the United States. Is this then an industry that the American Government should encourage to go out of business? I think not.

Hawaii produces about 1 million tons of raw sugar per year, nearly one-fifth of all sugar produced in the United States. The United States consumes about 11 million tons of sugar a year of which, on the average, 50 percent is imported. The demise of Hawaii's sugar industry, or that of the Nation at large, would have a strong negative economic impact. The financial responsibility of Government to soften the negative social and economic impact resulting from the collapse of America's sugar industry would be enormous. The equally important issue of America's continuing balance-of-trade deficit must also be addressed. We are already the world's largest importer of sugar.

The consumer will bear additional costs, both direct and indirect, monetary and nonmonetary, if the domestic sugar industry folds—as it will without a Government program. The U.S. Government would then have little if any influence over the price of sugar.

There is nothing unique about Government regulation and support of a domestic sugar industry. In fact, Government regulation over production, trade, and prices has been the most universal and continuous feature of the economic development of the sugar industry in the past three centuries.

Market inflexibilities, both on the production and demand side, have required Government interference in the sugar industry. Both the sugar beet and cane industries are dependent upon large, capital-intensive processing plants. Thus, the expansion of the world sugar production in response to price increases is severely constrained in the short run by the high costs associated with establishing and maintaining excess or "standby" cane or beet processing capacity and/or long leadtime required to plan, finance and construct processing facilities. As a result of this high ratio of fixed costs to total costs in sugar production, it is economically rational to continue to produce in the short run when price is below total cost, as long as variable costs are covered. It is this inelasticity in supply and demand that has caused governments to become involved in the market mechanisms of the sugar industry.

The narrowness of the international market—the so-called free world market—in which sugar is traded, has also made it almost mandatory for governments to step in to protect their domestic sugar industries from extreme price cyclicality. Slightly more than 28 percent of world sugar production is traded internationally. However, only 40 percent of this amount is traded on the free market, the rest being traded under preferential agreements.

The United States alone imports approximately 50 percent of the sugar traded on the free market. The limited amount of sugar available on the residual free market reduces the effectiveness of market mechanisms in bringing about necessary adjustments of production in response to changes in demand, and subjects the American consumer to extreme fluctuations in the price of sugar. For that reason, the American Government must step in with an adjusting mechanism to protect producer and consumer from excessive competitive market behavior.

One should also recognize that the sugar industry does not operate in a competitive international market system. Most producing countries have government subsidized sugar industries. For example, the sugar industry in the Philippines, facing cost of production higher than world market prices, is supported by the Philippine Government with a domestic price much higher than that achieved on long-term contracts on the world market. This difference provides the additional income needed to maintain a viable sugar industry in the Philippines. Interestingly, the United States is the largest importer of this subsidized sugar from the Philippines.

The world's largest grower of sugar, Brazil, also has a strongly subsidized sugar industry. The Brazilian Government recognizes the need to export large quantities of sugar to the United States at internationally competitive prices in order to obtain dollars desperately needed to continue Brazil's rate of economic development. They, therefore, continue to subsidize their domestic sugar industry. Those who oppose the sugar bill seek to force our sugar producers to compete against subsidized producers in a noncompetitive system. This is completely unrealistic and sets the stage for economic suicide for the American sugar producers.

The sugar industry is not the only agricultural producer that receives "unique treatment" from the American Government. Virtually every agricultural commodity in the United States receives some form of price support, tariff or quota protection. Unlike most other agricultural products, sugar is imported in very large quantities and is, therefore, at the mercy of international prices. This fact alone is a strong argument in supporting of insulating the domestic sugar industry from the international market. The argument that the sugar industry is requesting special or preferential treatment is completely invalid, however, as many products including beef, dairy products and even peanuts are subject to import quotas.

For example, the Department of Agriculture has proposed to set the support price for milk at 80 percent of parity as of October 1, 1978. As a result of the increase to the $9.87 per hundredweight support price, the Commodity Credit Corporation purchase prices were raised 5.25 cents per pound for butter, 2.75 cents per pound for cheese, and 2.75 cents per pound for nonfat dry milk. In the marketing chain, the increase in the support price is equal to about 3.8 cents per gallon of fluid milk. Based on data provided by the Department of Agriculture, it appears that the retail value of dairy products sold commercially in marketing year 1978–79 will be $26.0 billion, $2.1 billion more than consumers spent this marketing year. About half of the projected increase in retail prices for milk and dairy products is due to the increase in support. Yet no one screams "consumer rip-off" on that.

The price of peanuts is supported by the Department of Agriculture through the use of a national poundage quota and a national acreage allotment. By limiting the national acreage allotment to the statutory minimum and thereby limiting production of additional peanuts for export, the Department of Agriculture is helping to stabilize export markets and world prices for American peanut farmers and also the price to the American consumer.

American beef producers are also protected from the international market through the use of tariffs and quotas. In fact, almost every agricultural commodity grown in the United States is supported through tariffs, quotas, and parity prices.

Interestingly, the Department of Agriculture has gone out of its way to calculate the cost to the consumer of a 1-cent increase in the price of sugar but is unable to provide substantial information on the cost the consumer incurs from the Department's support of most other agricultural commodities. The argument against supporting sugar can be used with equal validity on the other crops.

In summary, it should be mentioned that while Hawaii is just a small State with a small population, it carries a responsibility equal to that of the other

States of this great Nation. Hawaii's taxpayers support such projects as rescuing New York City from bankruptcy. We support the price of agricultural products not grown in Hawaii. Our people understand that this is part of the responsibility of being a citizen of the United States. Now the people of Hawaii ask support for their sugar industry—an industry that is essential to their livelihood.

If our approach is to be realistic and if a viable domestic sugar industry is in the national interest, which I unquestionably believe it is, then a Sugar Act must be adopted which will assure the producers and processors of domestic sugar a reasonable price for their product in the future. It is no less deserving than other farm products of such protection, and I assure you the need is no less acute.

Mr. ABOUREZK addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania has the floor.

Mr. ABOUREZK. Mr. President, will the Senator yield?

Mr. HEINZ. Yes, I yield.

The PRESIDING OFFICER. Does the Senator yield the floor to the Senator?

UP AMENDMENT NO. 2060

(Purpose: Adding as Title V hospital cost containment)

Mr. ABOUREZK. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. ABOUREZK) proposes an unprinted amendment numbered 2060.

Mr. ABOUREZK. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of UP amendment No. 2059, add the following new title:

"TITLE V—TRANSITIONAL HOSPITAL COST CONTAINMENT PROVISION

"PART A—PURPOSE OF THE PROGRAM

"SEC. 501. It is the purpose of the transitional hospital cost containment program established by this title to constrain the rate of increase in total hospital inpatient costs, beginning January 1, 1979, and continuing until the adoption of the permanent reforms referred to in Part D, by limiting the amount of revenue which may be received by the hospitals that are subject to the provisions of this title from Government programs, private insurers, and individuals who pay directly for hospital care.

"PART B—ESTABLISHMENT OF HOSPITAL COST CONTAINMENT PROGRAM

"IMPOSITION OF LIMIT ON HOSPITAL REVENUE INCREASES

"SEC. 511. (a) The average reimbursement payable per admission to a hospital by any cost payer, and the average inpatient charges per admission of a hospital for any accounting year any part of which occurs after December 31, 1978, may not (except as provided in subsection (b), or in section 514, 515, 517, 518, 519, 524, or 531) exceed such average reimbursement payable per admission or such average inpatient charges per admission, respectively, for the hospital's base accounting year adjusted by a percentage equal to the product of the following factors—

"(1) one hundred plus the percentage by which the hospital's costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) would have increased in the period after the close of the hospital's base accounting year and prior to January 1, 1979, if such costs had increased (during that period) at the average annual rate of increase in the hospital's costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) during the two-year period ending with the close of such base accounting year, except that such percentage as applied for purposes of this section shall not be more than 15 per centum nor less than 6 per centum.

"(2) one hundred plus the percentage by which such average reimbursement payable per admission or average inpatient charges per admission would have increased in the period after December 31, 1978 (or after the close of the hospital's base accounting year, if later), and prior to the first day of the accounting year for which the limit is being imposed if such average reimbursement payable per admission or average inpatient charges per admission had increased (during such period) at an annual rate equal to the inpatient hospital revenue increase limit determined and promulgated under section 512 (b), and

"(3) one hundred plus the percentage by which such average reimbursement payable per admission on average impatient changes per admission would increase (or decrease) in the hospital's accounting year (except for any part thereof occurring before January 1, 1979) for which the limit is being imposed if such average reimbursement payable per admission or average inpatient charges per admission increase (or decrease) during such accounting year at an annual rate equal to the adjusted inpatient hospital revenue increase limit applicable to the hospital under section 512(a).

"(b) For an accounting year which ends after December 31, 1978, but before December 31, 1979, the ceiling established under subsection (a) for average inpatient charges per admission of a hospital and for average reimbursement payable per admission to that hospital by each cost payer shall be applied only to that percentage of the inpatient charges or reimbursement paid, respectively, as the number of days in that accounting year occurring after December 31, 1978, is of the total number of days in that accounting year.

"(c) For purposes of subsection (a), in the case of the admission of an individual whose inpatient hospital services are paid for in part by more than one cost payer, the admission shall be attributed to the cost payer which pays for any such services excluding any amounts paid as a deductible by a cost payer.

"DETERMINATION OF ADJUSTED INPATIENT HOSPITAL REVENUE INCREASE LIMIT

"SEC. 512.(a) The 'adjusted inpatient hospital revenue increase limit' which is applicable to any hospital for purposes of section 511(a)(3) with respect to any accounting year shall (subject to sections 524 and 531) be equal to the inpatient hospital revenue increase limit determined and promulgated under subsection (b) of this section for the twelve-month period in which such accounting year ends, modified by the application of the 'volume load formula' which is promulgated under section 513 and applied to that hospital.

"(b)(1) Between October 1 and December 31 of each calendar year beginning with 1978, the Secretary shall promulgate a figure which (subject to paragraph (2)) shall be the 'inpatient hospital revenue increase limit' applicable to accounting years ending in the twelve-month period beginning January 1 of the next year. Such figure shall be, except as provided in section 531, the sum of—

"(A) the rate of increase in the implicit price deflator of the gross national product as calculated by the Bureau of Economic Analysis of the Department of Commerce and published in the Survey of Current Business (hereinafter in this title referred to as the 'GNP deflator') for the twelve-month period ending September 30 of such year over the GNP deflator for the previous twelve-month period and

"(B) one-third of the difference between—

"(i) the average annual rate of increase in total expenditures of hospitals (or distinct parts thereof) which satisfy the requirements of section 521(a) which is found by the Secretary to have occurred during the two previous calendar years, and

"(ii) the average annual rate of increase in the GNP deflator for the two previous calendar years.

"(2) If the Secretary finds that for any twelve-month period for which a figure is promulgated under paragraph (1) the GNP deflator with respect to such period has exceeded or is expected to exceed by more than 1 percentage point the GNP deflator which was used in making the determination under paragraph (1) (or in making a prior adjustment under this paragraph), the Secretary shall increase (or further increase) the GNP deflator so used by the amount of such excess; except that no adjustment made under this paragraph shall be effective with respect to any accounting year ending prior to the calendar quarter preceding the calendar quarter in which such adjustment is made.

"PROMULGATION OF VOLUME LOAD FORMULA

"SEC. 513. (a) The volume load formula shall be promulgated by the Secretary within thirty days after the date of enactment of this Act. It shall be defined for any accounting year for which an adjusted inpatient hospital revenue increase limit is determinated as the average of—

"(1) the per centum change in the number of admissions since the base year, and

"(2) the per centum change in the number of patient days since the base year.

"(b) The volume load formula shall be applied to generate an adjusted inpatient hospital revenue increase limit for each hospital applicable to the average inpatient charges per admission of the hospital and to the average reimbursement payable per admission to the hospital by each cost payer, and for a hospital whose volume load (in the accounting year to which the adjusted inpatient hospital revenue increase limit applies)—

"(1) increases by less than 2 per centum or declines by less than 10 per centum of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted by the inpatient hospital revenue increase limit if there were no change in volume load,

"(2) increases by 2 per centum or more but by less than 15 per centum of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the sum of (A) the amount specified under clause (1), and (B) one-half of the amount specified under clause (1) multiplied by the increase in volume load above the 2 per centum limit,

"(3) declines by 10 per centum or move but by less than 15 per centum of the total volume load in the hospital's base account-

ing year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the difference between (A) the amount specified under clause (1), and (B) one-half of the amount specified under clause (1) multiplied by the decline in volume load below the 10 per centum limit,

"(4) increases by 15 per centum or more of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the greatest maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted under clause (2), or

"(5) decreases by 15 per centum or more of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the difference between (A) the smallest maximum total inpatient charges and the smallest maximum reimbursements payable by cost payers permitted under clause (3), and (B) the amount specified under clause (1) multiplied by the decline in volume load below the 15 per centum limit.

"BASE ACCOUNTING YEAR AND MODIFICATION OF CHARGES AND REIMBURSEMENTS FOR THAT YEAR

"SEC. 514. (a) For purposes of this title, a hospital's 'base accounting year' is its accounting year which ended in 1977, or, if later, the second accounting year during all of which the hospital has been a hospital as defined in section 121.

"(b) For purposes of calculating under section 511(a) the average inpatient charges per admission of a hospital and the average reimbursement payable per admission to the hospital by each cost payer for the base accounting year, the inpatient charges of the hospital (and the reimbursement payable to the hospital by a cost payer) for the base accounting year shall (except as provided in subsection (c)) be reduced by an amount equal to any inpatient charges (in the case of a cost payer, inpatient charges attributable to that cost payer) for such base accounting year for elements of inpatient hospital services which cease to be furnished in an accounting year which is subject to this title, multiplied by the portion of that accounting year (or part thereof) subject to this title during which such services are not furnished.

"(c) Subsection (b) shall not apply with respect to inpatient hospital services which have been found to be not appropriate pursuant to section 1523(a)(6) of the Public Health Service Act by the State health planning and development agency designated under section 1521 of such Act for the State in which the hospital is located.

"ESTABLISHMENT OF EXCEPTIONS

"SEC. 515. (a) Upon request by a hospital, the Secretary may grant exceptions from the limits established under this title to such hospital to the extent that such hospital provides evidence satisfactory to the Secretary—

"(1) of the extent to which costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) for such hospital in an accounting year exceed such costs in the base accounting year as the result of—

"(A) changes in volume load in the range specified in clause (4) or (5) of section 113, or

"(B) changes in capacity or in the character of inpatient hospital services available in the hospital or renovation or replacement of physical plant which changes, renovation, or replacement increase costs for inpatient hospital services per admission by more than the per centum specified in section 112(b)(1)(B) over costs for inpatient hospital services per admission in the previous accounting year; and

"(2) that the current ratio of assets to liabilities (determined in accordance with the last sentence of this subsection) is less than two; and

"(3) that the changes in volume load, capacity, or character of inpatient hospital services, or the renovation or replacement generating the excess costs described in paragraph (1) have been found, pursuant to section 1523 of the Public Health Service Act, to be needed or appropriate by the State health planning and development agency designated under section 1521 of such Act for the State in which such hospital is located.

For purposes of paragraph (2), the term 'current ratio of assets liabilities', with respect to any hospital means the sum of the cash, notes and accounts receivable (less reserves for bad debts), marketable securities, and inventories held by such hospital divided by the sum of all liabilities of that hospital falling due in an accounting year for which the exception is requested under this section.

"(b) Upon request by a hospital, the Secretary may grant exceptions from the limits established under this title to such hospital to the extent that such hospital provides evidence satisfactory to the Secretary that—

"(1) there has been a change in the inpatient hospital services for such hospital for which reimbursement is payable by a cost payer, or the basis on which the reimbursement payable by a cost payer is calculated has changed, or

"(2) the percentage of inpatient charges attributable to any cost payer has changed for such hospital, and such change has reduced the total revenue of such hospital by at least the per centum specified in section 512(b)(1)(B) of the costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act).

"(c) The Secretary shall either approve any request for an exception made by a hospital under subsection (a) or (b), or deny such request, within a period not to exceed ninety days after the hospital has filed in a manner and form prescribed by the Secretary the evidence required by such subsection. (If such hospital has not received written notice within fifteen days that such request has not been filed in such manner and form, such request shall be deemed to have been filed in the prescribed manner and form.) Any such request not denied within such ninety-day period shall be deemed approved.

"(d) Any hospital granted an exception under subsection (a) shall make itself available for an operational review by the Secretary. As a result of such review, the Secretary may make recommendations to such hospital for improvements to increase such hospital's efficiency and economy. The Secretary may discontinue, after notice and an opportunity for a hearing on the record, any such exception for failure of the hospital to implement any such recommendation.

"(e)(1) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (a)(1)(A), the upper or lower 15 per centum limitation specified in clauses (2) and (3), respectively, of section 513(b) shall be permanently changed for that hospital to the upper or lower per centum limitation determined by the Secretary.

"(2) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (a)(1)(B), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year and all subsequent accounting years (and the limit on the allowable rate of increase under section 511 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount no greater than the amount the Secretary estimates, at the time he grants the exception, is necessary to maintain the current ratio of its assets to liabilities (determined in accordance with the last sentence of subsection (a)) at the level specified in subsection (a)(2).

"(3) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (b)(1), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year and all subsequent accounting years (and the limit on the allowable rate of increase under section 511 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount equal to the amount the Secretary estimates, at the time he grants the exception, is necessary to offset the loss in revenue caused by the changes for which the exception was granted.

"(4) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (b)(2), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year (and the limit on the allowable rate of increase under section 111 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount equal to the amount the Secretary estimates, at the time he grants the exception, is necessary to offset the loss in revenue caused by the changes for which the exception was granted.

"(f)(1) Any hospital, or any entity described in section 1842(f)(1) of the Social Security Act, which is dissatisfied with a determination of the Secretary made under this section may obtain a hearing before the Provider Reimbursement Review Board established under section 1878 of the Social Security Act, if the amount in controversy is $10,000 or more and the request for such hearing is filed within one hundred and eighty days after receipt of the Secretary's determination.

"(2) The Secretary (notwithstanding section 1878(h) of the Social Security Act) shall appoint five additional members to the Provider Reimbursement Review Board, following the specifications for expertise applicable to the existing five members. Such five additional members shall constitute the Board for purposes of reviewing appeals under this title. The other provisions of subsections (c), (d), (e), (f), (h), and (i) of section 1878 of the Social Security Act shall apply, except that the Board as so constituted shall be considered as reviewing decisions of the Secretary rather than of a fiscal intermediary.

"(g) Upon request by a hospital, the State health planning and development agency designated under section 1521 of the Public Health Service Act for the State in which the hospital is located shall make a finding as to the appropriateness of specific institutional health services for purposes of subsection (a)(3) or section 514(c) of this title, after requesting the recommendations of the appropriate health systems agency. The finding of a State health planning and development agency under this subsection shall not be subject to further review.

"ENFORCEMENT

"SEC. 516. (a) Notwithstanding any provision of title XVIII of the Social Security Act, reimbursement for inpatient hospital services under the program established by that title shall not be payable, on an interim basis or in final settlement, to the extent that it exceeds the applicable limits established under this title or under the program for a State whose hospitals have been ex-

cluded under section 517 or 519 from the application of this title.

"(b) Notwithstanding any provision of title V or XIX of such Act, payment shall not be required to be made by any State under either such title with respect to any amount paid for inpatient hospital services in excess of the applicable limits established under this title; nor shall payment be made to any State under either such title with respect to any amount paid for inpatient hospital services in excess of such limits.

"(c) Notwithstanding any other provision of law, the imposition by any hospital of inpatient charges in excess of the applicable limit established under this title, or any payment by any cost payer (as defined in section 522(e)(2)) for inpatient hospital services in excess of such limit, shall subject such hospital or cost payer—

"(1) to the Federal excise tax imposed by section 4991 of the Internal Revenue Code of 1954 (as added by section 528 of this Act), and

"(2) to exclusion, at the discretion of the Secretary, from participation in any or all of the programs established by title V, XVIII, or XIX of the Social Security Act.

"(d) Any hospital shall be exempt from the penalties set forth in subsection (c) if it holds in escrow an amount equal to its inpatient charges in excess of the applicable limit established under this title multiplied by the percentage of such charges not attributable to cost payers until such time as future inpatient hospital charges fall below the applicable limits established under this title, in an amount equal to the amount in escrow; but any such hospital which fails to do so shall be subject to such penalties.

"EXEMPTION FOR HOSPITALS IN CERTAIN STATES

"SEC. 517. At the request of the Governor (or other chief executive) of any State the Secretary may exclude from the application of this title except for sections 525 and 526 all hospitals (as defined in section 521(c)) physically located in such State if—

"(a) the Secretary finds that such State has in operation as of the date of such request a program capable of containing hospital costs for inpatient hospital services in the State which covers at least 90 per centum of the hospitals in the State which would otherwise be covered under the program established by this title;

"(b) the Secretary finds that the State program applies at least to all revenues for inpatient hospital services of hospitals covered by the program and has applied for at least one year prior to the date of such request to at least half of those revenues (excluding revenues received under title XVIII of the Social Security Act);

"(c) the Governor (or chief executive) certifies, and the Secretary determines, that the aggregate rate of increase in revenues over the previous accounting year for inpatient hospital services for all hospitals in the State will not (1) exceed 110 per centum of the inpatient hospital revenue increase limit determined pursuant to paragraphs (b)(1) and (b)(2) of section 512, except that, at the option of the State, the above limit shall increase by the amount of increases in revenues attributable to increases in regular wages (as defined in section 524(b)(1)) which are exempt under section 524, nor (2) be less than the increase in the GNP deflator applicable to that fiscal period; and

"(d) the Governor (or chief executive) has submitted, and had approved by the Secretary, a plan for recovering any excess of total revenue which (notwithstanding paragraph (c)) may occur.

"EXEMPTION FOR HOSPITALS ENGAGED IN CERTAIN EXPERIMENTS OR DEMONSTRATIONS

"SEC. 518. A hospital or group of hospitals (as defined in section 521(c)) may be excluded from the application of this title except for sections 525 and 526 if the Secretary determines that (1) such exclusion is necessary to facilitate or continue an experiment or demonstration entered into under section 402 of the Social Security Amendments of 1967, section 222 of the Social Security Amendments of 1972, or section 1526 of the Public Health Service Act, and (2) such experiment or such demonstration is not inconsistent with the provisions of this title.

"EXEMPTION FOR STATES WITH COST CONTAINMENT PROGRAMS

"SEC. 519. (a) Any State may submit to the Secretary a plan for a hospital cost containment program for approval. The Secretary shall approve such a program and exempt from the application of this title except for sections 525 and 526 all hospitals (as defined in section 521(c)) physically located in such State if the Secretary determines that such program—

"(1) designates an identifiable unit of State government which has the authority to supervise the administration of the program;

"(2) provides for a methodology to assure that the aggregate rate of increase in revenues for inpatient hospital services over the previous year for all hospitals in the State will not exceed 110 per centum of the inpatient hospital revenue increase limit determined pursuant to paragraphs (b)(1) and (b)(2) of section 512 nor be less than the increase in the GNP deflator applicable to that fiscal period. Such methodology may include alternative methods for classifying hospitals, for establishing prospective rates of payment, and for implementing on a gradual, selective, or other basis the establishment of a prospective payment system, in order to stimulate hospitals through positive (or negative) financial incentives to use their facilities and personnel more efficiently without adversely affecting the quality of services;

"(3) includes a methodology for the recovery of any excess of total revenues which (notwithstanding paragraph (2)) may occur;

"(4) provides for sanctions and enforcement procedures adequate to insure compliance with the program;

"(5) provides for uniform definition of all costs;

"(6) provides for the evaluation of standards of institutional performance;

"(7) provides that the limit specified in paragraph (2) shall increase by the amount of increases in regular wages (as defined in section 524(b)(1)); and

"(8) provides for compliance with such other criteria as the Secretary deems necessary to accomplish the purposes of this title and which are not inconsistent with the provisions of this title.

"(b) The Secretary may make grants to any State which has an approved program pursuant to subsection (a) to assist such State in the implementation of its program. For the purposes of this subsection, there are authorized to be appropriated $10,000,000 for the fiscal year ending September 30, 1979, and such sums shall remain available until expended.

"(c) The Secretary shall promulgate regulations to implement this section within one hundred and eighty days of the date of enactment of this Act.

"REVOCATION OF EXEMPTIONS UNDER SECTIONS 517, 518, AND 519

"SEC. 520. (a) The Secretary shall review annually any program, experiment, or demonstration that has received an exemption pursuant to section 517, 518, or 519 to determine whether such program, experiment, or demonstration is in compliance with such section and the regulations promulgated thereunder. The Secretary may revoke, after notice and an opportunity for a hearing on the record, any such exemption if he determines that such exemption is no longer justified because the conditions for such exemption are no longer being met.

"(b) Upon revocation of an exemption awarded under section 517, 518, or 519 each hospital that would be otherwise be subject to this title will be subject to the limits established under this title for each full accounting year as defined by section 522(a)(1) any part of which was not subject to the program, experiment, or demonstration established under section 517, 518, or 519.

"PART C—DEFINITIONS AND MISCELLANEOUS PROVISIONS

"DEFINITION OF HOSPITAL AND APPLICABILITY OF TITLE

"SEC. 521. (a) For purposes of this title (subject to subsections (b), (c), and (d) of this section), the term "hospital", with respect to any accounting year, means an institution (including a distinct part of an institution if the distinct part participates in the program established under title XVIII of the Social Security Act) which—

"(1) satisfies clauses (1) and (7) of section 1861(e) of the Social Security Act, and

"(2) had an average duration of stay of thirty days or less in the preceding accounting year.

"(b) A hospital shall not be subject to this title except for the purposes of sections 525 and 526 for an accounting year if it—

"(1) has met the conditions specified in subsection (a) (under present and previous ownership) for less than two years before such accounting year;

"(2) derives more than 75 per centum of its inpatient care revenues, disregarding revenues received under title XVIII of the Social Security Act, from one or more health maintenance organizations (as defined in section 1301(a) of the Public Health Service Act) during such accounting year;

"(3) has had, in the three accounting years preceding such accounting year, average annual admissions of two thousand or less; or

"(4) has had in the three accounting years preceding such accounting year, average admissions that are greater than two thousand and less than four thousand; is a sole community provider, as defined by the Secretary; and, is not physically located within a standard metropolitan statistical area.

"(c) For the purposes of sections 517, 518, and 519, the term 'hospital', with respect to any accounting year, means an institution (including a distinct part of an institution if the distinct part participates in the program established under title XVIII of the Social Security Act) which meets the requirements of paragraphs (1) and (2) of subsection (a) except that a hospital shall not be subject to the provisions of such sections if it meets the requirements of paragraph (2) of subsection (b).

"(d) A hospital shall not be subject to any provisions of this title if it is a Federal hospital.

"OTHER DEFINITIONS

"SEC. 522. For purposes of this title—

"Accounting Year

"(a)(1) The term 'accounting year' means, except as provided in paragraph (2)—

"(A) in the case of a hospital participating in the program established by title XVII of the Social Security Act, a period of twelve consecutive full calendar months including the same months as the last full reporting period allowed for reimbursement purposes under such title; and

"(B) in the case of a hospital not participating in the program established by title XVIII of the Social Security Act, a calendar year, or, if requested by the hospital, such other period of twelve consecutive full calendar months as the Secretary may designate.

"(2) The Secretary may establish an 'accounting year' of less than twelve months,

and make appropriate adjustments in the application of this title to that period, for an entity whose 'accounting year' under paragraph (1) is changed from one twelve month period to another or for other reasons that the Secretary deems appropriate.

"Inpatient Hospital Services

"(b) The term 'inpatient hospital services' has the meaning given it by section 1861(b) of the Social Security Act including in addition the services otherwise excluded by paragraph (5) thereof.

"Inpatient Charges

"(c) The term 'inpatient charges' means (1) charges (as defined in section 405.452 (d) (4) of title 30 of the Code of Federal Regulations as in effect on the date of enactment of this Act) for inpatient hospital services or (2) except for purposes of subsection (e), the hospitals costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act), if such costs are greater than the charges as defined in clause (1).

"Admission

"(d) The term 'admission' means the formal acceptance of an inpatient by a hospital, excluding newborn children (unless retained after discharge of the mother) and excluding transfers within inpatient units of the same institution.

"Cost Payer

"(e) The term 'cost payer' means—

"(1) a program established under title V, XVIII, or XIX of the Social Security Act, and

"(2) any organization which (A) meets the definition in section 1842(f)(1) of the Social Security Act, and (B) reimburses a hospital subject to this title for inpatient hospital services on a basis related to the hospital's costs in furnishing those services or on any other basis other than inpatient charges.

"(f) The term 'reimbursement payable by a cost payer' means the sums of—

"(1) the amounts payable by the cost payer to a hospital for inpatient hospital services, and

"(2) the amounts payable by an individual to the hospital for inpatient hospital services if the individual's expenses for such services are payable in part by the cost payer, to the extent that those amounts are calculated as a portion of the costs or other basis on which the amounts payable by the cost payer are determined.

"Secretary

"(g) The term 'Secretary' means the Secretary of Health, Education, and Welfare, unless otherwise indicated.

"State

"(h) The term 'State' includes Puerto Rico, Guam, the District of Columbia, and the Virgin Islands.

"DETERMINATION OF INPATIENT REIMBURSEMENT

"SEC. 523. For purposes of section 511, inpatient reimbursement under a program established under title V, XVIII, or XIX of the Social Security Act shall be determined without regard to adjustments resulting from the application of section 405.460(g), 405.455 (d), 405.415(f), or 405–415(d)(3) of title 20 of the Code of Federal Regulations.

"EXEMPTION OF NONSUPERVISORY PERSONNEL WAGE INCREASES FROM REVENUE LIMIT

"SEC. 524. (a) The Secretary shall modify the inpatient hospital revenue increase limit (for purposes of section 511(a)(2)) and the adjusted inpatient hospital revenue increase limit (for purposes of section 511(a)(3)) otherwise established for any hospital which is subject to the provisions of this title except for those hospitals exempted pursuant to section 517, 518 or 519 for any accounting year beginning before April 1980, as prescribed in subsection (b).

"(b) Such modified limits for any accounting year shall be calculated by adding together—

"(1) the average percentage increase in regular wages (as that term is used for purposes of the Fair Labor Standards Act of 1938) per employee per hour granted to employees other than doctors of medicine or osteopathy and supervisors (as defined in section 2(12) of the National Labor Relations Act) during that accounting year multiplied by the percentage of total costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) attributable to such wages in the preceding accounting year; and

"(2) the adjusted inpatient hospital revenue increase limit otherwise applicable to the hospital for that accounting year under this title multiplied by the percentage of such costs attributable to all other expenses in the preceding accounting year; and

"(3) 100 percent plus the average percentage increase in regular wages (as defined in clause (1)) per employee per hour granted to employees specified in clause (1), multiplied by the product of (A) the percentage of total costs for inpatient hospital services (as calculated under clause (1)) attributable to such wages in the preceding accounting year, and (B) the fractional increase in the average number of such employees in the accounting year for which the modified limit is calculated over the average number of such employees in the preceding accounting year; provided, that the total percentage determined under this clause may not exceed the difference between the percentage which would be obtained under clause (1) if the adjusted inpatient hospital revenue increase limit were used instead of the average percentage increase in regular wages per employee per hour, and the percentage actually calculated under clause (1).

"(c) The modified inpatient hospital revenue increase limit and adjusted inpatient hospital revenue increase limit established under subsection (b) for any hospital with respect to any accounting year shall constitute such hospital's inpatient hospital revenue increase limit under section 511(a)(2) or, as appropriate, the adjusted inpatient hospital revenue increase limit under section 511(a)(3), for such accounting year for all purposes of this title.

"DISCLOSURE OF FISCAL INFORMATION

"SEC. 525. (a) Every hospital shall submit to the health systems agency designated under section 1515 of the Public Health Service Act for the health service area in which it is located by March 1 and September 1 of each year, a report, in a form prescribed by the Secretary, the rates charged for each of the thirty most frequently used hospital services, as specified by the Secretary, including the average semiprivate and private room rates.

"(b) Each such hospital shall submit annually to such health systems agency, within ninety days of the close of each such hospital's accounting year, a report, in a form prescribed by the Secretary, which contains information, as specified by the Secretary, describing the ownership, management, and financial status of each such hospital including:

"(1) a balance sheet as of the end of such accounting year, setting forth assets and liabilities at such date, including all capital, surplus, reserve, and depreciation;

"(2) a statement of operations for such accounting year, setting forth all operating and nonoperating revenues and expenses including the percent increase in wages for nonsupervisory personnel during such accounting year (including a comparison with all previous accounting years subsequent to the date of enactment of this Act);

"(3) the name and address of any person—

"(A) who has (directly or indirectly) an ownership, lease, or rental interest of 5 per centum or more in such hospital, or who is the owner (directly or indirectly) of an interest of 5 per centum or more in any mortgage, deed of trust, note, or other obligation secured (in whole or in part) by such hospital or any of the property or assets thereof, or

"(B) who is an officer or director of the hospital if it is organized as a corporation; and

"(4) the name and address of any individual, corporation, partnership, or other legal entity with whom the hospital has had, during the previous twelve months, business transactions in an aggregate amount in excess of $5,000 if a person described in paragraph (3) or a person who exercises discretionary authority or discretionary control respecting the financial management of the hospital (A) is such an individual or (B) has (directly or indirectly) an ownership interest of 5 per centum or more in such corporation, partnership, or other legal entity; and

"(5) the names and annual compensation including salary and benefit increases of the hospital's principal operating personnel, as defined by the Secretary.

"(c) Every hospital shall submit annually to such health systems agency all costs reports submitted to each cost payer, as defined in section 522(e) of this Act, and its overall plan and budget described in section 1861(z) of the Social Security Act (if it participates in the program established by title XVIII of that Act).

"(d) If a hospital fails to fully comply with the requirements of subparagraphs (a), (b), and (c) and any regulation promulgated thereunder, the Secretary shall notify the hospital and any payment due to such hospital pursuant to titles XVIII, XIX and XX of the Social Security Act or any other program supported in whole or in part by funds supplied by the United States shall be reduced by 10 per centum effective with the date of such notice and such reduction shall continue in effect until the hospital fully complies with the requirements of subparagraphs (a), (b), and (c) or any regulation promulgated thereunder: *Provided*, That if the Secretary finds that the hospital has fully complied with such requirements within ninety days of notification by the Secretary of a violation, the Secretary may, in his discretion, waive all or part of the reduction in payments prescribed herein.

"(e) Each such health systems agency shall make available to the public for inspection and copying (at the reasonable expenses of the public) the information supplied to the health systems agency pursuant to this section in readily understandable language and in a manner designed to facilitate comparisons among the hospitals in the health systems agency's health service area.

"IMPROPER CHANGES IN ADMISSION PRACTICES

"SEC. 526. Upon written complaint by any person that one or more hospitals has changed its admission practices in a manner that would tend to reduce the proportion of inpatients of such hospital or hospitals for whom reimbursement is less than the anticipated inpatient charges applicable to such inpatients, the Secretary shall investigate the complaint. The Secretary may impose, after notice and an opportunity for a hearing on the record, the sanction set forth in section 516(c)(2) if he determines that such complaint is justified.

"REVIEW OF CERTAIN DETERMINATIONS

"SEC. 527. Any determinations made on behalf of the Secretary under this title with respect to the application of its provisions to individual hospitals (other than determinations made under section 515 or 526) shall be subject to the provisions of section 1878 of the Social Security Act in the same man-

ner as determinations with respect to the amount of reimbursement due a provider of services under title XVIII of such Act.

"EXCISE TAX ON EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

"SEC. 528. (a) Subtitle D of the Internal Revenue Code of 1954 (relating to miscellaneous excise taxes) is amended by adding at the end thereof the following new chapter:

"'CHAPTER 45—TAX ON CERTAIN EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

"'Sec. 4991. Imposition of tax.

"'SEC. 4991. IMPOSITION OF TAX.

"'(a) IN GENERAL.—(1) There is hereby imposed, with respect to the receipt by any hospital of any payment made by any cost payer for inpatient hospital services in excess of the applicable limit established by, and with respect to any payment made by any cost payer as defined in section 522(e)(2) of such Act for inpatient hospital services in excess of such limit, a tax equal to 150 percent of the amount of such excess. The tax imposed by this paragraph shall be paid both by the hospital and by the cost payer.

"'(2) There is hereby imposed, with respect to the inpatient charges of any hospital in excess of the applicable limits established by multiplied by the percentage of such charges not attributable to cost payers, a tax equal to 150 percent of the amount of such excess. The tax imposed by this paragraph shall be paid by the hospital.

"'(b) EXCEPTION.—The tax imposed by subsection (a)(2) shall not apply with respect to any hospital so long as it is determined by the Secretary of Health, Education, and Welfare to be taking the corrective action described in section 516(d)(2) of the

"'(c) DEFINITIONS.—Terms used in subsections (a) and (b) have the meanings given them by

"'(d) ADMINISTRATION.—Under and to the extent provided by regulations of the Secretary, the appropriate provisions of subtitle F (relating to procedure and administration) shall be made applicable with respect to the tax imposed by subsection (a) of this section.'.

"(b) The table of chapters for subtitle D of such Code is amended by adding at the end thereof the following new item:

"'Chapter 45. Tax on certain excessive payments for inpatient hospital services.'.

"EFFECT OF ACT ON PAYMENTS BELOW THE ESTABLISHED LIMITS

"SEC. 529. This Act shall not require any Federal or State program or any person to pay a hospital more than that program or person would have been required to pay had this Act not been enacted.

"CITIZEN'S CIVIL ACTIONS

"SEC. 530. (a) Except as provided in paragraph (b) of this section, any person may commence a civil action for injunctive relief, including interim equitable relief, on his own behalf, whenever such action constitutes a case or controversy—

"(1) against any person (including the Secretary) who is alleged to be in violation of sections 525, 526, 528, or 529 of this title or any regulation promulgated thereunder; or

"(2) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty pursuant to sections 525, 526, 528, or 529 of this title or any regulation promulgated thereunder.

The district courts of the United States shall have jurisdiction over actions brought under this section, without regard to the amount of controversy, or of the citizenship of the parties.

"(b) No civil action may be commenced—

"(1) under paragraph (a)(1) of this section—

"(A) prior to sixty days after the plaintiff has given notice of the alleged violation to the Secretary and to any alleged violator in such manner as the Secretary may by regulation require; or

"(B) if the Attorney General or the Secretary has commenced and is diligently pursuing judicial proceedings or administrative action with respect to such alleged violation; or

"(2) under paragraph (a)(2) of this section, prior to sixty days after the plaintiff has given notice to the Secretary of such alleged failure to perform an act or duty.

"(c) In any action under this section, the Attorney General or the Secretary may intervene as a matter of right. The decision and rulings of the court, in any judicial proceeding commenced under this section, shall not be a bar to the institution of any judicial proceeding or administrative action by the Secretary against a party to such judicial proceeding. No factual finding by such court shall be determinative as to any fact in any subsequent judicial proceeding or administrative action brought by the Secretary, unless the Secretary is a party to the proceeding under this section.

"(d) The court, in issuing any final order in any action brought pursuant to subsection (a), may award costs of litigation (including a reasonable attorney's fee, based on the prevailing rates for such services, and expert witness fees) to any party, whenever the court determines that such an award is appropriate.

"(e) Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or at common law to seek enforcement of any regulation or order or to seek any other relief.

"(f) Nothing in this section shall require the disclosure of any trade secret information or any other confidential information except as provided by the Federal Rules of Civil Procedure.

"SEC. 531. (a) Within one year of the date of enactment of this Act, the Secretary shall—

"(1) after consultation with the Bureau of Labor Statistics of the Department of Labor, the Bureau of Economic Analysis of the Department of Commerce, and other appropriate public and private organizations, promulgate a figure that more accurately reflects the rate of increase in the prices of the inputs necessary for the production and delivery of hospital services. Such figure shall replace the figure promulgated pursuant to section 112 as the new inpatient hospital revenue increase limit; and

"(2) make any changes in the exceptions process established by section 15 as deemed necessary or appropriate by the Secretary as a result of the promulgation of the new inpatient hospital revenue increase limit pursuant to paragraph (1) of this section. The Secretary shall make such changes in order to insure that—

"(A) only hospitals that are experiencing financial crises, as defined by the Secretary, and that have not incurred expenses in excess of those found to be necessary pursuant to section 1861(v)(1)(A) of the Social Security Act are allowed to receive exceptions; and

"(B) exceptions will only be granted to hospitals that qualify under clause (A) and that have—

"(i) experienced an unforeseeable or unavoidable rise in the price of malpractice insurance, other liability insurance, energy or such other items as the Secretary deems appropriate which result in hospital expenditures in excess of the figure promulgated pursuant to paragraph (1) of this subsection;

"(ii) experienced a change in patient mix resulting from expanded institutional capacity provided such expansion has been either found by a State health planning and development agency designated under section 1521 of the Public Health Service Act to be in conformity with applicable standards, criteria, and plans under an agreement pursuant to section 1122 of the Social Security Act or approved by such agency under a certificate-of-need program which is satisfactory to the Secretary under section 1523(a)(4) of the Public Health Service Act;

"(iii) experienced unusual increased expenses, as defined by the Secretary, associated with the closing, modifying, or changing usage of all or part of its facilities by eliminating excess bed capacity; discontinuing an underutilized service for which there are adequate alternative sources; or, substituting for the underutilized service some other service which is needed in the area and which is consistent with the findings of an appropriate health planning agency; or

"(iv) experienced such other change in condition that the Secretary deems an appropriate justification for an exception:

Provided, That such reasons for hospitals qualifying for exceptions as set forth in clauses (i) through (iv) have been found pursuant to section 1523 of the Public Health Service Act to be needed or appropriate by the State health planning and development agency designated under section 1521 of such Act for the State in which the hospital requesting the exception is located.

"(b) The changes in the inpatient hospital revenue increase limit and the exceptions process prescribed by subsection (a) shall apply to hospitals for their accounting years commencing after such changes are in effect.

"(c) Any changes made pursuant to sections (a)(1) and (a)(2) shall become effective after sixty days of continous session of the Congress after the Secretary has submitted such changes to the Congress together with a detailed statement of the reasons underlying such changes, unless either House passes a resolution during such sixty-day period stating in substance that it does not favor such changes.

"SEC. 532. The Secretary, after consultation with appropriate public and private organizations, shall establish within one year of the date of enactment of this Act the following:

"(a) an accounting and uniform functional cost reporting system (including uniform procedures for allocation of costs) for determining operating and capital costs of hospitals providing services;

"(b) a system which will classify hospitals according to size, geographical location, and other criteria which will reflect efficiency and services provided;

"(c) a system that more accurately measures the changes in hospital cost associated with changes in hospital volume;

"(d) a system that monitors, on a current basis, shifts in case mix including shifts of cases with higher than average costs per admission;

"(e) a system that measures the output of hospitals which includes a way to identify hospitals that provide better than average care than hospitals of similar characteristics; and

"(f) a system that would reimburse hospitals of similar characteristics differently based on the system established pursuant to subsection (e).

"SEC. 533. (a) The Secretary shall arrange for the conduct of a study or studies of methods for controlling the cost of and/or revenue received for hospital outpatient services, long term care services, and ambulatory care services.

"(b) The study or studies required by subsection (a) shall be completed within one year of the date of enactment of this Act. Within thirty days of the date of completion of such study or studies, such study or studies and the report of reports thereon shall be submitted to Congress. Such report or reports shall include recommendations, if any, for legislative and administrative action.

"SEC. 534. The Secretary shall monitor, on a current basis, the economic impact of all

the provisions of this title including 517, 518, 519, and 525. He shall report annually to the Congress the results of such monitoring including the percentage of increase in the cost of energy, malpractice, and other liability insurance, and the wages for nonsupervisory personnel.

"SEC. 535. In carrying out the purposes of this title the Secretary or a State is authorized to enter into contracts with State or national cooperative information centers established under section 304 or 306 of the Public Health Service Act.".

"PART D—REPORT ON PERMANENT REFORM IN THE DELIVERY AND FINANCING OF HEALTH CARE

"SEC. 536. The Secretary of Health, Education, and Welfare shall submit to the Congress, no later than March 1, 1979, a report setting forth his recommendations for permanent reforms in the delivery and financing of health care which will increase the efficiency, effectiveness, and quality of health care in the United States and which will replace the transitional provisions of Parts A through C.

Mr. ABOUREZK. I will make a very brief explanation.

This is an amendment I am offering on behalf of Mr. KENNEDY, who is unable to be here at this point. I am trying to get him to the floor to describe his amendment.

Unless the Senator from Georgia wants to—I will not yield for the purpose of a tabling motion, but I will yield for debate, if he wants to talk about it.

Mr. TALMADGE. If the Senator will yield, I will offer a substitute.

Mr. ABOUREZK. I would like to wait until Senator KENNEDY gets here. So, Mr. President, I suggest the absence of a quorum.

Mr. CHURCH addressed the Chair.

Mr. ABOUREZK. I withhold that.

Mr. CHURCH. Just to save the Senate time, I wonder if the Senator from South Dakota will yield to me so that I may make a speech in favor of the pending bill.

Mr. TALMADGE. I will seek recognition in my own right as soon as the Senator from South Dakota has completed his remarks.

Mr. ABOUREZK. I will suggest the absence of a quorum until Senator KENNEDY gets here, unless the Senator from Georgia will agree that Senator CHURCH can make a statement to fill that time.

Mr. TALMADGE. All I want to do is to offer a substitute.

Mr. ABOUREZK. I do not yield for that purpose.

Mr. TALMADGE. I have no objection to Senator CHURCH speaking.

Mr. ABOUREZK. On the condition that I do not lose my right to the floor, as soon as he is finished.

Mr. TALMADGE. Mr. President, I ask unanimous consent that as soon as the speech is made. I have an opportunity to offer a substitute.

Mr. ABOUREZK. I object. I do not yield for that purpose.

The PRESIDING OFFICER. Objection is heard.

Mr. ABOUREZK. Senator KENNEDY is here.

Mr. TALMADGE. Mr. President, I seek recognition in my own right.

Mr. ABOUREZK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. KENNEDY. I object.

Mr. ABOUREZK. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will resume the call of the roll.

The second assistant legislative clerk resumed the call of the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts has the floor.

Mr. KENNEDY. Mr. President, I welcome the opportunity to have the chance to lay out to the Senate today our cost containment legislation which was reported from the Human Resources Committee some 14 months ago, and we appreciate the chance in the final hours to be able to get a determination by the Senate on what has been recommended by the administration and which can save the American taxpayers billions and billions of dollars a year, if implemented.

Last year, Americans spent over $160 billion for health care—three times the amount we spent 10 years ago. At that current rate of increase health spending will grow to more than $230 billion in 3 short years. Health care has become so expensive that Americans are now working more than 1 full month of every year just to pay for their health care—2 weeks' wages for hospital care alone.

Mr. President, during the past 25 years, national health expenditures have increased not only in aggregate terms and on a per capita basis, but also as a percentage of the gross national product (GNP). In 1950, national health expenditures amounted to $12 billion, or 4.5 percent of the GNP. Preliminary estimates for fiscal year 1977 indicate that total health expenditures amounted to $160 billion, or 8.6 percent of the GNP. Expenditures for hospital care are the largest component of national health expenditures, reaching an estimated $65.6 billion in fiscal year 1977 for about 40 percent of total health care expenditures.

Expenditures for hospital care have risen annually at double-digit rates for a decade. During fiscal year 1965, the year prior to enactment of medicare and medicaid, expenditures for hospital care amounted to nearly $13.2 billion. Within 5 years the annual outlay had almost doubled to $25.9 billion, and by fiscal year 1976 expenditures had more than quintupled to $65.6 billion. The average annual increase from 1965 to 1976 was 13.9 percent; adjusted to reflect constant prices in the general economy, the average annual increase was still 8.6 percent. If this rate of increase continues, total spending on hospital care alone could be $220 billion by 1986.

TABLE 1.—*Expenditures for hospital care, selected fiscal years, 1950–77*

Fiscal year	Total expenditures (billions)	Annual percentage increase
1950	$3.7	----------
1955	5.7	9.0
1960	8.5	8.4
1965	13.2	9.1
1970	25.9	14.5
1971	29.1	12.3
1972	32.7	12.4
1973	36.2	10.7
1974	41.0	13.3
1975	48.2	17.6
1976	55.4	14.9
1977	65.0	18.1

Public opinion polls indicate that rising health care costs are among the top three domestic concerns of the American people—even ranking ahead of rising energy costs. This concern reflects a fundamental fact—rising health costs add significantly to burdens on the taxpayer, on the wage earner, and on those consumers who lack adequate health insurance protection.

Each day American taxpayers pay $58 million for all hospital care provided under medicare and medicaid.

Private health insurance premiums have jumped 20 to 30 percent in the last year, cutting into most workers' take home pay. Indeed, Americans today must work 1 full month of every year just to pay for their health care. It takes about 2 weeks' wages to cover hospital costs alone. Higher health insurance premiums paid for fully or in part by employers drain off money that could be provided to workers in the form of higher wage increases or pension benefits.

For the 18 million individuals in this country without any health insurance, the 19 million additional individuals with very inadequate insurance policies, and the 115 million people without major medical insurance coverage, rising health care costs—especially spiraling hospital costs—pose the direct threat of financial ruin, and a lifetime of indebtedness.

Rising health care costs have olso hampered the ability of Federal and State governments to meet other pressing social problems. For example, between 1966 and 1978, the HEW health budget increased from $3 billion to $44.5 billion. Of this increase, $37.3 billion has gone to pay for benefits under medicare and medicaid, with only $4.2 billion left over for expansion of other governmental health activities beyond their 1966 level. The rapid increase in hospital costs have also made it necessary for many States to make serious cuts in ambulatory care services under medicaid.

TABLE 2.—*Total health expenditures between 1975 and 1980*

[In billions]

Fiscal year	Percentage of GNP	Amount	Estimated amount
1975	8.4	$122.2	----------
1976	8.6	139.3	----------
1977	8.7	----------	$159.7
1978	8.9	----------	181.1
1979	9.0	----------	204.5
1980	9.1	----------	228.8

TABLE 3.—*Expenditures for hospital care between 1975 and 1980*

[In billions]

Fiscal year	Amount	Estimated amount
1975	$48.2	
1976	55.4	
1977		$65.6
1978		74.4
1979		85.7
1980		97.4

Specifically we are focusing on hospital care because the cost of this hospital care—which accounts for 40 cents of every dollar Americans spend on health care—has escalated even faster. Last year the Nation's total hospital bill jumped to $65.6 billion or more than $1,000 per family. Next year, without any control, the figure is predicted to increase dramatically to almost $75 billion.

The costs of a hospital stay has risen 2½ times faster than the Consumer Price Index and doctor's fees have been going up at similar rates.

Even the American Hospital Association acknowledges that it is not just the costs of supplies and equipment that is causing costs to go up. Hospitals continue to add expensive new facilities, personnel, and technology.

We can no longer just sit back and watch health costs continue to escalate at past rates. For too long we have allowed hospitals to be reimbursed at whatever level they wanted. Their budgets have been open ended and they have had no economic incentive to hold down costs. Ironically, our reimbursement system tends to encourage hospitals to add expensive new facilities, personnel and technologies, but few are asking, "Do we really need all this new personnel, laboratory tests and X-rays?" Even though we spent nearly three times as much for laboratory tests in 1975 than we did in 1971 there is no evidence that all these extra tests affected the health of the American people.

We have encouraged more hospital beds than are needed, and today the consumer is bearing the burden of paying for the costs of greatly underutilized facilities, services and equipment. A recent study by the prestigious Institute of Medicine documented that this Nation as a whole has at least 100,000 more hospital beds than it needs. These beds which should be closed or used for other purposes are costing all of us well over $2 billion per year.

This open ended reimbursement has also encouraged the massive proliferation of expensive equipment in both hospitals and doctors' offices. The 1,000 CAT scanners now installed or on order have the capacity to scan over 3 million patients a year, and most often this expensive procedure has little efficacy and could have been avoided by a careful physical examination by a doctor. Today well over 500 hospitals now maintain expensive open heart surgery facilities, yet in less than one quarter of these institutions were 200 procedures performed annually. In most cases less than 100 cases were performed annually, and this goes on in the face of the guidelines of the American College of Thoracic surgeons which state clearly that 200 procedures are needed to justify operation of a facility and maintain quality.

Tragically, we are pouring so much money into hospitals right now for extra beds, for unneeded tests, for unnecessary surgery that we have not had money to spend on basic preventive health care. It is more humane, and it would be a lot less expensive to prevent illness than to put someone into a hospital to cure them. Vital programs such as immunizing children have been overlooked for too long. Tragically, nearly 9 cents of every Federal dollar goes to the hospital industry while far less than 1 penny is spent on preventive care. We need to redefine our priorities.

Over 16 months ago I introduced S. 1391, the Hospital Cost Containment Act of 1977 which was ordered reported by the Committee on Human Resources on August 2, 1977. As chairman of the Subcommittee on Health and Scientific Research I held 5 days of hearings on this bill and other approaches to containing hospital costs. Testimony was received from over 100 witnesses and many call for immediate action; however, today, more than a year later, in part due to the lobbying efforts of the hospital industry and the AMA, we still have not enacted a bill that would constrain the rate of increases in hospital costs.

S. 1391 was carefully written and, Mr. President, I would now like to offer printed amendment No. 3477 which has been cosponsored by Senators WILLIAMS, CRANSTON, NELSON, JAVITS, HATHAWAY, and PELL. The amendment contains title I of the cost containment bill (S. 1391) reported by the Human Resources Committee over a year ago. The amendment would save almost $60 billion over the next 5 years—150 times more than would be saved by H.R. 5285 in its present form.

Mr. President, Americans have repeatedly expressed the view that inflation is the No. 1 problem they face, and health care costs are significantly contributing to this spiraling inflation. Although I believe that only national health insurance will effectively control health care costs, a national health insurance proposal would require some lead time prior to implementation. During this period as well cost increases could be reduced.

Because hospital outlays today account for over 40 percent of all health care expenditures, and Federal, State, and local governments pay 45 percent of short-term general hospital costs, I believe that by starting to limit hospital costs, we will be responding to the American people's immediate wish to control these health care expenditures. Last year medicare and medicaid payments for hospitals jumped $4 billion alone.

Mr. President, this bill was designed to be implemented quickly and simply without creating a new bureaucracy. It specifically provided for phasing in a system that would classify hospitals according to size, geographical location and other criteria which would reflect efficiency and services provided. A cornerstone of the bill was the development of an inflation index specific to the hospital industry that would accurately reflect the rate of increases in prices of the inputs necessary for the production and delivery of hospital services.

Again, Mr. President, today, well over a year since that bill was reported, in part due to the lobbying efforts of the hospital industry and the AMA, we still have not enacted a bill that would constrain the rate of increases in hospital costs. Tragically, while the American people are telling us that they are troubled by inflation we have watched the cost of hospital care continue to escalate at the alarming rate of $1 million per hour, $25 million a day, $168 million a week, and almost three-quarters of a billion dollars a month.

Some have argued that now is not the time for enactment of legislation that would create new bureaucracies, S. 1391 does not create any new bureaucracy, and, according to HEW, will be administered at the Federal level with few new employees. The Federal Government will not, contrary to the charges of many, tell a hospital how to run its business. The hospital cost containment program will not dictate specific ways in which hospitals must live within their revenue limit but will only set the overall budget levels and let the trustees, health professionals and administrators involved decide how to best allocate their resources. The bill would leave considerable flexibility to identify those economies appropriate for the local situation.

Some have charged that the quality of care would be affected if hospital's expenditures were limited. There is no evidence of this. In regard to hospitalization, "more" is not necessarily "better" but is all to often merely excessive and unnecessary. Many cost reductions can, if managed appropriately, actually increase the quality of care and help hospitals better serve the needs of their patients and of society. Eliminating unnecessary beds, unnecessary laboratory tests. Underutilization of duplicative costs of equipment and services and implementing preadmission testing can all go to saving hospitals considerable dollars.

I urge my colleagues to join me in passage of this amendment. Without passage and by supporting the provisions in H.R. 5285 as drafted, we will be doing virtually nothing to reduce inflation in the hospital sector.

It has the support of the labor unions. I have letters here from the AFL–CIO, from the American Federation of State, County and Municipal Employees, and UAW is behind this legislation.

The mental health associations are behind this legislation. The health planning associations are behind this legislation. The community mental health centers are behind this legislation. The Health Insurance Association of America and Blue Cross and Blue Shield support this legislation.

Washington Business Group on Health supports the issue of cost containment.

The only people opposed are the hospitals and the doctors—the most privileged groups in our society. They ask to be exempt from the simple budget procedures that every other business has. That

shoe stores have, that gas stations have, that the auto industry has, and that schools have.

The bill does not dictate specific ways in which hospitals must live within their revenue limits but, as with schools and other businesses, only sets the overall budget levels and lets the trustees, the health professionals, and the administrators involved decide how best to allocate their resources. This would leave considerable flexibility for hospitals to identify those economies appropriate for their local situation.

The reductions in cost escalation laid out in this bill are reasonable. Several States which have enacted their own cost containment programs have succeeded in reducing costs to 9 or 10 percent. These programs include hospitals of all types and are spread throughout the country. During the economic stabilization program—1971–74—hospitals managed, without loss of quality, to reduce rates of cost increases to the same level that we are requesting.

The Province of Quebec and Canada held hospital revenue increases to 3 percent in 1976 and less than 1 percent in 1977. Their restraints have been successfully imposed without serious patient complaints regarding quality of care or services.

Up until now Congress has taken the easy route and cut authorizations for programs that lack the lobbying strength of the hospital industry. Health maintenance organizations were cut by $240 million, health planning by $915 million, and health services research by $40 million. We have cut back the tools to bring the system under control. We have picked on the weak, while the special interests run wild.

In conclusion, I hope my distinguished colleagues will join me in passing a meaningful cost containment bill.

Together we must all reassess our priorities and determine the best way to allocate our health care dollars so that all Americans can obtain decent health care. This means focusing on preventive health care, insuring that children are immunized and that people are educated about their health. This cannot be done when less than 1 cent of every Federal dollar is spent on prevention and this cannot be done when cost containment bills are so watered down that they have no meaning and produce no results.

As chairman of the Subcommittee on Health, I have long advocated sweeping reform in the way we finance and deliver health care in America, and I remain firm in that commitment. I believe national health insurance is the only viable solution to the health care crisis in America, but even if it were signed into law tomorrow it would take substantial leadtime to implement. In the meantime we can no longer afford the 32 percent increase in hospital care of the past 2 years. A transitional cost containment, does not create a new bureaucracy and will result in significant savings. The Congressional Budget Office estimates that the amendment I offer would save almost $60 billion over the next 5 years, $2.8 billion in the first year alone.

We have to act. We can no longer continue to squander billions of dollars on unnecessary drugs, unnecessary surgery and unnecessary technology while hundreds of thousands of children are not being immunized and millions of Americans cannot get basic health care.

Americans are telling us that they no longer want to sit back and watch health care costs escalate at the rate of: $1 million an hour, $24 million a day, $160 million a week, almost three-quarters of a billion dollars a month.

I urge adoption of this amendment.

The figures speak for themselves. We are talking about saving $60 billion over the next 5 years compared to a trivial $373 million in H.R. 5285 that is before us.

Mr. President, I think this legislation is important. I think it is probably the most important single piece of legislation that this body will consider, in order to save the taxpayers money, not 3 years from now, not 5 years from now, but beginning right now, to save billions of dollars. It seems to me to be highly desirable to do so.

Mr. President, I ask unanimous consent to be able to have printed in the RECORD a group of charts that vividly demonstrate those points.

The PRESIDING OFFICER. Without objection, it is so ordered.

[Charts mentioned above are not reproducible in the RECORD.]

The PRESIDING OFFICER. The Senator from Georgia.

UP AMENDMENT NO. 2061

Mr. TALMADGE. Mr. President, I offer a substitute for the amendment to the amendment and ask for its immediate consideration. The substitute is the verbatim text of H.R. 5285, as reported by the Committee on Finance.

The bill, which has been pending in the Senate for more than 2 months, makes important and urgently needed changes in the medicare and medicaid programs.

In particular, important reforms to moderate payments for hospital care are incorporated.

I urge Senators to support the committee-approved text as an appropriate substitute for sweeping and arbitrary controls.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. TALMADGE) proposes an unprinted amendment numbered 2061, as a substitute amendment for unprinted amendment No. 2060.

The amendment is as follows:

In lieu of the language proposed to be inserted, insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Medicare-Medicaid Administrative and Reimbursement Reform Act".

TABLE OF CONTENTS

HOSPITAL REIMBURSEMENT REFORM

Sec. 2. Criteria for determining reasonable cost of hospital services.
Sec. 3. Payments to promote closing and conversion of underutilized facilities.
Sec. 4. Federal participation in hospital capital expenditures.

PRACTITIONER REIMBURSEMENT REFORMS

Sec. 5. Agreement by physicians to accept assignments.
Sec. 6. Certain surgical procedures performed on an ambulatory basis.
Sec. 7. Criteria for determining reasonable charge for physicians' services.
Sec. 8. Payment for certain antigens under part B of medicare.
Sec. 9. Payments on behalf of deceased individuals.

LONG-TERM CARE REFORMS

Sec. 10. Hospital providers of long-term care services.
Sec. 11. Reimbursement rates under medicaid for skilled nursing facilities and intermediate care facilities.
Sec. 12. Medicaid certification and approval of skilled nursing and intermediate care facilities.
Sec. 13. Visits away from institution by patients of skilled nursing or intermediate care facilities.

GENERAL REFORMS

Sec. 14. Notification to State officials.
Sec. 15. Repeal of section 1867.
Sec. 16. Procedure for determining reasonable cost and reasonable charge.
Sec. 17. Ambulance service.
Sec. 18. Grants to regional pediatric pulmonary centers.
Sec. 19. Waiver of human experimentation provision for medicare and medicaid.
Sec. 20. Disclosure of aggregate payments to physicians.
Sec. 21. Resources of medicaid applicant to include assets disposed of at substantially less than fair market value.
Sec. 22. Rate of return on net equity for for-profit hospitals.
Sec. 23. Deductible not applicable to expenses for certain independent laboratory tests.
Sec. 24. Payment for laboratory services under medicaid.
Sec. 25. Status of professional standards review organizations.
Sec. 26. Removal of three-day hospitalization requirement and 100 visit limitation for home health services.
Sec. 27. Payment for durable medical equipment.
Sec. 28. Development of uniform claims forms for use under health care programs.
Sec. 29. Coordinated audits under the Social Security Act.
Sec. 30. Encouragement of philanthropic support for health care.
Sec. 31. Participation under medicaid by skilled nursing facilities participating under medicare and vice versa.
Sec. 32. Coverage under medicare of certain dentists' services.
Sec. 33. Coverage under medicare of optometrists' services with respect to aphakia.
Sec. 34. Study of criteria employed for classifying a facility as a skilled nursing facility.
Sec. 35. Authority for certain States to buy-in coverage under Part B of medicare for certain medicaid recipients.

CRITERIA FOR DETERMINING REASONABLE COST OF HOSPITAL SERVICES

SEC. 2. (a)(1) The first sentence of section 1861(v)(1)(A) of the Social Security Act is amended by striking out "The" and inserting "Subject to subsection (bb), the".

(2) Section 1861(v) of such Act is further amended by adding at the end thereof the following new paragraph:

"(8) For additional requirements applicable to determination of reasonable cost for services provided by hospitals, see subsection (bb).".

(b) Section 1861 of such Act is amended by adding after subsection (aa) the following new subsection:

"Criteria for Determining Reasonable Cost of Hospital Services

"(bb)(1) In order more fairly and effectively to determine reasonable costs incurred in providing hospital services, the Secretary shall, not later than April 1, 1979, after consulting with appropriate national organizations, establish a system of hospital classification under which hospitals furnishing services initially will be classified—

"(A) by size, with each of the following groups of hospitals being classified in separate categories: (i) those having more than 5, but fewer than 25, beds, (ii) those having more than 24, but fewer than 50 beds, (III) those having more than 49, but fewer than 100, beds, (iv) those having more than 99, but fewer than 200, beds, (v) those having more than 24, but fewer than 50, beds, (iii) those having more than 299, but fewer than 400, beds, (vii) those having more than 399, but fewer than 500, beds, and (viii) those having more than 499 beds;

"(B) by type of hospital, with (i) short-term general hospitals being in a separate category, (ii) hospitals which are primary affiliates of accredited medical schools being in one separate category (without regard to bed size), and (iii) psychiatric, geriatric, maternity, pediatric, or other specialty hospitals being in the same or separate categories, as the Secretary may determine appropriate, in light of any differences in specialty which significantly affect the routine costs of the different types of hospitals;

"(C) as rural or urban; and

"(D) according to such other criteria as the Secretary finds appropriate, including modification of bedsize categories;

but the system of hospital classification shall not differentiate between hospitals on the basis of ownership.

"(2) The term 'routine operating costs' used in this subsection does not include—

"(A) capital and related costs,

"(B) direct personnel and supply costs of hospital education and training programs,

"(C) costs of interns, residents, and non-administrative physicians,

"(D) energy costs,

"(E) malpractice insurance expense, or

"(F) ancillary service costs.

"(3)(A) During the calendar quarter beginning on January 1 of each year, beginning with 1979, the Secretary shall determine, for the hospitals in each category of the system established under pargaraph (1), an average per diem routine operating cost amount which shall (except as otherwise provided in this subsection) be used in determining payments to hospitals.

"(B) The determination shall be based upon the amount of the hospitals' routine operating costs for the most recent accounting year ending prior to October 1 of the calendar year preceding the calendar year in which the determination is made. If, for any accounting year which starts on or after July 1, 1979, a hospital's actual routine operating costs are in excess of the amount allowed for purposes of determining payment to the hospital pursuant to this subsection and subsection (v), only one-half of such excess shall be taken into account in making any determination which the Secretary shall make under this pargraph.

"(C) In making a determination, the routine operating costs of hospitals in each category shall be divided into personnel and nonpersonnel components.

"(D)(i) The personnel and nonpersonnel components of routine operating costs for hospitals in each category (other than for those excluded under clause (ii)) shall be divided by the total number of days of routine care provided by such hospitals to determine the average per diem routine operating cost for such category.

"(ii) In making the calculations required by subparagraph (A) the Secretary shall exclude any newly opened hospital (as defined in the second sentence of paragraph (4)(F)), and any hospital which he determines experiencing signifiant cost differentials resulting from failue of the hospital fully to meet the standards and conditions of participation as a provider of services.

"(E) There shall be determined for each hospital in each category a per diem target rate for routine operating costs. Such target rate shall equal the average per diem routine operating cost amount for the category in which the hospital is expected to be classified during the subsequent accounting year, except that the personnel component shall be adjusted using a wage index based upon general wage levels for reasonably comparable work in the areas in which the hospitals are located. If the Secretary finds that, in an area where a hospital in any category is located for the most recent twelve-month period for which data with respect to such wage levels are available, the wage level for such hospital is significantly higher than such general wage level in that area (relative to the relationship within the same hospital group between hospital wages and such general wages in other areas), then such general wage level in the area shall be deemed equal to the wage level for such hospital, only with respect to the hospital's first accounting year on or after July 1, 1979.

"(4)(A)(i) The term 'adjusted per diem target rate for routine operating costs' means the per diem target rate for routine operating costs plus the percentage increase in costs determined under the succeeding provisions of this subparagraph.

"(ii) In determining the adjusted per diem target rate, the Secretary shall add an annual projected percentage increase in the cost of the mix of goods and services (including personnel and nonpersonnel costs) comprising routine operating costs, based on an index composed of appropriately weighted indicators of changes in the economy in wages and prices which are representative of services and goods included in routine operating costs. Where actual changes in such weighted index are significantly different (at least one-half of 1 percentage point) from those projected, the Secretary shall issue corrected target rates on a quarterly basis. At the end of the hospital's accounting year, the target rate shall be adjusted to reflect the actual changes in such weighted index. Adjustments shall also be made to take account of changes in the hospital's classification.

"(B) For purposes of payment the amount of routine operating cost incurred by a hospital shall be deemed to be equal—

"(i) in the case of a hospital which has actual routine operating costs equal to or greater than that hospital's adjusted per diem target rate for routine operating costs, to the greater of—

"(I) the hospital's actual routine operating costs, but not exceeding—

"(a) in the case of the first accounting year of any hospital which begins on or after July 1, 1979, and prior to July 1, 1980, an amount equal to the aggregate of (1) 100 percent of the hospital's adjusted per diem target rate for routine operating costs, plus (2) 15 percent of the amount described in clause (1), and

"(b) in the case of any accounting year after the accounting year described in clause (a), an amount equal to the aggregate of (1) 100 percent of the hospital's adjusted per diem target rate for routine operating costs for such year, plus (2) a dollar amount equal to the dollar amount determined under clause (a)(2) for the category of such hospital, or

"(II) the amounts determined for the hospital under division (I) if it had been classified in the bed-size category which contains hospitals closest in bed-size to such hospital's bed-size (with a hospital which has a bed-size that falls halfway between two such categories being considered in the category which contains hospitals with the greater number of beds), but not exceeding the hospital's actual routine operating costs; and

"(ii) in the case of a hospital which has actual routine operating costs which are less than that hospital's adjusted pier diem target rate for routine operating costs, to (I) the amount of the hospital's actual routine operating costs, plus (II) the smaller of (a) 5 percent of the hospital's adjusted per diem target rate for routine operating costs, or (b) 50 percent of the amount by which the hospital's adjusted per diem target rate for routine operating costs exceeds the hospital's actual routine operating costs.

"(C) Any hospital (other than a newly opened hospital) excluded by the Secretary under paragraph (3)(D)(ii), shall be reimbursed for routine operating costs on the basis of the lesser of (i) actual costs or (ii) the reimbursement determined under this subsection.

"(D) On or before April 1 of the year in which the Secretary determines the amount of the average per diem operating cost for each hospital category and the adjusted per diem target rate for each hospital, the Secretary shall publish the determinations, and he shall notify the hospital administrator and the administrative governing body of each hospital with respect to all aspects of the determination which affect the hospital.

"(E) If a hospital is determined by the Secretary to be—

"(i) located in an underserved area where hospital services are not otherwise available,

"(ii) certified as being currently necessary by an appropriate planning agency, and

"(iii) underutilized,

the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to the underutilized capacity.

"(F) If a newly opened hospital is determined by the Secretary to have greater routine operating costs as a result of the cost patterns associated with newly opened hospitals, the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to such patterns. For purposes of this subparagraph a 'newly opened hospital' means a hospital which has not satisfied the requirements of paragraphs (1) and (7) of subsection (e) of this section (under present or previous ownership) for at least twenty-four months prior to the start of such hospital's accounting year.

"(G) If a hospital is determined by the Secretary to have greater routine operating costs as a result of changes in service on account of consolidation, sharing, or addition of services, where such consolidation, sharing, or addition has been approved by the appropriate State Health Planning and Development Agency or Agencies, the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to such changes in service.

"(H) If a hospital satisfactorily demonstrates to the Secretary that, in the aggregate, its patients require a substantially greater intensity of care than generally is provided by the other hospitals in the same category, resulting in unusually greater routine operating costs, then the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to the greater intensity of care required. To the extent that a hospital can demonstrate that it experiences routine operating costs in excess of such costs for hospitals having a

reasonably similar mix of patients on account of consistently shorter lengths-of-stay in such hospital, which result from the greater intensity of care provided by such hospital, the excess routine operating costs shall be considered attributable to the greater intensity of care required.

"(I) The Secretary may further increase the adjusted per diem target rate applicable in Alaska and Hawaii to reflect the higher prices prevailing in such States.

"(J) Where the Secretary finds that a hospital has manipulated its patient mix, or patient flow, or provides less than the normal range and extent of patient services, or that an unusually large proportion of routine nursing service is provided by private-duty nurses, the routine operating costs of that hospital shall be deemed equal to the lesser of (i) the amount determined without regard to this subsection, or (ii) the amount determined under subparagraph (B).

"(5) Where any provisions of this subsection are inconsistent with section 1861(v), this subsection supersedes section 1861(v).

"(6)(A) Notwithstanding any other provision of this Act, in the case of any State which has established a reimbursement system for hospitals, hospital reimbursement in that State under this title and under the State plan approved under title XIX shall, with respect to the services covered by such system, be based on that State system, if the Secretary finds that—

"(i) the State has mandated the reimbursement system and it at least applies to the same hospitals in the State, and to the same costs, as the Federal reimbursement reform program established by this subsection;

"(ii) every hospital in the State with which there is such a provider agreement conforms to the accounting and uniform reporting requirements of section 1121 of this Act, and furnishes any appropriate reports that the Secretary may require; and

"(iii) such State demonstrates to his satisfaction that the total amount payable, with respect to inpatient hospital costs, in the State under this title and under the State plan approved under title XIX will be equal to or less than the amount which would otherwise be payable for such costs under this title and such State plan.

If the Secretary finds that any of the above conditions in a State which previously met them have not been met for a two-year period, the Secretary shall, after due notice, reimburse hospitals in that State according to the provisions of this Act (other than this paragraph) unless he finds that unusual, justifiable and nonrecurring circumstances led to the failure to comply.

"(B) If the Secretary finds that, during any two-year period during which hospital reimbursement under this title and under the State plan approved under title XIX was based on a State system as provided in subparagraph (A), the amount payable by the Federal Government under such titles for inpatient hospital costs in such State was in excess of the amount which would have been payable for such costs in such State if reimbursement had not been based on the State system (as estimated by the Secretary), the adjusted per diem target rate for routine operating costs (as determined under the preceding paragraphs of this subsection) for hospitals in such State shall be reduced (by not more than 1 percent in any year) until the Federal Government has recouped an amount equal to such excess payment amount.

"(C)(i) The Secretary shall pay to any State in which hospital reimbursement under this title is based on a State system as provided in subparagraph (A), an amount which bears the same ratio to the total cost of administering the State system (including the cost of initially putting the system into operation) as the amount paid by the Federal Government under this title in such State for inpatient hospital costs bears to the total amount of inpatient hospital costs in such State which are subject to the State system.

"(ii) Payments under clause (i) shall be made from funds in the Federal Hospital Insurance Trust Fund.

"(iii) An amount which bears the same ratio to the total cost of administering the State system (including the cost of initially putting the system into operation) as the amount paid under the State plan approved under title XIX in such State for inpatient hospital costs bears to the total amount of inpatient hospital costs in such State which are subject to the State system, shall, for purposes of title XIX, be considered to be an amount expended for the administration of such State plan.".

(c) Part A of title XI of the Social Security Act is amended by adding after section 1126 the following new section:

"HEALTH FACILITIES COSTS COMMISSION

"SEC. 1127. (a) There is established a commission to be known as the Health Facilities Costs Commission (hereinafter in this section referred to as the 'Commission').

"(b)(1) The Commission shall be composed of eleven members appointed by the Secretary—

"(A) three of whom are individuals who are representatives of hospital administrators,

"(B) two of whom are practicing physicians in hospitals, and

"(C) six of whom are consumers of health care, and each of whom, as a result of training, experience, or attainments, is exceptionally well qualified to assist in serving and carrying out the functions of the Commission. One of the members of the Commission shall, at the time of appointment, be designated as Chairman of the Commission. The Secretary shall first appoint members to the Commission not later than January 1, 1979.

"(2) No individual who is a full-time employee or officer of the United States may be appointed as a member of the Commission.

"(3) The Chairman of the Commission shall designate a member of the Commission to act as Vice Chairman of the Commission.

"(4) A majority of the members of the Commission shall constitute a quorum, but a lesser number may conduct hearings.

"(5) A vacancy in the Commission shall not affect its powers, but shall be filled in the same manner as that herein provided for the appointment of the member first appointed to the vacant position.

"(6) Members of the Commission shall be appointed for a term of four years, except that the Secretary shall provide for such shorter terms of some of the members first appointed so as to stagger the date of expiration of members' terms of office.

"(7) No individual may be appointed to serve more than two terms as a member of the Commission.

"(8) Each member of the Commission shall be entitled to per diem compensation at rates fixed by the Secretary, but not more than the current per diem equivalent of the annual rate of basic pay in effect for grade GS–18 of the General Schedule for each day (including travel time) during which the member is engaged in the actual performance of duties vested in the Commission, and all members of the Commission shall be allowed, while away from their homes or regular places of business in the performance of service for the Commission, travel expenses (including per diem in lieu of subsistence) in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

"(9) The Commission shall meet at the call of the Chairman, or at the call of a majority of the members of the Commission; but meetings of the Commission shall be held not less frequently than once in each calendar month which begins after a majority of the authorized membership of the Commission has first been appointed.

"(c) It shall be the duty and function of the Commission to conduct a continuing study, investigation, and review of the reimbursement of hospitals for care provided by them to individuals covered under title XVIII or under State plans approved under title XIX, with particular attention to the criteria established by section 1861(bb) (hereinafter in this section referred to as the 'reimbursement reform program') with a view to devising and recommending, from time to time but not less frequently than once each calendar year (beginning with the calendar year 1979), to the Secretary and the Congress measures—

"(A) for the improvement of the reimbursement reform program, and

"(B) for the possible application (i) of the reimbursement reform program to providers of service other than hospitals, and (ii) of classification and comparison techniques similar to those applied to adjusted routine costs of hospitals under section 1861(5b) to other costs of hospitals and other providers of services.

"(d) The Secretary shall provide such technical, secretarial, clerical, and other assistance as the Commission may need.

"(e) The Commission may secure directly from any department or agency of the United States such data and information as may be necessary to enable it to carry out its duties under this section. Upon request of the Chairman of the Commission, any such department or agency shall furnish any such data or informatoin to the Commission.

"(f) There are hereby authorized to be appropriated such sums as may be necessary to carry out this section.

"(g) Section 14 of the Federal Advisory Committee Act shall not apply to the Commission.".

(d)(1) Section 1866(a)(1) of the Social Security Act is amended—

(A) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof ", and"; and

(B) by inserting after subparagraph (D) the following new subparagraph:

"(E) not to increase amounts due from any individual, organization, or agency in order to offset reductions made under section 1861 (bb) in the amount paid, or expected to be paid, under this title.".

(2) Section 1902(a)(27) of the Social Security Act is amended by striking out "and" at the end of clause (A) and by inserting before the semicolon at the end of clause (B) the following: ", and (C) not to increase amounts due from any individual, organization, or agency in order to offset reductions made pursuant to the requirements contanied in section 1902(a)(13)(D) in the amount paid, or expected to be paid under the State plan".

(e) Section 1902(a)(13)(D) of the Social Security Act is amended to read as follows:

"(D) for payment of the reasonable cost of inpatient hospital services provided under the plan, applying the methods specified in section 1861(v) and section 1861(bb), which are consistent with section 1122; and".

PAYMENTS TO PROMOTE CLOSING AND CONVERSION OF UNDERUTILIZED FACILITIES

SEC. 3. (a) Part A of title XI of the Social Security Act is amended by adding after section 1127 (as added by section 2 of this Act) the following new section:

"PAYMENTS TO PROMOTE CLOSING AND CONVERSION OF UNDERUTILIZED FACILITIES

"SEC. 1128. (a)(1)(A) Before the end of the third full month following the month in

which this section is enacted, the Secretary shall establish a Hospital Transitional Allowance Board (hereinafter in this section referred to as the 'Board'). The Board shall have five members, appointed by the Secretary without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, who are knowledgeable about hospital planning and hospital operations.

"(B) Members of the Board shall be appointed for three-year terms, except some initial members shall be appointed for shorter terms to permit staggered terms of office.

"(C) Members of the Board shall be entitled to per diem compensation at rates fixed by the Secretary, but not more than the current per diem equivalent at the time the service involved is rendered for grade GS-18 under section 5332 of title 5, United States Code.

"(D) The Secretary shall provide such technical, secretarial, clerical, and other assistance as the Board may need.

"(2) The Board shall receive and act upon applications by hospitals, certified for participation (other than as 'emergency hospitals') under titles XVIII and XIX, for transitional allowances.

"(b) For purposes of this section—

"(1) The term 'transitional allowance' means an amount which—

"(A) shall, solely by reason of this section, be included in a hospital's reasonable cost for purposes of calculating payments under the programs authorized by titles V, XVIII, and XIX of this Act; and

"(B) in accordance with this section, is established by the Secretary for a hospital in recognition of a reimbursement detriment (as defined in paragraph (3)) experienced because of a qualified facility conversion (as defined in paragraph (2)).

"(2) The term 'qualified facility conversion' means closing, modifying, or changing the usage of an underutilized hospital facility which is expected to benefit the programs authorized under title V, title XVIII and title XIX by (A) eliminating excess bed capacity, (B) discontinuing an underutilized service for which there are adequate alternative sources, or (C) substituting for the underutilized service some other service which is needed in the area and which is consistent with the findings of an appropriate health planning agency.

"(3) A hospital which has carried out a qualified facility conversion and which continues in operation will be regarded as having experienced a 'reimbursement detriment'—

"(A) to the extent that, solely because of the conversion, there is a reduction in that portion of the hospital's costs attributable to capital assets which are taken into account in determining reasonable cost for purposes of determining amount of payment to the hospital under title V, title XVIII, or a State plan approved under title XIX;

"(B) if the conversion results, on an interim basis, in increased operating costs, to the extent that operating costs exceed amounts ordinarily reimbursable under title V, title XVIII and the State plan approved under title XIX; or

"(C) in the case of complete closure of a private nonprofit hospital, or local governmental hospital, other than for replacement of the hospital, to the extent of actual debt obligations previously recognized as reasonable for reimbursement, where the debt remains outstanding, less any salvage value.

"(c)(1) Any hospital may file an application with the Board (in a form and including data and information as the Board, with the approval of the Secretary, may require) for a transitional allowance with respect to any qualified conversion which was formally initiated after December 31, 1978. The Board, with the approval of the Secretary, may also establish procedures, consistent with this section, by means of which a finding of a reimbursement detriment may be made prior to the actual conversion.

"(2) The Board shall consider any application filed by a hospital, and if the Board finds that—

"(A) the facility conversion is a qualified facility conversion, and

"(B) the hospital is experiencing or will experience a reimbursement detriment because it carried out the qualified facility conversion,

the Board shall transmit to the Secretary its recommendation that the Secretary establish a transitional allowance for the hospital in amounts reasonably related to prior or prospective use of the facility under title V, title XVIII and the State plan approved under title XIX, for a period, not to exceed twenty years as specified by the Board, and, if the Board finds that the criteria in subparagraphs (A) and (B) are not met, it shall advise the Secretary not to establish a transitional allowance for that hospital. For an approved closure under subsection (b)(3)(C) the Board may recommend or the Secretary may approve, a lump-sum payment in lieu of periodic allowances, where such payment would constitute a more efficient and economic alternative.

"(3)(A) The Board shall notify a hospital of its findings and recommendations.

"(B) A hospital dissatisfied with a recommendation may obtain an informal or formal hearing, at the discretion of the Secretary by filing (in the form and within a time period established by the Secretary) a request for a hearing.

"(4)(A) Within thirty days after receiving a recommendation from the Board respecting a transitional allowance or, if later, within thirty days after a hearing, the Secretary shall make a final determination whether, and if so in what amount and for what period of time, a transitional allowance will be granted to a hospital. A final determination of the Secretary shall not be subject to judicial review.

"(B) The Secretary shall notify a hospital and any other appropriate parties of the determination.

"(C) Any transitional allowance shall take effect on a date prescribed by the Secretary, but not earlier than the date of completion of the qualified facility conversion. A transitional allowance shall be included as an allowable cost item in determining the reasonable cost incurred by the hospital in providing services for which payment is authorized under this Act, except that the transitional allowance shall not be considered in applying limits to costs recognized as reasonable pursuant to the third sentence of section 1861(v)(1) and section 1861(bb) of this Act, or in determining the amount to be paid to a provider pursuant to section 1814(b), section 1933(a)(2), section 1910(1)(3), and section 506(f)(3) of this Act.

"(d) In determining the reasonable cost incurred by a hospital with respect to which payment is authorized under a State plan approved under title V or title XIX, any transitional allowance shall be included as an allowable cost item.

"(e)(1) The Secretary is authorized to establish transitional allowances only as provided in paragraphs (2) and (3).

"(2) Prior to January 1, 1982, the Secretary is authorized to establish a transitional allowance for not more than fifty hospitals.

"(3) On and after January 1, 1982, the Secretary is authorized to establish a transitional allowance for any hospital which qualifies for such an allowance under the provisions of this section.

"(4) On or before January 1, 1981, the Secretary shall report to the Congress evaluating the effectiveness of the program established under this section fncluding appropriate recommendations.".

(b) The amendments made by subsection (a) shall apply only to services furnished by a hospital during any accounting year beginning on or after October 1, 1978.

FEDERAL PARTICIPATION IN HOSPITAL CAPITAL EXPENDITURES

SEC. 4. (a) Section 1122(c) of the Social Security Act is amended to read as follows:

"(c) The reasonable expenses incurred in carrying out the activities referred to in subsection (b) by the designated planning agencies (disregarding any expenses for which the agency is authorized to be reimbursed from other sources) shall be payable from—

"(1) funds in the Federal Hospital Insurance Trust Fund,

"(2) funds in the Federal Supplementary Medical Insurance Trust Fund, and

"(3) funds appropriated to carry out the health care provisions of the several titles of this Act,

in such amounts as the Secretary finds result in a proper allocation. The Secretary finds result in a proper allocation. The Secretary shall transfer money between the funds as may be appropriate to settle accounts between them. The Secretary shall pay the designated planning agencies without requiring contribution of funds by any State or political subdivision thereof.".

(b) Section 1122(d) of such Act is amended to read as follows:

"(d)(1) Except as provided in paragraph (2), if the Secretary determines that—

"(A) the designated planning agency had not approved the proposed expenditure; and

"(B) the designated planning agency had granted to the person proposing the capital expenditure an opportunity for a fair hearing with respect to the findings;

then, in determining Federal payments under titles V, XVIII, and XIX for services furnished in the health care facility for which the capital expenditure is made, the Secretary shall not include any amount attributable to depreciation, interest on borrowed funds, a return on equity capital (in the case of proprietary facilities), other expenses related to the capital expenditure, or for direct operating costs, to the extent that they can be directly associated with the capital expenditure, unless the designated planning agency for the States determines, in accordance with an agreement entered into under subsection (b) or under a certificate of need program which is applicable to such expenditure and which meets the requirements of title XV of the Public Health Service Act, that such capital expenditures are needed and meet criteria adopted by such agency. In the case of a proposed capital expenditure in a standard metropolitan statistical area which encompasses more than one jurisdiction, that expenditure shall require approval of the designated planning agency of each jurisdiction, which shall jointly review the proposal. Where the designated planning agencies do not unanimously agree, the proposed expenditures shall be deemed disapproved. Where the designated planning agencies do not act to approve or disapprove the proposed expenditure within one hundred and eighty days after the submission of the request for approval, the proposed expenditure shall be deemed approved. Any deemed approval or disapproval shall be subject to review and reversal by the Secretary following a request, submitted to him within sixty days of the deemed approval or disapproval, for a review and reconsideration based upon the record. With respect to any organization which is reimbursed on a per capita, fixed fee, or negotiated rate basis, in determining the Federal payments to be made under titles V, XVIII and XIX, the Secretary shall exclude an amount reasonably equivalent to the amount which would otherwise be excluded under this subsection if payment were made on other than a per capita, fixed fee, or negotiated rate basis.

"(2) If the Secretary, after submitting the matters involved to the advisory council established under subsection (i), determines that an exclusion of expenses related to any capital expenditure would discourage the operation or expansion of any health care facility or health maintenance organization which has demonstrated to his satisfaction proof of its capability to provide comprehensive health care services (including institutional services) effectively and economically, or would be inconsistent with effective organization and delivery of health services, or the effective administration of title V, XVIII, or XIX), he shall not exclude the expenses pursuant to paragraph (1).".

(c) Section 1122(g) of the Social Security Act is amended to read as follows:

"(g) For purposes of this section, a 'capital expenditure' is an expenditure which, under generally accepted accounting principles, is not properly chargeable as an expense of operation and maintenance and which (1) exceeds $150,000, (2) changes the bed capacity of the facility, or (3) substantially changes the services of the facility, including conversion of existing beds to higher cost usage. The cost of studies, surveys, designs, plans, working drawings, specifications, and other activities essential to the acquisition, improvement, expansion, or replacement of the plant and equipment shall be included in determining whether the expenditure exceeds $150,000. For purposes of this section, 'capital expenditure' does not include an expenditure for the purpose of acquiring (either by purchase or under lease or comparable arrangement) an existing health care facility, the utilized services and bed capacity of which are not increased as a result of the acquisition.".

(d) Section 1861(z) of the Social Security Act is amended to read as follows:

"Institutional Planning

"(z) An overall plan and budget of a hospital, skilled nursing facility, or home health agency shall—

"(1) provide for an annual operating budget which includes all anticipated income and expenses related to items which would, under generally accepted accounting principles, be considered income and expense items (except that nothing in this paragraph shall require that there be prepared in connection with any budget an item-by-item identification of the components of each type of anticipated expenditure or income);

"(2) provide for a capital expenditures plan for at least a five-year period (including the year to which the operating budget applies) which identifies in detail the sources of financing and the objectives of each anticipated expenditure in excess of $150,000 related to the acquisition of land, improvement of land, buildings, or equipment, and the replacement, modernization, or expansion of the buildings and equipment, and which would, under generally accepted accounting principles, be considered capital items, and such capital expenditures plan shall be a matter of public record and available in readily accessible form and fashion;

"(3) provide for annual review and updating; and

"(4) be prepared, under the direction of the governing body of the institution or agency, by a committee consisting of representatives of the governing body, administrative staff, and medical staff (if any) of the institution or agency.".

(e) The amendments made by this section shall become effective on January 1, 1979, and shall be effective with respect to determinations made by the Secretary on and after such date.

AGREEMENTS WITH PHYSICIANS TO ACCEPT ASSIGNMENTS

SEC. 5. (a) Title XVIII of the Social Security Act is amended by adding the following new section:

"AGREEMENTS WITH PHYSICIANS TO ACCEPT ASSIGNMENTS

"SEC. 1868. (a) For purposes of this section the term 'participating physician' means a doctor of medicine or osteopathy who has in effect an agreement with the Secretary by which he agrees to accept an assignment of claim (as provided for in section 1842(b)(3)(B)(ii)) for each physicians' service (other than those excluded from coverage by section 1862) performed by him in the United States for an individual enrolled under part B. The assignment shall be in a form prescribed by the Secretary. The agreement may be terminated by either party upon 30-days' notice to the other, filed in a manner prescribed by the Secretary.

"(b) To expedite processing of claims from participating physicians, the Secretary shall establish procedures and develop appropriate forms under which—

"(1) each physican will submit his claims on one of alternative simplified approved bases including multiple listing of patients, and the Secretary shall act to assure that these claims are processed expeditiously, and

"(2) the physician shall obtain from each patient enrolled under part B (except in cases where the Secretary finds it impractical for the patient to furnish it) and shall make available at the Secretary's request, a signed statement by which the patient (A) agrees to make an assignment with respect to all services furnished by the physician and (B) authorizes the release of any medical information needed to review claims submitted by the physician.

"(c)(1) Participating physicians shall be paid administrative cost-savings allowances (as determined under paragraph (2)) in addition to the reasonable charges that are payable.

"(2) The administrative cost-savings allowance shall be $1 for each claim the participating physician submits in accordance with the simplified billing procedure referred to in subsection (b) and these payments shall be treated as an administrative expense to the medical insurance program, except that—

"(A) not more than $1 shall be payable to a physician for claims for services furnished to any particular patients within any 7-day period;

"(B) no administrative cost-savings allowance shall be payable for services performed for a hospital inpatient or outpatient unless:

"(i) the services are surgical services, anesthesia services, or services performed by a physician who, as an attending or consulting physician, personally examined the patient and whose office or regular place of practice is located outside a hospital, and

"(ii) the physician ordinarily bills directly (and not through such hospital) for his services; and

"(C) no administrative cost-savings allowance shall be payable for services which consist solely of laboratory or X-ray services which are for hospital inpatients or outpatients or are performed outside the office of the participating physician.".

(b) The amendments made by subsection (a) shall become effective on July 1, 1979.

CERTAIN SURGICAL PROCEDURES PERFORMED ON AN AMBULATORY BASIS

SEC. 6. Part B of title XVIII of the Social Security Act is amended by adding at the end thereof the following new section:

"SPECIAL PROVISONS RELATING TO CERTAIN SURGICAL PROCEDURES PERFORMED ON AN AMBULATORY BASIS

"SEC. 1845. (a) The Secretary shall, in consultation with the National Professional Standards Review Council and appropriate medical organizations, specify those surgical procedures which can be safely and appropriately performed either in a hospital on an inpatient basis or on an ambulatory basis—

"(1) in a physician's office; or

"(2) in an ambulatory surgical center or hospital.

"(b)(1) If a physician performs in his office a surgical procedure specified by the Secretary pursuant to subsection (a)(1) on an individual insured for benefits under this part, he shall, notwithstanding any other provision of this part, be entitled to have payment made under this part equal to—

"(A) 100 percent of the reasonable charge for the services involved with the performance of such procedure (including all pre- and post-operative physicians' services performed in connection therewith), plus

"(B) the amount established by the Secretary pursuant to paragraph (2),

but only if the physician agrees with such individual to be paid on the basis of an assignment under the terms of which the reasonable charge for such services is the full charge therefor.

"(2) The Secretary shall establish with respect to each surgical procedure specified pursuant to subsection (a)(1), an amount established with a view to according recognition to the special costs, in excess of usual overhead, which physicians incur which are attributable to securing, maintaining, and staffing the facilities and ancillary services appropriate for the performance of such procedure in the physician's office, and to assuring that the performance of such procedure in the physician's office will involve substantially less total cost than would be involved if the procedure were performed on an inpatient basis in a hospital. The amount so established with respect to any surgical procedure periodically shall be reviewed and revised and may be adjusted, when appropriate, by the Secretary to take account of varying conditions in different areas.

"(c)(1) Payment under this part may be made to an ambulatory surgical center for ambulatory facility services furnished in connection with any surgical procedure, specified by the Secretary pursuant to subsection (a)(2), which is performed on an individual insured for benefits under this part in an ambulatory surgical center, which meets such health, safety, and other standards as the Secretary shall by regulations prescribe, if such surgical center agrees to accept, in full payment of all services furnished by it in connection with such procedure, the amount established for such procedure pursuant to paragraph (2).

"(2) The Secretary shall establish with respect to each surgical procedure specified pursuant to subsection (a)(2), a reimbursement amount which is payable to an ambulatory surgical center for its services furnished in connection with such procedure. The amount established for any such surgical procedure shall be established with a view to according recognition to the costs incurred by such centers generally in providing the services involved in connection with such procedure, and to assuring that the performance of such procedure in such a center involves less cost than would be involved if such procedure were performed on an inpatient basis in a hospital. The amount so established with respect to any surgical procedure shall periodically be reviewed and revised and may be adjusted by the Secretary, when appropriate, to take account of varying conditions in different areas.

"(3) If the physician, performing a surgical procedure (specified by the Secretary under subsection (a)(2)), in a hospital on an outpatient basis or in an ambulatory surgical center with respect to which payment is authorized under the preceding provisions of this subsection or a physician performing physicians' services in such center or hospital directly related to such surgical procedure, agrees to accept as full payment for all serv-

ices performed by him in connection with such procedure (including pre- and post-operative services) an amount equal to 100 percent of the reasonable charge for such services, he shall be paid under this part for such services an amount equal to 100 percent of the reasonable charge for such services.

"(d)(1) The Secretary is authorized by regulations to provide that in case a surgical procedure specified by the Secretary pursuant to subsection (a)(2) is performed on an individual insured for benefits under this part in an ambulatory surgical center which meets such health, safety, and other standards as the Secretary shall by regulations prescribe, there shall be paid with respect to the services furnished by such center and with respect to all related services (including physicians' services, laboratory, X-ray, and diagnostic services) a single all-inclusive fee established pursuant to paragraph (2), if all parties furnishing all such services agree to accept such fee (to be divided among the parties involved in such manner as they shall have previously agreed upon) as full payment for the services furnished.

"(2) In implementing this subsection, the Secretary shall establish with respect to each surgical procedure specified pursuant to subsection (a)(2) the amount of the all-inclusive fee for such procedure, taking into account such factors as may be appropriate. The amount so established with respect to any surgical procedure shall periodically be reviewed and revised and may be adjusted, when appropriate, to take account of varying conditions in different areas.

"(e) The provisions of section 1833 (a) and (b) shall not be applicable to expenses attributable to services to which subsection (b) is applicable, to ambulatory facility services (furnished by an ambulatory surgical center) to which the provisions of subsection (c) (1) and (2) are applicable, to physicians' services to which the provisions of subsection (c)(3) are applicable, or to services to which the provisions of subsection (d) are applicable.".

CRITERIA FOR DETERMINING REASONABLE CHARGE FOR PHYSICIANS' SERVICES

SEC. 7. (a) Section 1842(b) of the Social Security Act is amended—

(1) by redesignating paragraphs (4) and (5) as paragraphs (5) and (6);

(2) by striking out so much of paragraph (3) as follows the first sentence; and

(3) by inserting after paragraph (3) the following new paragraph:

"(4)(A) In determining the reasonable charge for services for purposes of paragraph (3) (including the services of any hospital-associated physicians), there shall be taken into consideration the customary charges for similar services generally made by the physician or other person furnishing such services, as well as the prevailing charges in the locality for similar services.

"(B)(i) Except as otherwise provided in clause (iii), no charge may be determined to be reasonable in the case of bills submitted or requests for payment made under this part after December 31, 1970, if it exceeds the higher of (I) the prevailing charge recognized by the carrier and found acceptable by the Secretary for similar services in the same locality in administering this part on December 31, 1970, or (II) the prevailing charge level that, on the basis of statistical data and methodology acceptable to the Secretary, would cover 75 percent of the customary charges made for similar services in the same locality during the last preceding calendar year elapsing prior to the start of the fiscal year in which the bill is submitted or the request for payment is made.

"(ii) In the case of physician services, the prevailing charge level determined for purposes of clause (i)(II) for any fiscal year beginning after June 30, 1973, may not (except as otherwise provided in clause (iii)) exceed (in the aggregate) the level determined under such clause for the fiscal year ending June 30, 1973, except to the extent that the Secretary finds, on the basis of appropriate economic index data, that such higher level is justified by economic changes. Moreover, for any twelve-month period beginning on July 1 of any year (beginning with 1979), no prevailing charge level for physicians' services shall be increased to the extent that it would exceed by more than one-third the statewide prevailing charge level (as determined under subparagraph (E)) for that service.

"(iii) Notwithstanding the provisions of clauses (i) and (ii) of this subparagraph, the prevailing charge level in the case of a physician service in a particular locality determined pursuant to such clauses for the fiscal year beginning July 1, 1975, shall, if lower than the prevailing charge level for the fiscal year ending June 30, 1975, in the case of a similar physician service in the same locality by reason of the application of economic index data, be raised to such prevailing charge level for the fiscal year ending June 30, 1975.

"(C) In the case of medical services, supplies, and equipment (including equipment servicing) that, in the judgment of the Secretary, do not generally vary significantly in quality from one supplier to another, the charges incurred after December 31, 1972, determined to be reasonable may not exceed the lowest charge levels at which such services, supplies, and equipment are widely and consistently available in a locality except to the extent and under circumstances specified by the Secretary. With respect to power-operated wheelchairs for which payment may be made in accordance with section 1861(s)(6), charges determined to be reasonable may not exceed the lowest charge at which power-operated wheelchairs are available in the locality.

"(D) The requirement in paragraph (3)(B) that a bill be submitted or request for payment be made by the close of the following calendar year shall not apply if (i) failure to submit the bill or request the payment by the close of such year is due to the error or misrepresentation of an officer, employee, fiscal intermediary, carrier, or agent of the Department of Health, Education, and Welfare performing functions under this title and acting within the scope of his or its authority, and (ii) the bill is submitted or the payment is requested promptly after such error or misrepresentation is eliminated or corrected.

"(E) The Secretary shall determine separate statewide prevailing charge levels for each State that, on the basis of statistical data and methodology acceptable to the Secretary, would cover 50 percent of the customary charges made for similar services in the State during the last preceding calendar year elapsing prior to the start of the fiscal year in which the bill is submitted or the request for payment is made. In States with more than one carrier, the statewide prevailing charge level shall be the weighted average of the fiftieth percentiles of the customary charges of each carrier.

"(F) Notwithstanding any other provision of this paragraph, any charge for any particular service or procedure performed by a doctor of medicine or osteopathy shall be regarded as a reasonable charge if—

"(i) the service or procedure is performed in an area which the Secretary has designated as a physician shortage area,

"(ii) the physician has a regular practice in the physician shortage area,

"(iii) the charge does not exceed the prevailing charge level as determined under subparagraph (B), and

"(iv) the charge does not exceed the amount generally charged by such physician for similar services.".

(b) Sections 506(f)(1) and 1903(i)(1) of the Social Security Act are each amended by striking out "the fourth and fifth sentences of section 1842(b)(3)" and inserting in lieu thereof in each instance "subparagraphs (B)(ii), (B)(iii), (C), and (F) of section 1842(b)(4)".

(c) The amendments made by this section shall become effective on July 1, 1979.

PAYMENTS FOR CERTAIN ANTIGENS UNDER PART B OF MEDICARE

SEC. 8. (a) Section 1861(s)(2) of the Social Security Act is amended—

(1) by striking out "and" at the end of clause (E),

(2) by inserting "and" at the end of clause (F), and

(3) by adding after clause (F) the following new clause:

"(G) antigens (subject to reasonable quantity limitations determined by the Secretary) prepared by an allergist for a particular patient, including antigens he prepares which are forwarded to another qualified person for administration to the patient by or under the supervision of another physician;".

(b) The amendments made by subsection (a) shall apply to items furnished after the month of enactment of this Act.

PAYMENT UNDER MEDICARE OF CERTAIN PHYSICIANS' FEES ON ACCOUNT OF SERVICES FURNISHED TO A DECEASED INDIVIDUAL

SEC. 9. (a) Section 1870(f) of the Social Security Act is amended by striking out the matter following clause (2) thereof and inserting in lieu thereof the following: "payment for such services shall be made (but only in such amount and subject to such conditions as would have been applicable if the individual who received the services had not died) to—

"(A) the physician or other person who provided such services, but only on the condition that such physician or person agrees that the reasonable charge is the full charge for the services, or

"(B) the spouse or other legally designated representative of such individual, but only if (i) the condition specified in subparagraph (A) is not met, and (ii) such spouse or representative requests (in such form and manner as the Secretary shall by regulations prescribe) that payment be made under this subparagraph.".

(b) The amendment made by subsection (a) shall apply only to payments made after the month of enactment of this Act.

HOSPITAL PROVIDERS OF LONG-TERM CARE SERVICES

SEC. 10. (a) Section 1861 of the Social Security Act is amended by adding after subsection (bb) (as added by section 2 of this Act) the following:

"Hospital Providers of Extended Care Services

"(cc)(1)(A) Any hospital (other than a hospital which has in effect a waiver of the requirement imposed by subsection (e)(5)) which has an agreement under section 1866 may (subject to paragraph (2)) enter into an agreement with the Secretary under which its inpatient hospital facilities may be used for the furnishing of services of the type which, if furnished by a skilled nursing facility, would constitute posthospital extended care services.

"(B)(i) Notwithstanding any other provision of this title, payment to any hospital for services furnished under an agreement entered into under this subsection shall be based upon the reasonable cost of the services as determined under this subparagraph.

"(ii) The reasonable cost of the services shall consist of the reasonable cost of routine services and ancillary services. The reasonable cost of routine services furnished during any calendar year by a hospital under an agreement under this subsection shall equal the product of the number of patient-days during the year for which the services were furnished and the average reasonable cost

per patient-day. The average reasonable cost per patient-day shall be established as the average rate per patient-day paid for routine services during the previous calendar year under the State plan (of the State in which the hospital is located) approved under title XIX to skilled nursing facilities located in such State and which meet the requirements specified in section 1902(a)(28). The reasonable cost of ancillary services shall be determined in the same manner as the reasonable cost of ancillary services provided as inpatient hospital services.

"(2) The Secretary shall not enter into an agreement under this subsection with any hospital unless—

"(A) the hospital is located in a rural area and has less than 50 beds, and

"(B) the hospital has been granted a certificate of need for the provision of long-term care services from the agency of the State (which has been designated as the State health planning and development agency under an agreement pursuant to section 1521 of the Public Health Service Act) in which the hospital is located.

"(3) An agreement with a hospital entered into under this section shall, except as otherwise provided under regulations of the Secretary, be of the same duration and subject to termination on the same conditions as are agreements with skilled nursing facilities under section 1866, and shall, where not inconsistent with any provision of this subsection, impose the same duties, responsibilities, conditions, and limitations, as those imposed under such agreements entered into under section 1866; except that no such agreement with any hospital shall be in effect for any period during which the hospital does not have in effect an agreement under section 1866, or during which there is in effect for the hospital a waiver of the requirement imposed by subsection (e)(5). A hospital with respect to which an agreement has been terminated shall not be eligible to undertake a new agreement until a two-year period has elapsed from the termination date.

"(4) Any agreement with a hospital under this subsection shall provide that payment for services will be made only for services for which payment would be made as post hospital extended care services if those services had been furnished by a skilled nursing facility under an agreement entered into under section 1866, and any individual who is furnished services for which payment may be made under an agreement shall, for purposes of this title (other than this subsection), be deemed to have received posthospital extended care services in like manner and to the same extent as if the services furnished to him had been posthospital extended care services furnished by a skilled nursing facility under an agreement under section 1866.

"(5) During a period for which a hospital has in effect an agreement under this subsection, in order to allocate routine costs between hospital and long-term care services for purposes of determining payment for inpatient hospital services (including the application of reimbursement limits specified in section 1861 (bb)), the total reimbursement received for routine services from all classes of long-term care patients, including title XVIII, the State plan approved under title XIX, and private pay patients, shall be subtracted from the hospital's total routine costs before calculations are made to determine title XVIII reimbursement for routine hospital services.

"(6) During any period during which an agreement is in effect with a hospital under this subsection, the hospital shall, for services furnished by it under the agreement, be considered to satisfy the requirements, otherwise required of a skilled nursing facility for purposes of the following provisions: sections 1814(a)(2)(C), 1814(a)(6), 1814(a)(7), 1814(h), 1861(a)(2), 18611, 1861(j) (except 1861(j)(12)), and 1861(n); and the Secretary shall specify any other provisions of this Act under which the hospital may be considered as a skilled nursing facility.

"(7) Within three years after the date of enactment of this subsection, the Secretary shall provide a report to the Congress containing an evaluation of the program established under this subsection concerning—

"(A) the effect of the agreements on availability and effective and economical provision of long-term care services;

"(B) whether the program should be continued; and

"(C) whether eligibility should be extended to other hospitals, regardless of bed size or geographic location, where there is a shortage of long-term care beds.".

(b) Title XIX of such Act is amended by adding at the end thereof the following new section:

"HOSPITAL PROVIDERS OF SKILLED NURSING AND INTERMEDIATE CARE SERVICES

"SEC. 1913. (a) Notwithstanding any other provision of this title, payment may be made, in accordance with this section, under an approved State plan for skilled nursing services and intermediate care services furnished by a hospital which has in effect an agreement under section 1861(cc).

"(b)(1) Payment to any such hospital, for any skilled nursing or intermediate care services furnished, shall be at a rate equal to the average rate per patient-day paid for routine services during the previous calendar year under the State plan to skilled nursing and intermediate care facilities located in the State in which the hospital is located. The reasonable cost of ancillary services shall be determined in the same manner as the reasonable cost of ancillary services provided for inpatient hospital services.

"(2) With respect to any period for which a hospital has in effect an agreement under section 1861(cc), in order to allocate routine costs between hospital and long-term care services, the total reimbursement for routine services received from all classes of long-term care patients, including title XVIII, the State plan, and private pay patients, shall be subtracted from the hospital total routine costs before calculations are made to determine reimbursement for routine hospital services under the State plan.".

(c) The amendments made by this section shall become effective on the date on which final regulations, promulgated by the Secretary to implement the amendments, are issued; and those regulations shall be issued not later than the first day of the sixth month following the month in which this Act is enacted.

REIMBURSEMENT RATES UNDER MEDICAID FOR SKILLED NURSING AND INTERMEDIATE CARE FACILITIES

SEC. 11. (a) Section 1902(a)(13)(E) of the Social Security Act is amended by inserting "(and which may, at the option of the State, include reasonable allowances for the facilities in the form of incentive payments related to efficient performance)" after "cost related basis".

(b) The amendment made by subsection (a) shall become effective on October 1, 1978.

MEDICAID CERTIFICATION AND APPROVAL OF SKILLED NURSING AND INTERMEDIATE CARE FACILITIES

SEC. 12. (a) (Section 1910 of the Social Security Act is amended to read as follows:

"CERTIFICATION AND APPROVAL OF SKILLED NURSING AND INTERMEDIATE CARE FACILITIES

"SEC. 1910. (a) The Secretary shall make an agreement with any State which is willing and able to do so whereby the State health agency or other appropriate State or local agencies (whichever are utilized by the Secretary pursuant to section 1864(a)) will be utilized to recommend to him whether an institution in the State qualifies as a skilled nursing facility (for purposes of section 1902(a)(28)) or an intermediate care facility (for purposes of section 1905(c)).

"(b) The Secretary shall advise the State agency administering the medical assistance plan of his approval or disapproval of any institution certified to him as a qualified skilled nursing or intermediate care facility for purposes of section 1902(a)(28) or section 1905(c) and specify for each institution the period (not to exceed twelve months) for which approval is granted, except that the Secretary may extend that term for up to two months, provided the health and safety of patients will not be jeopardized, if he finds that an extension is necessary to prevent irreparable harm to the facility or hardship to the facility's patients or if he finds it impracticable within the twelve-month period to determine whether the facility is complying with the provisions of this title and applicable regulations. The State agency may, upon approval of the Secretary, enter into an agreement with any skilled nursing or intermediate care facility for the specified approval period.

"(c) The Secretary may cancel approval of any skilled nursing or intermediate care facility at any time if he finds that a facility fails to meet the requirements contained in section 1902(a)(28) or section 1905(c), or if he finds grounds for termination of his agreement with the facility pursuant to section 1866(b). In that event the Secretary shall notify the State agency and the skilled nursing or intermediate care facility that approval of eligibility of the facility to participate in the programs established by this title and title XVIII shall be terminated at a time specified by the Secretary. The approval of eligibility of any such facility to participate in the programs may not be reinstated unless the Secretary finds that the reason for termination has been removed and there is reasonable assurance that it will not recur.

"(d) Effective July 1, 1979, no payment may be made to any State under this title for skilled nursing or intermediate care facility services furnished by any facility—

"(1) which does not have in effect an agreement with the State agency pursuant to subsection (b), or

"(2) with respect to which approval of eligibility to participate in the programs established by this title or title XVIII has been terminated by the Secretary and has not been reinstated, except that payment may be made for up to thirty days for skilled nursing or intermediate care facility services furnished to any eligible individual who was admitted to the facility prior to the effective date of the termination.

"(e) Any skilled nursing facility or intermediate care facility which is dissatisfied with any determination by the Secretary that it no longer qualifies as a skilled nursing facility or intermediate care facility for purposes of this title shall be entitled to a hearing by the Secretary to the same extent as is provided in section 205(b) and to judicial review of the Secretary's final decision after such hearing as is provided in section 205(g). Any agreement between such facility and the State agency shall remain in effect until the period for filing a request for a hearing has expired or, if a request has been filed, until a decision has been made by the Secretary; except that the agreement shall not be extended if the Secretary makes a written determination, specifying the reasons therefor, that the continuation of provider status constitutes an immediate and serious threat to the health and safety of patients, and the Secretary certifies that the facility has been notified of its deficiencies and has failed to correct them.".

(b) Section 1869(c) of the Social Security Act is amended by adding at the end thereof the following sentence: "If the Secretary's determination terminates a provider with an existing agreement pursuant to section 1866

(b)(2), or if such determination consists of a refusal to renew an existing provider agreement, the provider's agreement shall remain in effect until the period for filing a request for a hearing has expired or, if a request has been filed, until a final decision has been made by the Secretary; except that the agreement shall not be extended if the Secretary makes a written determination, specifying the reasons therefor, that the continuation of provider status constitutes an immediate and serious threat to the health and safety of patients and if the Secretary certifies that the provider has been notified of such deficiencies and has failed to correct them.".

(c) The amendments made by the preceding provisions of this section shall become effective on the date on which final regulations, promulgated by the Secretary to implement the amendments, are issued; and those regulations shall be issued not later than the first day of the sixth month following the month in which this Act is enacted.

(d) Title XIX of the Social Security Act is amended by adding after section 1910 thereof the following new section:

"CERTIFICATION AND APPROVAL OF RURAL HEALTH CLINICS

"SEC. 1910A. (a) Whenever the Secretary certifies a facility in a State to be a qualified rural health clinic under title XVIII, such facility shall be deemed to meet the standards for certification as a rural health clinic for purposes of providing rural health clinic services under this title.

"(b) The Secretary shall notify the State agency administering the medical assistance plan of his approval or disapproval of any facility in that State which has applied for certification by him as a qualified rural health clinic.".

(e) Section 1866(c)(2) of the Social Security Act is amended by striking out "1910(a)" and inserting in lieu thereof "1910".

VISITS AWAY FROM INSTITUTION BY PATIENTS OF SKILLED NURSING OR INTERMEDIATE CARE FACILITY

SEC. 13. (a) Section 1903 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(r) In the administration of this title, the fact that an individual who is an inpatient of a skilled nursing or intermediate care facility leaves to make visits outside the facility shall not conclusively indicate that he does not need services which the facility is designed to provide; however, the frequency and length of such visits shall be considered, together with other evidence, in determining whether the individual is in need of the facility's services.".

(b) The amendment made by subsection (a) shall become effective on October 1, 1978.

NOTIFICATION TO STATE OFFICIALS

SEC. 14. Part A of title XI of the Social Security Act is amended by adding after section 1128 (as added by section 3 of this Act) the following new section:

"NOTIFICATION TO STATE OFFICIALS

"SEC. 1129. If the Secretary notifies a State of any audit, quality control performance report, deficiency, or any reduction, termination, or increase in Federal matching, under the State plan for any program for which Federal payments are made under this Act, simultaneous notification shall also be made to the Governor of the State and the respective chairmen of the legislative and appropriation committees of that State's legislature having jurisdiction over the program affected.".

REPEAL OF SECTION 1867

SEC. 15. Section 1867 of the Social Security Act is repealed.

PROCEDURES FOR DETERMINING REASONABLE COST AND REASONABLE CHARGE

SEC. 16. (a) Part A of title XI of the Social Security Act is amended by adding after section 1129 (as added by section 14 of this Act) the following new section:

"EXCLUSION OF CERTAIN ITEMS IN DETERMINING REASONABLE COST AND REASONABLE CHARGE

"SEC. 1130. (a) Except as otherwise provided in subsection (b), in determining the amount of any payment under title XVIII, under a program established under title V, or under a State plan approved under title XIX of this Act, when the payment is based upon the reasonable cost or reasonable charge, no element comprising any part of the cost or charge shall be considered to be reasonable if, and to the extent that, such element is—

"(1) a commission, finder's fee, or for a similar arrangement, or

"(2) an amount payable for any facility (or part or activity thereof) under any rental or lease arrangement which is, directly or indirectly, determined, wholly or in part as a percentage, fraction, or portion of the charge or cost attributed to any health service (other than the element) or any health service including, but not limited to, the element.

"(b) The Secretary shall by regulations establish exceptions to the provisions of subsection (a) with respect to any element of cost or charge which consists of payments based on a percentage arrangement, if such element is otherwise reasonable and the percentage arrangement—

"(1) is a customary commercial business practice, or

"(2) provides incentives for the efficient and economical operation of the health service.".

(b) Section 506 of such Act is amended by adding at the end thereof the following new subsection:

"(h) For additional exclusions from reasonable cost and reasonable charge see section 1130.".

(c) Section 1842(b)(4) of such Act (as amended by section 7 of this Act) is further amended by adding at the end thereof the following new subparagraph:

"(G) For additional exclusions from reasonable cost and reasonable charge see section 1130.".

(d) Section 1861(v) of such Act is amended by adding after paragraph (8) (as added by section 2 of this Act) the following new paragraph:

"(9) For additional exclusions from reasonable cost and reasonable charge see section 1130.".

(e) Section 1903 of such Act is amended by adding after subsection (r) (as added by section 13 of this Act) the following new subsection:

"(s) For additional exclusions from reasonable cost and reasonable charge see section 1130.".

AMBULANCE SERVICE

SEC. 17. (a) Section 1861(s)(7) of the Social Security Act is amended by inserting after "ambulance service" the following: "(including ambulance service to the nearest hospital which is (A) adequately equipped, and (B) has medical personnel qualified to deal with, and available for the treatment of, the individual's illness, injury, or condition)".

(b) The amendment made by subsection (a) shall apply to services furnished on and after the first day of the first month which begins more than 180 days after the date of the enactment of this Act, or, if earlier, the effective date of regulations promulgated by the Secretary to implement such amendment.

GRANTS TO REGIONAL PEDIATRIC PULMONARY CENTERS

SEC. 18. (a) Section 511 of the Social Security Act is amended—

(1) by inserting "(a)" after "SEC. 511.", and

(2) by adding at the end thereof the following new subsection:

"(b)(1) From the sums available under paragraph (2) the Secretary is authorized to make grants to public or nonprofit private regional pediatric pulmonary centers, which are a part of (or are affiliated with) an institution of higher learning, to assist them in carrying out a program for the training and instruction (through demonstrations and otherwise) of health care personnel in the prevention, diagnosis, and treatment of respiratory diseases in children and young adults, and in providing (through such program) needed health care services to children and young adults suffering from such diseases.

"(2) For the purpose of making grants under this subsection, there are authorized to be appropriated, for the fiscal year ending September 30, 1979, and each of the next four succeeding fiscal years, such sums (not in excess of $5,000,000 for any fiscal year) as may be necessary. Sums authorized to be appropriated for any fiscal year under this subsection for making grants for the purposes referred to in paragraph (1) shall be in addition to any sums authorized to be appropriated for such fiscal year for similar purposes under other provisions of this title.".

(b) Section 502(2) of such Act is amended by inserting "(a)" after "511".

WAIVER OF HUMAN EXPERIMENTATION PROVISION FOR MEDICINE AND MEDICAID

SEC. 19. Any requirements of title II of Public Law 93-348 otherwise held applicable are hereby waived with respect to coverage, or copayments, deductibles, or other limitations on payment for services (whether of general application or in effect only on a trial or demonstration basis) under programs established under titles XVIII and XIX of the Social Security Act.

DISCLOSURE OF AGGREGATE PAYMENTS TO PHYSICIANS

SEC. 20. Section 1106 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(f) The Secretary shall not make available, nor shall the State title XIX agency be required to make available to the public, information relating to the amounts that have been paid to individual doctors of medicine or osteopathy by or on behalf of beneficiaries of the health programs established by title XVIII or XIX, as the case may be, except as may be necessary to carry out the purposes of those titles or as may be specifically required by the provisions of other Federal law.".

RESOURCES OF MEDICAID APPLICANT TO INCLUDE CERTAIN ASSETS PREVIOUSLY DISPOSED OF FOR SUBSTANTIALLY LESS THAN MARKET VALUE

SEC. 21. (a) Section 1904 of the Social Security Act is amended by adding at the end thereof the following sentence: "The Secretary shall not find that a State has failed to comply with the requirements of this title solely because it denies medical assistance to an individual who would be ineligible for such assistance if, in determining whether he is eligible for benefits under title XVI of this Act, or, in the case of an individual who is not included under section 1902(a)(13)(B), in determining whether he is eligible for medical assistance under the State plan, there was included in his resources any asset owned by him within the preceding twelve months to the extent that he gave or sold that asset to any person for substantially less than its fair market value for the purpose of establishing eligibility for medical assistance under

the State plan (and any such transaction shall be presumed to have been for such purpose unless such individual furnishes convincing evidence to establish that the transaction was for some other purpose).".

(b) Section 1902(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (39);

(2) by striking out the period at the end of paragraph (40) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(41) contain provisions reasonably directed at the denial of eligibility for medical assistance under the State plan to an individual who would be ineligible for such assistance except for the transfer of assets, for substantially less than fair market value; except that such denial shall be made only to the extent authorized under the last sentence of section 1904 or under other provisions of this title.".

(c)(1) The amendment made by subsection (a) shall become effective on October 1, 1978.

(2)(A) The amendment made by subsection (b) shall, except as otherwise is provided in subparagraph (B) become effective on July 1, 1979.

(B) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by subsection (b), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature which begins after the date of enactment of this Act.

RATE OF RETURN ON NET EQUITY FOR FOR-PROFIT HOSPITALS

SEC. 22. Section 1861(v)(1)(B) of the Social Security Act is amended—

(1) in the first sentence thereof, by inserting "a hospital or" immediately after "Such regulations in the case of";

(2) in the second sentence thereof, by striking out "one and one-half times" and inserting in lieu thereof "the percentages, specified in the next sentence, of"; and

(3) by inserting after the last sentence thereof the following new sentence: "For hospital and skilled nursing facility accounting years beginning before July 1, 1979, the percentage referred to in the previous sentence is 150 percent and for subsequent accounting years, the percentage is—

"(i) 150 percent with respect to a skilled nursing facility;

"(ii) 150 percent with respect to a hospital which, during such accounting year, had actual routine operating costs which were greater than the maximum allowable routine operating costs of such hospital as determined under section 1861(bb)(4)(B)(i);

"(iii) 250 percent with respect to a hospital which, during such accounting year had actual routine operating costs which were less than the hospital's adjusted per diem target rate for routine operating costs as determined under section 1861(bb)(4); and

"(iv) 200 percent with respect to other hospitals.".

DEDUCTIBLE NOT APPLICABLE TO EXPENSES FOR CERTAIN INDEPENDENT LABORATORY TESTS

SEC. 23. (a) The first sentence of section 1833(b) of the Social Security Act is amended—

(1) by striking out "and" at the end of clause (1), and

(2) by inserting immediately before the period the following: ", and (3) such total amount shall not include expenses incurred for diagnostic tests with respect to which the provisions of subsection (a)(1)(D) are applicable".

(b) The amendments made by subsection (a) shall be applicable with respect to services provided on and after the first day of the first calendar month which begins more than 60 days after the date of enactment of this Act.

PAYMENT FOR LABORATORY SERVICES UNDER MEDICAID

SEC. 24. (a)(1) Secton 1902(a)(23) of the Social Security Act is amended by inserting "(A)" before "has entered into" and by inserting before the semicolon at the end the following: ", or (B) during the three-year period beginning on the date of enactment of the Medicaire-Medicaid Administrative and Reimbursement Reform Act, has made arrangements through a competitive bidding process or otherwise for the purpose of laboratory services referred to in section 1905(a)(3), if the Secretary has found that (i) adequate services will be available under such arrangements, (ii) such laboratory services will be provided only through laboratories (I) which meet the requirements of section 1861(e)(9), paragraphs (10) and (11) of section 1861(s), and such additional requirements as the Secretary may require, and (II) no more than 75 per centum of whose charges for such services are for services provided to individuals who are entitled to benefits under this title or under part A or part B of title XVIII, and (iii) charges for services provided under such arrangements are made at the lowest rate charged (determined without regard to administrative costs which are related solely to the method of reimbursement for such services) for comparable services by the provider of such services, or, if charged for on a unit price basis, such charges result in aggregate expenditures not in excess of expenditures that would be made if charges were at the lowest rate charged for comparable services by the provider of such services".

(2) The Secretary shall evaluate arrangements made for the purchase of laboratory services under section 1902(a)(23)(B) of the Social Security Act and shall transmit that evaluation to the Congress, together with recommendations as to whether such section 1902(a)(23)(B) should be extended or modified, no later than twenty-four months after the date of enactment of this Act.

(b) Section 1902(a)(28) of such Act is amended by inserting before the semicolon the following: ", and provide that any laboratory services (other than such services provided in a physician's office) paid for under such plan must be provided by a laboratory which during the three-year period beginning on the date of enactment of the Medicare-Medicaid Administrative and Reimbursement Reform Act meets the requirements of section 1861(e)(9), paragraphs (10) and (11) of section 1861(s) or, in the case of a rural health clinic, subsection 1861(aa)(2)(G)".

(c) Section 1902(a)(30) of such Act is amended by inserting before the semicolon the following: "; and, in the case of laboratory services referred to in section 1905(a)(3), such payments do not exceed the lowest amount charged (determined without regard to administrative costs which are related solely to the method of reimbursement for such services) to any person or entity for such services by that provider of laboratory services".

(d)(1) The amendments made by subsections (b) and (c) shall (except as otherwise provided in paragraph (2)) apply to medical assistance provided, under a State plan approved under title XIX of the Social Security Act, on and after the first day of the first calendar quarter that begins more than 30 days after the date of enactment of this Act.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by paragraph (b) or (c), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of enactment of this Act.

STATUS OF PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

SEC. 25. Section 1166 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(e) No Professional Standards Review Organization and no Statewide Professional Standards Review Council shall be considered to be or have been an 'agency' or 'authority of the Government of the United States' for the purpose of disclosure of information developed or collected, at any time, in carrying out functions under this Act.".

REMOVAL OF THREE-DAY HOSPITALIZATION REQUIREMENT AND ONE HUNDRED-VISIT LIMITATION FOR HOME HEALTH SERVICES

SEC. 26. (a) Section 1811 of the Social Security Act is amended by striking out "post-hospital".

(b) Section 1812(a)(3) of such Act is amended to read as follows:

"(3) home health services.".

(c) Section 1812(d) of such Act is repealed.

(d) Section 1812(e) of such Act is amended—

(1) by striking out "(c), and (d)" and inserting in lieu thereof "and (c)"; and

(2) by striking out "post-hospital extended care services, and post-hospital home health services" and insering in lieu thereof "and post-hospital extended care services".

(e) Section 1814(a)(2)(D) of such Act is amended—

(1) by striking out "post-hospital"; and

(2) by striking out "for any of the conditions with respect to which he was receiving inpatient hospital services (or services which would constitute inpatient hospital services if the institution met the requirements of paragraphs (6) and (9) of section 1861(e)) or post-hospital extended care services".

(f) Section 1814(i) of such Act is amended—

(1) by striking out "Posthospital" in the heading thereof; and

(2) by striking out "posthospital" in paragraph (1).

(g) Section 1832(a)(2)(A) of such Act is amended by striking out "for up to 100 visits during a calendar year".

(h) Section 1834 of such Act is repealed.

(i) Section 1861(n) of such Act is repealed.

(j) Section 226(c) of such Act is amended by striking out "post-hospital home health services" and inserting in lieu thereof "home health services".

(k) Section 7(d)(1) of the Railroad Retirement Act is amended by striking out "posthospital home health services" and inserting in lieu thereof "home health services".

(l) The amendments made by this section shall be effective with respect to services provided on or after July 1, 1979.

PAYMENT FOR DURABLE MEDICAL EQUIPMENT

SEC. 27. Section 1833(f)(3) of the Social Security Act is amended to read as follows:

"(3) For purposes of determining the amount payable with respect to durable

medical equipment furnished an individual as described in section 1861(s)(6), the Secretary shall, to the extent feasible, calculate at least annually the reasonable charge on a prospective basis and shall take into account, in addition to the customary and prevailing charges for such equipment, the acquisition costs of such equipment, appropriate overhead (taking into consideration the level of delivery services and other necessary services actually provided by the supplier), and a reasonable margin of profit.

DEVELOPMENT OF UNIFORM CLAIMS FORMS FOR USE UNDER HEALTH CARE PROGRAMS

SEC. 28. (a) Part A of title XI of the Social Security Act is amended by inserting, immediately after section 1131 thereof, the following new section:

"DEVELOPMENT OF UNIFORM CLAIMS FORMS FOR USE UNDER HEALTH CARE PROGRAMS

"SEC. 1132. (a) Within the 2-year period commencing on the date of the enactment of this section, the Secretary shall to the maximum extent feasible develop and require to be employed, in the administration of the health insurance for the aged and disabled program established by title XVIII and the medical assistance programs approved under title XIX, uniform claims forms which shall be utilized in making payment for health services under such programs. Such claims forms may vary in form and content, but only to the extent clearly required.

"(b) The Secretary shall require forms developed pursuant to subsection (a) to be utilized in the administration of health care programs (other than those referred to in subsection (a)) but over which he has administrative responsibility, if he determines that such use is in the interest of effective administration of such programs.

"(c) The Secretary, in carrying out the provisions of subsection (a) shall consult with those charged with the administration of Federal programs (other than those referred to in subsections (a) and (b)) and with other organizations and persons that pay for health care, and with the concerned providers of health care services, with the objective of having a broad representation of such programs and plans to facilitate and encourage maximum use by other programs of such uniform claims forms.".

(b) The Secretary shall make a report to the Congress, within 21 months after the enactment of this Act, covering the following points:

(1) his assessment of what his actions will be in carrying out the provisions of section 1132 of the Social Security Act,

(2) the success or lack of success in encouraging third party payors generally to adopt the uniform claims forms required under such section, and

(3) his recommendations as to what action, legislative or otherwise, needs to be taken in order to maximize the use of such uniform claims forms.

COORDINATED AUDITS UNDER THE SOCIAL SECURITY ACT

SEC. 29. (a) Title XI of the Social Security Act is amended by inserting after section 1132 (as added by section 28 of this Act) the following new section:

"COORDINATED AUDITS

"SEC. 1133. If an entity provides services reimbursable on a cost-related basis under title V or XIX, as well as services reimbursable on such a basis under title XVIII, the Secretary shall require, as a condition for payment to any State under title V or XIX with respect to administrative costs incurred in the performance of audits of the books, accounts, and records of that entity, that these audits be coordinated through common audit procedures with audits performed with respect to the entity for purposes of title XVIII. The Secretary shall apportion to the program established under title V or XIX that part of the cost of coordinated audits which is attributable to each such program and which would not have otherwise been incurred in an audit of the program established under title XVIII. Where the Secretary finds that a State has declined to participate in such a common audit with respect to title V or XIX, he shall reduce the payments otherwise due such State under such title by an amount which he estimates to be the amount that represents the duplication of costs resulting from such State's failure to participate in the common audit.".

(b)(1) Section 1902(a) of the Social Security Act (as amended by section 21(b) of this Act) is further amended—

(A) by striking out "and" at the end of paragraph (40);

(B) by striking out the period at the end of paragraph (41) and inserting in lieu thereof "; and"; and

(C) by inserting after paragraph (41) the following new paragraph:

"(42) provide (A) that the records of any entity participating in the plan and providing services reimbursable on a cost-related basis will be audited as the Secretary determines to be necessary to insure that proper payments are made under the plan (B) that such audits, for such entities also providing services under part A of title XVIII, will be coordinated and conducted jointly (to such extent and in such manner as the Secretary shall prescribe) with audits conducted for purposes of such title, and (C) for payment of the portion of the costs of each such common audit of such an entity equal to the portion of the cost of the common audit which is attributable to the program established under this title and which would not have otherwise been incurred in an audit of the program established under title XVIII.".

(2)(A) The amendments made by paragraph (1) shall (except as otherwise is provided in subparagraph (B)) apply to medical assistance provided, under a State plan approved under title XIX of the Social Security Act, on and after the first day of the first calendar quarter which begins more than 30 days after the date of enactment of this Act.

(B) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by subsection (b), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature which begins after the date of enactment of this Act.

(c)(1) Section 505(a) of the Social Security Act is amended—

(A) by striking out "and" at the end of paragraph (14);

(B) by striking out the period at the end of paragraph (15) and inserting in lieu thereof "; and"; and

(C) by inserting after paragraph (15) the following new paragraph:

"(16) provides (A) that the records of any entity participating in the plan and providing services reimbursable on a cost-related basis will be audited as the Secretary determines to be necessary to insure that proper payments are made under the plan, (B) that such audits, for such entities also providing services under part A of title XVIII, will be coordinated and conducted jointly (to such extent and in such manner as the Secretary shall prescribe) with audits conducted for purposes of such part, and (C) for payment of the portion of costs of each such common audit of such an entity equal to the portion of the cost of the common audit which is attributable to the program established under this title and which would not have otherwise been incurred in an audit of the program established under title XVIII.".

(2) The amendments made by paragraph (1) shall apply to services provided, under a State plan approved under title V of the Social Security Act, on and after the first day of the first calendar quarter which begins more than 30 days after the date of enactment of this Act.

(d) The Secretary shall report to Congress, not later than March 31, 1980, on actions the Secretary has taken (1) to coordinate the conduct of institutional audits and inspections which are required under the programs funded under title V, XVIII, or XIX of the Social Security Act and (2) to coordinate such audits and inspections with those conducted by other cost payers, and he shall include in such report recommendations for such legislation as he deems appropriate to assure the maximum feasible coordination of such institutional audits and inspections.

DEVELOPMENT OF PHILANTHROPIC SUPPORT FOR HEALTH CARE

SEC. 30. Title XI of the Social Security Act is amended by inserting after section 1133 (as added by section 29 of this Act) the following new section:

"ENCOURAGEMENT OF PHILANTHROPIC SUPPORT FOR HEALTH CARE

"SEC. 1134. (a) It is the policy of the Congress that philanthropic support for health care be encouraged and expanded, especially in support of experimental and innovative efforts to improve the health care delivery system and access to health care services.

"(b)(1) For purposes of determining, under title XVIII or XIX, the reasonable costs of any service furnished by a provider of health services—

"(A) except as provided in paragraph (2), unrestricted grants, gifts, and endowments and income therefrom, shall not be deducted from the operating costs of such provider, and

"(B) grants, gifts, and endowment income designated by a donor for paying specific operating costs of such provider shall be deducted from the particular operating costs or group of costs involved.

"(2) Income from endowments and investments may be used to reduce interest expense, if such income is from an unrestricted gift or grant and is commingled with other funds, except that in no event shall any such interest expense be reduced below zero by any such income.".

PARTICIPATION UNDER MEDICAID BY SKILLED NURSING FACILITIES PARTICIPATING UNDER MEDICARE AND VICE VERSA

SEC. 31. (a)(1) Section 1903 of the Social Security Act is amended by adding after subsection (s) thereof (as added by section 16 of this Act) the following new subsection:

"(t) Notwithstanding any other provision of this section no payment shall be made to a State with respect to expenditures incurred by it for services in a skilled nursing facility unless such facility has an agreement with the Secretary in effect under section 1866 and such facility has in effect and conforms to a policy (which it shall amply publicize) of not discriminating for admission and treatment purposes against any patient because he is insured for benefits under part A of title XVIII.".

(2) The amendment made by paragraph (1) shall be effective with respect to services furnished after June 30, 1979.

(b)(1) Section 1866(c) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(3) No agreement under this section with a skilled nursing facility shall, after the date

of enactment of this paragraph, be entered into, extended, or renewed, if the State in which such facility is located has a State plan—

"(A) which is approved under title XIX, and

"(B) which covers skilled nursing facility services, unless such facility has in effect an agreement, with the State agency administering or supervising the administration of such State plan, under which the skilled nursing services furnished by such facility will be available (on a nondiscriminatory basis) to individuals covered for medical assistance under such State plan.".

COVERAGE UNDER MEDICARE OF CERTAIN DENTISTS' SERVICES

SEC. 32. (a) Clause (2) of the first sentence of section 1861(r) of the Social Security Act is amended to read as follows: "(2) a doctor of dentistry or of dental or oral surgery who is legally authorized to practice dentistry by the State in which he performs such function, but only with respect to (A) a function (i) which he is legally authorized to perform as such by the State in which he performs such function, and (ii) which, if performed by an individual described in clause (1), would constitute physicians' services, or (B) the certification required by section 1814(a)(2)(E) of this Act,".

(b) The amendment made by subsection (a) shall be effective with respect to service provided on or after October 1, 1978.

COVERAGE UNDER MEDICARE OF OPTOMETRISTS' SERVICES WITH RESPECT TO APHAKIA

SEC. 33. (a) The first sentence of section 1861(r) of the Social Security Act is amended, in clause (4) thereof, by—

(1) inserting "(i)" immediately after "with respect to", and

(2) inserting immediately after "lenses," the following: ", and (ii) any function with respect to aphakia which he is legally authorized to perform as such by the State in which he performs such function,".

(b) The amendments made by subsection (a) shall be effective with respect to services provided on or after October 1, 1978.

STUDY OF CRITERIA EMPLOYED FOR CLASSIFYING A FACILITY AS A SKILLED NURSING FACILITY

SEC. 34. (a) The Secretary of Health, Education, and Welfare (hereinafter in this section referred to as the "Secretary") shall conduct a special study, investigation, and review of the criteria presently employed in determining whether a facility is a "skilled nursing facility" as that term is used in paragraph (2) of section 1861(a) of the Social Security Act (relating to definition of "spell of illness"), with a view to determining, and recommending to the Congress, such modifications in such criteria as he may consider appropriate.

(b) The Secretary shall not later than December 31, 1979, submit to the Congress a full and complete report on such study, investigation, and review, together with his recommendations for any modification in the criteria referred to in subsection (a).

AUTHORITY FOR CERTAIN STATES TO BUY-IN COVERAGE UNDER PART B OF MEDICARE FOR CERTAIN MEDICAID RECIPIENTS

SEC. 35. Section 1843 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(i) Any State, which prior to the date of enactment of this subsection—

"(A) has not entered into an agreement under the preceding provisions of this section, may enter into such an agreement at any time within the twelve-month period which begins with the month following the month in which this subsection is enacted, and any such agreement shall conform to the modifications prescribed by the Secretary (as referred to in the third sentence of subsection (b)) and may, at the option of the State, contain any provision authorized under subsections (g) and (h) with respect to modifications of agreements with States entered into under the preceding provisions of this section; or

"(B) has entered into an agreement under the preceding provisions of this section which has not been modified pursuant to the authority contained in subsection (g) or (h), may within the twelve-month period which begins with the month following the month in which this subsection is enacted modify such agreement in like manner as if the date referred to in subsection (g)(1) and (h)(1) were the day following the close of such twelve-month period.".

Mr. LONG. Mr. President, it is perfectly fine with me to fight the battle of hospital cost containment in the remaining days of this session; but, Mr. President, not in this bill. We have some other revenue bills now at the desk. We have several on which reports were filed on Monday. The point was made here this morning that we cannot call those bills up today because Monday was a holiday, even though we were in session for more than 12 hours on that date. But Monday was a legal holiday, and we are not permitted to call up a measure under unanimous consent because Monday was a holiday. The 3 days have passed, but Monday was a legal holiday, and we are stuck with that.

But starting tomorrow we will be able to call up all those bills on which committee reports were presented on Monday. We will have plenty of bills on which to fight the hospital cost containment battle. We can have the Kennedy amendment, the Nelson amendment, the Talmadge amendment. But we have all the controversial matters we can stand on this bill. We have the President's request to continue the waiver of countervailing duties, so the trade talks can proceed at Geneva. The sugar bill itself is controversial. I do not know of any filibuster or extended debate in prospect, but that is not an easy bill to pass. So we have all the controversy we can say grace over on this right now, Mr. President, without getting into hospital cost containment.

I will offer the Senator from Massachusetts a firm commitment that if I am able to bypass the fight over hospital cost containment on this bill, I will be happy to call up another revenue bill and he can offer his hospital cost containment proposal, Senator TALMADGE can offer his amendment on that, and Senator NELSON can offer his substitute amendment for both of them, as far as I am concerned.

But, in behalf of my constituents, I am trying to pass the Sugar Act, which incidentally should have been passed a long time ago. That being the case, because I have no other choice, to move the Sugar Act I move to table the other amendment, and I ask unanimous consent that that not carry with it all the other amendments to the Kennedy amendment.

Mr. KENNEDY. Mr. President, will the Senator withhold that motion, and yield to me?

Mr. LONG. Mr. President, I ask unanimous consent that I might yield to the Senator from Massachusetts reserving my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I would not call this extraordinary action. We reported this bill 14 months ago, and here we are in the final hours, trying to get a vote on what has been a major proposal of the administration, which proposal was referred to both the Committee on Human Resources and the Finance Committee.

We have sent our proposal to the Finance Committee over 14 months ago, and the Finance Committee did not have the courtesy of even reporting it out with any kind of recommendation. That is what we have waited for, and now this is the only opportunity to try to get a vote on this vital proposal.

Mr. TALMADGE. Will the Senator yield?

Mr. KENNEDY. I want to give assurances to the chairman of the Finance Committee that if there is going to be a time agreement—and I am prepared, obviously, to let the votes fall where they may and preserve everyone's right—I am willing to permit an hour of debate on either the Talmadge amendment or my amendment or the Nelson amendment, and then, if we are able to get an agreement for a vote on it, I would certainly join with my other colleagues in seeing that we remove it as an amendment.

Mr. TALMADGE. Will the Senator yield?

Mr. LONG. What? What?

Mr. KENNEDY. Barring that particular opportunity, I would rather be able to get a vote even if it is going to be on a tabling motion because we are talking about billions of dollars to the taxpayers.

We have made a finding in the Human Resources Committee, and we are entitled to get some consideration on this floor, Senator.

Mr. TALMADGE. Will the Senator yield?

Mr. LONG. Mr. President, I believe I have the floor.

Mr. TALMADGE. Will the Senator yield to me?

Mr. LONG. Hold on just a minute, and let me just say a word or two.

The Senate Finance Committee has been willing to consider the points of view of all Senators on hospital cost containment, and the Senate Finance Committee has recommended its views on hospital cost containment in H.R. 5285, which has been on the calendar since August 11; and I understand it is the Senator from Massachusetts (Mr. KENNEDY) who has a hold on that, to keep it from being called up, at least for the first couple of weeks; maybe not now, but for the first couple of weeks he had a hold on it, I guess because he wanted to offer his amendment.

Mr. TALMADGE has been trying to get that bill before the Senate so the Senate could vote on that subject matter, and I would hope the leadership would cooperate with us in laying that bill down after the conclusion of the Sugar Act. But, Mr. President, we have all the controversy on the Sugar Act we can say grace over the way it is now. So I would plead with Senators, please do not put so much controversy on it that we cannot

do business at all. Let us vote on the Sugar Act. We are willing to carry a rider on that to take the administration's countervailing duties matter as an amendment, and that has got us in for an extended debate on that issue.

Mr. TALMADGE. Will the Senator yield briefly to me, without losing his right to the floor?

Mr. LONG. Yes, if I may.

The PRESIDING OFFICER (Mr. INOUYE). Without objection, it is so ordered.

Mr. TALMADGE. The distinguished Senator from Massachusetts and I had a conversation early this year, in which I assured the Senator from Massachusetts we would have an opportunity to vote on hospital cost containment.

The Committee on Finance has been working on this measure now for some 4 or 5 years. The President of the United States during his campaign for the Presidency endorsed a bill that I had pending before the Committee on Finance, S. 3205. He endorsed it by number during his Presidential campaign.

I agree with the distinguished Senator from Massachusetts that this has a very high priority on the part of the administration. It is one I have been interested in now for many, many years. The Senator from Massachusetts has been interested in it for a long time. The Senator from Wisconsin has been interested in it for a long time. For some 2 months I have urged the leadership to take up the Senate Finance Committee bill with a time limitation. I am perfectly agreeable to a time limitation. We can discuss this issue and let the majority vote of the Senate prevail, whether it be the proposal of the Committee on Human Resources, the proposal of the Senate Committee on Finance, or whether it be the substitute to be offered by the distinguished Senator from Wisconsin. I think the Senate ought to have an opportunity to vote its will on this matter before we adjourn sine die. I thank the distinguished chairman of the Finance Committee for yielding.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. I am willing to do anything within reason to let the Senator from Massachusetts and the Senator from Wisconsin have a vote on their amendments. I am trying to move ahead.

Mr. President, I ask unanimous consent that when H.R. 5285 is called up, Calendar No. 1031, that all amendments to the bill be germane and that there be a time limitation on all amendments, to be equally divided between the sponsor and the manager of the bill, of 2 hours.

The PRESIDING OFFICER. Is there objection?

SEVERAL SENATORS. Mr. President.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I would like to have a little opportunity to see if this request has been cleared with Members on both sides. I am very interested in getting an agreement which would provide for taking up a vehicle that would allow the Senate to work its will on the hospital cost containment and at the same time free this bill which, as the distinguished manager says, is vitally needed to be acted upon free from the other encumbrances which are hourly occurring.

If the Senator will allow me to attempt to work something out, I wish he would withdraw his request for a brief time.

Mr. LONG. I withdraw the request, yes.

Mr. BUMPERS. Will the distinguished majority leader yield for a question?

Mr. ROBERT C. BYRD. The Senator from Louisiana has the floor.

Mr. LONG. I yield.

Mr. BUMPERS. The bill the Senator referred to on the calendar, what is the substitute bill?

Mr. TALMADGE. Hospital cost containment, medicare and medicaid, reported by the Senate Finance Committee.

Mr. LONG. In order to overcome the 3-day rule objection, we had to call up a welfare-social security type bill and strike all after the enacting clause and substitute the Sugar Act, in order to get to the Sugar Act.

The Sugar Act has an amendment to it that has to do with the trade negotiations. The Sugar Act involves trade, and so does the countervailing duty involve trade. So we put that before the Senate. That has a lot of controversy.

The Senator from Massachusetts brought up the hospital cost containment issue and offered it on this bill.

My answer to that is that we have a bill on the calendar which deals with hospital cost containment, which is the so-called Talmadge amendment, the approach recommended by the chairman of the Subcommittee on Finance.

It is my proposal that we act on the Sugar Act and after we get through with that then act on the bill that has to do with hospital cost containment.

Mr. BUMPERS. I thank the Senator.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. KENNEDY. Will the Senator entertain a brief quorum call without losing his right to the floor?

Mr. LONG. Mr. President, I ask unanimous consent that we might have a quorum call without prejudicing my rights to the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none. Without objection, is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Louisiana.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum under the same conditions.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistance legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Mr. YOUNG may proceed for not to exceed 5 minutes, without prejudicing Mr. LONG's right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUGAR STABILIZATION ACT OF 1978

Mr. YOUNG. Mr. President, I very strongly support the Sugar Stabilization Act of 1978, as reported by the Senate Finance Committee, and I oppose the amendments.

I want to commend the distinguished chairman of the Finance Committee (Mr. LONG), the ranking Republican (Mr. CURTIS), and all the members on that committee, for reporting a good bill and a balanced bill, one which will be helpful to both producers and consumers.

The sugar producers of this Nation are indeed fortunate to have two Senators as sympathetic to their problem and as understanding of the sugar industry as are these two Senators.

Mr. President, during the period starting in 1975 in which we had no Sugar Act all of the foreign countries which exported sugar to us raised their prices. This continued until recently.

This resulted in the average retail price of refined sugar in this country going from 15.10 cents a pound in 1973 to a high of 37.24 cents a pound in 1975. Thus, the consumer was paying three times as much for sugar as had been the case when we had an effective Sugar Act.

I ask unanimous consent that a table containing figures on the price paid sugar beet producers and the average retail price paid for refined sugar from 1968 through 1977 obtained from the Department of Agriculture be printed in the RECORD as a part of my remarks.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[In cents]

	Amount sugarbeet producers were paid per pound on refined basis	U.S. average retail price for refined sugar (per pound)
1968	6.3	12.18
1969	6.6	12.40
1970	6.9	12.97
1971	7.2	13.61
1972	7.6	13.91
1973	13.1	15.10
1974	19.2	32.34
1975	10.9	37.24
1976	8.8	23.96
1977 [1]	10.7	[1] 21.62

[1] 1st 10 mo.

USDA figures (Economics, Statistics, and Cooperatives Service).

Sugar Act expired in 1974. Payments made to farmers under the Sugar Act were called Compliance Payments. They were direct payments of .8 cents per pound to farmers in return for their compliance with the minimum wage provisions of the Sugar Act.

Mr. YOUNG. During this period, household consumers and industrial consumers, such as bottlers and others, complained bitterly about these high

sugar prices. We would not have had these high prices if we had continued the Sugar Act, which provided producers with assurance that there would be a future in the business of sugar production.

Mr. President, our domestic sugar producers, both beet and cane, have the capability to fill a much larger share of our sugar requirements, thus keeping the consumers of this country from being at the mercy of foreign countries which always raise their prices when we are in short supply.

It makes no sense at all to be importing such a high percentage of our domestic requirements for sugar when we can produce it very efficiently in this country. This is particularly true at this time with our very critical problem with our balance of payments with the rest of the world.

It would be utter folly to adopt a policy which would result in our being even more dependent for sugar on the whim of the dictators of sugar-producing countries—dictators who set the price at all the traffic will bear.

Mr. President, it was with regret, as well as dismay, that I learned of the opposition of the Carter administration to the market price objective for sugar producers as contained in this bill.

The bill establishes a U.S. market price objective for raw sugar of 17 cents a pound to the producer. The Department of Agriculture apparently feels this will be too expensive from the consumer's standpoint.

Failure to pass an adequate sugar bill and thus provide the assurances our sugar producers need will result in our consumers becoming even more dependent on foreign countries to fill virtually all of our sugar needs.

The situation with respect to coffee is a good example. The price of coffee rose sky high when shortages occurred. Unfortunately, we are not able to produce coffee in this country or we would be able to stabilize prices through domestic production.

In the long run, I am convinced it will be much more expensive to our consumers to have to rely on the whims of foreign governments for such a basic commodity as sugar.

As I mentioned previously, the retail price of refined sugar jumped from 15.10 cents to a high of 37.24 cents a pound during the period in which we had no sugar program.

In the case of most agricultural commodities, foreign countries, in order to assure their producers of a fair price, establish high domestic prices, prices two or three times the price we are able to get in those countries.

Wheat is a good example. The price of a bushel of wheat in some European countries is as high as $8 a bushel, while our export price is only about $3.50 a bushel.

As I have indicated, this legislation is in the best interests of both the producer and the consumer. Sugar is a high cost of production commodity and when prices are low, many of our best farmers go broke.

If the Sugar Act is not approved, we can look forward to sharply reduced production in this country, which will contribute to an even greater imbalance in our balance of payments with the rest of the world.

The consumer is understandably unhappy when prices are exorbitantly high. This bill will stabilize prices and at the same time provide producers with the assurances of a fair price which they need if they are to remain in business. It assures the consumer of an adequate supply of sugar, and at a reasonable price.

Mr. President, as I indicated at the opening of my remarks, this legislation is strongly supported by sugar beet growers, their growers association and their refining cooperatives in North Dakota. I ask unanimous consent that a part of the telegrams and mailgrams which I have received from them in support of this legislation be printed in the RECORD as a part of my remarks.

There being no objection, the documents were ordered to be printed in the RECORD, as follows:

WAHPETON, N. DAK.

Senator MILTON R. YOUNG,
U.S. Senate,
Washington, D.C.:

Request and urgently need your support in passing responsible and adequate domestic sugar legislation, Wahpeton Area growers (300) along with the rest of consumers need this. Thank you.

Minn-Dak Farmer Cooperative; Wahpeton; James Link, President; Gerald W. Shannon, General Manager.

CAVALIER, N. DAK.

Senator MILTON YOUNG:

We would appreciate any work you can do for passage of a meaningful sugar act.

DUANE MORRISON.

CASSELTON, N. DAK.

Senator MILTON YOUNG,
Washington, D.C.

DEAR SIR: As a young man starting farming I would appreciate any help you can do to secure passage of a meaningful sugar act.

RALPH KIEFFER.

FARGO, N. DAK.

Senator MILTON YOUNG,
Washington, D.C.:

We urgently request all the help you can give us in the passage of the Sugar Stabilization Act if the domestic industry collapses the American people will be at the mercy of foreign cartels, sugar prices will again sky rocket in our inbalance of trade will get much worst than it already is.

Gratefully,

GEORGE SINNER,
President, Red River Valley Sugar Beet Growers Association, Fargo.

MANVEL, N. DAK.

Senator MILTON YOUNG:

We will appreciate any work you can do to secure passage of a meaningful sugar act.

JIM HUTTON.

BATHGATE, N. DAK.

Senator YOUNG:

Will appreciate any work you can do to secure passage of a meaningful sugar act.

CHARLES MORRISON.

BATHGATE, N. DAK.

Senator YOUNG:

Thanks for your efforts to secure passage of a satisfactory sugar act. May you be successful.

RUSSELL MORRISON.

CASTLETON, N. DAK.

Senator MILTON YOUNG:

Will appreciate any work you can do to secure passage of meaningful sugar act.

WILLIAM SINZ.

GRAFTON, N. DAK.

Senator MILTON R. YOUNG:

We will appreciate any work you can do to secure passage of a meaningful sugar act.

ROGER MOE,
Director, Drayton Factory District.

MINTO, N. DAK.

Senator MILTON R. YOUNG,
Capitol One, D.C.:

We would appreciate any work you can do to secure passage of a meaningful sugar act.

FRANK NARLOCH,
President, East Grand Forks Factory District, Sugar Beet Growers Assn.

AMENIA, N. DAK.

Senator MILTON YOUNG:

We will appreciate any work you can do to secure passage of a meaningful sugar act.

AL and DENNY POYZER.

HILLSBORO, N. DAK.

Senator MILTON YOUNG,
Capitol One, D.C.:

We would appreciate anything you can do to get passage of a meaningful sugar act so U.S. sugar beet farmers can stay in business. Thank you.

KEITH FREELAND.

HILLSBORO, N. DAK.

Senator MILTON YOUNG:

We beet growers will appreciate any work you can do to help for the passage of a meaningful sugar act.

ARTHUR GROVE.

GRAFTON, N. DAK.

Senator MILTON R. YOUNG:

I would appreciate anything you can do that would secure the passage of a meaningful act S.A.

JACK DESAUTEL.

GRAFTON, N. DAK.

Senator MILTON R. YOUNG:

Consumers also deserve protection from the harsh realities of the world sugar market therefore we would appreciate all you can do to secure passage of a meaningful sugar act.

MANVEL GREEN.

MOORHEAD, MONT.

Senator MILTON R. YOUNG,
U.S. Senate,
Washington, D.C.:

We urge your support of the sugar stabilization act which will be presented to the Senate next week. This bill is vital for the Red River Valley economy and the continued viability of America's domestic sugar industry.

Mr. and Mrs. DAVID WACHAL.

Mr. YOUNG. Mr. President, the sugar beet producers in North Dakota would indeed be in deep trouble if the Sugar Act were not extended. In years past, the sugar beet refiners were unwilling to invest in sugar beet refineries because of the uncertainty of prices in the future, or uncertainty whether the Sugar Act would be continued. To continue in the sugar beet business, farmers themselves bought these sugar beet refineries—built more and borrowed most of the money to do so. They are deeply in debt now. Unless we get another Sugar Act much the same as is being proposed here, the sugar beet producers for the most part will have to go out of business. That will make us again dependent on foreign

sugar. Whenever we are in short supply, they have raised the price very sharply.

After the Sugar Beet Act expired, the sugar price to consumers went up to around 37 cents a pound. It is now down to around 15 to 14 cents a pound. It is in the best interest of the consumers to have a sugar act to assure an adequate supply of sugar so that we are not dependent on foreign countries like we are for coffee and oil. It means a more stable price and it means an important industry is stabilized. It means that our balance of payments problem with the rest of the world would be relieved to a considerable extent.

Mr. BARTLETT. Will the Senator yield for 1 minute?

Mr. YOUNG. Yes, I yield.

KOREAN TROOP WITHDRAWAL

Mr. BARTLETT. Mr. President, during the 1976 Presidential campaign, President Carter pledged his commitment to the withdrawal of U.S. ground troops from South Korea. From the earliest days of his administration, he has acted vigorously, yet arbitrarily to implement that policy. Korea and Japan were informed of President Carter's intent soon after his inauguration by Vice President MONDALE. Needless to say, the reactions of Seoul and Tokyo were less than enthusiastic, especially because of the absence of prior consultations.

Since that time there has been considerable discussion of the merits of an arbitrary troop withdrawal plan. Our own defense planners, representatives of our allies in the Asian Pacific and members of the academic community have viewed the wisdom of such a move as highly questionable.

The Korean Peninsula is one of the most critical and potentially volatile areas of international relations today. In Korea, the interests of the three largest industrial powers and the most populous nation in the world intersect. In view of the violent and unstable history of the Korean Peninsula, the maintenance of peace in the area is a vital and primary concern in our foreign policy.

For 25 years, peace on the Korean Peninsula has been the product of the visible presence of American military forces, now there in the form of 40,000 troops from the 8th Army. Our presence impacts directly on the political and military policies of South Korea and Japan, including the needs of both nations to rearm and perhaps to acquire nuclear weapons. Further, the delicate state of Sino-Soviet affairs, and the possibility of full-scale hostilities erupting over any sudden military imbalance are matters much too important to be altered by implementing any poorly conceived withdrawal plan.

Given the complexity of the issue, the controversy involved and the strong dissent expressed from so many arenas, I am very much relieved that President Carter has moderated his plans for a withdrawal of our troops from Korea for the time being. Troop reductions should not be made without a thorough military and political evaluation of our role in the Western Pacific. All parties involved should be contacted.

Mr. President, I have followed closely the issue of our military presence in Korea in hearings before the Armed Services Committee and in revelant studies, such as the excellent report issued by my colleagues Senators JOHN GLENN and the late Hubert Humphrey. We must continue to examine the consequences of any troop withdrawals.

I need not remind any of my colleagues of the turmoil and violence Korea has suffered even after a tenuous peace agreement was achieved 25 years ago. The on again-off again negotiations for reunification have produced nothing conciliatory. Indeed, they have been suspended since 1973. At that time South Korea desired reunification through a gradual lessening of tensions and confidence building. North Korea has rejected the slower functional approach and has concentrated on military issues such as force reduction. In this arena, President Carter may have discarded a valuable bargaining chip in future negotiations by his unilateral move to reduce U.S. forces.

Meanwhile, the saber-rattling rhetoric of Kim Il Sung and the image he seeks to cultivate as an international revolutionary has done nothing to ease tensions or contribute to renewed negotiations. Thus, for the foreseeable future, the military complexion of Korea will be the chief means of insuring peace and the status quo.

The military balance on the Korean Peninsula has changed remarkably since the Korean war. Of course, the presence of the air and ground forces of the United States has played a dominant role in deterring North Korea's ambition for forceful reunification. However, the most important new military development in Korea has been the establishment of a professional military force for the Republic of Korea.

In 1950, North Korea had a military force of 135,000 men, 150 tanks, 600 artillery pieces, and 180 aircraft. South Korea had a smaller force of 95,000 men with no tanks or antitank weapons, only 90 artillery pieces, and a mere 32 aircraft. North Korea had 210 fighter-bombers; South Korea had none.

At the outbreak of the Korean war, North Korea's forces were configured for the offensive; South Korea's were organized for the defensive. The same is true todav. However, the armed forces of the Republic of Korea (ROK) are now, with few exceptions, the qualitative and quantitative equals of the military forces of the People's Democratic Republic of Korea (PDRK). Total active forces for South Korea total 595,000 compared with 495,000 for North Korea, and the quality of ROK aircraft and equipment is at least the equal of that used by North Korea.

South Korea also has a superior amphibious warfare capability built around a thoroughly professional Marine Corps. South Korean military forces are now into their second force modernization program since 1970, a modernization begun when the United States withdrew one American division because of the Vietnam war. Furthermore, the Republic of Korea was able to send two divisions of its own to Vietnam, the White Horse and Capitol Divisions. For that reason, many of the Korean military units contain soldiers and officers with combat experience. Also, many Korean soldiers have gained experience with American units as KATUSA—Korean Auxiliary to the United States Army. South Korea has done much to prepare to defend itself, and, recognizing the normal risks of war, should, with the current help of American forces, be able to repel an attack from the present North Korean Armed Forces.

However, there remains a significant number of military advantages that North Korea possesses over the South and to which the American presence in Korea addresses itself. In the last 7 years, the Peoples Republic of Korea has massed a considerable offensive capability and possess significant numerical advantages in numbers of tanks, artillery pieces, mortars, surface to air missiles—SAM's — submarines, combat aircraft, helicopters, and cargo planes. Furthermore, the great proportion of North Korea's military hardware and manpower are poised at or near the Demilitarized Zone (DMZ) in a distinctly offensive posture aimed at the South. American forces, particularly in the form of highly mobile armor units, would greatly assist in delivering concentrated fire at the point of any offensive thrust by the North on short notice.

More importantly though, the United States provides a vital intelligence gathering and analysis capability which insures the earliest possible warning in the instance of enemy attack.

This is particularly important for two reasons. Since 1974, the allied defensive posture has been a forward defense designed to prevent the capture of Seoul in the event of enemy attack. Because Seoul, the commercial and governmental center of South Korea, is only 30 miles from the DMZ and 9 minutes flying time from the nearest North Korean air base, detection and warning time are of the utmost concern. Further, with the increased use of unconventional warfare by the North Koreans, security problems are more acute.

Given sufficient warning of an American troop withdrawal, and given the opportunity to purchase needed equipment and ammunition, South Korea can maintain the military balance on the Korean Peninsula if neither China nor the Soviet Union intervene. While American forces in Korea help to deter a full scale attack from North Korea, and would be available for the defense of the South, their primary contribution to the stability of Northeast Asia is no longer to add to the South Korean forces sufficient strength to repulse an attack from the North. Indeed, although the Second Infantry Division, the major U.S. Army combat unit stationed in Korea, is a potent force, its 30,000 men would be only a small fraction of the Allied forces involved in any land war in Korea. The potential contribution of American airpower would be far more important in the early days of battle.

American ground forces in Korea serve mainly as a symbol of America's military commitment to the defense of South Korea, providing nearly absolute deterrence and insuring that careful plan-

ning, clever strategems such as the infamous tunnels under the demilitarized zone, and the best fortunes of war will not combine to produce a victory for Communist North Korea. Furthermore, the existence of American ground forces in action increases the likelihood that any North Korean gains would be of short duration. Also, American involvement raises the possibility that the price to North Korea for its aggression may well be the destruction or invasion of its homeland. Strategies with limited objectives, such as the seizure of Seoul to be followed by immediate negotiations, lose their attractiveness when there is great doubt whether even that limited objective could be obtained.

The presence of American forces in South Korea also serves to limit the ability of Pyongyang to exploit the Sino-Soviet split. With both the People's Republic of China and the Union of Soviet Socialist Republics desirous of keeping North Korea neutral at worst and hostile to the other great power at best, each has employed a combination of rewards and threats to maintain a North Korea which does not endanger their interests. Yet North Korea has not been able to exploit successfully the Sino-Soviet conflict in its efforts to gain support for the military reunification of Korea. A militarily strong South Korea reinforced by the American presence prevents Pyongyang from becoming an unencumbered ally of either China or the Soviet Union against the other. Neither Communist nation alone is likely to support North Korea in a military adventure which might weaken it against the other Communist giant.

North Korea could not win any long term gains against the South unless it had the direct support of either the Soviets or Chinese. It is clear that neither the Chinese nor the Russians are desirous of a direct confrontation with the American military. Both Communist nations perceive the risks of a nuclear exchange in return for the relatively limited gains of unified Korea as unacceptable.

What then would be the effect of an American troop withdrawal on South Korea itself? Perhaps the most immediate effect would be an effort to test the credibility of any remaining American commitments. American aircraft alone do not signal America's commitment, but rather indicate America's desire to replace commitment with flexibility. Korea and Japan would receive little encouragement from American aircraft sitting on the runway ready to fight or flee at the earliest indication of trouble. The next time there is a major incident along the demilitarized zone, the whole world would be looking on. Anything less than a major show of force by the United States would be interpreted as further decay in Korean-American relations.

Reductions in the American military presence in Korea would require continued modernization of Korean forces, an expensive task. Estimates in excess of $5.2 billion and stretching into the early 1980's are generally forecast.

In the event of an American withdrawal, South Korea may assume that the reintroduction of American troops in peace or war is unlikely to occur or to be timely.

For this reason, South Korea may seek new allies in the region even though none is as conducive to stability in Northeast Asia as is the United States. The Republic of China—Taiwan—has an interest in the security of South Korea and even offered troops during the Korean war. An alliance with Taiwan, however, might encourage an active alliance between Red China and North Korea. Japan would seem to be a likely candidate for an alliance with Korea were it not for the traditional anti-Japanese feeling in Korea. Also, the essential pacifism of the present Constitution and the apathy of the Japanese people would serve to inhibit such an alliance. Any arrangement would send serious shock waves through Japan and the rest of Asia.

Nevertheless, the Government of Japan has become more vocal in its efforts to persuade the United States to retain its ground forces in Korea. Last year, Prime Minister Fukuda is reported to have told President Carter that American forces in Korea provide the shield for the defense of Japan, and Japanese defense officials have become more explicit in their recommendations for the defense of Korea and Japan. Although Japan's military activity is limited by its Constitution, Tokyo has made minor increases in its defense expenditures and has continued to provide diplomatic and logistical support to South Korea and American forces there. Japan is concerned not only for the security of Korea but also that Korea remain politically and economically stable; 40 percent of all Korean imports come from Japan. There is over $700 million worth of Japanese investment in Korea and there was a $3.7 billion trade volume between the two nations last year. Obviously, Japan will want to preserve these close economic links.

Further, the Governments of Thailand, the Philippines, Singapore, and Australia have expressed serious concern over American troop wtihdrawal from Korea, and its implications for their own security. Consultation with these nations is vital if our relations are to remain cordial.

President Carter's proposed troop withdrawals on an arbitrary schedule cannot be justified on the basis of changes in the military and geopoiitical balance in Northeast Asia. Motivations for the disengagement of American forces such as dissatisfaction with Seoul's disappointing human rights record, and scandals in the United States involving Korean nationals may be valid but do not warrant the risks involved. Certainly, if South Korea was to become a model, Western-style democracy, pressure for an American pullout would be greatly reduced, but not eliminated.

To those who see a dollar savings for the U.S. Defense Department in troop withdrawal, cost estimates tell a different story:

A sum of $400 to $800 million in relocation of American troops;

A sum of $800 million lost in equipment that the 2d Division will leave behind;

A sum of $1 billion to realize the administration's intent to reequip the 2d Division as a mechanized infantry division; and

A sum of $1.4 billion in foreign military sales credits to assist Korea in its force improvement plan (FIP).

There will be no savings to the United States. Indeed there will be a considerable expenditure over and above the cost of maintaining troops there.

In the wake of the fall of Vietnam, Laos, Cambodia, and Angola, and in view of the increased Soviet adventurism in the Third World, an impending American withdrawal from Korea causes concern among many allies and friends that the United States will abandon her responsibilities as a great power in order to avoid the turmoil which is so characteristic of the world today.

Many nations of the globe see America's retrenchment as a destabilizing event and are looking elsewhere for political and military support. Anticipating difficulties in obtaining military support and equipment from the United States, many nations friendly to the United States are diversifying their sources of weaponry and are manufacturing modern arms for their own use and for export. Among industrially advanced nations faced with serious military threats—nations such as Korea, Israel, Taiwan, and South Africa—there is tremendous pressure for the development of nuclear weapons. A similar sense of isolation is gradually emerging in Japan and would be accelerated by a premature American withdrawal from Korea.

An American troop withdrawal from Korea may in time be desirable. Indeed, the South Koreans themselves favor such eventual action. I quote President Park speaking in the fall of 1975:

> In five years, Korea will be able to repulse the North Korean Communists without the participation of the U.S. forces if the Communists invade Korea without the assistance of Communist China or the Soviet Union.

Given the Republic of Korea's thriving economy, whose GNP has tripled in the last decade, and her population resources, which currently provide 2.8 million reserve military personnel, it is reasonable to assume that with sufficient preparation, the Republic of Korea will be able to provide for her own defense, in the general time frame proposed by President Park. To this desirable end, though I doubt if it can be achieved by 1980, we should be committed.

Mr. President, in the meantime, the perception that the United States is a dependable ally and a responsible world power would be reinforced if any American troop reductions in Korea are executed in a manner and at a time which guarantees stability in Northeast Asia. A hasty withdrawal would increase the chances of war in Korea and Northeast Asia, and could result in reduced political freedoms and increased nuclear proliferation throughout much of the Third World.

NUCLEAR TESTING AND THE CTB

Mr. BARTLETT. Mr. President, recently, the Acting Assistant Secretary of Energy for Defense programs, Dr. Don-

ald M. Kerr, testified before the House Armed Services Committee that continued nuclear weapons testing was of great importance to the United States. He concluded that:

A total cessation of testing in the long run would inevitably result in a steady decline of our confidence in the reliability of our nuclear deterrent and risk a steadily growing asymmetry between U.S. and Soviet military forces.

Kerr's testimony, which represented the coordinated professional judgment of technical experts throughout the Government, was not unusual. It is consistent with what I was told by our test ban negotiators in Geneva and is consistent with views expressed to me by a wide variety of technical experts. It is also consistent with testimony previously received by Senate committees.

With the exception of a few long-time CTB activists, witnesses before Senate committees have recognized that retaining confidence in the reliability of our nuclear weapons over time would require continued testing. For example, last year in written response to a question from Senator PELL concerning the importance of testing to maintaining the reliability of the stockpile, the State Department provided the following comment prepared by and coordinated with Dr. Kerr's predecessor, Alfred D. Starbird:

Assuming compliance, . . . over a period of time, each side would inevitably have somewhat degraded confidence in the reliability of its nuclear weapons.

Starbird also noted:

Under a moratorium or CTB, safeguards cannot preclude but can delay this degradation of the stockpile.

This view was consistent with testimony from our chief CTB negotiator, ACDA Director Paul Warnke, who said:

There is no question of the fact that there would be some deterioration of confidence in the stockpile, but again that deterioration would apply to both sides.

Generally, most advocates of a CTB do not reject the notion that a CTB would result in a lowered confidence in our nuclear weapons stockpile. Indeed, they believe that it is desirable because they think that the Soviet Union will also loose confidence in its nuclear weapons and that this will result in a more stable nuclear balance and the beginning of nuclear disarmament.

Of course, there is a risk. If our verification procedures and technologies are inadequate, the Soviet Union could conduct secret tests which would assure the reliability of their weapons even as we lose confidence in ours. Also, there is reason to believe that Soviet nuclear weapons are less sensitive to changes in design and materials and would therefore be less likely to require testing to correct problems.

If the Soviet Union were skillful in its deception practices and if the United States did not insist upon a verifiable CTB, Moscow might even be able to develop new tactical, and some strategic, warheads. Although it is frequently assumed that the United States has a major technological lead in warhead design, the evidence for that assumption is limited to conjecture about why Soviet warheads are so large.

In fact, we do not know that their warheads are any less sophisticated than ours because we have not had the benefit of information from atmospheric testing since 1963. What we learned then was that the Soviet Union had introduced major innovations into warhead designs and was experimenting with weapons effects about which we had limited knowledge. Given the large payloads of Soviet missiles, Russian warheads do not need to be as small as American warheads to place the same number of reentry vehicles on a missile. And size tells us very little about the capability and effects of a particular warhead. In short, small size warheads are a sign of sophistication only when you have very small missiles, as is the case for the United States.

Concerning this risk that the Soviet Union might be able to obtain advantage as the United States lost confidence in more and more of its nuclear weapons, the Director of the Defense Nuclear Agency testified this year that he believed "it would be possible for the Soviet Union to maintain stockpile reliability under a CTB" and that an unverifiable CTB "would be asymmetrical in favor of the Soviets." It is for that reason that I believe we should make verification the key principle in our negotiation of a comprehensive test ban treaty. Our negotiating position should also take into account advantages which the Soviet Union might obtain during a test ban.

Given a long history of testimony to the effect that a complete cessation of testing would result over time in a loss of confidence in our existing nuclear weapons and given the danger that the Soviet Union might gain an advantage from this development, I was surprised to learn that Dr. Kerr's statement to that effect caused a heated controversy within the adminisration and is reported to have drawn the concern of the Soviet negotiators in Moscow. Indeed, even as he spoke, Dr. Kerr's assertion that testing would be required to maintain the long-term reliability of the stockpile was challenged in a letter to the President written by Richard Garwin, signed by Garwin, Noris Bradbury, and J. Carson Mark, endorsed by Hans Bethe and the Federation of American Scientists, and placed in the CONGRESSIONAL RECORD by my colleague, the senior Senator from Massachusetts (Mr. KENNEDY).

The Garwin letter has apparently caused quite a debate in scientific and arms control circles. The letter asserts that nuclear testing is not necessary to maintain confidence in the reliability of our existing nuclear weapons because we can discover any problems through inspection and can overcome those problems without testing by:

"(1) Remanufacture to precisely the original specifications.

(2) Remanufacture with minor modifications in surface treatment, protective coatings, and the like, after thorough review by experienced and knowledgeable individuals.

(3) Replace the nuclear explosive by one which has previously been tested and accepted for stockpile."

Although it is true that many problems can be discovered by inspection and that some problems can be corrected without testing, the assertion that testing is not necessary at all conflicts with testimony before the Congress and with the view of the vast majority of scientific and arms control experts with whom I have spoken.

Clearly, many examples exist of problems discovered only during nuclear detonations and confidence that corrective measures will work has frequently required testing. In fact, even developing the experienced personnel who are competent to judge whether or not a particular change in material or design can be made without testing requires testing.

Furthermore, efforts at remanufacturing weapons exactly as they were first built may not prove as easy as the Garwin letter suggests. Many materials and processes used in weapons now part of our nuclear stockpile are no longer available, and more may become unavailable or too expensive to obtain. The recent controversy over the OSHA regulation of beryllium production illustrates the problem. The Secretary of Energy wrote to the Secretary of Health, Education, and Welfare expressing concern over the impact a decline in production of beryllium would have on our nuclear weapons stockpile if new OSHA restrictions were to cause producers to leave that industry. Similar problems with other strategic materials and processes can be anticipated. Thus, even in cases where problems with nuclear weapons theoretically could be fixed by exact remanufacture of the weapons, in practice even that is often not possible.

Although the question of the need for nuclear testing to maintain the reliability of our nuclear weapons is only one of the issues surounding a comprehensive test ban, it is an important one. For that reason, I wrote to the current directors of our Nation's two nuclear design laboratories and one former director to see if they agreed with the conclusions of the Garwin letter. They did not.

Mr. President, to aid my colleagues in dealing with the complex issues which will surround any comprehensive test ban, I ask unanimous consent that the original Garwin letter be reprinted in the CONGRESSIONAL RECORD following my remarks along with the replies by Dr. Harold Agnew, director of the Los Alamos Scientific Laboratory, Dr. Roger Batzel, director of the Lawrence Livermore Laboratory, and Dr. Michael May, former director of the Lawrence Livermore Laboratory. Also, I ask unanimous consent that an article from the Washington Post on OSHA regulation of beryllium be printed. Thank you.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AUGUST 15, 1978.

President JIMMY CARTER,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: As individuals long involved in the conception, design, manufacture, test, and maintenance of many of the United States' nuclear and thermonuclear weapons, we want you to know of our judgment on a question which has assumed considerable prominence in connection with the

Comprehensive Test Ban Treaty ("CTBT"). That is the question of the degree of assurance in the continued operability of our stockpiled nuclear weapons in the absence of any possibility of testing with significant nuclear yield (for instance, with testing limited to laboratory-type experiments.)

As you know, the assurance of continued operability of stockpiled nuclear weapons has in the past been achieved almost exclusively by non-nuclear testing—by meticulous inspection and disassembly of the components of the nuclear weapons, including their firing and fuzing equipment. Problems encountered in this inspection are normally validated by additional sampling and solved by the remanufacture of the affected components. This program is, of course, supplemented by the instrumented firing of the entire nuclear weapon with inert material replacing the fissile materials, and the entire program thus far described would be unaffected by the requirements of a CTBT. It has been exceedingly rare for a weapon to be taken from stockpile and fired "for assurance."

It has also been rare to the point of nonexistence for a problem revealed by the sampling and inspection program to require a nuclear test for its resolution. There are three acceptable approaches to the correction of deficiencies without requiring nuclear testing:

(1) Remanufacture to precisely the original specifications.

(2) Remanufacture with minor modifications in surface treatment, protective coatings, and the like, after thorough review by experienced and knowledgeable individuals.

(3) Replace the nuclear explosive by one which has previously been tested and accepted for stockpile.

A fourth option, to replace the troubled nuclear system by one not already proof-tested may result in improved performance, lesser use of special nuclear materials, or the like, virtues which have more to do with improvement of the stockpile than with confirming its operability.

We believe that the key question to be answered by those responsible for making and maintaining nuclear weapons is

"Can the continued operability of our stockpile of nuclear weapons be assured without future nuclear testing? That is, without attempting or allowing improvement in performance, reductions in maintenance cost, and the like, are there non-nuclear inspection and correction programs which will prevent the degradation of the reliability of stockpiled weapons?"

Our answer is "yes," and we now discuss the reasons why knowledgeable people may have answered "no" to seemingly similar questions.

First, we confined ourselves essentially to the question. "If the stockpile is not required to improve, can it be kept from degrading?" Others may have had in mind the normal work of the weapons laboratories, by which nuclear weapons are continuously made somewhat more efficient, less costly in terms of nuclear materials, adapted to new packaging requirements, and safer to handle—for instance by the substitution of insensitive explosion. We have participated in such programs and find them both interesting and useful. Were these "improvement programs" carried out long enough without nuclear testing, the weapons thus affected would indeed have uncertain performance; the solution under a CTBT would be to forego such programs in order not to sacrifice stockpile reliability to a desire for minor improvement in performance.

Second, it is true that certain deficiencies have in the past been corrected by the replacement of the affected nuclear system by another one, following a test certifying the replacement model as ready for stockpile. This corrective measure would not be available under a CTBT. But the examples normally cited need not have been corrected in this way; for instance one Polaris warhead problem could readily have been solved by remanufacture with an acceptable change of surface treatment on the component which had caused the problem. The change of nuclear system was not absolutely necessary for the correction of the problem observed.

Finally, it is sometimes claimed that remanufacture may become impossible because of increasingly severe restrictions by EPA or OSHA to protect the environment of the worker. We note that additional protective measures which might be an intolerable cost burden in the manufacture of cardboard or of lightbulbs or of aircraft brakes are easily affordable in connection with the nuclear stockpile. Thus if the worker's environment acceptable until now for the use of asbestos, spray adhesives, or beryllium should be forbidden by OSHA regulations, those few workers needed to continue operations with such material could wear plastic film suits (supplied with external air) commonly used for isolation against germs and against certain pharmaceuticals. It would be wise also to stockpile in appropriate storage facilities certain commercial materials used in weapons manufacture which might in the future disappear from the commercial scene.

It has been suggested that under a CTBT a President or Congress or the Department of Energy might not provide funds for stockpile maintenance inspection and correction, or that a President might not provide a requested exemption from OSHA or EPA requirements. We see no reason to assume that the national security bureaucracy will not continue to serve the national interest, and we would welcome a statement in conjunction with a CTBT that non-nuclear testing, inspection, and remanufacture where necessary will be fully supported in order to ensure the continued operability of stockpiled nuclear weapons.

We believe that the Department of Energy, throught its contractors and laboratories, can through the measures described provide continuing assurance for as long as may be desired of the operability of the nuclear weapons stockpile. We are making this statement available to others in the Executive and the Congress.

Sincerely Yours,

J. CARSON MARK,
NORRIS E. BRADBURY,
RICHARD L. GARWIN.

UNIVERSITY OF CALIFORNIA,
LOS ALAMOS SCIENTIFIC LABORATORY,
Los Alamos, N. Mex., September 22, 1978.

Senator DEWEY F. BARTLETT,
U.S. Senate,
Committee on Armed Services,
Washington, D.C.

DEAR SENATOR BARTLETT: Reference your letter of September 1, 1978. I appreciate the opportunity to comment on the Garwin *et al.* letter. In my opinion our present nuclear weapon stockpile can be maintained for an indefinite period with adequate certainty of its reliability only if we are allowed to test up to a few kt. If we are not allowed to test to this level, I can foresee problems arising which may seriously affect our strategic deterrent. In addition, without a test program we will certainly lose the knowledgeable experienced individuals who are able to recognize or cope with those problems.

We have been able to avoid most stockpile problems not only through a continuing nonnuclear surveillance program but through our present nuclear testing program. These tests have specific relevance to our stockpile since many of them have nuclear components identical to those existing in stockpiled systems.

Coupled with the need to test up to a few kt is the indisputable fact that we will not be able to determine if any other nation is honoring a zero-threshold treaty. I believe that eventually, if the Soviets make their land mass accessible to us, we may be able to monitor a treaty down to about 5 kt, but I question our ability to do so now. Any CTB will be in effect a threshold treaty. I don't believe we should set the threshold below a level which we can have reasonable assurance of monitoring, particularly when that level would be sufficient for essential U.S. tests.

In theory, we should be able to rebuild, given enough resources anything which has been built in the past. This is the basis of the Garwin letter. Unfortunately, theory and actual practice are not always compatible. Recent events have confirmed my opinion that if problems do occur in the stockpile, we will not be able to rebuild exactly certain vital components, and without nuclear testing serious questions will arise for which we may no longer have the expertise to answer. In my opinion, the implications are too serious to trust to wishful thinking. Present strategic systems and those about to enter the stockpile are quite different from those in which Bradbury and Mark were actually involved, and Garwin, competent as he is, has never been directly involved in putting any nuclear weapon into the stockpile.

I presume the objective of a CTB is to encourage other nations to sign the NPT. It would appear to me that if the major powers were to point out that over the years we have gone from unlimited testing in the atmosphere, to complete containment, to a 150-kt limitation, and now we are prepared to lower the threshold to a few kt it should indicate progressive restraint on our part. It could be especially effective if it were pointed out that a 5-kt threshold would preclude the introduction of any new strategic warheads but would insure the reliability of existing stockpiles. Maintaining the credibility of the strategic nuclear deterrent of both the East and West should be of concern to all nations. If any asymmetry should develop, it could be extremely destabilizing to world order.

In the meantime. I would hope that we would continue our efforts to bring into being a meaningful SALT agreement and a reduction in conventional arms. Until progress is made in these areas I would not support any type of CTB. Thanks again for contacting me on this vital matter.

Sincerely,

H. M. AGNEW,
Director.

LAWRENCE LIVERMORE LABORATORY,
September 25, 1978.

HON. DEWEY F. BARTLETT,
U.S. Senate, Committee on Armed Services,
Washington, D.C.

DEAR SENATOR BARTLETT: I would like to comment on the question of the reliability of the United States nuclear weapon stockpile under a comprehensive ban on nuclear weapon testing. As you are aware, a letter from Drs. Garwin, Bradbury, and Mark, dated August 15, 1978, claimed that the operability of the nuclear weapon stockpile can be maintained for as long as may be desired. In this letter I wish to summarize the reasons why I cannot subscribe to this view.

First, the nuclear weapon stockpile is not static. Changes have been made, are being made, and will be made. We expect all nuclear weapons will need to be replaced or remanufactured within a few decades of their original manufacture. More and more of our stockpiled weapons are approaching this retirement age. No amount of good intentions or executive decisions will prevent chemical corrosion, the unavailability of exact replacement materials, or new perceptions of

the safety of manufacturing processes. Additionally, budgetary considerations and probable new safety or systems requirements will provide an irresistable motivation for future changes in our weapons or their replacements, even under a CTBT.

Second, recognition of stockpile problems and their fixes can be made reliably only by experienced scientists and engineers. Experienced personnel will not be long available under a CTBT because some will leave weapons work for other fields, or some will leave because of the absence of the experimental confirmation necessary for scientific professionalism, or others will stay and lose their expertise through lack of the hard reality of experimental verification. Drs. Bradbury and Mark must certainly recall our experience with the test moratorium of 1958–61. During that time some of the best people left weapons work.

Also during that period, a number of new weapons were put into stockpile, owing to new system requirements such as Minuteman and Polaris. There were some design errors which were discovered, some by nuclear testing, some by non-nuclear testing. Some of these errors required nuclear tests for correction. The Garwin letter claims, as an example, that a change in surface treatment would have allowed remanufacture of a class of malfunctioning warheads. Being closer to the problems than they were, I can assure you that after a concerted study no solution to the problem was known to us other than the major design change we made, which necessitated and received nuclear test verification.

Third, the fact that nuclear testing of stockpile weapons has only infrequently shown problems in the stockpile does not mean that nuclear testing is unimportant for maintenance of stockpile reliability. Testing of other than stockpile weapons has led us to recognition and fixes of stockpile problems. The whole body of nuclear testing provides us with the expertise required to recognize, prevent, and fix stockpile problems and to assert with confidence that the current stockpile is highly reliable.

Although not discussed by Garwin et al., it is essential to bear in mind that we cannot assume that stockpile degradation will be symmetrical in respect to US and Soviet weapons. We just do not know how Soviet weapons are made, by what means they can maintain their weapon scientists, or what their remanufacturing problems are.

It is for these reasons that I believe the continued credibility of the US nuclear weapon deterrent cannot be assured for long without nuclear testing.

Sincerely,

ROGER E. BATZEL,
Director.

LAWRENCE LIVERMORE LABORATORY,
September 26, 1978.

Hon. DEWEY F. BARTETT,
U.S. Senate, Committee on Armed Services, Washington, D.C.

DEAR SENATOR BARTLETT: Thank you for your letter of September 15, 1978, concerning the letter by Dr. Norris Bradbury and others to the President, which Senator Kennedy placed in the CONGRESSIONAL RECORD for August 17, 1978.

Reviewing the arguments and counter-arguments in the matter, it seems to me that the essential differences are only in part matters of technical opinion. They also involve judgments about how the job of maintaining deterrent nuclear forces can be carried out today, in practice rather than theory.

As the letter writers recognize, deployed U.S. nuclear weapons have been and are now in a process of change. The reasons for the changes range from something as major as the development of a new missile system and the consequent need for changes in dimensions and yields, to something as apparently minor as the deterioration of some material on the outside of the weapon. The changes are sometimes verified with a nuclear test, sometimes not. The judgment as to whether a test is needed or not is informed by the ongoing nuclear test series.

I do not believe that these changes can stop if and when a Comprehensive Test Ban is signed. New systems will continue to be required, materials will continue to deteriorate. There are now in the process of development weapons aimed at fulfilling requirements that may arise after a CTB is in force. These weapons are not in final form, nor can they be. Certain changes will have to be made as the requirements become more clearly defined. The process cannot be frozen at a time of our choosing. Nuclear weapons are not isolated items, but part of the hardware of deterrent systems. Neither natural processes, nor the strategic situation, with all the technological and political factors that contribute to it, can remain static out of deference to the CTB.

To comtemplate relying on "remanufacture", "remanufacture with minor modifications", or "replac(ing) the nuclear explosive by one which has previously been tested" under these circumstances, seems to me risky in the extreme. It involves a misjudgment of the human and technical processes by which we arrive at new or modified nuclear weapon systems, and a misunderstanding of our capabilities and limitations.

Modifications will occur. Some are minor, some not so minor. There are differences of opinion about which modifications need to be tested and which do not. Resolving these differences through boards of experts, informed only by calculations and non-nuclear testing, is an unreliable procedure. One need not be a "nuclear testing buff" as Senator Kennedy puts it, to realize that, in every technical field, experiments have been needed to check on even what seemed to be most conservative assumptions—and, often enough, the assumptions have been found wrong. There are several instances in the nuclear weapon field and countless ones in other fields.

In sum, it is unrealistic, both from the strategic and the technological point of view, to assume that we can proceed with no change whatsoever in deployed weapons. Given that there will be some changes, it is equally unrealistic to assume that we will be able infallibly to draw the line between those that do and those that do not need to be verified by nuclear tests in the future, when we have not been able to do so in the past. The situation envisaged by Dr. Bradbury and others thus does not represent the real situation in which we find ourselves today.

I hope this letter is of help in your evaluation. I have sent these comments also to Congressman Kemp in answer to his request.

Sincerely yours,

MICHAEL M. MAY.

[From the Washington Post, Sept. 14, 1978]

SCHLESINGER FAULTS BERYLLIUM RULE, CITES NATIONAL SECURITY

(By Bill Richards)

Energy Secretary James R. Schlesinger has told federal occupational health officials that national security could be endangered if a proposed regulation is enacted cutting worker exposure to a suspected cancer-causing metal.

Officials said Schlesinger's warning was the first time the rationale of national security had been used to oppose costly production changes required of industry for worker safety.

In a two-page letter to Labor Secretary Ray Marshall, Schlesinger said a study by the Energy Department concluded recently that the cost of meeting a proposed exposure standard for beryllium may drive the only two non-communist producers of the metal out of business and cut off the U.S. supply.

"The loss of beryllium production capability," Schlesinger wrote in the Aug. 30 letter, "would seriously impact our ability to develop and produce weapons for the nuclear stockpile and, consequently, adversely affect our national security."

The Labor Department's Occupational Safety and Health Administration has proposed cutting worker exposure to the metal from two micrograms to one microgram in a cubic meter of air. The metal has been cited by federal health experts as responsible for causing fatal respiratory disease and cancer in workers.)

A copy of Schlesinger's letter and other related documents were obtained by The Washington Post. The documents indicate that top Health, Education, and Welfare Department officials, acting under political pressure, agreed recently to delay enactment of the tougher exposure standard and instead to institute a full review of the medical effects of beryllium.

The decision was made by Secretary Joseph A. Califano Jr., according to HEW documents, despite assurances earlier from the department's senior medical officer that enough medical evidence already existed to determine the cancer danger of the metal to workers.

Federal health officials, who asked not to be named, said laboratory studies on the metal have provided unusually strong evidence of the metal's danger as a human poison and carcinogen. The metal has been shown to cause cancer, they said, in nine species of laboratory animals. Evidence in two species is currently required by federal officials for a determination that a substance is a potential carcinogen.

In his letter to Marshall, Schlesinger said: "It is improbable that industry would invest millions of dollars in an attempt to reduce the beryllium exposure with no assurance that their facilities can be brought into compliance with the proposed standard."

Such a standard, Schlesinger added, "places a heavy burden upon the free world's two primary beryllium producers, who might cease production of high purity beryllium metal and beryllium oxide" if the standard is put into effect.

The two firms producing the ultralight metal are Kawecki-Berylco Industries Inc., of Reading, Pa., and the Brush Wellman Co., of Cleveland. Both have opposed the regulation since it was proposed two years ago. A 1975 federal study estimated that about 30,000 workers are exposed to beryllium dust and fumes on the job.

Beryllium is a critical component in the aerospace and nuclear industries and is used in items such as nuclear reactors, rocket motor parts, missile guidance systems and heat shields. According to industry officials, virtually all the pure beryllium that is produced is purchased for government use.

Concern over the toxicity of the metal is not new. In 1968, according to a HEW memo, officials became concerned over private researchers' warnings that the fallout from rocket firings could expose civilian populations near takeoff sites to beryllium. After a Massachusetts researcher threatened to make her fears public, a senior HEW official wrote, "This could be a bombshell if her views would ever get into print."

Other HEW documents obtained by The Washington Post indicate that intense political pressure this year caused the agency to back down from its strong stand for an immediate new beryllium standard.

In a letter in March, Dr. Julius B. Richmond, assistant HEW secretary for health, noted concern from political and industrial officials over the beryllium studies used by federal regulators. Richmond said he would

go along with a review of the studies if necessary and estimated it would take two weeks.

"However," the HEW official wrote, in a letter to OSHA Director Eula Bingham, "our basic conclusions concerning the carcinogenicity of beryllium were reached before the above mentioned studies were completed. I would expect, therefore, that the standard-setting process can proceed."

Despite Richmond's assurances, HEW Secretary Califano came under pressure from several senators to delay the standard setting. In an Aug. 21 letter from Califano to Sen. John Glenn (D-Ohio), the HEW secretary noted the interest for an independent review of beryllium by Glenn—whose state is the home of one of the two beryllium producers—and promised it would be undertaken by Richmond.

A spokesman for Califano said yesterday that the HEW Secretary acted after Richmond apparently changed his mind and decided a new study of the metal was necessary. The spokesman said Califano discussed the beryllium situation with Richmond but that Richmond apparently did not tell his boss of his earlier letter to Bingham saying the new study was not necessary.

Califano's review, according to HEW documents and federal officials, is considerably broader than the one first suggested. Federal officials estimated it could delay implementation of the beryllium standard for up to a year. The standard was scheduled to go into effect during the past summer, officials said.

Califano was asked about the beryllium controversy during a union health and safety conference here this week. He told delegates to the conference he was not aware of the conflict over the exposure standard for the metal.

Schlesinger's letter has raised additional questions. Energy Department officials said yesterday it would cost about $150 million to convert the nation's two beryllium producers' facilities to attempt to meet the proposed standard.

However, according to Dr. F. Charles Gilbert, deputy director of DOE's Office of Military applications, only a small portion of the two firms' total beryllium production is the type purchased by the government.

Gilbert said about 2 percent of Kawecki-Berylco's beryllium production is "pure beryllium," the kind used by the government for defense and aerospace programs. About 10 percent of Brush Wellman's output is pure beryllium, he said.

An official of Kawecki-Berylco estimated yesterday it would cost his company about $12 million to try to meet the new standard for its pure beryllium production facility. Brush Wellman officials said they were unable to estimate the cost of trying to convert their pure beryllium facility.

Officials of both firms said, however, they did not believe they could meet the proposed standard with current technology no matter how much money they spent. H. G. Piper, president of Brush Wellman, said in a telephone interview his company would continue its nongovernment beryllium production even if it meant violating the new standard.

"We already violate the standard they have now," he said.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, Mr. LONG has left the floor, I seek recognition.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, we are continuing to put forth an effort to reach a time agreement on the hospital cost containment vehicle. For that reason, that we may continue, I ask unanimous consent that my right to the floor be preserved while I suggest the absence of a quorum.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Wisconsin without losing my right to the floor.

Mr. NELSON. Mr. President, I ask unanimous consent that Larry Gage, formerly of my staff, now with HEW, who has been working with me on my amendment, be granted privilege of the floor during the course of the consideration of the hospital cost containment legislation and the votes thereon.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—H.R. 5285

Mr. ROBERT C. BYRD. Mr. President, with the understanding that the bill now before the Senate will be laid aside in the event I can get a time agreement, and that the Senate would proceed to the consideration then of H.R. 5285, Calendar Order No. 1031, which is an act to amend the Tariff Schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets, and plates of certain plastics or rubber, thus allowing Senators to call up their amendments with respect to hospital cost containment, I would proceed to propound such a unanimous consent request.

Mr. HEINZ. Reserving the right to object, is that everything?

Mr. ROBERT C. BYRD. I have not propounded any request yet, but I will be glad to yield to the distinguished Senator.

Mr. HEINZ. I was just wondering what else there may be to the Senator's unanimous-consent request.

Mr. ROBERT C. BYRD. I will be glad to state that request. The request would be as follows: That at such time as the bill, H.R. 5285, is called up and made the pending business—and it would be understood if the agreement is entered into I would move to proceed immediately to that bill—at such time as that bill is called up and made the pending business before the Senate, there be a time limitation on it as follows: 1 hour to be equally divided between Senator TALMADGE and Senator KENNEDY; that there be a time limitation on an amendment by Senator KENNEDY of 40 minutes, to be equally divided, that will be in the usual form; that there be a time limitation on an amendment by Senator NELSON of 40 minutes, to be equally divided, in accordance with the usual form; and that there be a time limitation on any other amendments of 20 minutes, to be equally divided, and that the agreement be in the usual form.

Mr. ABOUREZK. Reserving the right to object, Mr. President, I want to ask a question.

The Senator is going to call up H.R. 5285 for the purpose of putting a substitute on that dealing with hospital cost containment?

Mr. ROBERT C. BYRD. There would be hospital cost containment amendments offered. Mr. KENNEDY would offer one. Mr. NELSON would offer one.

Mr. ABOUREZK. Would Senator TALMADGE's original bill be offered as an amendment?

Mr. ROBERT C. BYRD. It would be a vehicle.

Mr. ABOUREZK. Well, Mr. President, may I just say, there is a section of the Talmadge bill that deals with exempting from Freedom of Information Act.

What I am trying to protect, the jurisdiction of my subcommittee in Judiciary, which has jurisdiction over Freedom of Information, that bill never came through, through my subcommittee, and what I would like to do is protect myself for a point of order.

So I would like to be able to have the agreement in the form that I can raise a point of order that would lie to be decided by the Chair, of course, if I could do that.

Mr. ROBERT C. BYRD. Does the Senator from Georgia wish to respond?

Mr. ABOUREZK. I do not want to get third-degreed out.

Mr. ROBERT C. BYRD. Mr. President, while the Senator is conferring, I would add to that agreement that any debate on any debatable motion, point of order, or appeal, if such point of order is submitted to the Senate for its discussion, be limited to 10 minutes, to be equally divided in accordance with the usual form.

Mr. ABOUREZK. I am still reserving my right to object.

Mr. ROBERT C. BYRD. Yes.

And that Senator BAKER have 20 minutes on an amendment by Senator BAKER, equally divided in accordance with the usual form; on an amendment by Senator MORGAN there be a time limitation of 40 minutes, to be equally divided in accordance with the usual form.

The PRESIDING OFFICER. Is there objection?

Several Senators addressed the Chair.

Mr. ABOUREZK. I am still reserving my right to object. I want to include in the agreement, if it is possible that the leader would do that. If we offer the Talmadge bill as an amendment, I am precluded from raising a point of order.

That is what I am talking about. It is a vehicle. But if he offers it as an amendment to the vehicle, I am precluded from raising a point of order on the grounds of jurisdiction.

Mr. ROBERT C. BYRD. It is in the bill.

Mr. ABOUREZK. I know. I want to take it out of the bill. I just want it to be considered as original text for the purpose of raising a point of order on the jurisdictional question of that section, if we include that, or a motion to strike, either one.

Mr. ROBERT C. BYRD. Mr. President, that will be included in the request.

Several Senators addressed the Chair.

Mr. BAKER. Reserving the right to object, I have a request from the Senator from North Carolina to be included in such a request, if such a request is made.

Mr. HELMS. A time stipulated for other amendments, 20 minutes, 10 to a side, would be fine.

Mr. BAKER. All right.

In addition to that, did I understand the majority leader to say his unanimous-consent request included to provide amendments be in the usual form?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Except those specified?

Mr. ROBERT C. BYRD. Yes, except those specified.

Several Senators addressed the Chair.

Mr. BUMPERS. Reserving the right to object——

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Mr. President, the unanimous-consent agreement does not cover germaneness.

Mr. TALMADGE. Yes it does.

Mr. ROBERT C. BYRD. Yes, it does.

Mr. BUMPERS. Then I would like to be included. The Senator did not name my amendment. I would like for my amendment to be specifically——

Mr. ROBERT C. BYRD. The Senator's amendment would be germane, but I thought I mentioned the Senator specifically.

In any event, I mention the Senator's name now.

Mr. BUMPERS. Twenty minutes, 10 on a side.

Mr. ROBERT C. BYRD. Equally divided.

Several Senators addressed the Chair.

Mr. HEINZ. Reserving the right to object, my understanding of the unanimous-consent request is that upon the disposition of the hospital cost containment, that we would return to the pending business, which is the Sugar Act.

Mr. ROBERT C. BYRD. Yes.

Mr. HEINZ. With that understanding, I shall not object.

Mr. ROBERT C. BYRD. All right.

The PRESIDING OFFICER. How much time is set aside for the Senator from North Carolina?

Mr. DOLE. Twenty minutes, 10 on a side.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Reserving the right to object, we have sort of done this piecemeal. Can the Chair state now the amendments that will be specified by name in the unanimous-consent?

The PRESIDING OFFICER. Senator KENNEDY, 40 minutes; Senator NELSON, 40 minutes; Senator BAKER, 20 minutes; Senator MORGAN, 40 minutes; Senator BUMPERS, 20 minutes; Senator HELMS, 20 minutes; all other amendments, 20 minutes; debatable motions, appeals, et cetera, 10 minutes.

Mr. BAKER. And the request is in the usual form?

The PRESIDING OFFICER. In the usual form.

Mr. SCHWEIKER. Any Senator has a 20-minute prerogative, that does not have to be specified in there?

Mr. BAKER. No.

The PRESIDING OFFICER. Any amendment will get 20 minutes, equally divided.

Mr. SCHWEIKER. I have several amendments, and I am protected.

The PRESIDING OFFICER. The Senator is correct.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. I yield to the Senator from Utah.

Mr. HATCH. I have four amendments to this bill.

Mr. ROBERT C. BYRD. Are they germane? If not, they would be included in the——

Mr. HATCH. I am not sure.

Mr. BAKER. Include them.

Mr. ROBERT C. BYRD. It is all right with me to include them, but I do not know what we may be getting on amendments that are not explained here. I am not saying this just with reference to the Senator.

Mr. METZENBAUM. I have an amendment that is germane.

Mr. BAKER. Twenty minutes on four amendments?

Mr. HATCH. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. HATCH. Are we going to continue on the nongermane hospital containment amendment?

Mr. TALMADGE. No, it will be germane.

Mr. HATCH. How will it be germane?

Mr. TALMADGE. Relating to hospital cost containment. That is the bill that will be pending before the Senate.

Mr. HATCH. That will be the pending bill?

Mr. TALMADGE. Yes.

Mr. ROBERT C. BYRD. Mr. President, I ask that the Senator's amendments be included—he has four—with a time limitation of 20 minutes, equally divided.

Mr. HATCH. Yes.

The PRESIDING OFFICER. Is there objection?

Mr. HATCH. Mr. President, reserving the right to object——

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, with the understanding that I retain my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, the concern has been expressed that an amendment dealing with the Illinois Brick matter might be one of the amendments that is specified which can come in——

Mr. KENNEDY. I can assure the leader that that will not be an amendment to this bill. My legislation is on the calendar, and it has been there for several months, and it will not be an amendment to this bill.

Mr. ROBERT C. BYRD. I thank the Senator. I did not have the Senator in mind, but other Senators have gotten amendments in simply by naming the author of the amendment.

I ask unanimous consent—I hope I do not step on anybody's toes—I ask unanimous consent, as a part of this agreement, that no amendments dealing with the Illinois Brick matter be in order.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, did we get the entire request agreed to?

The PRESIDING OFFICER. Yes. The Senator is correct.

Mr. ROBERT C. BYRD. Mr. President, will the Senators withdraw their amendments to the pending sugar bill?

Mr. TALMADGE. I withdraw my amendment.

Mr. KENNEDY. I withdraw the amendment.

Mr. ROBERT C. BYRD. Mr. President, are the amendments withdrawn?

The PRESIDING OFFICER. The Senator is correct.

CLOTURE MOTION

Mr. ROBERT C. BYRD. Mr. President, I send a cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair, without objection, directs the clerk to read the motion.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on H.R. 7200, an act to amend the Social Security Act to make needed improvements in the programs of supplemental security income benefits, aid to families with dependent children, child welfare services, and for other purposes.

Robert C. Byrd, Abraham Ribicoff, Spark M. Matsunaga, Daniel K. Inouye, Russell B. Long, Milton J. Young, Robert Dole, Howard H. Baker, Jr., Ted Stevens, Richard (Dick) Stone, Carl T. Curtis, Dale Bumpers, Jim Sasser, Robert Morgan, Herman E. Talmadge, and Gaylord Nelson.

MEDICARE-MEDICAID ADMINISTRATIVE AND REIMBURSEMENT REFORM ACT

Mr. ROBERT C. BYRD. Mr. President, I now move that the Senate proceed to the consideration of Calendar No. 1031, H.R. 5285, the bill on which we have just reached a time agreement.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 5285) to amend the Tariff Schedules of the United States with respect to the tariff treatment accorded to film, strips, sheets, and plates of certain plastic and rubber.

The motion was agreed to, and the Senate proceeded to consider the bill, which had been reported from the Committee on Finance with an amendment to strike all after the enacting clause and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Medicare-Medicaid Administrative and Reimbursement Reform Act".

TABLE OF CONTENTS

HOSPITAL REIMBURSEMENT REFORM

Sec. 2. Criteria for determining reasonable cost of hospital services.
Sec. 3. Payments to promote closing and conversion of underutilized facilities.
Sec. 4. Federal participation in hospital capital expenditures.

PRACTITIONER REIMBURSEMENT REFORMS

Sec. 5. Agreement by physicians to accept assignments.
Sec. 6. Certain surgical procedures performed on an ambulatory basis.
Sec. 7. Criteria for determining reasonable charge for physicians' services.
Sec. 8. Payment for certain antigens under part B of medicare.
Sec. 9. Payments on behalf of deceased individuals.

LONG-TERM CARE REFORMS

Sec. 10. Hospital providers of long-term care services.
Sec. 11. Reimbursement rates under medicaid for skilled nursing facilities and intermediate care facilities.
Sec. 12. Medicaid certification and approval of skilled nursing and intermediate care facilities.
Sec. 13. Visits away from institution by patients of skilled nursing or intermediate care facilities.

GENERAL REFORMS

Sec. 14. Notification to State officials.
Sec. 15. Repeal of section 1867.
Sec. 16. Procedure for determining reasonable cost and reasonable charge.
Sec. 17. Ambulance service.
Sec. 18. Grants to regional pediatric pulmonary centers.
Sec. 19. Waiver of human experimentation provision for medicare and medicaid.
Sec. 20. Disclosure of aggregate payments to physicians.
Sec. 21. Resources of medicaid applicant to include assets disposed of at substantially less than fair market value.
Sec. 22. Rate of return on net equity for for-profit hospitals.
Sec. 23. Deductible not applicable to expenses for certain independent laboratory tests.
Sec. 24. Payment for laboratory services under medicaid.
Sec. 25. Status of professional standards review organizations.
Sec. 26. Removal of three-day hospitalization requirement and 100 visit limitation for home health services.
Sec. 27. Payment for durable medical equipment.
Sec. 28. Development of uniform claims forms for use under health care programs.
Sec. 29. Coordinated audits under the Social Security Act.

CRITERIA FOR DETERMINING REASONABLE COST OF HOSPITAL SERVICES

SEC. 2. (a)(1) The first sentence of section 1861(v)(1)(A) of the Social Security Act is amended by striking out "The" and inserting "Subject to subsection (bb), the".

(2) Section 1861(v) of such Act is further amended by adding at the end thereof the following new paragraph:

"(8) For additional requirements applicable to determination of reasonable cost for services provided by hospitals, see subsection (bb).".

(b) Section 1861 of such Act is amended by adding after subsection (aa) the following new subsection:

"Criteria for Determining Reasonable Cost of Hospital Services

"(bb)(1) In order more fairly and effectively to determine reasonable costs incurred in providing hospital services, the Secretary shall, not later than April 1, 1979, after consulting with appropriate national organizations, establish a system of hospital classification under which hospitals furnishing services initially will be classified—

"(A) by size, with each of the following groups of hospitals being classified in separate categories: (i) those having more than 5, but fewer than 25, beds, (ii) those having more than 24, but fewer than 50, beds, (iii) those having more than 49, but fewer than 100, beds, (iv) those having more than 99, but fewer than 200, beds, (v) those having more than 199, but fewer than 300, beds, (vi) those having more than 299, but fewer than 400, beds, (vii) those having more than 399, but fewer than 500, beds, and (viii) those having more than 499 beds;

"(B) by type of hospital, with (i) short-term general hospitals being in a separate category, (ii) hospitals which are primary affiliates of accredited medical schools being in one separate category (without regard to bed size), and (iii) psychiatric, geriatric, maternity, pediatric, or other specialty hospitals being in the same or separate categories, as the Secretary may determine appropriate, in light of any differences in specialty which significantly affect the routine costs of the different types of hospitals;

"(C) as rural or urban; and

"(D) according to such other criteria as the Secretary finds appropriate, including modification of bedsize categories;

but the system of hospital classification shall not differentiate between hospitals on the basis of ownership.

"(2) The term 'routine operating costs' used in this subsection does not include—

"(A) capital and related costs,

"(B) direct personnel and supply costs of hospital education and training programs,

"(C) costs of interns, residents, and non-administrative physicians,

"(D) energy costs,

"(E) malpractice insurance expense, or

"(F) ancillary service costs.

"(3)(A) During the calendar quarter beginning on January 1 of each year, beginning with 1979, the Secretary shall determine, for the hospitals in each category of the system established under paragraph (1), an average per diem routine operating cost amount which shall (except as otherwise provided in this subsection) be used in determining payments to hospitals.

"(B) The determination shall be based upon the amount of the hospitals' routine operating costs for the most recent accounting year ending prior to October 1 of the calendar year preceding the calendar year in which the determination is made. If, for any accounting year which starts on or after July 1, 1979, a hospital's actual routine operating costs are in excess of the amount allowed for purposes of determining payment to the hospital pursuant to this subsection and subsection (v), only one-half of such excess shall be taken into account in making any determination which the Secretary shall make under this paragraph.

"(C) In making a determination, the routine operating costs of hospitals in each category shall be divided into personnel and nonpersonnel components.

"(D)(i) The personnel and nonpersonnel components of routine operating costs for hospitals in each category (other than for those excluded under clause (ii)) shall be divided by the total number of days of routine care provided by such hospitals to determine the average per diem routine operating cost for such category.

"(ii) In making the calculations required by subparagraph (A) the Secretary shall exclude any newly opened hospital (as defined in the second sentence of paragraph (4)(F)), and any hospital which he determines is experiencing significant cost differentials resulting from failure of the hospital fully to meet the standards and conditions of participation as a provider of services.

"(E) There shall be determined for each hospital in each category a per diem target rate for routine operating costs. Such target rate shall equal the average per diem routine operating cost amount for the category in which the hospital is expected to be classified during the subsequent accounting year, except that the personnel component shall be adjusted using a wage index based upon general wage levels for reasonably comparable work in the areas in which the hospitals are located. If the Secretary finds that, in an area where a hospital in any category is located for the most recent twelve-month period for which data with respect to such wage levels are available, the wage level for such hospital is significantly higher than such general wage level in that area (relative to the relationship within the same hospital group between hospital wages and such general wages in other areas), then such general wage level in the area shall be deemed equal to the wage level for such hospital, only with respect to the hospital's first accounting year on or after July 1, 1979.

"(4)(A)(i) The term 'adjusted per diem target rate for routine operating costs' means the per diem target rate for routine operating costs plus the percentage increase in costs determined under the succeeding provisions of this subparagraph.

"(ii) In determining the adjusted per diem target rate, the Secretary shall add an annual projected percentage increase in the cost of the mix of goods and services (including personnel and nonpersonnel costs) comprising routine operating costs, based on an index composed of appropriately weighted indicators of changes in the economy in wages and prices which are representative of services and goods included in routine operating costs. Where actual changes in such weighted index are significantly different (at least one-half of 1 percentage point) from those projected, the Secretary shall issue corrected target rates on a quarterly basis. At the end of the hospital's accounting year, the target rate shall be adjusted to reflect the actual changes in such weighted index. Adjustments shall also be made to take account of changes in the hospital's classification.

"(B) For purposes of payment the amount of routine operating cost incurred by a hospital shall be deemed to be equal—

"(i) in the case of a hospital which has actual routine operating costs equal to or greater than that hospital's adjusted per diem target rate for routine operating costs, to the greater of—

"(I) the hospital's actual routine operating costs, but not exceeding—

"(a) in the case of the first accounting year of any hospital which begins on or

after July 1, 1979, and prior to July 1, 1980, an amount equal to the aggregate of (1) 100 percent of the hospital's adjusted per diem target rate for routine operating costs, plus (2) 15 percent of the amount described in clause (1), and

"(b) in the case of any accounting year after the accounting year described in clause (a), an amount equal to the aggregate of (1) 100 percent of the hospitals' adjusted per diem target rate for routine operating costs for such year, plus (2) a dollar amount equal to the dollar amount determined under clause (a)(2) for the category of such hospital, or

"(II) the amounts determined for the hospital under division (I) if it had been classified in the bed-size category which contains hospitals closest in bed-size to such hospital's bed-size (with a hospital which has a bed-size that falls halfway between two such categories being considered in the category which contains hospitals with the greater number of beds), but not exceeding the hospital's actual routine operating costs; and

"(ii) in the case of a hospital which has actual routine operating costs which are less than that hospital's adjusted per diem target rate for routine operating costs, to (I) the amount of the hospital's actual routine operating costs, plus (II) the smaller of (a) 5 percent of the hospital's adjusted per diem target rate for routine operating costs, or (b) 50 percent of the amount by which the hospital's adjusted per diem target rate for routine operating costs exceeds the hospitals' actual routine operating costs.

"(C) Any hospital (other than a newly opened hospital) excluded by the Secretary under paragraph (3)(D)(ii), shall be reimbursed for routine operating costs on the basis of the lesser of (i) actual costs or (ii) the reimbursement determined under this subsection.

"(D) On or before April 1 of the year in which the Secretary determines the amount of the average per diem operating cost for each hospital category and the adjusted per diem target rate for each hospital, the Secretary shall publish the determinations, and he shall notify the hospital administrator and the administrative governing body of each hospital with respect to all aspects of the determination which affect the hospital.

"(E) If a hospital is determined by the Secretary to be—

"(i) located in an underserved area where hospital services are not otherwise available,

"(ii) certified as being currently necessary by an appropriate planning agency, and

"(iii) underutilized,

the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to the underutilized capacity.

"(F) If a newly opened hospital is determined by the Secretary to have greater routine operating costs as a result of the cost patterns associated with newly opened hospitals, the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to such patterns. For purposes of this subparagraph a 'newly opened hospital' means a hospital which has not satisfied the requirements of paragraphs (1) and (7) of subsection (e) of this section (under present or previous ownership) for at least twenty-four months prior to the start of such hospital's accounting year.

"(G) If a hospital is determined by the Secretary to have greater routine operating costs as a result of changes in service on account of consolidation, sharing, or addition of services, where such consolidation, sharing, or addition has been approved by the appropriate State Health Planning and Development Agency or Agencies, the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to such changes in service.

"(H) If a hospital satisfactorily demonstrates to the Secretary that, in the aggregate, its patients require a substantially greater intensity of care than generally is provided by the other hospitals in the same category, resulting in unusually greater routine operating costs, then the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to the greater intensity of care required. To the extent that a hospital can demonstrate that it experiences routine operating costs in excess of such costs for hospitals having a reasonably similar mix of patients on account of consistently shorter lengths-of-stay in such hospital, which result from the greater intensity of care provided by such hospital, the excess routine operating costs shall be considered attributable to the greater intensity of care required.

"(I) The Secretary may further increase the adjusted per diem target rate applicable in Alaska and Hawaii to reflect the higher prices prevailing in such States.

"(J) Where the Secretary finds that a hospital has manipulated its patient mix, or patient flow, or provides less than the normal range and extent of patient services, or that an unusually large proportion of routine nursing service is provided by private-duty nurses, the routine operating costs of that hospital shall be deemed equal to the lesser of (i) the amount determined without regard to this subsection, or (ii) the amount determined under subparagraph (B).

"(5) Where any provisions of this subsection are inconsistent with section 1861(v), this subsection supersedes section 1861(v).

"(6)(A) Notwithstanding any other provision of this Act, in the case of any State which has established a reimbursement system for hospitals, hospital reimbursement in that State under this title and under the State plan approved under title XIX shall, with respect to the services covered by such system, be based on that State system, if the Secretary finds that—

"(i) the State has mandated the reimbursement system and it at least applies to the same hospitals in the State, and to the same costs, as the Federal reimbursement reform program established by this subsection;

"(ii) every hospital in the State with which there is such a provider agreement conforms to the accounting and uniform reporting requirements of section 1121 of this Act, and furnishes any appropriate reports that the Secretary may require; and

"(iii) such State demonstrates to his satisfaction that the total amount payable, with respect to inpatient hospital costs, in the State under this title and under the State plan approved under title XIX will be equal to or less than the amount which would otherwise be payable for such costs under this title and such State plan.

If the Secretary finds that any of the above conditions in a State which previously met them have not been met for a two-year period, the Secretary shall, after due notice, reimburse hospitals in that State according to the provisions of this Act (other than this paragraph) unless he finds that unusual, justifiable and nonrecurring circumstances led to the failure to comply.

"(B) If the Secretary finds that, during any two-year period during which hospital reimbursement under this title and under the State plan approved under title XIX was based on a State system as provided in subparagraph (A), the amount payable by the Federal Government under such titles for inpatient hospital costs in such State was in excess of the amount which would have been payable for such costs in such State if reimbursement had not been based on the State system (as estimated by the Secretary), the adjusted per diem target rate for routine operating costs (as determined under the preceding paragraphs of this subsection) for hospitals in such State shall be reduced (by not more than 1 percent in any year) until the Federal Government has recouped an amount equal to such excess payment amount.

"(C)(i) The Secretary shall pay to any State in which hospital reimbursement under this title is based on a State system as provided in subparagraph (A), an amount which bears the same ratio to the total cost of administering the State system (including the cost of initially putting the system into operation) as the amount paid by the Federal Government under this title in such State for inpatient hospital costs bears to the total amount of inpatient hospital costs in such State which are subject to the State system.

"(ii) Payments under clause (i) shall be made from funds in the Federal Hospital Insurance Trust Fund.

"(iii) An amount which bears the same ratio to the total cost of administering the State system (including the cost of initially putting the system into operation) as the amount paid under the State plan approved under title XIX in such State for inpatient hospital costs bears to the total amount of inpatient hospital costs in such State which are subject to the State system, shall, for purposes of title XIX, be considered to be an amount expended for the administration of such State plan.".

(c) Part A of title XI of the Social Security Act is amended by adding after section 1126 the following new section:

"HEALTH FACILITIES COSTS COMMISSION

"SEC. 1127. (a) There is established a commission to be known as the Health Facilities Costs Commission (hereinafter in this section referred to as the 'Commission').

"(b)(1) The Commission shall be composed of eleven members appointed by the Secretary—

"(A) three of whom are individuals who are representatives of hospital administrators,

"(B) two of whom are practicing physicians in hospitals, and

"(C) six of whom are consumers of health care, and each of whom, as a result of training, experience, or attainments, is exceptionally well qualified to assist in serving and carrying out the functions of the Commission. One of the members of the Commission shall, at the time of appointment, be designated as Chairman of the Commission. The Secretary shall first appoint members to the Commission not later than January 1, 1979.

"(2) No individual who is a full-time employee or officer of the United States may be appointed as a member of the Commission.

"(3) The Chairman of the Commission shall designate a member of the Commission to act as Vice Chairman of the Commission.

"(4) A majority of the members of the Commission shall constitute a quorum, but a lesser number may conduct hearings.

"(5) A vacancy in the Commission shall not affect its powers, but shall be filled in the same manner as that herein provided for the appointment of the member first appointed to the vacant position.

"(6) Members of the Commission shall be appointed for a term of four years, except that the Secretary shall provide for such shorter terms for some of the members first appointed so as to stagger the date of expiration of members' terms of office.

"(7) No individual may be appointed to serve more than two terms as a member of the Commission.

"(8) Each member of the Commission shall be entitled to per diem compensation at rates fixed by the Secretary, but not more than the current per diem equivalent of the annual rate of basic pay in effect for grade GS-18 of the General Schedule for each day (including travel time) during which the

member is engaged in the actual performance of duties vested in the Commission, and all members of the Commission shall be allowed, while away from their homes or regular places of business in the performance of service for the Commission, travel expenses (including per diem in lieu of subsistence) in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5, United States Code.

"(9) The Commission shall meet at the call of the Chairman, or at the call of a majority of the members of the Commission; but meetings of the Commission shall be held not less frequently than once in each calendar month which begins after a majority of the authorized membership of the Commission has first been appointed.

"(c) It shall be the duty and function of the Commission to conduct a continuing study, investigation, and review of the reimbursement of hospitals for care provided by them to individuals covered under title XVIII or under State plans approved under title XIX, with particular attention to the criteria established by section 1861(bb) (hereinafter in this section referred to as the 'reimbursement reform program') with a view to devising and recommending, from time to time but not less frequently than once each calendar year (beginning with the calendar year 1979), to the Secretary and the Congress measures—

"(A) for the improvement of the reimbursement reform program, and

"(B) for the possible application (i) of the reimbursement reform program to providers of service other than hospitals, and (ii) of classification and comparison techniques similar to those applied to adjusted routine costs of hospitals under section 1861(bb) to other costs of hospitals and other providers of services.

"(d) The Secretary shall provide such technical, secretarial, clerical, and other assistance as the Commission may need.

"(e) The Commission may secure directly from any department or agency of the United States such data and information as may be necessary to enable it to carry out its duties under this section. Upon request of the Chairman of the Commission, any such department or agency shall furnish any such data or information to the Commission.

"(f) There are hereby authorized to be appropriated such sums as may be necessary to carry out this section.

"(g) Section 14 of the Federal Advisory Committee Act shall not apply to the Commission.".

(d)(1) Section 1866(a)(1) of the Social Security Act is amended—

(A) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof ", and"; and

(B) by inserting after subparagraph (D) the following new subparagraph:

"(E) not to increase amounts due from any individual, organization, or agency in order to offset reductions made under section 1861(bb) in the amount paid, or expected to be paid, under this title.".

(2) Section 1902(a)(27) of the Social Security Act is amended by striking out "and" at the end of clause (A) and by inserting before the semicolon at the end of clause (B) the following: ", and (C) not to increase amounts due from any individual, organization, or agency in order to offset reductions made pursuant to the requirements contained in section 1902(a)(13)(D) in the amount paid, or expected to be paid under the State plan".

(e) Section 1902(a)(13)(D) of the Social Security Act is amended to read as follows:

"(D) for payment of the reasonable cost of inpatient hospital services provided under the plan, applying the methods specified in section 1861(v) and section 1861(bb), which are consistent with section 1122; and".

PAYMENTS TO PROMOTE CLOSING AND CONVERSION OF UNDERUTILIZED FACILITIES

SEC. 3. (a) Part A of title XI of the Social Security Act is amended by adding after section 1127 (as added by section 2 of this Act) the following new section:

"PAYMENTS TO PROMOTE CLOSING AND CONVERSION OF UNDERUTILIZED FACILITIES

"SEC. 1128. (a)(1)(A) Before the end of the third full month following the month in which this section is enacted, the Secretary shall establish a Hospital Transitional Allowance Board (hereinafter in this section referred to as the 'Board'). The Board shall have five members, appointed by the Secretary without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, who are knowledgeable about hospital planning and hospital operations.

"(B) Members of the Board shall be appointed for three-year terms, except some initial members shall be appointed for shorter terms to permit staggered terms of office.

"(C) Members of the Board shall be entitled to per diem compensation at rates fixed by the Secretary, but not more than the current per diem equivalent at the time the service involved is rendered for grade GS-18 under section 5332 of title 5, United States Code.

"(D) The Secretary shall provide such technical, secretarial, clerical, and other assistance as the Board may need.

"(2) The Board shall receive and act upon applications by hospitals, certified for participation (other than as 'emergency hospitals') under titles XVIII and XIX, for transitional allowances.

"(b) For purposes of this section—

"(1) The term 'transitional allowance' means an amount which—

"(A) shall, solely by reason of this section, be included in a hospital's reasonable cost for purposes of calculating payments under the programs authorized by titles V, XVIII, and XIX of this Act; and

"(B) in accordance with this section, is established by the Secretary for a hospital in recognition of a reimbursement detriment (as defined in paragraph (3)) experienced because of a qualified facility conversion (as defined in paragraph (2)).

"(2) The term 'qualified facility conversion' means closing, modifying, or changing the usage of an underutilized hospital facility which is expected to benefit the programs authorized under title V, title XVIII and title XIX by (A) eliminating excess bed capacity, (B) discontinuing an underutilized service for which there are adequate alternative sources, or (C) substituting for the underutilized service some other service which is needed in the area and which is consistent with the findings of an appropriate health planning agency.

"(3) A hospital which has carried out a qualified facility conversion and which continues in operation will be regarded as having experienced a 'reimbursement detriment'—

"(A) to the extent that, solely because of the conversion, there is a reduction in that portion of the hospital's costs attributable to capital assets which are taken into account in determining reasonable cost for purposes of determining amount of payment to the hospital under title V, title XVIII, or a State plan approved under title XIX;

"(B) if the conversion results, on an interim basis, in increased operating costs, to the extent that operating costs exceed amounts ordinarily reimbursable under title V, title XVIII and the State plan approved under title XIX; or

"(C) in the case of complete closure of a private nonprofit hospital, or local governmental hospital, other than for replacement of the hospital, to the extent of actual debt obligations previously recognized as reasonable for reimbursement, where the debt remains outstanding, less any salvage value.

"(c)(1) Any hospital may file an application with the Board (in a form and including data and information as the Board, with the approval of the Secretary, may require) for a transitional allowance with respect to any qualified conversion which was formally initiated after December 31, 1978. The Board, with the approval of the Secretary, may also establish procedures, consistent with this section, by means of which a finding of a reimbursement detriment may be made prior to the actual conversion.

"(2) The Board shall consider any application filed by a hospital, and if the Board finds that—

"(A) the facility conversion is a qualified facility conversion, and

"(B) the hospital is experiencing or will experience a reimbursement detriment because it carried out the qualified facility conversion,

the Board shall transmit to the Secretary its recommendation that the Secretary establish a transitional allowance for the hospital in amounts reasonably related to prior or prospective use of the facility under title V, title XVIII and the State plan approved under title XIX, for a period, not to exceed twenty years as specified by the Board, and, if the Board finds that the criteria in subparagraphs (A) and (B) are not met, it shall advise the Secretary not to establish a transitional allowance for that hospital. For an approved closure under subsection (b)(3)(C) the Board may recommend or the Secretary may approve, a lump-sum payment in lieu of periodic allowances, where such payment would constitute a more efficient and economic alternative.

"(3)(A) The Board shall notify a hospital of its findings and recommendations.

"(B) A hospital dissatisfied with a recommendation may obtain an informal or formal hearing, at the discretion of the Secretary by filing (in the form and within a time period established by the Secretary) a request for a hearing.

"(4)(A) Within thirty days after receiving a recommendation from the Board respecting a transitional allowance or, if later, within thirty days after a hearing, the Secretary shall make a final determination whether, and if so in what amount and for what period of time, a transitional allowance will be granted to a hospital. A final determination of the Secretary shall not be subject to judicial review.

"(B) The Secretary shall notify a hospital and any other appropriate parties of the determination.

"(C) Any transitional allowance shall take effect on a date prescribed by the Secretary, but not earlier than the date of completion of the qualified facility conversion. A transitional allowance shall be included as an allowable cost item in determining the reasonable cost incurred by the hospital in providing services for which payment is authorized under this Act, except that the transitional allowance shall not be considered in applying limits to costs recognized as reasonable pursuant to the third sentence of section 1861(v)(1) and section 1861(bb) of this Act, or in determining the amount to be paid to a provider pursuant to section 1814(b), section 1933(a)(2), section 1910(1)(3), and section 506(f)(3) of this Act.

"(d) In determining the reasonable cost incurred by a hospital with respect to which payment is authorized under a State plan approved under title V or title XIX, any transitional allowance shall be included as an allowable cost item.

"(e)(1) The Secretary is authorized to establish transitional allowances only as provided in paragraphs (2) and (3).

"(2) Prior to January 1, 1982, the Secre-

tary is authorized to establish a transitional allowance for not more than fifty hospitals.

"(3) On and after January 1, 1982, the Secretary is authorized to establish a transitional allowance for any hospital which qualifies for such an allowance under the provisions of this section.

"(4) On or before January 1, 1981, the Secretary shall report to the Congress evaluating the effectiveness of the program established under this section including appropriate recommendations.".

(b) The amendments made by subsection (a) shall apply only to services furnished by a hospital during any accounting year beginning or on after October 1, 1978.

FEDERAL PARTICIPATION IN HOSPITAL CAPITAL EXPENDITURES

SEC. 4. (a) Section 1122(c) of the Social Security Act is amended to read as follows:

"(c) The reasonable expenses incurred in carrying out the activities referred to in subsection (b) by the designated planning agencies (disregarding any expenses for which the agency is authorized to be reimbursed from other sources) shall be payable from—

"(1) funds in the Federal Hospital Insurance Trust Fund,

"(2) funds in the Federal Supplementary Medical Insurance Trust Fund, and

"(3) funds appropriated to carry out the health care provisions of the several titles of this Act,

in such amounts as the Secretary finds result in a proper allocation. The Secretary shall transfer money between the funds as may be appropriate to settle accounts between them. The Secretary shall pay the designated planning agencies without requiring contribution of funds by any State or political subdivision thereof.".

(b) Section 1122(d) of such Act is amended to read as follows:

"(d)(1) Except as provided in paragraph (2), if the Secretary determines that—

"(A) the designated planning agency had not approved the proposed expenditure; and

"(B) the designated planning agency had granted to the person proposing the capital expenditure an opportunity for a fair hearing with respect to the findings;

then, in determining Federal payments under titles V, XVIII, and XIX for services furnished in the health care facility for which the capital expenditure is made, the Secretary shall not include any amount attributable to depreciation, interest on borrowed funds, a return on equity capital (in the case of proprietary facilities), other expenses related to the capital expenditure, or for direct operating costs, to the extent that they can be directly associated with the capital expenditure, unless the designated planning agency for the States determines, in accordance with an agreement entered into under subsection (b) or under a certificate of need program which is applicable to such expenditure and which meets the requirements of title XV of the Public Health Service Act, that such capital expenditures are needed and meet criteria adopted by such agency. In the case of a proposed capital expenditure in a standard metropolitan statistical area which encompasses more than one jurisdiction, that expenditure shall require approval of the designated planning agency of each jurisdiction, which shall jointly review the proposal. Where the designated planning agencies do not unanimously agree, the proposed expenditures shall be deemed disapproved. Where the designated planning agencies do not act to approve or disapprove the proposed expenditure within one hundred and eighty days after the submission of the request for aproval, the proposed expenditure shall be deemed approved. Any deemed approval or disapproval shall be subject to review and reversal by the Secretary following a request, submitted to him within sixty days of the deemed approval or disapproval, for a review and reconsideration based upon the record. With respect to any organization which is reimbursed on a per capita, fixed fee, or negotiated rate basis, in determining the Federal payments to be made under titles V, XVIII and XIX, the Secretary shall exclude an amount reasonably equivalent to the amount which would otherwise be excluded under this subsection if payment were made on other than a per capita, fixed fee, or negotiated rate basis.

"(2) If the Secretary, after submitting the matters involved to the advisory council established under subsection (1), determines that an exclusion of expenses related to any capital expenditure would discourage the operation or expansion of any health care facility or health maintenance organization which has demonstrated to his satisfaction proof of its capability to provide comprehensive health care services (including institutional services) effectively and economically, or would be inconsistent with effective organization and delivery of health services, or the effective administration of title V, XVIII, or XIX), he shall not exclude the expenses pursuant to paragraph (1).".

(c) Section 1122(g) of the Social Security Act is amended to read as follows:

"(g) For purposes of this section, a 'capital expenditure' is an expenditure which, under generally accepted accounting principles, is not properly chargeable as an expense of operation and maintenance and which (1) exceeds $150,000, (2) changes the bed capacity of the facility, or (3) substantially changes the services of the facility, including conversion of existing beds to higher cost usage. The cost of studies, surveys, designs, plans, working drawings, specifications, and other activities essential to the acquisition, improvement, expansion, or replacement of the plant and equipment shall be included in determining whether the expenditure exceeds $150,000. For purposes of this section, 'capital expenditure' does not include an expenditure for the purpose of acquiring (either by purchase or under lease or comparable arrangement) an existing health care facility, the utilized services and bed capacity of which are not increased as a result of the acquisition.".

(d) Section 1861(z) of the Social Security Act is amended to read as follows:

"Institutional Planning

"(z) An overall plan and budget of a hospital, skilled nursing facility, or home health agency shall—

"(1) provide for an annual operating budget which includes all anticipated income and expenses related to items which would, under generally accepted accounting principles, be considered income and expense items (except that nothing in this paragraph shall require that there be prepared in connection with any budget an item-by-item identification of the components of each type of anticipated expenditure or income);

"(2) provide for a capital expenditures plan for at least a five-year period (including the year to which the operating budget applies) which identifies in detail the sources of financing and the objectives of each anticipated expenditure in excess of $150,000 related to the acquisition of land, improvement of land, buildings, or equipment, and the replacement, modernization, or expansion of the buildings and equipment, and which would, under generally accepted accounting principles, be considered capital items, and such capital expenditures plan shall be a matter of public record and available in readily accessible form and fashion;

"(3) provide for annual review and updating; and

"(4) be prepared, under the direction of the governing body of the institution or agency, by a committee consisting of representatives of the governing body, administrative staff, and medical staff (if any) of of the institution or agency.".

(e) The amendments made by this section shall become effective on January 1, 1979, and shall be effective with respect to determinations made by the Secretary on and after such date.

AGREEMENTS WITH PHYSICIANS TO ACCEPT ASSIGNMENTS

SEC. 5. (a) Title XVIII of the Social Security Act is amended by adding the following new section:

"AGREEMENTS WITH PHYSICIANS TO ACCEPT ASSIGNMENTS

"SEC. 1868. (a) For purposes of this section the term 'participating physician' means a doctor of medicine or osteopathy who has in effect an agreement with the Secretary by which he agrees to accept an assignment of claim (as provided for in section 1842 (b)(3)(B)(ii)) for each physicians' service (other than those excluded from coverage by section 1862) performed by him in the United States for an individual enrolled under part B. The assignment shall be in a form prescribed by the Secretary. The agreement may be terminated by either party upon 30-days' notice to the other, filed in a manner prescribed by the Secretary.

"(b) To expedite processing of claims from participating physicians, the Secretary shall establish procedures and develop appropriate forms under which—

"(1) each physician will submit his claims on one of alternative simplified approved bases including multiple listing of patients, and the Secretary shall act to assure that these claims are processed expeditiously, and

"(2) the physician shall obtain from each patient enrolled under part B (except in cases where the Secretary finds it impractical for the patient to furnish it) and shall make available at the Secretary's request, a signed statement by which the patient (A) agrees to make an assignment with respect to all services furnished by the physician and (B) authorizes the release of any medical information needed to review claims submitted by the physician.

"(c)(1) Participating physicians shall be paid administrative cost-savings allowances (as determined under paragraph (2)) in addition to the reasonable charges that are payable.

"(2) The administrative cost-savings allowance shall be $1 for each claim the participating physician submits in accordance with the simplified billing procedure referred to in subsection (b) and these payments shall be treated as an administrative expense to the medical insurance program, except that—

"(A) not more than $1 shall be payable to a physician for claims for services furnished to any particular patient within any 7-day period;

"(B) no administrative cost-savings allowance shall be payable for services performed for a hospital inpatient or outpatient unless:

"(i) the services are surgical services, anesthesia services, or services performed by a physician who, as an attending or consulting physician, personally examined the patient and whose office or regular place of practice is located outside a hospital, and

"(ii) the physician ordinarily bills directly (and not through such hospital) for his services; and

(C) no administrative cost-savings allowance shall be payable for services which consist solely of laboratory or X-ray services which are for hospital inpatients or outpatients or are performed outside the office of the participating physician.".

(b) The amendment made by subsection (a) shall become effective on July 1, 1979.

CERTAIN SURGICAL PROCEDURES PERFORMED ON AN AMBULATORY BASIS

SEC. 6. Part B of title XVIII of the Social Security Act is amended by adding at the end thereof the following new section:

"SPECIAL PROVISIONS RELATING TO CERTAIN SURGICAL PROCEDURES PERFORMED ON AN AMBULATORY BASIS

"SEC. 1845. (a) The Secretary shall, in consultation with the National Professional Standards Review Council and appropriate medical organizations, specify those surgical procedures which can be safely and appropriately performed either in a hospital on an inpatient basis or on an ambulatory basis—

"(1) in a physician's office; or

"(2) in an ambulatory surgical center or hospital.

"(b)(1) If a physician performs in his office a surgical procedure specified by the Secretary pursuant to subsection (a)(1) on an individual insured for benefits under this part, he shall, notwithstanding any other provision of this part, be entitled to have payment made under this part equal to—

"(A) 100 percent of the reasonable charge for the services involved with the performance of such procedure (including all pre- and post-operative physicians' services performed in connection therewith), plus

"(B) the amount established by the Secretary pursuant to paragraph (2),

but only if the physician agrees with such individual to be paid on the basis of an assignment under the terms of which the reasonable charge for such services is the full charge therefor.

"(2) The Secretary shall establish with respect to each surgical procedure specified pursuant to subsection (a)(1), an amount established with a view to according recognition to the special costs, in excess of usual overhead, which physicians incur which are attributable to securing, maintaining, and staffing the facilities and ancillary services appropriate for the performance of such procedure in the physician's office, and to assuring that the performance of such procedure in the physician's office will involve substantially less total cost than would be involved if the procedure were performed on an inpatient basis in a hospital. The amount so established with respect to any surgical procedure periodically shall be reviewed and revised and may be adjusted, when appropriate, by the Secretary to take account of varying conditions in different areas.

"(c)(1) Payment under this part may be made to an ambulatory surgical center for ambulatory facility services furnished in connection with any surgical procedure, specified by the Secretary pursuant to subsection (a)(2), which is performed on an individual insured for benefits under this part in an ambulatory surgical center, which meets such health, safety, and other standards as the Secretary shall by regulations prescribe, if such surgical center agrees to accept, in full payment of all services furnished by it in connection with such procedure, the amount established for such procedure pursuant to paragraph (2).

"(2) The Secretary shall establish with respect to each surgical procedure specified pursuant to subsection (a)(2), a reimbursement amount which is payable to an ambulatory surgical center for its services furnished in connection with such procedure. The amount established for any such surgical procedure shall be established with a view to according recognition to the costs incurred by such centers generally in providing the services involved in connection with such procedure, and to assuring that the performance of such procedure in such a center involves less cost than would be involved if such procedure were performed on an inpatient basis in a hospital. The amount so established with respect to any surgical procedure shall periodically be reviewed and revised and may be adjusted by the Secretary, when appropriate, to take account of varying conditions in different areas.

"(3) If the physician, performing a surgical procedure (specified by the Secretary under subsection (a)(2)), in a hospital on an outpatient basis or in an ambulatory surgical center with respect to which payment is authorized under the preceding provisions of this subsection, or a physician performing physicians' services in such center or hospital directly related to such surgical procedure, agrees to accept as full payment for all services performed by him in connection with such procedure (including pre- and post-operative services) an amount equal to 100 percent of the reasonable charge for such services, he shall be paid under this part for such services an amount equal to 100 percent of the reasonable charge for such services.

"(d)(1) The Secretary is authorized by regulations to provide that in case a surgical procedure specified by the Secretary pursuant to subsection (a)(2) is performed on an individual insured for benefits under this part in an ambulatory surgical center which meets such health, safety, and other standards as the Secretary shall by regulations prescribe, there shall be paid with respect to the services furnished by such center and with respect to all related services (including physicians' services, laboratory, X-ray, and diagnostic services) a single all-inclusive fee established pursuant to paragraph (2), if all parties furnishing all such services agree to accept such fee (to be divided among the parties involved in such manner as they shall have previously agreed upon) as full payment for the services furnished.

"(2) In implementing this subsection, the Secretary shall establish with respect to each surgical procedure specified pursuant to subsection (a)(2) the amount of the all-inclusive fee for such procedure, taking into account such factors as may be appropriate. The amount so established with respect to any surgical procedure shall periodically be reviewed and revised and may be adjusted, when appropriate, to take account of varying conditions in different areas.

"(e) The provisions of section 1833(a) and (b) shall not be applicable to expense attributable to services to which subsection (b) is applicable, to ambulatory facility services (furnished by an ambulatory surgical center) to which the provisions of subsection (c)(1) and (2) are applicable, to physicians' services to which the provisions of subsection (c)(3) are applicable, or to services to which the provisions of subsection (d) are applicable.".

CRITERIA FOR DETERMINING REASONABLE CHARGE FOR PHYSICIANS' SERVICES

SEC. 7. (a) Section 1842(b) of the Social Security Act is amended—

(1) by redesignating paragraphs (4) and (5) as paragraphs (5) and (6);

(2) by striking out so much of paragraph (3) as follows the first sentence; and

(3) by inserting after paragraph (3) the following new paragraph:

"(4)(A) In determining the reasonable charge for services for purposes of paragraph (3) (including the services of any hospital-associated physicians), there shall be taken into consideration the customary charges for similar services generally made by the physician or other person furnishing such services, as well as the prevailing charges in the locality for similar services.

"(B)(i) Except as otherwise provided in clause (iii), no charge may be determined to be reasonable in the case of bills submitted or requests for payment made under this part after December 31, 1970, if it exceeds the higher of (I) the prevailing charge recognized by the carrier and found acceptable by the Secretary for similar services in the same locality in administering this part on December 31, 1970, or (II) the prevailing charge level that, on the basis of statistical data and methodology acceptable to the Secretary, would cover 75 percent of the customary charges made for similar services in the same locality during the last preceding calendar year elapsing prior to the start of the fiscal year in which the bill is submitted or the request for payment is made.

"(ii) In the case of physician services, the prevailing charge level determined for purposes of clause (i)(II) for any fiscal year beginning after June 30, 1973, may not (except as otherwise provided in clause (iii)) exceed (in the aggregate) the level determined under such clause for the fiscal year ending June 30, 1973, except to the extent that the Secretary finds, on the basis of appropriate economic index data, that such higher level is justified by economic changes. Moreover, for any twelve-month period beginning on July 1 of any year (beginning with 1979), no prevailing charge level for physicians' services shall be increased to the extent that it would exceed by more than one-third the statewide prevailing charge level (as determined under subparagraph (E)) for that service.

"(iii) Notwithstanding the provisions of clauses (i) and (ii) of this subparagraph, the prevailing charge level in the case of a physician service in a particular locality determined pursuant to such clauses for the fiscal year beginning July 1, 1975, shall, if lower than the prevailing charge level for the fiscal year ending June 30, 1975, in the case of a similar physician service in the same locality by reason of the application of economic index data, be raised to such prevailing charge level for the fiscal year ending June 30, 1975.

"(C) In the case of medical services, supplies, and equipment (including equipment servicing) that, in the judgment of the Secretary, do not generally vary significantly in quality from one supplier to another, the charges incurred after December 31, 1972 determined to be reasonable may not exceed the lowest charge levels at which such services, supplies, and equipment are widely and consistently available in a locality except to the extent and under circumstances specified by the Secretary. With respect to power-operated wheelchairs for which payment may be made in accordance with section 1861(s)(6), charges determined to be reasonable may not exceed the lowest charge at which power-operated wheelchairs are available in the locality.

"(D) The requirement in paragraph (3)(B) that a bill be submitted or request for payment be made by the close of the following calendar year shall not apply if (i) failure to submit the bill or request the payment by the close of such year is due to the error or misrepresentation of an officer, employee fiscal intermediary, carrier, or agent of the Department of Health, Education, and Welfare performing functions under this title and acting within the scope of his or its authority, and (ii) the bill is submitted or the payment is requested promptly after such error or misrepresentation is eliminated or corrected.

"(E) The Secretary shall determine separate statewide prevailing charge levels for each State that, on the basis of statistical data and methodology acceptable to the Secretary, would cover 50 percent of the customary charges made for similar services in the State during the last preceding calendar year elapsing prior to the start of the fiscal year in which the bill is submitted or the request for payment is made. In States with more than one carrier, the statewide prevailing charge level shall be the weighted average of the fiftieth percentiles of the customary charges of each carrier.

"(F) Notwithstanding any other provision of this paragraph, any charge for any particular service or procedure performed by a doctor of medicine or osteopathy shall be regarded as a reasonable charge if—

"(i) the service or procedure is performed in an area which the Secretary has designated as a physician shortage area,

"(ii) the physician has a regular practice in the physician shortage area,

"(iii) the charge does not exceed the prevailing charge level as determined under subparagraph (B), and

"(iv) the charge does not exceed the amount generally charged by such physician for similar services.".

(b) Sections 506(f)(1) and 1903(i)(1) of the Social Security Act are each amended by striking out "the fourth and fifth sentences of section 1842(b)(3)" and inserting in lieu thereof in each instance "subparagraphs (B)(ii), (B)(iii), (C), and (F) of section 1842(b)(4)".

(c) The amendments made by this section shall become effective on July 1, 1979.

PAYMENT FOR CERTAIN ANTIGENS UNDER PART B OF MEDICARE

SEC. 8. (a) Section 1861(s)(2) of the Social Security Act is amended—

(1) by striking out "and" at the end of clause (E),

(2) by inserting "and" at the end of clause (F), and

(3) by adding after clause (F) the following new clause:

"(G) antigens (subject to reasonable quantity limitations determined by the Secretary) prepared by an allergist for a particular patient, including antigens he prepares which are forwarded to another qualified person for administration to the patient by or under the supervision of another physician;".

(b) The amendments made by subsection (a) shall apply to items furnished after the month of enactment of this Act.

PAYMENT UNDER MEDICARE OF CERTAIN PHYSICIANS' FEES ON ACCOUNT OF SERVICES FURNISHED TO A DECEASED INDIVIDUAL

SEC. 9. (a) Section 1870(f) of the Social Security Act is amended by striking out the matter following clause (2) thereof and inserting in lieu thereof the following: "payment for such services shall be made (but only in such amount and subject to such conditions as would have been applicable if the individual who received the services had not died) to—

"(A) the physician or other person who provided such services, but only on the condition that such physician or person agrees that the reasonable charge is the full charge for the services, or

"(B) the spouse or other legally designated representative of such individual, but only if (i) the condition specified in subparagraph (A) is not met, and (ii) such spouse or representative requests (in such form and manner as the Secretary shall by regulations prescribe) that payment be made under this subparagraph.".

(b) The amendment made by subsection (a) shall apply only to payments made after the month of enactment of this Act.

HOSPITAL PROVISIONS OF LONG-TERM CARE SERVICES

SEC. 10. (a) Section 1861 of the Social Security Act is amended by adding after subsection (bb) (as added by section 2 of this Act) the following:

"HOSPITAL PROVIDERS OF EXTENDED CARE SERVICES

"(cc)(1)(A) Any hospital (other than a hospital which has in effect a waiver of the requirement imposed by subsection (e)(5)) which has an agreement under section 1866 may (subject to paragraph (2)) enter into an agreement with the Secretary under which its inpatient hospital facilities may be used for the furnishing of services of the type which, if furnished by a skilled nursing facility, would constitute posthospital extended care services.

"(B)(i) Notwithstanding any other provision of this title, payment to any hospital for services furnished under an agreement entered into under this subsection shall be based upon the reasonable cost of the services as determined under this subparagraph.

"(ii) The reasonable cost of the services shall consist of the reasonable cost of routine services and ancillary services. The reasonable cost of routine services furnished during any calendar year by a hospital under an agreement under this subsection shall equal the product of the number of patient-days during the year for which the services were furnished and the average reasonable cost per patient-day. The average reasonable cost per patient-day shall be established as the average rate per patient-day paid for routine services during the previous calendar year under the State plan (of the State in which the hospital is located) approved under title XIX to skilled nursing facilities located in such State and which meet the requirements specified in section 1902(a)(28). The reasonable cost of ancillary services shall be determined in the same manner as the reasonable cost of ancillary services provided as inpatient hospital services.

"(2) The Secretary shall not enter into an agreement under this subsection with any hospital unless—

"(A) the hospital is located in a rural area and has less than 50 beds, and

"(B) the hospital has been granted a certificate of need for the provision of long-term care services from the agency of the State (which has been designated as the State health planning and development agency under an agreement pursuant to section 1521 of the Public Health Service Act) in which the hospital is located.

"(3) An agreement with a hospital entered into under this section shall, except as otherwise provided under regulations of the Secretary, be of the same duration and subject to termination on the same conditions as are agreements with skilled nursing facilities under section 1866, and shall, where not inconsistent with any provision of this subsection, impose the same duties, responsibilities, conditions, and limitations, as those imposed under such agreements entered into under section 1866; except that no such agreement with any hospital shall be in effect for any period during which the hospital does not have in effect an agreement under section 1866, or during which there is in effect for the hospital a waiver of the requirement imposed by subsection (e)(5). A hospital with respect to which an agreement has been terminated shall not be eligible to undertake a new agreement until a two-year period has elapsed from the termination date.

"(4) Any agreement with a hospital under this subsection shall provide that payment for services will be made only for services for which payment would be made as posthospital extended care services if those services had been furnished by a skilled nuring facility under an agreement entered into under section 1866, and any individual who is furnished services for which payment may be made under an agreement shall, for purposes of this title (other than this subsection), be deemed to have received posthospital extended care services in like manner and to the same extent as if the services furnished to him had been posthospital extended care services furnished by a skilled nursing facility under an agreement under section 1866.

"(5) During a period for which a hospital has in effect an agreement under this subsection, in order to allocate routine costs between hospital and long-term care services for purposes of determining payment for inpatient hospital services (including the application of reimbursement limits specified in section 1861 (bb)), the total reimbursement received for routine services from all classes of long-term care patients, including title XVIII, the State plan approved under title XIX, and private pay patients, shall be subtracted from the hospital's total routine costs before calculations are made to determine title XVIII reimbursement for routine hospital services.

"(6) During any period during which an agreement is in effect with a hospital under this subsection, the hospital shall, for services furnished by it under the agreement, be considered to satisfy the requirements, otherwise required, of a skilled nursing facility for purposes of the following provisions: sections 1814(a)(2)(C), 1814(a)(6), 1814(a)(7), 1814(h), 1861(a)(2), 1861(i), 1861(j) (except 1861(j)(12)), and 1861(n); and the Secretary shall specify any other provisions of this Act under which the hospital may be considered as a skilled nursing facility.

"(7) Within three years after the date of enactment of this subsection, the Secretary shall provide a report to the Congress containing an evaluation of the program established under this subsection concerning—

"(A) the effect of the agreements on availability and effective and economical provision of long-term care services;

"(B) whether the program should be continued; and

"(C) whether eligibility should be extended to other hospitals, regardless of bed size or geographic location, where there is a shortage of long-term care beds.".

(b) Title XIX of such Act is amended by adding at the end thereof the following new section:

"HOSPITAL PROVIDERS OF SKILLED NURSING AND INTERMEDIATE CARE SERVICES

"SEC. 1913. (a) Notwithstanding any other provision of this title, payment may be made, in accordance with this section, under an approved State plan for skilled nursing services and intermediate care services furnished by a hospital which has in effect an agreement under section 1861(cc).

"(b)(1) Payment to any such hospital, for any skilled nursing or intermediate care services furnished, shall be at a rate equal to the average rate per patient-day paid for routine services during the previous calendar year under the State plan to skilled nursing and intermediate care facilities located in the State in which the hospital is located. The reasonable cost of ancillary services shall be determined in the same manner as the reasonable cost of ancillary services provided for inpatient hospital services.

"(2) With respect to any period for which a hospital has in effect an agreement under section 1861(cc), in order to allocate routine costs between hospital and long-term care services, the total reimbursement for routine services received from all classes of long-term care patients, including title XVIII, the State plan, and private pay patients, shall be subtracted from the hospital total routine costs before calculations are made to determine reimbursement for routine hospital services under the State plan.".

(c) The amendments made by this section shall become effective on the date on which final regulations, promulgated by the Secretary to implement the amendments, are issued; and those regulations shall be issued not later than the first day of the sixth month following the month in which this Act is enacted.

REIMBURSEMENT RATES UNDER MEDICAID FOR SKILLED NURSING AND INTERMEDIATE CARE FACILITIES

SEC. 11. (a) Section 1902(a)(13)(E) of the Social Security Act is amended by in-

serting "(and which may, at the option of the State, include reasonable allowances for the facilities in the form of incentive payments related to efficient performance)" after "cost related basis".

(b) The amendment made by subsection (a) shall become effective on October 1, 1978.

MEDICAID CERTIFICATION AND APPROVAL OF SKILLED NURSING AND INTERMEDIATE CARE FACILITIES

SEC. 12. (a) Section 1910 of the Social Security Act is amended to read as follows:

"CERTIFICATION AND APPROVAL OF SKILLED NURSING AND INTERMEDIATE CARE FACILITIES

"SEC. 1910. (a) The Secretary shall make an agreement with any State which is willing and able to do so whereby the State health agency or other appropriate State or local agencies (whichever are utilized by the Secretary pursuant to section 1864(a)) will be utilized to recommend to him whether an institution in the State qualifies as a skilled nursing facility (for purposes of section 1902(a)(28)) or an intermediate care facility (for purposes of section 1905(c)).

"(b) The Secretary shall advise the State agency administering the medical assistance plan of his approval or disapproval of any institution certified to him as a qualified skilled nursing or intermediate care facility for purposes of section 1902(a)(28) or section 1905(c) and specify for each institution the period (not to exceed twelve months) for which approval is granted, except that the Secretary may extend that term for up to two months, provided the health and safety of patients will not be jeopardized, if he finds that an extension is necessary to prevent irreparable harm to the facility or hardship to the facility's patients or if he finds it impracticable within the twelve-month period to determine whether the facility is complying with the provisions of this title and applicable regulations. The State agency may, upon approval of the Secretary, enter into an agreement with any skilled nursing or intermediate care facility for the specified approval period.

"(c) The Secretary may cancel approval of any skilled nursing or intermediate care facility at any time if he finds that a facility fails to meet the requirements contained in section 1902(a)(28) or section 1905(c), or if he finds grounds for termination of his agreement with the facility pursuant to section 1866(b). In that event the Secreary shall notify the State agency and the skilled nursing or intermediate care facility that approval of eligibility of the facility to participate in the programs established by this title and title XVIII shall be terminated at a time specified by the Secretary. The approval of eligibility of any such facility to participate in the programs may not be reinstated unless the Secretary finds that the reason for termination has been removed and there is reasonable assurance that it will not recur.

"(d) Effective July 1, 1979, no payment may be made to any State under this title for skilled nursing or intermediate care facility services furnished by any facility—

"(1) which does not have in effect an agreement with the State agency pursuant to subsection (b), or

"(2) with respect to which approval of eligibility to participate in the programs established by this title or title XVIII has been terminated by the Secretary and has not been reinstated, except that payment may be made for up to thirty days for skilled nursing or intermediate care facility services furnished to any eligible individual who was admitted to the facility prior to the effective date of the termination.

"(e) Any skilled nursing facility or intermediate care facility which is dissatisfied with any determination by the Secretary that it no longer qualifies as a skilled nursing facility or intermediate care facility for purposes of this title shall be entitled to a hearing by the Secretary to the same extent as is provided in section 205(b) and to judicial review of the Secretary's final decision after such hearing as is provided in section 205(g). Any agreement between such facility and the State agency shall remain in effect until the period for filing a request for a hearing has expired or, if a request has been filed, until a decision has been made by the Secretary; except that the agreement shall not be extended if the Secretary makes a written determination, specifying the reasons therefor, that the continuation of provider status constitutes an immediate and serious threat to the health and safety of patients, and the Secretary certifies that the facility has been notified of its deficiencies and has failed to correct them.".

(b) Section 1869(c) of the Social Security Act is amended by adding at the end thereof the following sentence: "If the Secretary's determination terminates a provider with an existing agreement pursuant to section 1866(b)(2), or if such determination consists of a refusal to renew an existing provider agreement, the provider's agreement shall remain in effect until the period for filing a request for a hearing has expired or, if a request has been filed, until a final decision has been made by the Secretary; except that the agreement shall not be extended if the Secretary makes a written determination, specifying the reasons therefor, that the continuation of provider status constitutes an immediate and serious threat to the health and safety of patients and if the Secretary certifies that the provider has been notified of such deficiencies and has failed to correct them.".

(c) The amendments made by the preceding provisions of this section shall become effective on the date on which final regulations, promulgated by the Secretary to implement the amendments, are issued; and those regulations shall be issued not later than the first day of the sixth month following the month in which this Act is enacted.

(d) Title XIX of the Social Security Act is amended by adding after section 1910 thereof the following new section:

"CERTIFICATION AND APPROVAL OF RURAL HEALTH CLINICS

"SEC. 1910A. (a) Whenever the Secretary certifies a facility in a State to be a qualified rural health clinic under title XVIII, such facility shall be deemed to meet the standards for certification as a rural health clinic for purposes of providing rural health clinic services under this title.

"(b) The Secretary shall notify the State agency administering the medical assistance plan of his approval or disapproval of any facility in that State which has applied for certification by him as a qualified rural health clinic.".

(e) Section 1856(c)(2) of the Social Security Act is amended by striking out "1910(a)" and inserting in lieu thereof "1910".

VISITS AWAY FROM INSTITUTION BY PATIENTS OF SKILLED NURSING OR INTERMEDIATE CARE FACILITY

SEC. 13. (a) Section 1903 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(r) In the administration of this title, the fact that an individual who is an inpatient of a skilled nursing or intermediate care facility leaves to make visits outside the facility shall not conclusively indicate that he does not need services which the facility is designed to provide; however, the frequency and length of such visits shall be considered, together with other evidence, in determining whether the individual is in need of the facility's services.".

(b) The amendment made by subsection (a) shall become effective on October 1, 1978.

NOTIFICATION TO STATE OFFICIALS

SEC. 14. Part A of title XI of the Social Security Act is amended by adding after section 1128 (as added by section 3 of this Act) the following new section:

"NOTIFICATION TO STATE OFFICIALS

"SEC. 1129. If the Secretary notifies a State of any audit, quality control performance report, deficiency, or any reduction, termination, or increase in Federal matching, under the State plan for any program for which Federal payments are made under this Act, simultaneous notification shall also be made to the Governor of the State and the respective chairmen of the legislative and appropriation committees of that State's legislature having jurisdiction over the program affected.".

REPEAL OF SECTION 1867

SEC. 15. Section 1867 of the Social Security Act is repealed.

PROCEDURES FOR DETERMINING REASONABLE COST AND REASONABLE CHARGE

SEC. 16. (a) Part A of title XI of the Social Security Act is amended by adding after section 1129 (as added by section 14 of this Act) the following new section:

"EXCLUSION OF CERTAIN ITEMS IN DETERMINING REASONABLE COST AND REASONABLE CHARGE

"SEC. 1130. (a) Except as otherwise provided in subsection (b), in determining the amount of any payment under title XVIII, under a program established under title V, or under a State plan approved under title XIX of this Act, when the payment is based upon the reasonable cost or reasonable charge, no element comprising any part of the cost or charge shall be considered to be reasonable if, and to the extent that, such element is—

"(1) a commission, finder's fee, or for a similar arrangement, or

"(2) an amount payable for any facility (or part or activity thereof) under any rental or lease arrangement which is, directly or indirectly, determined, wholly or in part as a percentage, fraction, or portion of the charge or cost attributed to any health service (other than the element) or any health service including, but not limited to, the element.

"(b) The Secretary shall by regulations establish exceptions to the provisions of subsection (a) with respect to any element of cost or charge which consists of payments based on a percentage arrangement, if such element is otherwise reasonable and the percentage arrangement—

"(1) is a customary commercial business practice, or

"(2) provides incentives for the efficient and economical operation of the health service.".

(b) Section 506 of such Act is amended by adding at the end thereof the following new subsection:

"(h) For additional exclusions from reasonable cost and reasonable charge see section 1130.".

(c) Section 1842(b)(4) of such Act (as amended by section 7 of this Act) is further amended by adding at the end thereof the following new subparagraph:

"(G) For additional exclusions from reasonable cost and reasonable charge see section 1130.".

(d) Section 1861(v) of such Act is amended by adding after paragraph (8) (as added by section 2 of this Act) the following new paragraph:

"(9) For additional exclusions from reasonable cost and reasonable charge see section 1130.".

(e) Section 1903 of such Act is amended by adding after subsection (r) (as added by section 13 of this Act) the following new subsection:

"(s) For additional exclusions from reasonable cost and reasonable charge see section 1130.".

AMBULANCE SERVICE

SEC. 17. (a) Section 1861(s)(7) of the Social Security Act is amended by inserting after "ambulance service" the following: "(Including ambulance service to the nearest hospital which is (A) adequately equipped, and (B) has medical personnel qualified to deal with, and available for the treatment of, the individual's illness, injury, or condition)".

(b) The amendment made by subsection (a) shall apply to services furnished on and after the first day of the first month which begins more than 180 days after the date of the enactment of this Act, or, if earlier, the effective date of regulations promulgated by the Secretary to implement such amendment.

GRANTS TO REGIONAL PEDIATRIC PULMONARY CENTERS

SEC. 18. (a) Section 511 of the Social Security Act is amended—

(1) by inserting "(a)" after "SEC. 511.", and

(2) by adding at the end thereof the following new subsection:

"(b)(1) From the sums available under paragraph (2) the Secretary is authorized to make grants to public or nonprofit private regional pediatric pulmonary centers, which are a part of (or are affiliated with) an institution of higher learning, to assist them in carrying out a program for the training and instruction (through demonstrations and otherwise) of health care personnel in the prevention, diagnosis, and treatment of respiratory diseases in children and young adults, and in providing (through such program) needed health care services to children and young adults suffering from such diseases.

"(2) For the purpose of making grants under this subsection, there are authorized to be appropriated, for the fiscal year ending September 30, 1979, and each of the next four succeeding fiscal years, such sums (not in excess of $5,000,000 for any fiscal year) as may be necessary. Sums authorized to be appropriated for any fiscal year under this subsection for making grants for the purposes referred to in paragraph (1) shall be in addition to any sums authorized to be appropriated for such fiscal year for similar purposes under other provisions of this title.".

(b) Section 502(2) of such Act is amended by inserting "(a)" after "511".

WAIVER OF HUMAN EXPERIMENTATION PROVISION FOR MEDICARE AND MEDICAID

SEC. 19. Any requirements of title II of Public Law 93-348 otherwise held applicable are hereby waived with respect to coverage, or copayments, deductibles, or other limitations on payment for services (whether of general application or in effect only on a trial or demonstration basis) under programs established under title XVIII and XIX of the Social Security Act.

DISCLOSURE OF AGGREGATE PAYMENTS TO PHYSICIANS

SEC. 20. Section 1106 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(f) The Secretary shall not make available, nor shall the State title XIX agency be required to make available to the public, information relating to the amounts that have been paid to individual doctors of medicine or osteopathy by or on behalf of beneficiaries of the health programs established by title XVIII or XIX, as the case may be, except as may be necessary to carry out the purposes of those titles or as may be specifically required by the provisions of other Federal law.".

RESOURCES OF MEDICAID APPLICANT TO INCLUDE CERTAIN ASSETS PREVIOUSLY DISPOSED OF FOR SUBSTANTIALLY LESS THAN MARKET VALUE

SEC. 21. (a) Section 1904 of the Social Security Act is amended by adding at the end thereof the following sentence: "The Secretary shall not find that a State has failed to comply with the requirements of this title solely because it denies medical assistance to an individual who would be ineligible for such assistance if, in determining whether he is eligible for benefits under title XVI of this Act, or, in the case of an individual who is not included under section 1902(a)(13)(B), in determining whether he is eligible for medical assistance under the State plan, there was included in his recources any asset owned by him within the preceding twelve months to the extent that he gave or sold that asset to any person for substantially less than its fair market value for the purpose of establishing eligibility for medical assistance under the State plan (and any such transaction shall be presumed to have been for such purpose unless such individual furnishes convincing evidence to establish that the transaction was for some other purpose).".

(b) Section 1902(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (39);

(2) by striking out the period at the end of paragraph (40) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following new paragraph:

"(41) contain provisions reasonably directed at the denial of eligibility for medical assistance under the State plan to an individual who would be ineligible for such assistance except for the transfer of assets, for substantially less than fair market value; except that such denial shall be made only to the extent authorized under the last sentence of section 1904 or under other provisions of this title.".

(c)(1) The amendment made by subsection (a) shall become effective on October 1, 1978.

(2)(A) The amendment made by subsection (b) shall, except as otherwise is provided in subparagraph (B), become effective on July 1, 1979.

(B) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary determines requires State Legislation in order for the plan to meet the additional requirements imposed by the amendments made by subsection (b), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature which begins after the date of enactment of this Act.

RATE OF RETURN ON NET EQUITY FOR FOR-PROFIT HOSPITALS

SEC. 22. Section 1861(v)(1)(B) of the Social Security Act is amended—

(1) in the first sentence thereof, by inserting "a hospital or" immediately after "Such regulations in the case of";

(2) in the second sentence thereof, by striking out "one and one-half times" and inserting in lieu thereof "the percentages, specified in the next sentence, of"; and

(3) by inserting after the last sentence thereof the following new sentence: "For hospital and skilled nursing facility accounting years beginning before July 1, 1979, the percentage referred to in the previous sentence is 150 percent and for subsequent accounting years, the percentage is—

"(i) 150 percent with respect to a skilled nursing facility;

"(ii) 150 percent with respect to a hospital which, during such accounting year, had actual routine operating costs which were greater than the maximum allowable routine operating costs of such hospital as determined under section 1861(bb)(4)(B)(i);

"(iii) 250 percent with respect to a hospital which, during such accounting year had actual routine operating costs which were less than the hospital's adjusted per diem target rate for routine operating costs as determined under section 1861 (bb)(4); and

"(iv) 200 percent with respect to other hospitals.".

DEDUCTIBLE NOT APPLICABLE TO EXPENSES FOR CERTAIN INDEPENDENT LABORATORY TESTS

SEC. 23. (a) The first sentence of section 1833(b) of the Social Security Act is amended—

(1) by striking out "and" at the end of clause (1), and

(2) by inserting immediately before the period the following: ", and (3) such amount shall not include expenses incurred for diagnostic tests with respect to which the provisions of subsection (a)(1)(D) are applicable".

(b) The amendments made by subsection (a) shall be applicable with respect to services provided on and after the first day of the first calendar month which begins more than 60 days after the date of enactment of this Act.

PAYMENT FOR LABORATORY SERVICES UNDER MEDICAID

SEC. 24. (a)(1) Section 1902(a)(23) of the Social Security Act is amended by inserting "(A)" before "has entered into" and by inserting before the semicolon at the end the following: ", or (B) during the three-year period beginning on the date of enactment of the Medicare-Medicaid Administrative and Reimbursement Reform Act, has made arrangements through a competitive bidding process or otherwise for the purchase of laboratory services referred to in section 1905(a)(3), if the Secretary has found that (i) adequate services will be available under such arrangements, (ii) such laboratory services will be provided only through laboratories (I) which meet the requirements of section 1861(e)(9), paragraphs (10) and (11) of section 1861 (s), and such additional requirements as the Secretary may require, and (II) no more than 75 per centum of whose charges for such services are for services provided to individuals who are entitled to benefits under this title or under part A or parf B of title XVIII, and (iii) charges for services provided under such arrangements are made at the lowest rate charged (determined without regard to administrative costs which are related solely to the method of reimbursement for such services) for comparable services by the provider of such services, or, if charged for on a unit price basis, such charges result in aggregate expenditures not in excess of expenditure that would be made if charges were at the lowest rate charged for comparable services by the provider of such services".

(2) The Secretary shall evaluate arrangements made for the purchase of laboratory services under section 1902(a)(23)(B) of the Social Security Act, and shall transmit that evaluation to the Congress, together with recomendations as to whether such section 1902(a)(23)(B) should be extended or modified, no later than twenty-four months after the date of enactment of this Act.

(b) Section 1902(a)(28) of such Act is amended by inserting before the semicolon the following: ", and provide that any labo-

ratory services (other than such services provided in a physician's office) paid for under such plan must be provided by a laboratory which during the three-year period beginning on the date of enactment of the Medicare-Medicaid Administrative and Reimbursement Reform Act meets the requirements of section 1861(e)(9), paragraphs (10) and (11) of section 1861(s) or, in the case of a rural health clinic, subsection 1861(aa)(2)(G)".

(c) Section 1902(a)(30) of such Act as amended by inserting before the semicolon the following: "; and, in the case of laboratory services referred to in section 1905(a)(3), such payments do not exceed the lowest amount charged (determined without regard to administrative costs which are related solely to the method of reimbursement for such services) to any person or entity for such services by that provider of laboratory services".

(d)(1) The amendments made by subsections (b) and (c) shall (except as otherwise provided in paragraph (2)) apply to medical assistance provided, under a State plan approved under title XIX of the Social Security Act, on and after the first day of the first calendar quarter that begins more than 30 days after the date of enactment of this Act.

(2) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by paragraph (b) or (c), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature that begins after the date of enactment of this Act.

STATUS OF PROFESSIONAL STANDARDS REVIEW ORGANIZATIONS

SEC. 25. Section 1166 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(e) No Professional Standards Review Organization and no Statewide Professional Standards Review Council shall be considered to be or have been an 'agency' or 'authority of the Government of the United States' for the purpose of disclosure of information developed or collected, at any time, in carrying out functions under this Act.".

REMOVAL OF THREE-DAY HOSPITALIZATION REQUIREMENT AND ONE HUNDRED-VISIT LIMITATION FOR HOME HEALTH SERVICES

SEC. 26. (a) Section 1811 of the Social Security Act is amended by striking out "post-hospital".

(b) Section 1812(a)(3) of such Act is amended to read as follows:

"(3) home health services.".

(c) Section 1812(d) of such Act is repealed.

(d) Section 1812(e) of such Act is amended—

(1) by striking out "(c), and (d)" and inserting in lieu thereof "and (c)"; and

(2) by striking out "post-hospital extended care services, and post-hospital home health services" and inserting in lieu thereof "and post-hospital extended care services".

(e) Section 1814(a)(2)(D) of such Act is amended—

(1) by striking out "post-hospital"; and

(2) by striking out "for any of the conditions with respect to which he was receiving inpatient hospital services (or services which would constitute inpatient hospital services if the institution met the requirements of paragraphs (6) and (9) of section 1861(e)) or post-hospital extended care services".

(f) Section 1814(i) of such Act is amended—

(1) by striking out "Posthospital" in the heading thereof; and

(2) by striking out "posthospital" in paragraph (1).

(g) Section 1832(a)(2)(A) of such Act is amended by striking out "for up to 100 visits during a calendar year".

(h) Section 1834 of such Act is repealed.

(i) Section 1861(n) of such Act is repealed.

(j) Section 226(c) of such Act is amended by striking out "post-hospital home health services" and inserting in lieu thereof "home health services".

(k) Section 7(d)(1) of the Railroad Retirement Act is amended by striking out "post-hospital home health services" and inserting in lieu thereof "home health services".

(l) The amendments made by this section shall be effective with respect to services provided on or after July 1, 1979.

PAYMENT FOR DURABLE MEDICAL EQUIPMENT

SEC. 27. Section 1833(f)(3) of the Social Security Act is amended to read as follows:

"(3) For purposes of determining the amount payable with respect to durable medical equipment furnished an individual as described in section 1861(s)(6), the Secretary shall, to the extent feasible, calculate at least annually the reasonable charge on a prospective basis and shall take into account, in addition to the customary and prevailing charges for such equipment, the acquisition costs of such equipment, appropriate overhead (taking into consideration the level of delivery services and other necessary services actually provided by the supplier), and a reasonable margin of profit.".

DEVELOPMENT OF UNIFORM CLAIMS FORMS FOR USE UNDER HEALTH CARE PROGRAMS

SEC. 28. (a) Part A of title XI of the Social Security Act is amended by inserting, immediately after section 1131 thereof, the following new section:

"DEVELOPMENT OF UNIFORM CLAIMS FORMS FOR USE UNDER HEALTH CARE PROGRAMS

"SEC. 1132. (a) Within the 2-year period commencing on the date of the enactment of this section, the Secretary shall to the maximum extent feasible develop and require to be employed, in the administration of the health insurance for the aged and disabled program established by title XVIII and the medical assistance programs approved under title XIX, uniform claims forms which shall be utilized in making payment for health services under such programs. Such claims form may vary in form and content, but only to the extent clearly required.

"(b) The Secretary shall require forms developed pursuant to subsection (a) to be utilized in the administration of health care programs (other than those referred to in subsection (a)) but over which he has administrative responsibility, if he determines that such use is in the interest of effective administration of such programs.

"(c) The Secretary, in carrying out the provisions of subsection (a) shall consult with those charged with the administration of Federal programs (other than those referred to in subsections (a) and (b)) and with other organizations and persons that pay for health care, and with the concerned providers of health care services, with the objective of having a broad representation of such programs and plans to facilitate and encourage maximum use by other programs of such uniform claims forms.".

(b) The Secretary shall make a report to the Congress, within 21 months after the enactment of this Act, covering the following points:

(1) his assessment of what his actions will be in carrying out the provisions of section 1132 of the Social Security Act,

(2) the success or lack of success in encouraging third party payors generally to adopt the uniform claims forms required under such section, and

(3) his recommendations as to what action, legislative or otherwise, needs to be taken in order to maximize the use of such uniform claims forms.

COORDINATED AUDITS UNDER THE SOCIAL SECURITY ACT

SEC. 29. (a) Title XI of the Social Security Act is amended by inserting after section 1132 (as added by section 28 of this Act) the following new section:

"COORDINATED AUDITS

"SEC. 1133. If an entity provides services reimbursable on a cost-related basis under title V or XIX, as well as services reimbursable on such a basis under title XVIII, the Secretary shall require, as a condition for payment to any State under title V or XIX with respect to administrative costs incurred in the performance of audits of the books, accounts, and records of that entity, that these audits be coordinated through common audit procedures with audits performed with respect to the entity for purposes of title XVIII. The Secretary shall apportion to the program established under title V or XIX that part of the cost of coordinated audits which is attributable to each such program and which would not have otherwise been incurred in an audit of the program established under title XVIII. Where the Secretary finds that a State has declined to participate in such a common audit with respect to title V or XIX, he shall reduce the payments otherwise due such State under such title by an amount which he estimates to be the amount that represents the duplication of costs resulting from such State's failure to participate in the common audit.".

(b)(1) Section 1902(a) of the Social Security Act (as amended by section 21(b) of this Act) is further amended—

(A) by striking out "and" at the end of paragraph (40);

(B) by striking out the period at the end of paragraph (41) and inserting in lieu thereof "; and"; and

(C) by inserting after paragraph (41) the following new paragraph:

"(42) provide (A) that the records of any entity participating in the plan and providing services reimbursable on a cost-related basis will be audited as the Secretary determines to be necessary to insure that proper payments are made under the plan, (B) that such audits, for such entities also providing services under part A of title XVIII, will be coordinated and conducted jointly (to such extent and in such manner as the Secretary shall prescribe) with audits conducted for purposes of such title, and (C) for payment of the portion of the costs of each such common audit of such an entity equal to the portion of the cost of the common audit which is attributable to the program established under this title and which would not have otherwise been incurred in an audit of the program established under title XVIII.".

(2)(A) The amendments made by paragraph (1) shall (except as otherwise is provided in subparagraph (B)) apply to medical assistance provided, under a State plan approved under title XIX of the Social Security Act, on and after the first day of the first calendar quarter which begins more than 30 days after the date of enactment of this Act.

(B) In the case of a State plan for medical assistance under title XIX of the Social Security Act which the Secretary determines requires State legislation in order for the plan to meet the additional requirements imposed by the amendments made by subsec-

tion (b), the State plan shall not be regarded as failing to comply with the requirements of such title solely on the basis of its failure to meet these additional requirements before the first day of the first calendar quarter beginning after the close of the first regular session of the State legislature which begins after the date of enactment of this Act.

(c)(1) Section 505(a) of the Social Security Act is amended—

(A) by striking out "and" at the end of paragraph (14);

(B) by striking out the period at the end of paragraph (15) and inserting in lieu thereof "; and"; and

(C) by inserting after paragraph (15) the following new paragraph:

"(16) provides (A) that the records of any entity participating in the plan and providing services reimbursable on a cost-related basis will be audited as the Secretary determines to be necessary to insure that proper payments are made under the plan, (B) that such audits, for such entities also providing services under part A of title XVIII, will be coordinated and conducted jointly (to such extent and in such manner as the Secretary shall prescribe) with audits conducted for purposes of such part, and (C) for payment of the portion of costs of each such common audit of such an entity equal to the portion of the cost of the common audit which is attributable to the program established under this title and which would not have otherwise been incurred in an audit of the program established under title XVIII.".

(2) The amendments made by paragraph (1) shall apply to services provided, under a State plan approved under title V of the Social Security Act, on and after the first day of the first calendar quarter which begins more than 30 days after the date of enactment of this Act.

(d) The Secretary shall report to Congress, not later than March 31, 1980, on actions the Secretary has taken (1) to coordinate the conduct of institutional audits and inspections which are required under the programs funded under title V, XVIII, or XIX of the Social Security Act and (2) to coordinate such audits and inspections with those conducted by other cost payers, and he shall include in such report recommendations for such legislation as he deems appropriate to assure the maximum feasible coordination of such institutional audits and inspections.

DEVELOPMENT OF PHILANTHROPIC SUPPORT FOR HEALTH CARE

SEC. 30. Title XI of the Social Security Act is amended by inserting after section 1133 (as added by section 29 of this Act) the following new section:

"ENCOURAGEMENT OF PHILANTHROPIC SUPPORT FOR HEALTH CARE

"SEC. 1134. (a) It is the policy of the Congress that philanthropic support for health care be encouragd and expanded, especially in support of experimental and innovative efforts to improve the health care delivery system and access to health care services.

"(b)(1) For purposes of determining, under title XVIII or XIX, the reasonable costs of any service furnished by a provider of health services—

"(A) except as provided in paragraph (2), unrestricted grants, gifts, and endowments and income therefrom, shall not be deducted from the operating costs of such provider, and

"(B) grants, gifts, and endowment income designated by a donor for paying specific operating costs of such provider shall be deducted from the particular operating costs or group of costs involved.

"(2) Income from endowments and investments may be used to reduce interest expense, if such income is from an unrestricted gift or grant and is commingled with other funds, except that in no event shall any such interest expense be reduced below zero by any such income.".

PARTICIPATION UNDER MEDICAID BY SKILLED NURSING FACILITIES PARTICIPATING UNDER MEDICARE AND VICE VERSA

SEC. 31. (a)(1) Section 1903 of the Social Security Act is amended by adding after subsection (s) thereof (as added by section 16 of this Act) the following new subsection:

"(t) Notwithstanding any other provision of this section no payment shall be made to a State with respect to expenditures incurred by it for services in a skilled nursing facility unless such facility has an agreement with the Secretary in effect under section 1866 and such facility has in effect and conforms to a policy (which it shall amply publicize) of not discriminating for admission and treatment purposes against any patient because he is insured for benefits under part A of title XVIII.".

(2) The amendment made by paragraph (1) shall be effective with respect to services furnished after June 30, 1979.

(b)(1) Section 1866(c) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(3) No agreement under this section with a skilled nursing facility shall, after the date of enactment of this paragraph, be entered into, extended, or renewed, if the State in which such facility is located has a State plan—

"(A) which is approved under title XIX, and

"(B) which covers skilled nursing facility services, unless such facility has in effect an agreement, with the State agency administering or supervising the administration of such State plan, under which the skilled nursing services furnished by such facility will be available (on a nondiscriminatory basis) to individuals covered for medical assistance under such State plan.".

COVERAGE UNDER MEDICARE OF CERTAIN DENTISTS' SERVICES

SEC. 32. (a) Clause (2) of the first sentence of section 1861(r) of the Social Security Act is amended to read as follows: "(2) a doctor of dentistry or of dental or oral surgery who is legally authorized to practice dentistry by the State in which he performs such function, but only with respect to (A) a function (i) which he is legally authorized to perform as such by the State in which he performs such function, and (ii) which, if performed by an individual described in clause (1), would constitute physicians' services, or (B) the certification required by section 1814(a)(2)(E) of this Act,".

(b) The amendment made by subsection (a) shall be effective with respect to service provided on or after October 1, 1978.

COVERAGE UNDER MEDICARE OF OPTOMETRISTS' SERVICES WITH RESPECT TO APHAKIA

SEC. 33. (a) The first sentence of section 1861(r) of the Social Security Act is amended, in clause (4) thereof, by—

(1) inserting "(i)" immediately after "with respect to", and

(2) inserting immediately after "lenses," the following: ", and (ii) any function with respect to aphakia which he is legally authorized to perform as such by the State in which he performs such function,".

(b) The amendments made by subsection (a) shall be effective with respect to services provided on or after October 1, 1978.

STUDY OF CRITERIA EMPLOYED FOR CLASSIFYING A FACILITY AS A SKILLED NURSING FACILITY

SEC. 34. (a) The Secretary of Health, Education, and Welfare (hereinafter in this section referred to as the "Secretary") shall conduct a special study, investigation, and review of the criteria presently employed in determining whether a facility is a "skilled nursing facility" as that term is used in paragraph (2) of section 1861(a) of the Social Security Act (relating to definition of "spell of illness"), with a view to determining, and recommending to the Congress, such modifications in such criteria as he may consider appropriate.

(b) The Secretary shall not later than December 31, 1979, submit to the Congress a full and complete report on such study, investigation, and review, together with his recommendations for any modification in the criteria referred to in subsection (a).

AUTHORITY FOR CERTAIN STATES TO BUY-IN COVERAGE UNDER PART B OF MEDICARE FOR CERTAIN MEDICAID RECIPIENTS

SEC. 35. Section 1843 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(i) Any State, which prior to the date of enactment of this subsection—

"(A) has not entered into an agreement under the preceding provisions of this section, may enter into such an agreement at any time within the twelve-month period which begins with the month following the month in which this subsection is enacted, and any such agreement shall conform to the modifications prescribed by the Secretary (as referred to in the third sentence of subsection (b)) and may, at the option of the State, contain any provision authorized under subsections (g) and (h) with respect to modifications of agreements with States entered into under the preceding provisions of this section; or

"(B) has entered into an agreement under the preceding provisions of this section which has not been modified pursuant to the authority contained in subsection (g) or (h), may within the twelve-month period which begins with the month following the month in which this subsection is enacted modify such agreement in like manner as if the date referred to in subsection (g)(1) and (h)(1) were the day following the close of such twelve-month period.".

Mr. TALMADGE. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. Senators will take their seats. The Senate will be in order.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the committee amendment be agreed to and that the bill as thus amended be considered as original text for the purpose of further amendment.

Mr. ABOUREZK. Mr. President, reserving the right to object, a parliamentary inquiry. Does that vitiate in any way the agreement that we had originally about the point of order?

Mr. TALMADGE. None whatever.

The PRESIDING OFFICER. It would, unless the right was retained.

Mr. ABOUREZK. Then, I ask the distinguished chairman to include that in the request, if he will.

Mr. TALMADGE. If the Senator desires to make a point of order about any amendment, Mr. President, I would be willing to have the Senator have that right preserved.

Mr. ROBERT C. BYRD. Mr. President, that was the intent—to protect the Senator on his point of order, in the request that was entered.

Mr. ABOUREZK. According to the Parliamentarian, the new agreement would vitiate it.

Mr. ROBERT C. BYRD. It was my intent that the Senator be fully protected, and I want that included in the request.

The PRESIDING OFFICER. With that intent, without objection.

Mr. METZENBAUM. Mr. President, reserving the right to object——

Mr. ROBERT C. BYRD. It is too late. We are protecting this Senator.

Mr. METZENBAUM. I could not understand what the unanimous-consent request was, and I ask the Chair to restate it.

The PRESIDING OFFICER. To agree to the committee amendment in the nature of a substitute, as original text.

Mr. TALMADGE. Mr. President, H.R. 5285, as amended by the Finance Committee, represents a major step forward in making vital reimbursement and administrative changes in the medicare and medicaid programs.

Those two programs will cost the Nation's taxpayers $50 billion in fiscal 1979.

That enormous expenditures is up from $44 billion in this fiscal year and up from $37 billion in fiscal 1977.

The numbers, alone, clearly indicate that change is necessary.

The committee amendment makes orderly modifications in various aspects of physician reimbursement, long-term care, and general provisions of medicare and medicaid.

Benefit improvements such as dropping the limitation on home health services under medicare and waiving deductible and coinsurance requirements for ambulatory surgery are also included.

Clearly, however, the most significant provision of the committee bill is section 2—reform of hospital reimbursement under medicare and medicaid.

The essence of that reform involves abandoning the present system which has been characterized as: "The more you spend—the more you get paid."

In place of that open-ended approach, the committee bill provides for a system whereby the reasonableness of a given hospital's costs would be determined by comparing those costs with the average costs in similar hospitals.

It is a system of classification and comparison.

It is a system which provides incentive payments as a reward for efficient hospital operation and which reduces payments in the case of inefficient operation.

It is a system which, by means of a health care facilities costs commission, has a mechanism for ongoing refinement and improvement as the "state of the art" of hospital costs comparison develops.

It is a system which provides for orderly extension of reasonable limitations—along with rewards and penalties—to all hospital costs, not just routine costs, as soon as appropriate and equitable methods of comparing those nonroutine costs are developed.

Now let us talk about what section 2 is not.

The committee bill is not a system for controlling all hospital costs.

It is a bill to change the way medicare and medicaid reimburse hospitals.

The committee bill is not the Government in its role as regulator—it is the Government in its role as a purchaser of hospital care, the Government as a prudent buyer.

For example, when the Federal Government purchases automobiles, it tries to buy those cars at the lowest cost it can negotiate.

That is not the same thing as placing price controls on the entire automobile industry.

Regardless of what may be done about overall hospital costs containment, the Government, in its direct expenditure of taxpayer dollars, has an obligation to spend those dollars as reasonably and as efficiently as is possible.

That is what the committee bill seeks to do.

The committee bill is not designed to limit all hospital revenues.

This is not a bill to indiscriminately cut and gut hospital operations.

This is a bill, Mr. President, which seeks to do no more—and no less—than to reform Government payment methods to hospitals with a system designed to encourage moderation by rewarding efficiency and not pay for inefficiency.

This bill reflects years of effort.

Its genesis was in S. 3205 of the last Congress and the successor bill in this Congress, S. 1470.

I take pride in the fact that so many of my colleagues joined with me in introducing those proposals.

It is also appropriate to point out that both S. 3205 and S. 1470 were bipartisan proposals.

In particular, the many hours of knowledgeable and dedicated effort of Senator BOB DOLE, ranking minority member of the Subcommittee on Health, are noteworthy.

Senator DOLE worked long and hard during the drafting process and, following introduction, the extensive hearings which followed.

The bill before us reflects his conscientious effort and concern.

I ask unanimous consent that the summary of H.R. 5285 included in the RECORD be printed.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

I. SUMMARY OF THE BILL

As reported, the provisions of S. 1470, the Medicare-Medicaid Administrative and Reimbursement Reform Act as amended by the committee and added as an amendment to H.R. 5285 address three major areas: hospital reimbursement, practitioner reimbursement, and long-term care. The summary presented below briefly outlines the bill as reported.

HOSPITAL REIMBURSEMENT REFORMS

1. The bill establishes a new method of reimbursement for routine operating costs for hospitals under the medicare and medicaid programs. The new mechanism, to be effective July 1, 1979, would provide for incentive reimbursement—rewarding hospitals whose routine operating costs are below average, and penalizing hospitals whose routine operating costs are substantially above average.

Comparisons among institutions would be facilitated by:

Classifying hospitals in groups, by bed size, location, type of hospital, or other categories found to be appropriate;

Applying the reimbursement system to routine operating costs (for example, routine nursing, administrative, maintenance, supply, and food costs), and excluding elements of routine costs such as costs of capital, costs of education and training programs, malpractice insurance, etc. Such excluded costs would continue to be reimbursed as under current law.

A target rate for routine operating costs would be determined for each hospital by:

Calculating the average per diem routine operating cost for the hospitals in each classification group; and

Adjusting the personnel cost component of the group average to reflect the difference in wages in effect in each hospital's area.

Hospitals whose actual routine operating costs fell below their target rate would receive one-half of the difference between their costs and their target rate, with the bonus payment limited to 5 percent of the target rate. In the first year, hospitals whose actual costs exceeded their target rate, but were no more than 115 percent of that rate, would be paid their actual costs. Those with costs above 115 percent of their payment rate would have their reimbursement limited to 115 percent of the target rate. Beginning with the second year, the reimbursement limit would be reduced below the 115 percent level.

Provision is made for a hospital to demonstrate that its unusually high routine costs are caused by (1) underutilization of beds or facilities, but only where such beds or facilities are necessary to meet the needs of an underserved area, (2) an unusual patient mix which results in a greater intensity of routine care, (3) changes in services due to approved consolidations or sharing of services with another hospital, and (4) start-up costs associated with a new hospital. To the extent that such additional costs could be justified, they would be excluded from the reimbursement criteria provided for in the bill.

If the Secretary is satisfied that a State hospital reimbursement control system would result in aggregate medicare and medicaid payments to the State's hospitals for routine and nonroutine costs which are no greater than would otherwise be payable by medicare and medicaid under the system established by the bill, then payments to hospitals in that State could, at the State's request, be based on the State system. A State with an approved reimbursement control program would be reimbursed for the medicare program's proportionate share of the cost of operating the State program. The State's medicaid program would pay its proportionate share of costs which would be matchable with Federal funds as an administrative expense. In addition, medicare and medicaid would pay their proportionate share of startup costs of approved State reimbursement control programs.

The bill requires the Secretary to appoint an 11-member Health Facilities Costs Commission. The Commission would monitor and study all aspects of the cost reimbursement program and propose such changes and refinements as it found appropriate. The Commission would be directed to develop possible legislative recommendations to refine the method of reimbursing hospitals for routine costs and for the possible application of similar limitations to other hospital costs and to the costs of other providers of services, such as skilled nursing facilities, ICFs, home health agencies, and renal dialysis facilities.

To the extent not specifically otherwise provided for under the bill hospital reimbursement would be made by medicare and medicaid subject to and under the provisions of present law.

2. The bill provides for including in payments to short-term hosiptals, reimbursement for increased operating costs and, in the case of nonprofit institutions, for increased capital costs associated with the closing down or conversion to approved use of underutilized bed capacity or services. This would include costs which might not be

otherwise reimbursable because of payment "ceilings", severance pay, "mothballing" and related expenses. In addition, nonprofit hospitals could continue to receive capital allowances in the form of depreciation or interest on debt in connection with the terminated beds. In the case of complete closing down of a hospital, payments would continue toward repayment of any debt, to the extent previously recognized by the program and actually outstanding. Appropriate safeguards are included to forestall abuse or speculation.

3. The bill includes several changes in the current law limitations on medicare and medicaid payments related to certain hospital capital expenditures. These changes link reimbursement to the health planning law by requiring that the designated planning agency approve capital expenditures in excess of $150,000 as a condition of medicare and medicaid reimbursement for capital and direct operating costs associated with those expenditures. A special procedure is established for proposed capital expenditures in metropolitan areas which include more than one State or jurisdiction. All States or jurisdictions in the area must approve the expenditure, or it would be considered disapproved for purposes of reimbursement subject to review by the Secretary. Section 1122(g) of the Social Security Act is amended to clarify that notice, approval and reimbursement penalty requirements contained in that section with respect to approval of health care facility capital expenditures do not apply to simple changes of ownership (either by purchase, or under lease or comparable arrangement) of existing and operational facilities which create no new beds or services.

PRACTITIONER REIMBURSEMENT REFORMS

1. The bill establishes the concept of "participating" physicians. A "participating" physician is an M.D. or D.O. who voluntarily agrees to accept the medicare reasonable charge determination on an assignment basis, as the full billing amount for all services to all his medicare patients. Agreements would be cancellable on the basis of 30 days' notice. "Nonparticipating" physicians could continue to elect to use the assignment method of billing on a claim-by-claim basis as under present law.

In the case of a participating physician, the Secretary would establish appropriate procedures and forms whereby such physician may submit his claims on a simplified basis. These claims would be given priority handling by the medicare carrier.

An "administrative cost-saving allowance" of $1 per eligible patient would be payable to a participating physician covering all services provided and billed for with respect to an eligible patient which were included in a multiple billing listing.

No administrative allowance would be payable in the case of claims solely for laboratory tests and X-rays undertaken outside of the office of the billing physician.

2. The bill permits medicare reimbursement to be made to free-standing ambulatory surgical centers and physicians performing surgery in their offices for the use of surgical facilities needed to perform a listed group of surgical procedures. Such procedures include those which are often provided on an inpatient basis but can, consistent with sound medical practice, be performed on an ambulatory basis. In the physician's office, the rate would encompass reimbursement for the facility and physician, and for related services including pre- and post-operative visits and routine laboratory and other diagnostic tests usually associated with the procedure. In the case of an ambulatory surgical center, the overhead allowance may be paid directly to the center and the professional fee directly to the physician(s).

The physician performing surgery in his office would be fully compensated for his overhead costs through this rate if he accepts an assignment; there would be no deductible and coinsurance.

Similarly, deductible and coinsurance amounts would be waived for the physician's fee when the physician accepts assignment for hospital outpatient surgery.

3. The bill modifies existing medicare criteria for determining reasonable charges for physician services.

Medicare presently allows a new doctor to establish his customary charge at not greater than the 50th percentile of prevailing charges in the locality. The bill would permit new physicians in under-served localities to be reimbursed at the 75th percentile (rather than the 50th) as a means of encouraging doctors to move into low-fee, physician shortage areas to have the fees they generally are charging recognized as reasonable, up to the 75th percentile.

Medicare utilizes more than 200 different "localities" throughout the country for purposes of determining part B "reasonable" charges. One State has 28 different localities. This has led to irrational disparities in areas of the same State in the prevailing charges for the same service. Additionally, under present law, all prevailing charges are annually adjusted upward by a fixed percentage to reflect changes in the costs of practice and wage levels. The effect of present law is to further widen the dollar gap between prevailing charges in different localities.

The bill requires calculation of statewide median charges (in any State with more than one locality) in addition to the locality prevailing charges. To the extent that any prevailing charge in a locality was more than one-third higher than the statewide median charge for a given service, it would not be automatically increased each year. This provision would not reduce any prevailing charges currently in effect—it would operate, to the extent given charges exceed the statewide median by more than one-third—to preclude raising them.

4. The bill amends present law to provide for direct payment to allergists for preparation of a reasonable supply of antigens which would be dispensed or administered by or under the supervision of another physician.

5. The bill includes a technical change that would permit payment by medicare for care directly to the spouse or other legal representative of a deceased medicare beneficiary on the basis of a nonreceipted bill. Under present law, medicare can only pay where the physician accepts an assignment or where the family has actually paid the bill. Thus, in some cases where a physician refuses an assignment, families have encountered difficulty in raising sufficient cash to pay the bill in order to be eligible for payment by medicare.

LONG-TERM CARE REFORMS

1. The bill includes a provision to encourage better use of underutilized beds of small rural hospitals by providing for a simplified cost reimbursement formula which avoids the current requirement for separate patient placement within the facility and separate cost finding.

2. The bill allows States the option, when computing reimbursement rates under medicaid to a skilled nursing facility or intermediate care facility, to include reasonable allowances for the facility in the form of incentive payments related to efficient performance.

3. The bill includes a provision which would make the Secretary of HEW the final certifying officer for skilled nursing and intermediate care facilities under medicaid.

4. The bill prohibits the Secretary from imposing numerical limits on the number of home visits which might be made by skilled nursing home or intermediate care patients under medicaid.

GENERAL PROVISIONS

1 The bill provides that if the Secretary notifies a State of any audits, quality control performance reports, deficiencies, or changes in Federal matching payments under the Social Security Act, simultaneous notification would also be made to the Governor of the State and the respective chairmen of the legislative and appropriation committees of that State's legislature having jurisdiction over the program affected.

2. The bill terminates the Health Insurance Benefits Advisory Council (HIBAC).

3. The bill includes a provision under which reimbursement to contractors, employees or related organizations, consultants, or subcontractors would not be recognized where compensation or payments (in whole or part, in cash or kind) were based upon percentage arrangements that are not normal business practices. The percentage prohibition would flow both ways either from the supplier or service agency back to the provider or organization or from the original provider or organization to the supplier or service agency. However, the amendment would not preclude certain percentage arrangements which are found to be customary commercial business practices or which promote good and economical management practices.

4. The bill permits payment for ambulance services to a more distant hospital when the nearest hospital does not have staff qualified to undertake the required care.

5. The bill authorizes up to $5 million annually for grants to public and nonprofit private regional pediatric pulmonary centers which are part of (or affiliated with) institutions of higher learning. These grants would assist institutions in the training of health care personnel in the prevention, diagnosis, and treatment of respiratory diseases and providing needed services for children and young adults suffering from such diseases.

6. The bill provides that the requirements of the human experimentation statute would not apply to financial and administrative arrangements such as deductible and copayment requirements.

7. The bill includes a provision that prohibits the routine release of information relating to the amounts paid to physicians on behalf of medicare patients.

8. The bill adds a provision that requires States to deny medicaid benefits for up to a year in certain cases for aged, blind and disabled individuals who, within the preceding year, dispose of their assets for substantially less than fair market value; there would be a rebuttable presumption that such disposal was undertaken for the purpose of qualifying for medicaid.

9. The bill changes the allowed rate of return on 'for-profit hospitals' net equity, which under present law is equal to 1½ times the current rate of return on Social Security trust funds. The new rate of return multiplier would be: 2½ times for hospitals entitled to an incentive payment under the incentive reimbursement system in sec. 2 of the bill; 2 times for hospitals that are reimbursed only their reasonable costs; and 1½ times for hospitals with costs in excess of their routine cost limits.

10. The bill waives the $60 deductible in applying special laboratory billing procedures under medicare.

11. The bill allows a State to purchase laboratory services for its medicaid population through competitive bidding arrangements for a three-year experimental period.

12. The bill clarifies that Professional Standards Review Organizations (PSRO's) are not to be considered Federal agencies for purposes of any public disclosure of information developed or compiled in undertaking functions required under the Social Security Act.

13. The bill removes the requirement in

existing law that limits medicare home health benefits to 100 visits under part A and 100 visits under part B. In addition, the bill removes the requirement that a beneficiary has to be an inpatient in a hospital for at least three days before he can qualify for part A home health benefits.

14. The bill establishes a new reimbursement methodology for medical equipment whereby reasonable charges for durable medical equipment would be calculated on a prospective basis and would take into account, in addition to the customary and prevailing charges, the acquisition costs of the equipment, appropriate overhead (considering the level of delivery services and other necessary services provided by the supplier), and a reasonable margin of profit.

15. The bill requires HEW to adopt, to the extent feasible, standardized claims forms for medicare and medicaid.

16. The bill provides for medicare to share its audit findings with the medicaid and the maternal and child health programs where these programs reimburse the same entity on the basis of its reasonable costs.

17. The bill would exclude certain charitable donations for the purpose of determining the reasonable costs for reimbursement under medicare and medicaid.

18. The bill requires skilled nursing facilities (SNFs) to participate in both medicare and medicaid as a condition to participate in either program.

19. The bill extends the coverage of dental services under medicare to include any services which may be performed by a doctor of dental surgery or of dental medicine legally authorized to perform such services if they would be covered when performed by a physician.

20. The bill authorizes medicare part B reimbursement to optometrists for services related to aphakia which are within the scope of licensed optometric practice, and which are covered under present law when provided by a physician.

21. Under present law, medicare beneficiaries who exhaust their eligibility for days of hospital or SNF benefits can renew their eligibility by remaining outside a skilled nursing care institution for 60 consecutive days.

The bill directs the Secretary to review present criteria for classifying skilled nursing care institutions to ensure that the criteria for renewing benefit eligibility are not too restrictive. The Secretary would report his findings and conclusions to the Congress within 9 months, together with any legislative recommendations he may wish to propose.

22. The bill provides an additional 1-year period for States to enter "buy-in" agreements under medicare on behalf of their medicaid population.

Mr. TALMADGE. Mr. President, I withhold the remainder of my time.

Mr. CURTIS and Mr. ABOUREZK addressed the Chair.

Mr. CURTIS. Mr. President, I make the following statement about the character of the Talmadge amendment and why the Talmadge amendment should be supported.

THE CHARACTER OF THE TALMADGE AMENDMENT

The Talmadge amendment would incorporate the substance of H.R. 5285, the medicare/medicaid cost containment measure reported by the Committee on Finance. This measure establishes a classification, comparison, and reward and penalty system in the medicare and medicaid programs as a replacement for the present system of reimbursement on the basis of reasonable cost. Target rates would be set by groups of hospitals, at their average per diem cost, and penalties would be levied against hospitals who have costs in excess of 115 percent of the target rate. Similarly, bonuses would be paid to hospitals who have costs less than the target rate.

WHY THE TALMADGE AMENDMENT SHOULD BE SUPPORTED

First. Government has a legitimate interest in controlling the costs of medicare and medicaid. The present system, where reimbursement is made on the basis of reasonable cost, has no incentive whatever with respect to cost control.

Second. The classification, comparison, and incentive system established by the Talmadge bill is fair and equitable. It groups hospitals by several criteria, and provides for suitable adjustments and exceptions according to their characteristics.

Third. It begins only with routine costs—food, wages, and the like. It appropriately does not include ancillary costs—drugs, laboratory work, supplies—which cannot at this point be measured or compared adequately.

Fourth. Similarly, it appropriately does not cover all payers—only medicare and medicaid. Cost control mechanisms of this type should cover only Government programs, not the private sector.

Fifth. It resists any move to impose flat revenue caps, as the Kennedy and Nelson proposals would do. See summary pages on each of these proposals for a listing of their defects.

Mr. NELSON. Mr. President, the hospital cost containment amendment which I and 14 other Members are proposing today represents a compromise between S. 1391, the Human Resources Committee's hospital cost containment proposal, and the Finance Committee-reported approach contained in H.R. 5285, the bill before us today. As such, I believe it will present the Senate with a meaningful, effective, and realistic opportunity to reduce current inflationary pressures, help balance Federal and State budgets, and save taxpayers, American business, and private patients literally billions of dollars over the course of the next few years.

In summary, this compromise amendment addresses one of the most significant inflationary factors in the economy today: Hospital costs. If adopted, it will significantly reduce the rate of increase in those costs, in a way which is equitable to the hospital industry.

This is true because our proposed compromise takes into account the efforts of that industry to control the current intolerable rate of hospital cost inflation voluntarily, but it also guarantees that this rate will be reduced, and that real savings will be realized for the American economy, by enacting a standby program to go into effect if the voluntary effort fails.

In the most general terms, this amendment could not be simpler. The hospital industry itself has proposed a voluntary effort to reduce the hospital cost inflation rate by 2 percentage points in 1978 and by 2 additional percentage points in 1979. The American Hospital Association panel survey has estimated a 1977 rate for all hospitals of 15.6 percent. At that rate, hospitals would have to achieve a rate of 11.6 percent by the end of 1979.

The key provision in this compromise simply acknowledges the voluntary effort, and writes it into the law, with certain minor changes.

The compromise also authorizes a set of mandatory hospital cost controls—but those controls would only apply to any particular hospital when:

The national voluntary effort fails; and

The State in which the hospital is located also fails to meet the national goals, and the State does not have an adequate cost containment program of its own, and

The hospital itself has more than 4,000 annual admissions, is not a new hospital, a mental hospital, or an HMO hospital, and is not exempt under the other exceptions set out in the amendment.

As you can see, Mr. President, this is an extremely careful, cautious approach, which recognizes voluntarism in the private sector. The Government only steps in with mandatory controls as a last resort in cases where all other efforts have failed to curb unacceptable inflation.

And yet despite this caution. HEW has estimated that this compromise will save $30 to $35 billion [1] over the next 5 years—over $11.5 billion for the Federal Government, $1.5 billion for State and local governments, and the rest for health insurance companies, businesses, employees, and other private payers.

In other words, the extent of the inflationary problem in this sector is so huge that what we do or fail to do about it here today, on the Senate floor, could have enormous repercussions throughout our economy for many years to come.

Before I discuss the cost containment provisions of H.R. 5285 and this compromise in greater detail, I would like briefly to outline the nature and scope of this problem, and provide some background for this current proposal.

The American people are frustrated and alarmed by the effects of uncontrollable inflation on their lives. When Louis Harris recently asked Americans to identify their most serious concerns, the message was clear:

Controlling inflation was their first priority, 69 percent.

Curbing Federal spending was their second priority, 31 percent.

Controlling health care costs was their fourth priority, 28 percent.

Reducing unemployment barely beat out controlling health care costs as the third priority.

Quite simply, this compromise gives Congress an opportunity to address all three of those major and traumatic concerns, Mr. President, by giving us an opportunity to bring rational, manageable controls to the rate of inflation in hospital costs.

One hundred and sixty-three billion dollars was spent for health care in

[1] This is the DHEW estimate. Within the last few days, however, the Congressional Budget Office has estimated savings of $23 billion, based on new economic assumptions.

America in fiscal year 1977—equal to $737 for every man, woman, and child in the country, according to the Health Care Financing Administration. Health care now absorbs some 8.8 percent of the gross national product (GNP), and predictions are for it to represent 10 percent of GNP by 1983.

Hospital costs alone account for 40 percent of all health care expenditures. Hospital costs have risen from a total of $12.6 billion in 1967 to $68.4 billion in 1977—making them clearly the most inflationary part of the Nation's health care budget.

The average cost of a stay in a hospital and the average daily rate over the last few years gives some indication of the magnitude of this problem. Consider the following facts:

	Average daily hospital rate	Average cost of a hospital stay
1946	NA	$85
1968	$55	469 (8.4 days)
1978	200	1,543 (7.7 days)
1983 (estimate)	373	2,872 (7.7 days)

In other words, over the past 10 years, total hospital expenses have quadrupled, with the increase averaging over 15 percent per year. That is almost 2.4 times more than the average rate of increase in the Consumer Price Index (CPI) over that same period of time. That is more than 3½ times the rate of increase for clothing, and more than twice the rate of increase for food prices. Quite simply, there is no longer any question that such costs present a major and constant threat to our efforts to control inflation.

In 1977, our total nationwide hospital bill increased by 15.6 percent over the previous year, according to the American Hospital Association. This followed increases of 20 percent in the five quarters from 1976 to 1977, 18.8 percent from 1975 to 1976, and 17.9 percent from 1974 to 1975.

Because of these tremendous inflationary rates of increase in hospital costs, President Carter proposed last year to put a temporary cap of one and one-half times the overall rate of inflation (as measured by the GNP deflaton on the annual rate of increase in hospital costs. At an inflation rate of 6.6 percent thus far in 1978, that cap would permit hospitals to increase their revenues by nearly 10 percent this year—a rate many economic analysts would consider far too high, but one considerably less than the current rate of inflation in this sector.

The inescapable fact is—if hospital costs had only been going up at a rate one and one-half times the overall rate of inflation during the last 3 years—rather than two and one-half times that rate—that reduction would have pulled down the overall average of three-tenths of a percent. In other words, the Consumer Price Index for the entire period would have averaged 5.8 percent rather than 6.1 percent.

And if we had held the rate of hospital cost inflation to just one and one-half times the overall rate over the last decade, Americans would be spending $14 billion less on hospital care this year than we will actually spend.

Since early 1977, the hospital rate of increase does appear to have declined somewhat. But it would be difficult, at best, to attribute that decline to any "voluntary effort" pure and simple.

For one thing, the decline started nearly a year before the so-called voluntary effort was even introduced by the industry—at about the time the administration first introduced its mandatory bill.

For another, virtually all of the total nationwide decline in hospital prices has been due to real and dramatic declines in States with mandatory rather than voluntary cost containment programs on the books.

In 1977, HEW now estimates that total inpatient hospital expenses rose by 14.2 percent in the Nation as a whole.[2]

However, the sole reason that rate was so low, relative to previous years, was that the nine States with mandatory programs on the books experienced an average increase of only 12 percent in 1977. Those States are:

(In percent)

	1975	1977
Colorado (1977)	22.9	15.1
Connecticut (1974)	16.8	11.4
Maryland (1973)	19.8	11.8
Massachusetts (1976)	17.7	13.7
New Jersey (1971)	18.3	11.8
New York (1969)	19.9	6.2
Rhode Island (1971)	20.5	11.1
Washington (1973)	21.7	15.2
Wisconsin (1975)	16.6	12.4
(Year Begun)		

On the other hand, the three States with statutory voluntary programs in 1977 averaged an increase of 15.6 percent in 1977. And the 39 States (including the District of Columbia) with no program at all averaged 15.8 percent that year.

Those who would base their vote on this bill in the hope that the "voluntary" effort will succeed by itself, without the threat of standby controls, take a long odds gamble at great risk to our economy. Only standby controls will assure success in an effort we cannot afford to lose.

Even the prediction that hospital cost inflation is on its way down this year received a damaging blow earlier this month, when the newest Consumer Price Index showed that health care costs alone went up 0.9 percent in the month of August—and that the hospital room and board component of that index jumped by 1.5 percent last month, or an annual rate of 18 percent.

The only committee to take action on the administration bill has been the Human Resources Committee, which reported out S. 1391 last year. The Congressional Budget Office has estimated savings through that bill of nearly $60 billion over the next 5 years, making it clearly the single most potent anti-inflation bill that will come before Congress this session (or indeed, for many sessions to come).

And yet no other committee of Congress has approved cost containment legislation even remotely similar to the administration bill. It has been stalled for months in the House Ways and Means Committee. It has essentially been gutted by the House Commerce Committee. And it has never been seriously considered in the Committee on Finance.

Section 2 of H.R. 5285 represents the Finance Committee's only effort this year to address the issue of rising hospital costs. But while the committee's adoption of this section indicates a belief that there is a serious hospital inflation problem, the solution proposed is simply inadequate to assure a resolution of the hospital cost inflation problem.

The Finance Committee proposal basically sets up a new mechanism for paying hospitals their routine (that is, "hoteltype") costs under medicare and medicaid. Currently, a hospital simply tells the governmental programs what its costs have been, and the Government pays its appropriate share of those costs—without really questioning the hospital's accounts. Under this Finance Committee bill, hospitals of similar size, type, and location will have their routine costs compared and averaged. Hospitals whose routine costs are far in excess of others in their categories would have some upward limits placed on their medicare and medicaid reimbursement—in general, they could receive no more than 115 percent of the per diem average for their class of hospital, regardless of their actual costs.

The Finance Committee bill has several serious deficiencies, however, which drastically limit any potential savings for the Government programs—and which guarantee even less real savings for the economy as a whole. As a result, there will be virtually no savings, even to the Government, under the Finance Committee bill for the first 2 years of its operation, and less than $500 million over the next 5 years—or over 100 times less than the savings under the Human Resources Committee bill.

For example, the Finance bill is limited only to hoteltype routine costs—with no effort whatsoever to control ancillary costs such as X-rays, laboratory fees, operating rooms, and so forth. Yet such costs represent a large percentage of the hospital budget—45 percent for ancilaries, as compared with 55 percent for routine costs. And with various routine costs such as energy costs, teaching costs, and malpractice insurance also excluded under the Finance bill, it would apply to no more than 40 percent of all hospital costs.

In addition, by limiting its effect only to medicare and medicaid, and not affecting insurance companies, Blue Cross/Blue Shield, private patients, and other payers, it is virtually guaranteed that no real savings will be felt at all for the economy as a whole. Clever hospital administrators and accountants will simply find ways to shift their excess costs from

[2] Note: While this differs from the AHA panel survey estimate of 15.6 percent, it measures a different and more detailed set of AHA cost data than that panel survey, and the rates of increase in States relative to one another are not necessarily affected by the different national rate.

the Federal programs to private payers—a phenomenon which has already been observed and recorded in New York State, where controls on medicaid and Blue Cross simply resulted in room rate charges twice as high for all other payers, including the private patient who can afford it the least.

Section 2 of the Finance Committee bill does contain language ostensibly prohibiting hospitals from shifting these excess costs to other payers—however, there is no effective way of enforcing that provision without actually controling in some way the payments of insurance companies and private patients. So it is unlikely that such language would have any practical effect on hospital practices.

In fact, HEW believes section 2 provides very little more statutory authority than the Department already has over medicare and medicaid—authority which the Department has not yet exercised precisely because of the fear of increased charges to all other payers.

On the one hand, then, we have the administration's cost containment proposal, which would entail mandatory controls on all hospital costs and all payers—and which would save upwards of $55 to $60 billion over the next 5 years.

On the other, we have the Finance Committee bill before us today, which makes certain modest changes in governmental reimbursement policy affecting only routine hospital costs—and which saves less than $500 million over the same period of time.

By way of compromise, this proposal would strike a middle road between these two:

It would accept the Finance Committee routine cost reimbursement proposal (with a few technical modifications to increase its cost savings), and that proposal limitations would thus go into effect as planned with regard to routine costs under medicare and medicaid.

It would statutorily recognize the need to contain ancillary costs and to control costs for all other payers, but would accept the hospitals' own voluntary effort to control those costs at the same time. It would simply seek to insure the success of that voluntary effort, by having in place statutory authority for standby mandatory controls to keep hospital cost inflation down if the voluntary effort fails.

Let us be clear on that last point before we go on to explain this compromise in greater detail: I consider the voluntary effort—not the standby controls—to be the key element of this compromise. But I believe that maintaining the threat of standby controls is also essential if that voluntary effort is to succeed.

I would now like to take a little time, Mr. President, to set out in somewhat greater detail exactly what this compromise does and how it would function.

As we stated previously, the vast majority of hospitals are currently paid by medicare, medicaid, and most third-party payers solely on the basis of their self-reported costs. When hospitals report that their costs have increased—whether due to price increases in the food they serve or the fact that they have purchased a new CAT Scanner—those increased costs are simply paid, with few or no questions, by medicare, medicaid, and private insurers.

It is absolutely essential to bear in mind, in discussing this amendment, that it does not represent price controls—because "pricing" policy has little or nothing to do with the way hospitals are paid. Hospitals simply do not "sell" their product on the open market like private industry, and the so-called "charges" that appear on most hospital bills are, in many cases, little more than informational accounting techniques. For anyone other than the uninsured private patient, those charges have little to do with either the way hospitals are paid or how much they are paid.

Again, medicare, medicaid, and Blue Cross/Blue Shield by and large simply pay the hospital that portion of the hospital's overall aggregate, annual costs attributable to their own beneficiaries.

To give you an example: Hospital A reports total costs for a particular year of $1 million and 40 percent of its patient charges for that year were covered by medicare, 30 percent by Blue Cross, 20 percent by medicaid, 15 percent by other insurance companies, and 5 percent were private patients with no insurance. Rather than submitting itemized bills, such as a patient sees, to each of those payers for each patient, the payer looks instead at the relevant costs and percentages. Medicare thus pays the hospital 40 percent of its $1 million annual costs—or $400,000;[3] Blue Cross pays $300,000 to the hospital; other insurers pay their share; and only the private patients end up paying on the basis of individual "charges" which appear on the bill. The other payers are in essence paying the hospital's budget.

Now, in fact the payment scheme is more complicated than that—negotiations do take place between each payer and a hospital over such matters as allowable costs and number of patients covered—but that is the basic system as it exists today.

Against that background, then, the very limited reforms contained in section 2 of H.R. 5285 would simply attempt to set some upward limits on what medicare and medicaid will pay hospitals for certain types of routine costs, amounting to only 40 percent of all hospital costs. In addition to that limitation, medicare pays only 30.4 percent of all hospital costs. The Federal medicaid share is only 5.7 percent, and State medicaid payments account for only 4.7 percent of hospital costs, for a total governmental share of just 40.8 percent. Blue Cross/Blue Shield and private insurers, on the other hand, now pay 53.9 percent of all hospital costs, while private patients account for the remaining 5.3 percent. Thus, less than 20 percent of all hospital costs would be covered under the Finance Committee bill, as it is currently written. Given the scope of the current inflationary problem in the hospital sector, the section 2 approach simply does not go far enough to meet the urgent need to reverse the inflationary trends.

This compromise amendment is designed to have a wider, more meaningful anti-inflationary effect than the Finance Committee bill—while avoiding the imposition of immediate, mandatory controls contained in the Human Resources Committee bill.

The way this amendment would work is as follows:

The modifications to the current medicare and medicaid cost reimbursement system already contained in the Finance bill would be preserved, with certain minor modifications designed to improve their effectiveness. Thus, hospitals would be classified according to size, type, and location, and commencing next July 1, the amount each hospital could receive from the Federal Government for its per diem routine costs would be limited to no more than 115 percent of the average per diem cost of all the hospitals in its class.

Three significant modifications are made by the compromise amendment in the basic Finance Committee approach to routine costs under medicare and medicaid:

First, this proposal would tighten up the technique used to determine the average costs of each class of hospital from year to year. While no hospital will receive more than 115 percent of that average in any given year, the Finance Committee provision permits half of each hospital's actual costs are in excess of that level to be counted in determining the following year's average. Since this would have the effect of permitting unreasonable costs to unnecessarily inflate the average in subsequent years, my amendment would disregard all—rather than half—of such excess costs in determining the new average.

Second, since the Finance Committee bill permits any hospital to be reimbursed for all its routine costs up to 115 percent limit, there is inadequate incentive to relatively low-cost hospitals to keep their costs down. While hospitals actually below the average can keep as a bonus half of the difference between their actual costs and the average (up to 5 percent of the average costs), that may not be adequate incentive for many hospitals, even if it is amended as I recommend to require half of the bonus to be passed on to hospital employees.

A hospital with costs at 80 percent of the average, for instance, can earn a 5 percent incentive bonus under the Finance measure if they keep their costs at 80 percent—but there would be no penalty to them if they increased their costs all the way to 115 percent of the average, an increase of nearly 50 percent in costs. My amendment simply guarantees that such inflationary increases will not occur, by limiting annual routine cost increases, even within the Finance Committee limits, to 1½ times the rate of increase in a "market basket" of goods and services normally purchased by hospitals.

[3] Medicare patients do pay a "first-day deductible" out of their own pockets for hospital care. That deductible came to $40 in 1968. By 1973, it had climbed to $72, and only last week, a new increase was announced from $144 to $160. By 1983, without any cost containment effort, it is estimated that the deductible will climb to $276 for the elderly patient.

The administration estimates that these two amendments would add $300 million and $1.6 billion in savings respectively over the next 5 years to the current Finance Committee approach to routine costs.

Third, the compromise proposal provides a basis for expanding the Finance Committee approach to govern medicare and medicaid reimbursement for ancillary costs, as well as routine costs, as soon as the Hospital Cost Commission created by H.R. 5285 recommends to the Secretary that we have adequate data to do so. This amendment will at least guarantee that all costs can, at some time in the future, be controlled under medicare and medicaid.

But even with these modifications, there remains the very serious problem of what to do at this time about ancillary costs and about all other payers. For that reason, this amendment also contains provision to address those concerns.

To summarize those provisions, as I pointed out earlier, this amendment would statutorily recognize the hospital industry's own voluntary effort to control hospital costs. If that effort succeeds, then no further governmental action will be required. If at any point it does not succeed, however, this amendment provides for standby, mandatory controls, which would then go into effect.

Here's how the amendment would put the voluntary effort into statute:

Total community hospital expenses nationwide increased by about 15.6 percent in 1977 (according to the American Hospital Association panel survey) to $53 billion. The voluntary goal is to lower that rate of increase by 2 percent in 1978 (thus limiting the rate of increase to 13.5 percent if 15.6 percent is finally determined to be the 1977 rate); and by a cumulative total of 4 percent in 1979 through 1982 (thus holding the rate of increase to 11.6 percent through those years, again based on the 15.6 percent base).

However, hospitals would not be required to reduce their aggregate rates of inflation below one and one-half times the rate of inflation in the general economy, as measured by the GNP price deflator.

For example, if the rate of inflation were to rise to 8 percent, hospitals would be allowed to increase by 12 percent, even if the "goal" for this year becomes 11.6 percent.

At the current rate of inflation of about 7.2 percent, one and one-half times that rate would be 10.8 percent, so the rate of increase allowed would still be 11.6 percent, based on the AHA figure.

It is important to bear in mind that the voluntary goals are measured nationwide, on the aggregate, not hospital-by-hospital. Therefore, some hospitals could have significantly higher rates of increase than others, and yet the national goal could still be met.

If the nationwide voluntary effort fails to meet its goal in any particular year, the standby program contained in the compromise amendment would then go into effect.

However, even in that event, any particular hospital could still be exempt from the controls if:

Hospitals in its State in the aggregate have met the national goals; or

The State has in place an effective cost containment program of its own which the Secretary determines to be capable of meeting the national goal; or

The hospital itself has fewer than 4,000 admissions, is primarily an HMO, psychiatric or tuberculosis hospital, is less than 3 years old.

In addition, even if a hospital is subject to controls, its maximum allowable rate would be adjusted upward if a hospital could demonstrate, as under the Talmadge bill, that its unusually high routine costs were caused by: First, underutilization of beds or facilities, when the hospital is in an underserved area; second, an unusual patient mix that results in a greater intensity of routine care; third, changes in services due to approved consolidations or sharing of services with another hospital; and fourth, start-up costs associated with a new hospital.

HEW would also have discretion to develop other exceptions, especially after the new Health Facilities Cost Commission created by the Talmadge bill analyzed needs for exceptions.

Finally, wage increases granted by hospitals to nonsupervisory employees would be disregarded by hospitals in determining whether, on the State or national aggregate, they have met the voluntary goals. This provision—which does not extend to fringe benefits, overtime, or shift differentials—is necessary because, while hospital costs have been increasing at up to 18 percent annually, low wage nonsupervisory employees' wages are rising at only 4 to 7 percent annually, according to the Bureau of Labor Statistics. After removing the effects of inflation, real wages of such hospital workers have risen only 20 cents per hour since 1970, as calculated from data from the BLS:

1977 average hourly hospital wage	$4.68
In 1970 dollars, $4.68 equals	2.99
1970 average hospital wage	−2.79
Real wage gain since 1970	0.20

Therefore, it is essential that this program remain neutral on the issue of nonsupervisory wages—neither giving hospital workers a blank check to demand inflationary increases nor permitting hospitals to use the threat of controls to deny employees' legitimate requests. The amendment is neither prolabor nor antilabor—it simply leaves both parties in the same collective bargaining position they would be in the absence of controls.

MANDATORY STANDBY PROGRAM

If, after considering all of the elements set out above, a hospital becomes subject to mandatory controls, those controls would work as follows:

The Secretary of HEW, acting through the local medicare fiscal intermediary, would set a maximum allowable revenue limit for each hospital made up of the following components:

First. The percentage increases allowed using the routine cost ceiling already determined for that hospital under section 2 of H.R. 5285 would be extended to routine costs paid by all payors.

Second. All other costs—the ancillary costs—would then be divided into two components: Labor costs and nonlabor costs. The rate of increase in each of those components would be compared with the overall rate of increase for each component in the economy.

First. In the case of labor costs, the rate of increase in general wages in the hospital's geographic area in the most recent 2-year period would be applied to the hospital's overall labor costs.

Second. In the case of nonlabor costs, the rate of increase in a "market basket" of goods and services normally purchased by hospitals would be multiplied by the hospital's total nonlabor, nonroutine costs. Such a market basket would be based on the hospital-related components of the CPI and Wage Price Index, and might include such items as food, fuel, insurance, drugs, and other supplies, such as linen, stationery, uniforms, spare parts, and so forth.

Third. Those three allowable rates of increase in the three separate components of the hospital's budget would be added together to produce the overall rate of increase allowed the hospital.

Fourth. That limit would then be corrected by subtracting the amount by which the hospital's current rate of increase exceeds the voluntary goal—in order to guard against a hospital unnecessarily increasing its costs in anticipation of mandatory controls.

Fifth. And once again, as in computing increases under the voluntary goals, wage increases for nonsupervisory workers would not be counted in determining the allowable increase.

The final result will be an individually permissible rate of increase for each hospital covered under the controls.

Despite the complaints of the hospital industry, that overall permissible rate of increase would in no way resemble a "flat cap," as under the original administration bill. Rather, there will be a different limit for each and every hospital, which will be applied on a peradmission basis to all payers.

Indeed, there could be wide variation in the limit from hospital to hospital—with an efficient, low-cost hospital entitled to a significantly higher limit than a wasteful, high-cost hospital. There is appended to this statement a specific example of how these limits might be applied to an individual hospital.

In conclusion, Mr. President, I would simply like once again to remind my colleagues that one of the most important areas in which Congress by its own decision can have an important direct impact on inflation and Federal spending is in health care costs. In fact, so far as this session of Congress is concerned, the most important decision we will make respecting spending and inflation will be in the area of hospital cost containment.

If we adopt the administration-Human Resources Committee bill, we will save $55 billion in hospital costs during the next 5 years which includes $19 billion in Federal expenditures and $2.3 billion in State government expenditures. I shall vote for the administration proposal. If it fails, I will offer the compromise proposal.

If we adopt my compromise proposal,

we will save between $30 and $34 billion through fiscal year 1983—an average of over $6 billion a year. Of this amount there would be $11.6 billion savings in Federal tax expenditures, and a $1.5 to $2 billion savings in State tax expenditures.

These are significant, indeed, dramatic figures. One would think that all Members of Congress would jump at the chance to strike such a telling blow against inflation and spending. Thus it is ironic that with all the ostentatious rhetoric about inflation and balanced budgets that we hear daily on the floor of both Houses of Congress, many of my colleagues have been strangely silent on this issue. They are willing to tilt at windmills but do not ask them to tilt with any problems in the real world.

I remain optimistic, however, that given this opportunity to evaluate the debate on this issue, a majority will recognize the importance of this legislation to the country and support it. Because when all is said and done, the vote in the Senate on this issue will separate the doers from the talkers on the issues of Federal spending and inflation.

A large number of concerned health care and public interest groups are strongly supporting this compromise amendment, a list of which I have appended to my statement.

I ask unanimous consent that this list, as well as letters and other materials provided by those groups, be included in the RECORD at the conclusion of my remarks. I also ask that the text of this compromise amendment, as modified, background material on the causes and effects of the amendment on an individual hospital be inserted in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ILLUSTRATION OF THE EFFECT OF THE NELSON AMENDMENT ON AN INDIVIDUAL HOSPITAL

Community Hospital is a hypothetical 300 bed acute care hospital that averages about 12,000 admissions a year. This illustration assumes passage of Section 2 of the Talmadge bill, with the Nelson amendment, in October of 1978.

HEW MONITORS THE VOLUNTARY EFFORT

Prior to January 1, 1979, Community hospital would report its expenses for each calendar quarter of 1976, 1977, and the first three quarters of 1978. They would continue to file quarterly reports for each succeeding quarter within 60 days of the close of the quarter. These reports would also indicate the amount of increase in expense arising for increases in the average hourly wage rates for nonsupervisory employees.

For purposes of this example, assume that Community hospital reports the following data:

	Million
1976 spending	$20
1977 spending	23
1978 spending	26

In addition, they report that $1 million of the increase in both 1977 and 1978 resulted from increased wage rates.

In March of 1979, the Health Care Financing Administration would add the expenses of Community Hospital with the expenses of all other reporting hospitals, disregarding the amounts arising from increased wage rates for nonsupervisory employees. For purposes of this example, assume that the increase nationally and in the State are as follows:

	State	*Nation*
1977	16%	16%
1978	13%	13%

Since the voluntary goal is a 2 percent reduction in 1978, and the hospitals nationally dropped from 16% to 13% (a 3% reduction), the voluntary goal was met and no further controls are triggered anywhere in the nation.

HEW IMPLEMENTS THE TALMADGE REFORMS

At the same time (during March of 1979) the Secretary of HEW would announce the Medicare and Medicaid routine operating cost target rates for each hospital as computed under the Talmadge bill. Assume that for hospitals with 300 beds in Community Hospital's area, the target based on average costs among similar hospitals is $100 per day starting January 1, 1980. Community Hospital enters that accounting year knowing that routine operating expenses in excess of $115 per day will be disallowed by Medicare and Medicaid, and that expenses of less than $100 per day will earn the hospital bonus payments.

THE VOLUNTARY EFFORT FAILS

All hospitals would continue to report quarterly data during 1979 in order to allow for continued monitoring of the voluntary goals. In March, 1980, HEW would again add all reported expenses from Community Hospital and all other reporting hospitals (excluding expenses arising from increased wage rates). Assume that the increase during 1979 was 13 percent nationally and 13 percent in Community Hospital's State.* Since the national voluntary goal is a rate of increase of 12 percent, the Secretary of HEW would announce that the voluntary goal has been exceeded both nationally and in Community Hospital's State. Standby controls would be effective January 1, 1980. Pursuant to the Stone modification to the Nelson amendment, a determination would also be made as to whether the individual hospital meets the national goal.

At the same time, the Secretary would announce two sets of data necessary to implement the standby controls:

The rate of increase in wages of service workers in each hospital's locality for the most recent two year period for which data are available;

The rate of increase in a "market basket index reflecting non labor purchases of hospitals. This index would be derived from appropriate components of the CPI and WPI weighted to reflect hospital purchases).

For purposes of this illustration, assume that wages increased by 9 percent in Community Hospitals area and that the price index increased by 8 percent.

STANDBY LIMITS IMPLEMENTED

The Medicare Intermediary for Community Hospital would review its estimate of 1980 costs to assure against payments in excess of the limits. Assume that they estimate:

Twelve thousand admissions;

Routine costs comprise one-third of costs and non-routine, non labor costs and non-routine labor costs each comprise one-third;

Routine operating costs were $100 per day in the previous year;

That a pay raise will increase the average hourly wage rate for nonsupervisory employees by 12 percent and such wages will constitute 40 percent of Community Hospitals costs.

Based on these estimates, the intermediary would compute the standby limit on reimbursement per inpatient admission according to the following steps.

One. Percent by which routine costs can increase over the prior accounting year without being disallowed:

$$\frac{\$115-\$100}{\$100}=.15$$

Two. Reduced by excess over 1½ times the "market basket" index used in setting target rates under the Talmadge bill. (assume 8%)

$.15-.03=.12$ (8% times $1.5=12\%$. 15% computed under step one is in excess of 12% by 3%)

Three. Multiply by portion of costs representing routine operating costs:

$$.12\times\tfrac{1}{3}=.04$$

Four. Add the product of the increase in area wages (9%) times the portion of non-routine labor costs (one-third)

$$.04+(.09\times\tfrac{1}{3})=.07$$

Five. Add the product of the increase in the "market basket" index of non-labor hospital prices (8%) times the portion those costs constitute of total costs (one-third).

$$.07+(.08\tfrac{1}{3})=.0966$$

Six. Subtract the product of the percentage by which Community Hospital was in excess of the voluntary goal for 1979 (assume that they experienced a 13% increase) times the portion of hospital expense which does not arise from regular wages of nonsupervisory employees (60%)

$$.0966-(.13-.12)(.6)=.0906$$

Seven. Multiply by the portion of costs represented by costs other than the regular wages of nonsupervisory employees:

$$.0906\times.6=.05436$$

Eight. Add the product of the rate increase in the regular wages of nonsupervisory employees times the proportion of total costs arising from such wages (40%)

$$.05436+(.12\times.4)=.10236$$

The intermediary would inform the hospital that Medicare payment per admission in 1980 cannot exceed such payments in 1979 by more than 10.236%. In addition, the intermediary would notify the State Medicaid agency, all other third party payors paying on the basis of costs, and the hospital in computing its charges, that such amounts cannot exceed the limits. If they do exceed the limits, they would be subject to an excise tax.

IMPACT OF RISING HOSPITAL COSTS

Medical costs have become a heavy burden on the average American family and hospitalization can easily be a financial catastrophe.

The median family income was $15,000 in 1976. The average health care expenditure per family was over $2,200—almost 15 percent of the median family income.

Most of this is paid indirectly so that it is not experienced as health care outlays—yet the financial drain is just as real.

A quarter of the social security tax goes for Medicare and this is supplemented by general revenues. Medicaid, veterans' health benefits, public hospitals, etc. are financed from Federal, State and local tax dollars. Thus 40 percent of total health care payments take place through the tax system.

Most private health insurance—which pays another 40 percent of the health bill and 50 percent of hospital costs—is obtained as a fringe benefit of employment, and many employees pay only a small part of the actual cost directly. But premium payments by employers drain off funds that might otherwise go to workers in the form of higher wages and pensions. The employer costs are also passed on to employees (as consumers) in

*Taking into account the State's increased population.

the prices for the goods and services produced.

Those who have to buy their health insurance individually suffer more—premiums have jumped even faster than group rates.

Some 18 million Americans have no health insurance coverage at all. Another 19 million—most with incomes between $5,000 and $10,000 have only skimpy inadequate insurance. For these groups, any major hospitalization is bound to be a financial disaster.

Medicare beneficiaries who paid $40 for their inpatient deductible (that is, their first day's hospital stay—when the program began, now pay $144. Their other medical costs have also jumped enormously. Consequently, despite Medicare, the aged pay more out-of-pocket today for medical expenses in real dollars (constant) than in 1965.

WHAT ARE THE EFFECTS OF HOSPITAL COST INFLATION

CONSUMERS

Consumers feel the direct effects in two ways: through increased health insurance premiums and through increased out-of-pocket payments for health care.

Over the past ten years, hospital expenses have quadrupled.

The cost of the average hospital stay is:

1968	$469
1978	1,543
1983 (estimated, if no cost containment)	2,872

Private insurance premiums for hospital care will more than double between 1975 and 1980.

Due to hospital care inflation, the Medicare deductible rose by 16 percent from $124 to $144 this year;

On January 1, the deductible will increase again, to $160.

LABOR/INDUSTRY AND COLLECTIVE BARGAINING

Increased cost of fringe benefits—

In 1970, employers paid the full cost of health insurance for workers in 40 percent of group plans. (See Ford example.)

Fringe benefits can become a significant issue in collective bargaining—i.e. Mine Workers Strike.

Increased payroll taxes for Medicare place a burden on business, especially small businesses which may have fewer employees who exceed the wage base for social security.

RISING HEALTH COSTS OF HIGHEST CONCERN TO AMERICANS

Given 21 national problems to choose from, highest priority was given to:

Getting inflation under control (69 percent—first priority).

Controlling Federal Government spending (31 percent—second priority).

Keeping health costs under control[1] (28 percent—fourth priority).

Hospital cost containment dramatically meets each of these concerns.

[1] Creating new jobs for the unemployed ranked third (30 percent).

SOURCE.—Harris survey, September 21, 1978.

HOSPITAL COST CONTAINMENT REDUCES HEAVY TOLL OF RISING HOSPITAL COSTS

[In billions

	Total 1978–83		
	Without hospital cost containment	With hospital cost containment	Savings
Hospital costs hit families in many ways:			
Insurance premiums	$98.0	$88.9	$9.1
Personal income and payroll taxes	156.4	141.8	14.6
Direct out-of-pocket payments	40.7	36.9	3.8
Hospital costs hit employers in many ways and reduced wages for workers:			
Payroll taxes	46.9	42.5	4.4
Hospital costs hit employers in many ways and reduced wages for workers:			
Corporate income taxes	38.6	35.0	3.6
Employee insurance premiums	166.9	151.4	15.5
Hospital costs hit State and local governments and cause increased taxes:			
Medicaid payments	27.1	24.6	2.5
State and local hospital budgets	65.7	59.6	6.1

Washington (1973)	21.7	15.2
Wisconsin (1975)	16.6	12.4

(Year begun.)

EXAMPLES OF UNNEEDED HOSPITAL SERVICES, FACILITIES, AND EXPENDITURES (FY 1977)

130,000 unnecessary beds, $2 billion.

100,000 patients improperly placed in acute care hospitals, $2.6 billion.

Weekend admissions with no medical care, $2 billion.

Hospital stays longer than on west coast, $3 billion.

2.4 million excess surgeries, $4 billion.[1]

Excessive high technology—i.e., CT-Scanners, $200 million.

Inefficient energy use, $500 million.

Profits and surplus earned by hospitals, $2 billion.

[1] Congressional estimate.

OCTOBER 4, 1978.

Hon. ROBERT C. BYRD,
U.S. Senate.
Washington, D.C.

DEAR SENATOR BYRD: A broad coalition of groups concerned with the escalation of hospital costs has joined to urge the Senate to enact meaningful hospital cost containment legislation. We are writing to urge your support and to enlist your help in ensuring that the Senate is provided an opportunity to vote on this critical anti-inflation measure.

This coalition is comprised of representatives of almost every sector of the economy that underwrites the excessive rate of inflation in the hospital sector, a rate twice the overall rate of inflation in our economy. From labor, the aged, and disabled, to commercial health insurers, States, counties, and cities—all pay far more than is required for the care that they purchase.

In addition, knowledgeable health care providers, such as the American Nurses Association, the National Association of Community Health Centers, the National Council of Community Mental Health Centers, the Group Health Association of America, and individual Health Maintenance Organizations, have also joined this unprecedented coalition. Public health interest groups, which have watched uncontrollable Medicare and Medicaid expenditures erode the resources available for discretionary health programs, have lent their support as well.

All have joined to urge you and your colleagues to consider the merits of a proposal that can make a critical difference to the diverse constituencies we represent. No other proposal pending in Congress speaks so directly to the desires of the American people. As shown by the September 21 Harris Survey, three of the four issues of greatest concern to Americans—controlling inflation, Federal spending, and health costs—are all addressed by meaningful hospital cost containment legislation.

The need is clear and the opportunity available. Your efforts on behalf of our coalition and the American people will be greatly appreciated.

Sincerely yours,

Aetna Life and Casualty;
Alliance of American Insurers;
American Association of Retired Persons;
American Health Planning Association;

August 29, 1978.

DEAR SENATOR: The problem of inflation is very much on the minds of all Americans, and has been cited a great deal recently during Senate consideration of spending programs. And while there is room for discussion about the consequences for inflation of different bills, there is no doubt that the Senate has a unique opportunity to make valuable inroads against inflation and to curb federal spending through the enactment of hospital cost containment legislation.

While double digit inflation is rightly viewed as a threat to our economic well-

being, hospital costs rose a remarkable 15.6 percent last year, following in the wake of even larger increases in 1975 and 1976. Not only have hospital costs risen at a far faster rate than the overall cost-of-living, hospitals costs are also rising more rapidly than other medical costs. Since 1950 hospital costs have risen from 30 percent of the total of all medical costs to 40 percent of the total.

The consequences of the rise in hospital costs is felt by every American. Most feel it directly in the soaring premiums for hospital insurance. Others, who lack such insurance or who are burdened with co-payment requirements, feel the burden of hospital costs even more directly. And, because of the high proportion of hospital costs covered by Medicare and Medicaid, the soaring cost of hospital care has had a direct bearing on federal spending, and, as a result, on federal income and payroll taxes. Moreover, state and local governments also feel the burden of hospital costs through their health benefit and public hospital programs.

The enactment of hospital cost containment legislation provides an opportunity to address this specific issue and the broader problem of inflation very directly. The UAW favors compulsory hospital cost containment legislation such as that approved by the Human Resources Committee. If that is not to be enacted we certainly believe that the plan proposed by Senator Nelson, for voluntary cost containment by the hospitals and standby mandatory controls, if the voluntary program does not work, should be enacted. Both the bill approved by the Human Resources Committee and the Nelson Amendment represent major improvements over the far less reaching proposal approved by the Finance Committee as an amendment to H.R. 5285.

The bill reported from the Finance Committee holds the prospect of saving less than a billion dollars in the costs of Medicare and Medicaid over a five year period. The savings from the Human Resources Committee bill and the Nelson Amendment, on the other hand, are measured in the tens of billions of dollars and obviously are far preferable to the narrow proposal approved in the Finance Committee.

An argument is made by some that it is unfair to control hospital costs at a time when there is broad sentiment against general wage and price controls. But that argument ignores the fact that hospital costs have risen far faster than the overall rate of inflation and pose a special burden because of the essential nature of medical care. Moreover, the Nelson Amendment would not result in federal controls unless and until the hospitals failed to achieve their own voluntary control program.

As a matter of equity, as a matter of sound economics, and as an essential blow against inflation, the UAW urges you to support hospital cost containment when it comes before the Senate following the current recess. Thank you.

Sincerely,

HOWARD G. PASTER,
Legislative Director.

NATIONAL COUNCIL
OF SENIOR CITIZENS, INC.,
Washington, D.C., August 22, 1978.

DEAR SENATOR: It is our understanding that the Senate is to take up legislation to contain the costs of hospital care this week.

In previous statements, testimony and letters, the National Council of Senior Citizens has strongly endorsed the concept of hospital cost containment and urged passage of legislation along the lines of the original Administration bill.

The Senate Human Resources Committee bill is the strongest, and has the most potential to restrain the inflationary escalation of hospital costs. By placing a cap on total hospital revenues, the Kennedy bill will have the effect of requiring hospitals to plan and budget, as do other businesses.

The alternative legislation, the Talmadge bill, which emerged from the Senate Finance Committee, is unfortunately lacking in several respects: It restricts its cost containment design to Medicare and Medicaid payers and it applies only to routine services which are the so-called hotel-type services. The result is a savings of only $500 million over the next five years.

In stark contrast, the Kennedy bill will save the public $56 billion over the next five years. To repeat, the difference between the Talmadge and Kennedy approaches is 1,112 per cent. If the Congress, and in particular the Senate, is going to curtail inflation, there is no better vehicle on the horizon than the Administration-backed Kennedy hospital cost containment bill.

NCSC would also like to call your attention to three other items associated with the cost containment legislation. The most important of these is the amendment Senator Nelson intends introducing, if the Kennedy bill fails to be adopted. Senator Nelson would amend the Talmadge bill to include hospital services other than simply routine services and expand the application of the cost containment approach to include all payers, not just Medicare and Medicaid.

The Nelson Amendment is, in effect, a compromise proposition. Although NCSC cannot in good conscience support the Talmadge bill in its present form, we would nevertheless support the Nelson compromise if the Kennedy bill were not adopted.

The second item of concern is a provision in the Talmadge bill which would, in effect, allow states to introduce various cost-sharing schemes in Medicaid and allow the federal government to do the same in the Medicare program. Though current law permits this experimentation with reimbursement schemes, the practice has not been widespread. In fact, when the State of Georgia recently attempted to initiate a co-payment procedure in Medicaid, it was successfully challenged in the courts. NCSC strongly opposes cost-sharing and, in order to protect Medicare and Medicaid patients from further erosion of their already modest benefits, opposes Section 19 of the Talmadge bill.

The third item of interest to NCSC, and which we strongly support, and which we have learned has come under attack by the nursing home industry, is Section 31 of the Talmadge bill, which requires skilled nursing facilities to participate in both Medicare and Medicaid as a condition of participation in either program. The disparity between states and within states of skilled nursing facilities, electing to participate in only Medicare or only Medicaid, has significantly reduced the number of skilled nursing facilities available in some areas to both Medicare and Medicaid beneficiaries. The financial incentives are sufficient to avoid the possibility of significant withdrawal from both populations; the effect of Section 31 can only be to enlarge the options for both populations, Medicare and Medicaid recipients.

We would be pleased to discuss our position on the above provisions, or any others that are of concern, at your convenience.

Sincerely,

WILLIAM R. HUTTON,
Executive Director.

AMERICAN NURSES' ASSOCIATION, INC.,
Kansas City, Mo., September 1, 1978

Hon. JAMES ABOUREZK,
U.S. Senate,
Washington, D.C.

DEAR SENATOR ABOUREZK: The American Nurses' Association would like to seek your support for the Nelson Amendment to S. 1470 (Talmadge) Medicare/Medicaid Reimbursement Reform Act.

We are in full support of the voluntary approach to hospital cost containment and hope that it will be successful without the need for further action. The Nelson Amendment affords an opportunity for the voluntary effort and would impose controls only if that effort fails.

The Nelson measure retains many of the key features of S. 1470, including the provision for classification of hospitals into groups with similar characteristics. This recognizes the concerns about maintaining quality patient care if there had been imposition of controls on all hospitals with very dissimilar needs, resources and track records on cost inflation as in other bills. The lack of such discrimination was one of our objections to S. 1391.

We also support the Amendment in that, if controls have to be implemented, it affects all payors, all costs, not just "routine costs" as called for in S. 1470. We endorse the Nelson wage pass-through for increases in salaries of non-supervisory employees who have only recently begun achieving parity with similar workers in other sectors of the economy.

Experience has shown there has been difficulty with interpretation of the term "supervisory" by hospitals. and we hope care will be taken that this process be fairly implemented to include all staff who do not carry major responsibility for making policy or for hiring and firing employees.

Finally, we think it eminently fair, as provided in the Nelson Amendment, that bonuses be paid to hospitals which operate economically and that such bonuses be shared with employees who help make such savings possible. We think the amendment does allow hospitals the chance to curb the escalation of their costs without government controls. while providing a reasonable recourse to alternative action if needed. Nurses, like all other groups included, will be affected by this legislation. We are concerned about maintaining quality health care and the welfare of hospital employees.

We recognize this Amendment as a reasonable compromise and we urge you to support it.

Sincerely,

BARBARA NICHOLS,
President.

NATIONAL RETIRED TEACHERS ASSOCIATION, AND THE AMERICAN ASSOCIATION OF RETIRED PERSONS,
August 21, 1978.

Hon. JAMES ABOUREZK,
U.S. Senate,
Washington, D.C.

DEAR SENATOR ABOUREZK: The National Retired Teachers Association and the American Association of Retired Persons, urge you to vote in favor of Senator Nelson's amendment to H.R. 5285, the Medicare/Medicaid reimbursement reform legislation recently reported out by the Senate Finance Committee.

Senator Nelson's proposal is a compromise that expands upon Senator Talmadge's bill for revising Medicare/Medicaid reimbursement of routine costs. It broadens the Talmadge bill by recognizing the hospital industry's present voluntary attempt to bring down their costs over the next two years. Standby controls would go into effect only if the hospita's fail to meet their own proposed goals. Small hospitals and hospitals in states that have effective cost containment programs would be exempted from these standby controls.

Our 12 million member Associations believe Senator Nelson's proposal would be more effective than Senator Talmadge's bill because first, it would control *all cost* (including ancillary costs), whereas the Talmadge approach would control only 16 percent of hospital costs; and second. the Nelson program would apply to *all payors* and not be restricted to just the Medicare/Medicaid programs which apply to only 40 percent of all hospital bills. The comparative effectiveness

of these two proposals is dramatically illustrated by the cost savings each would yield. The Nelson compromise would save between $30 and $35 billion over the next five years, while the Talmadge plan would only save less than $500 million over the same time period.

The cost savings which the Nelson proposal would yield could be used to provide long overdue benefit improvements in the Medicare/Medicaid programs as well as a beginning for national health insurance. The fiscal 1979 budget estimates for Medicare/Medicaid alone are up by $5.2 billion over 1978—with no increase in services. This inflationary spiral will not permit any expansion of government health benefits and, in fact, it could prompt a cut in benefits unless taxes are increased to cover this cost escalation.

Increasing numbers of older persons, even with Medicare protection, are being priced out of the health care market. In 1965, Medicare beneficiaries paid $40 for their in-patient deductible, they now pay $144. Medical expenses have similarly soared. As a result, in constant dollar terms the elderly pay more out-of-pocket today for medical expenses than they did in 1965.

Acceptance of the Nelson amendment is critical not only for the millions of elderly people in this country for whom rising health care costs have become an unbearable burden, but for all Americans who pay for this intolerable inflation in many ways, including increased health insurance premiums, increased prices and increased taxes. Almost everyone agrees that inflation is our number one domestic threat. The Senate now has a chance to cast a vote for an effective weapon to fight inflation—a meaningful hospital cost containment program.

Sincerely,

PETER W. HUGHES,
Legislative Counsel.

AFL–CIO, CLC,
Washington, D.C., August 22, 1978.

Hon. JAMES ABOUREZK,
Senate Office Building,
Washington, D.C.

DEAR SENATOR ABOUREZK: As the nation's largest union of hospital workers, SEIU fully supports the concept of hospital cost containment embodied in S. 1391 as ordered reported by the Senate Human Resources Committee in August 1977. This bill, sponsored by Senator Kennedy would save $30 billion over the next five years while at the same time assuring equitable treatment for low-wage hospital workers.

Currently opponents of meaningful hospital cost containment legislation are seeking to obtain passage of H.R. 5285, a tariff bill, to which a substantially weaker hospital cost containment program has been attached. This program, by comparison, would save less than $1½ billion in hospital costs over the next five years.

We ask that you reject this unfair, ineffective approach by supporting either the Kennedy legislation or an amendment to H.R. 5285 offered by Senator Gaylord Nelson (Amendment No. 3478). Senator Nelson's amendment would save over $30 billion in hospital costs over the next five years, and it includes a pass-through for the wages of non-supervisory hospital workers.

The choices are clear. Hospital workers are not responsible for health care inflation. The average non-supervisory hospital worker earns almost $1.00 an hour less than the average manufacturing employee. We believe that a hospital cost containment legislation should properly focus on the real causes of hospital inflation—mismanagement, poor planning, wasteful duplication of services and expensive technology.

We strongly urge you to support the Kennedy bill or the Nelson amendment to H.R. 5285 which seek to secure fair treatment for non-supervisory hospital workers as well as a meaningful hospital cost containment program.

Sincerely,

GEORGE HARDY,
International President.

AFSCME,
Washington, D.C., August 22, 1978.

DEAR SENATOR: With over one million members, several hundred thousand of whom work in public general hospitals, the American Federation of State, County and Municipal Employees supports effective and equitable cost controls in the hosiptal industry. The rapid increase in hospital costs must be controlled by a program which curbs excessive and wasteful spending while not repressing the wages of low-paid nonsupervisory hospital workers.

You will shortly be considering on the Senate floor H.R. 5285, the Medicare-Medicaid Administrative and Reimbursement Reform Act, sponsored by Senator Talmadge. At that time Senator Kennedy will offer as an amendment (No. 3477) the hospital cost control bill approved by the Human Resources Committee last year. Senator Nelson also will offer an amendment (No. 3478) as a compromise between the Human Resources Committee bill and H.R. 5285.

AFSME strongly opposes the Talmadge bill and urges you to do the same. The bill's cost savings are minimal. Covering only 16 percent of all hospital costs (routine costs under only Medicare and Medicaid), it would save less than $400 million in the next five years by grouping hospitals into categories (e.g., urban, rural, large, small) and disallowing some of the costs in hospitals that have significantly higher costs than the average for their category.

The Talmadge bill also is inequitable. It allows unlimited funding for such important items as capital expenditures, equipment, lab tests, malpractice insurance and energy. However, it imposes harsh government controls on nonsupervisory hospital workers when, historically, their wages have been declining as a percentage of total hospital costs and the rate of increase in their wages has lagged behind the rate of increase for the hospital industry as a whole. The area-wide indexing mechanism in the bill would freeze some hospital workers' wages, while possibly causing a wage rollback for others. It would not reimburse for the amount of wages above an undefined "general wage level" for comparable work in hospital and non-hospital jobs in the area regardless of whether the work is done by organized workers or even covered by minimum wage laws.

Finally, the Talmadge bill could hurt poor people and senior citizens. Reduced reimbursements could cause hospitals to reject Medicare/Medicaid patients or send them to already financially strapped and overburdened public hospitals where Medicare and Medicaid constitute a high percentage of their total inpatient revenues. Increased pressures on state and local governments to meet this demand could result.

Senator Kennedy's amendment, by contrast, imposes immediate, mandatory federal controls on all hospital revenues. It establishes a uniform cost increase limit on all hospitals that would save around $60 billion over the next five years, about $29 billion of which would be in Medicare and Medicaid. The amendment also prevents any artificial depression of nonsupervisory worker wages. It establishes a government policy of neutrality through a wage pass-through mechanism that allows wages to be determined by free collective bargaining in unionized hospitals.

The Nelson amendment also achieves substantial savings: about $30 billion over the next five years, of which about $11.5 billion would be in Medicare/Medicaid payments. The amendment retains the Talmadge bill's provisions for revising Medicare/Medicaid routine cost reimbursements with several cost-saving modifications. It endorses the hospital industry's present voluntary control effort by establishing the goal of a 2 percent reduction in the rate of increase in hospital costs for each of the next two years. Standby, mandatory controls that generally extend the mechanisms in the Talmadge bill to all costs and all revenues would go into effect if the voluntary effort failed. Like the Kennedy amendment, the Nelson amendment would protect nonsupervisory hospital workers.

The Kennedy amendment clearly is the most effective cost control proposal. The voluntary control program, which raises questions about the anti-trust implications of industrial price-fixing, and the lower cost savings of the Nelson amendment make it acceptable only as a compromise if the Kennedy amendment fails.

We urge you to support the Kennedy amendment, and, if it fails, to vote for the Nelson amendment as long as the worker protections are retained in both proposals. We strongly urge you to oppose any effort to weaken or strike the nonsupervisory employee wage provisions and to oppose any hospital cost containment proposal that does not contain them.

Hospital cost containment is essential, but equity demands that it not be achieved at the expense of low-wage hospital workers who have not been responsible for the main increases in the industry anyway. The provisions in the Kennedy and Nelson amendments simply protect from unfair pressure and controls some of the lowest paid workers in the American economy.

Sincerely,

WILLIAM B. WELSH,
Executive Director for Governmental Affairs.

NATIONAL GOVERNORS' ASSOCIATION.

DEAR SENATOR: The nation's Governors share with you a concern for the inflation which plagues our economy and which, in effect, imposes an additional tax on the income of our citizens. Inflation in the medical care sector has outstripped that in most other areas of the economy. Several states have found it advisable to take a strong stand against further excessive medical care cost inflation and, in September 1977, the National Governors' Association called for national hospital cost containment strategy.

In the near future, you will have the opportunity to vote for a cooperative state and federal cost containment program. When the medicare and medicaid reform bill (HR 5285) reaches the Senate floor, Senators Nelson and Kennedy will propose amendments which would expand the capacity of this bill to contain all hospital costs. Senator Nelson's amendment will establish voluntary goals for the hospital industry and will create standby federal controls on hospitals in states which are unable to meet the voluntary goals.

The National Governors' Association believes that a cost containment program must cover all hospital revenues. The present bill (HR 5285) would focus only on routine costs reimbursed under medicare and medicaid; the amendments proposed by Senator Nelson and Senator Kennedy would significantly expand the coverage of a national hospital cost containment program.

I urge you to support the amendment proposed by Senator Nelson and Senator Kennedy.

Sincerely,

GOV. J. JOSEPH GARRAHY,
Chairman, Subcommittee on Health Policy.

U.S. CONFERENCE OF MAYORS,
Washington, D.C., September 6, 1978.

DEAR SENATOR: On behalf of the U.S. Conference of Mayors, we seek your support of Senator Talmadge's Medicare-Medicaid Reform bill as amended in committee (S. 5285). We also seek your support of any hospital-cost containment amendments to strengthen the bill which may be offered when it is considered by the Senate.

Cost containment has been a major health issue for the U.S. Conference of Mayors and its affiliate, the U.S. Conference of City Health Officers. U.S. Conference of Mayors' policy calls for hospital-cost containment.

Mayors are concerned with rising hospital cost, since some cities administer and support general hospitals. Mayors must ensure that all persons in need of health care are able to obtain that care and, at the same time, we must keep an eye on how much of the municipal budget is directed to supporting local hospitals. If prices continue to rise, people in cities simply will not be able to afford hospital care.

As President of the U.S. Conference of Mayors, I strongly urge you to vote in favor of S. 5285 and any additional cost containment amendments which are proposed.

Thank you for your thoughtful consideration.

Sincerely,

WILLIAM H. MCNICHOLS, Jr.,
President.

CONSUMERS FEDERATION OF AMERICA,
Washington, D.C., September 7, 1978.

Re: H.R. 5285.

DEAR SENATOR: As you consider H.R. 5285, which includes provisions authored by Senator Herman Talmadge relating to hospital cost controls, we urge your vigorous support for the amendment submitted by Senator Edward M. Kennedy. This amendment is Title I of the Hospital Cost Containment Act of 1977 which was reported by the Committee on Human Resources and which CFA has enthusiastically endorsed.

At a moment when consumers are confronted with near double-digit inflation and hospital costs continue to increase at twice the rate of other goods and services, the Kennedy amendment would have consumers approximately $60 billion over the next five years. That savings compares sharply with the Talmadge proposal which would save only $500 million over the same period—none of which would be realized during the first two years.

With the adoption of the Kennedy amendment and its limitations on revenues, hospitals will at long last have an economic incentive to hold down costs. Without cost containment the average rate of increase in hospital costs has been 16% since 1973—nearly three times the rate of inflation in the general economy. Clearly, no meaningful fight against health care inflation can be waged without significantly controlling hospital costs.

We are decidedly less enthusiastic about the proposed compromise of Senator Gaylord Nelson, a co-sponsor of the Kennedy amendment. If the Nelson amendment is ultimately considered, we view it as a much weakened alternative to the Kennedy measure, but one which would be supported if (and only if) the Kennedy measure fails. The Nelson compromise should be supported for the following reasons:

1. It would save over $6 billion a year. By encouraging hospitals to continue their voluntary efforts to control hospital costs, total savings through fiscal year 1983 would be $34 billion.

2. It would provide the hospital industry with a much needed incentive to succeed in its voluntary effort. Under the Nelson proposal no mandatory controls would go into effect unless the national voluntary effort fails to meet its objectives. This approach recognizes that even the most well intentioned voluntary efforts are easily thwarted and lack incentive when standby controls are absent. The Nelson amendment would serve to supply the hospital industry with the necessary incentive to keep its promise.

3. Standby controls would involve limitations applicable to all costs and all payors. If the voluntary effort fails, the standby controls which would go into effect under the Nelson amendment would more equitably go beyond the routine ("bed and board" type) hospital costs which are the only ones covered by the Talmadge approach and which account for only 40% of all hospital costs. Furthermore, the voluntary controls would extend beyond Medicare/Medicaid payors who are the only ones covered by the Talmadge approach and who comprise only 40% of all payors. In addition, there is no guarantee under the Talmadge bill that hospitals will not raise the fees for other services such as laboratory fees or shift expenses to non-Medicare/Medicaid payors in order to meet these limitations.

4. Exemptions are provided for states whose hospitals have achieved the national voluntary goal. Regardless of whether or not the national effort succeeds, these states would not be subject to the standby controls. It would be noted that Wisconsin and Washington have already met the proposed goals of the legislation.

5. The need for equipment and other essential items necessary for high quality health care would not be jeopardized. Since the Nelson proposal permits a cost increase rate that is 1½ times the overall rate of inflation in any given year, hospital administrators should be more than able to accommodate the special needs of the population they serve.

6. Hospital employees would not sacrifice potential wage increases. Since neither the voluntary nor mandatory controls take into account wage increases for non-supervisory hospital employees, the Nelson proposal in no way compromises the economic well-being of hospital workers.

For all of these reasons, we urge your support for this compromise if it is introduced. However, successful passage of the Kennedy amendment would eliminate its necessity and present tangible evidence to the American consumer of your sincerity in controlling health care inflation.

Sincerely,

KATHLEEN F. O'REILLY,
Executive Director.
KATHLEEN D. SHEEKEY,
Legislative Director.

NATIONAL CONFERENCE
OF STATE LEGISLATURES,
August 30, 1978.

Hon. JAMES ABOUREZK,
Senate Office Building,
Washington, D.C.

DEAR SENATOR ABOUREZK: While the National Conference of State Legislatures believes that administrative and reimbursement reform in Medicare and Medicaid, as suggested in HR 5285, are critical, we also believe that containing the rate of increase in hospital costs ought to be an immediate national priority. For this reason, our organization fully supports Senator Nelson's amendment to HR 5285 to establish a national, voluntary hospital cost containment program to be followed by a mandatory control program in the event the voluntary effort fails. We would suggest that if mandatory controls are necessary, they should be implemented on a state-by-state basis according to each state's performance with respect to the voluntary goals. Moreover, we further support Senator Nelson's effort to extend the reimbursement methodology to be utilized under the mandatory program to all payors, so that it not be limited to Medicare and Medicaid.

We believe that the provisions in Senator Nelson's amendment provide adequate assurances that States which are operating effective cost containment programs would be able to continue to administer their own systems if the mandatory program takes effect. It is our conviction that state cost containment programs have been operating very effectively and should not be pre-empted by federal law.

Finally, we would suggest that an appropriate role of the federal government ought to be one of providing financial incentives to encourage many other States to experiment with alternative hospital cost containment programs.

As you know, the NCSL is the official representative of the nation's 7,600 state legislators.

Thank you very much for your assistance.

Sincerely,

JASON BOE,
President, NCSL.

● Mr. CHURCH. Mr. President, I would like to add my support for a number of provisions of the Medicare-Medicaid Administrative and Reimbursement Reform Act, now before the Senate.

First, section 26 of H.R. 5285 makes two improvements in medicare home health benefits. The bill would repeal the requirement for a prior stay of 3 days in a hospital to be eligible for home health services under medicare part A and remove all limitations on the number of home health visits allowed under both part A and part B. These two changes in home health eligibility criteria will make important differences to many older Americans.

Hearings before the Senate Committee on Aging have shown that once older Americans have used up the 100 visits now allowed by law per benefit period under part A and 100 visits per year under part B there is no way to continue with essential nursing care in the home. The committee has also received considerable evidence of physicians making expensive placements in an acute-care hospital solely as a way of establishing eligibility for medicare home health visits under part A.

During the last Congress, I introduced a proposal to increase the visit ceilings under parts A and B from 100 to 200 visits per benefit period as a way of recognizing this problem. The bill I introduced then, S. 2713, also sought to address the inequities in the prior hospitalization requirement under part A by deleting the requirement under present law that post-hospital benefits be limited to treatment of conditions which initially required hospitalization.

My bill also sought to increase the value of the home health benefit by striking the requirement that a patient be in need of skilled nursing care as a prerequisite for other home health services, such as home health aide or physical therapy services, and by adding a homemaker as a covered service. I believe these additional changes still need to be made to make medicare home health benefits fully responsive to the needs of older Americans, but the provisions in section 26 are also important and I urge their enactment.

Second, section 10 would allow small hospitals with 50 beds or fewer to use

empty acute-care beds for long-term care needs without requiring the hospital to establish a separate section for this purpose. I cosponsored similar legislation earlier, and I am glad to see its inclusion in this bill. This flexibility in medicare reimbursement is greatly needed in rural areas.

Third, several provisions in H.R. 5285 are designed to reduce the paperwork burden faced both by older Americans participating in medicare and medicaid and by providers of health services. Committee on Aging hearings and research indicate that many older Americans do not claim either medicaid or medicare benefits, because of complicated and frustrating procedures. For low-income older Americans, confusion between the two programs often means that medical expenses are not properly submitted for payment and, therefore, not properly reimbursed. In medicare, the "paperwork" problem weighs most heavily on a beneficiary when a physician chooses not to accept assignment of benefits under part B. This is a burden on the medicare beneficiary in two ways: First, he must pay the difference between the physician's charge and the amount determined as the reasonable charge under the medicare program, and second, he is also faced with the task of keeping track of bills, sorting out those which are medicare-eligible and those which must be paid through other insurance, filing claims properly, and then waiting long periods for payment. Only about 50 percent of physicians providing service to medicare beneficiaries now accept assignment, filing themselves for reimbursement in full from medicare.

Section 5 of H.R. 5285 seeks to encourage more physicians to accept assignment on medicare claims through administrative improvements in the billing and payment process. Many physicians have cited problems with this process as their primary reason for not fully participating in medicare. I hope that these improvements will increase the assignment rate and believe more persons will benefit from this approach.

Section 28, which would require the adoption of a uniform claims form for medicare and medicaid, also seeks to lessen the paperwork burden now imposed on many health providers.

We still have a long way to go to make medicare fully responsive to the needs of older Americans. Further improvements in administration, home health, and adequate coverage for dental care, eye care, mental health services, and essential out-of-hospital prescription drugs are still badly needed.

Last year I introduced S. 1479, which would extend medicare coverage to include essential out-of-hospital prescription drugs, and I hope that this legislation, as well as the additional home health measures I have suggested, will receive congressional attention early next year.

Nevertheless, the medicare modifications contained in H.R. 5285 are important and I urge my colleagues to support them.●

Mr. MUSKIE. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by Senator HATHAWAY.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR HATHAWAY

The Senate is about to consider H.R. 5285, the Medicare-Medicaid Administrative and Reimbursement Reform Act. This bill would vastly improve the administration of these federal health programs for elderly, poor, and disabled individuals. It provides incentives for hospials which keep costs down and disincentives for inefficient hospitals. Further in determining allowable hospitals costs, the bill classifies hospitals with those of similar size, type and location. It also exempts from computation of routine costs variable expenses such as those related to energy, capital construction, education and training programs, and malpractice insurance. In addition, exceptions are provided for institutions with high routine costs due to underutilization of beds in underserved areas, unusual patient mix, changes in services, and start up of a new hospital. I cosponsored this bill because its approach represents a great step forward in making the medicare reimbursement system more equitable, particularly with respect to hospitals in less populated rural areas.

I am also pleased that the bill includes a number of amendments which I offered in the Finance Committee. These include, among others, measures to eliminate the restriction on the number of home health visits reimbursable under Medicare and the three day prior hospitalization requirement for Part A home health care; and to provide for a common audit of Medicare, Medicaid and Maternal and Child Health Programs at an estimated cost savings of $30 million.

Although I am pleased with the Medicare reform bill as a beginning, it does not go far enough to curb skyrocketing hospital costs. The projected savings from this bill are $400–$500 million over the next five years. While this is by no means a small sum, the savings could in fact be far greater.

Given the facts that inflation is our number 1 domestic problem and health care costs contribute substantially to inflation. I believe we must take advantage of the opportunity to save billions of dollars now. That is why I have joined my colleagues in supporting hospital cost containment measures.

The Kennedy proposal is the legislation which was approved by the Senate Human Resources Committee on which I also serve. It would save an estimated $60 billion over 5 years, including about $20 billion in Federal Medicare and Medicaid money and $2.3 billion in state money. The measure includes an amendment which I offered in Committee to exempt all hospitals with fewer than 2,000 admissions annually and those hospitals which are the sole community provider with fewer than 4,000 annual admissions. It also provides for a mandatory pass through of non-supervisory personnel wage increases.

The Nelson amendment is a compromise that would save more than $30 billion over 5 years, including $11.6 billion in Medicare and Medicaid costs, and $1.5 billion in state money. It would recognize in statute, with some changes, the voluntary effort which was designed by, and has been implemented by, the hospital industry itself since 1977. Under the amendment, mandatory cost controls would not go into effect unless the voluntary goals were not achieved on the national average.

If the voluntary effort succeeds, there would be a savings of $31.3 billion. If the national goal under the voluntary effort is not achieved by July 1, 1979 or thereafter, however, Federal mandatory controls would be triggered based on the approach in H.R. 5285. In that event, states with programs meeting or exceeding the national mandatory goals would be exempt from the Federal controls, and would be allowed to measure their hospitals' performance on a state aggregate.

In this regard, I might mention that I intend to offer an amendment to the Nelson proposal to exempt for one year, those states which have already enacted state cost control programs, but have not yet had a full year of operation to demonstrate that their programs work.

Under the Nelson amendment, hospitals with fewer than 4,000 admissions annually would be exempt from both the voluntary and mandatory goals. Although that amounts to more than half of the nation's hospitals, it represents less than 10 percent of total hospital costs. In addition, there are specific exceptions allowed on a hospital-by-hospital basis.

No arbitrary or single "cap" would be imposed on hospitals. The formula in H.R. 5285, on which the compromise is based, allows higher increases to low-cost hospitals, and lower increases to high-cost hospitals. Therefore, efficient hospitals would be rewarded while inefficient ones would not be.

I believe that it is both necessary and possible to curb hospital costs. As we all know, the hospital industry itself recognizes this fact and has achieved reductions in the years that Congress has been considering cost containment legislation. It is important to continue this trend, but, to guarantee that it will work, it is also vital to have in place, at a minimum, stand-by methods to ensure that costs are in fact contained.

UP AMENDMENT NO. 2062

(Purpose: To make clear that the provisions of section 16 do not apply to hospital-based physicians.)

Mr. CURTIS. Mr. President, I have an amendment in the nature of a clarification and it is my understanding the chairman will accept it. I send it to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes unprinted amendment numbered 2062:

On page 59, line 11, strike out the quotation marks and final period.

On page 59, between lines 11 and 12, insert the following:

"(c) The provisions of this section shall not apply to payments made to a hospital-based physician for services performed for patients of that hospital.".

Mr. CURTIS. Mr. President, it is my understanding that the distinguished chairman in charge of the bill is willing to accept the amendment.

Mr. TALMADGE. I have no objection to the amendment.

Mr. CURTIS. I yield back the remainder of my time.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded solely for the purpose of a unanimous-consent request that a staff member be admitted to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. Mr. President, I ask

unanimous consent that Jane Yanulis, of my staff, be accorded the privilege of the floor during the debate and votes on this particular hospital cost containment bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURKIN. I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time is this quorum call?

Mr. DURKIN. Same as before, Mr. President.

The PRESIDING OFFICER. Is there objection to a quorum call?

Mr. TALMADGE. I am sorry. I did not hear the question of the Chair.

The PRESIDING OFFICER. Is there objection to a quorum call being called without the time being charge?

Mr. METZENBAUM. Objection.

Mr. TALMADGE. Whose time is it being charged on?

The PRESIDING OFFICER. No one's time.

Who yields time to the quorum call?

Mr. ABOUREZK. Mr. President, has the quorum started again?

The PRESIDING OFFICER. No.

Mr. ABOUREZK. Mr. President, I will ask unanimous consent, while they are discussing this amendment. I have a motion to strike contained in an amendment and it will be accepted by the committee. Can we just take that up by unanimous consent and just temporarily set the other aside while we are doing this?

The PRESIDING OFFICER. The Senator may offer his amendment.

Who yields time?

UP AMENDMENT NO. 2063

Mr. ABOUREZK. Mr. President, I ask the clerk to state my amendment.

The PRESIDING OFFICER. Without objection, the amendment is in order.

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Dakota (Mr. ABOUEZK) proposes an unprinted amendment numbered 2063:

On page 70, line 1, strike from the word "Status" through line 11, ending with the word "Act".

Mr. TALMADGE. Mr. President, I have no objection to the amendment.

Mr. ABOUREZK. Mr. President, I just want to explain it.

It would have been the subject that would have been the point of order.

This merely takes up the exemption from the Freedom of Information Act for a PSRO's and the committee has accepted it, and vote.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. ABOUREZK. I yield back the remainder of my time.

Mr. TALMADGE. I yield back my time.

The PRESIDING OFFICER. All time is yielded back.

Without objection, the amendment is agreed to.

Mr. DOLE addressed the Chair.

Mr. TALMADGE. I yield to the Senator from Kansas briefly.

Mr. DOLE. Mr. President, this was an amendment the Senator from Kansas offered for the distinguished Senator from Pennsylvania, Senator SCHWEIKER. I do not have any particular interest in the amendment. I assume that this has been discussed with the distinguished manager of the bill. So we have no objection.

Mr. TALMADGE. I thank the Senator. The point of order is in order, and I am willing to strike that part of it, and I understand the Senator from Pennsylvania will get something, and hopefully it will be agreeable to the Senator from South Dakota.

UP AMENDMENT NO. 2062

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from Nebraska.

Mr. TALMADGE. I yield back the remainder of my time.

Mr. ABOUREZK. I yield back my time.

The PRESIDING OFFICER. All time is yielded back.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The question now is on agreeing to the amendment of the Senator from Nebraska.

Without objection, the amendment——

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

UP AMENDMENT NO. 2063

Mr. ABOUREZK. The Chair has not acted on my amendment to strike?

The PRESIDING OFFICER. We have.

Mr. ABOUREZK. I move to reconsider the vote by which my amendment was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 2062

The PRESIDING OFFICER. Now the question is on agreeing to the amendment of the Senator from Nebraska.

Without objection, the Curtis amendment is——

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. METZENBAUM. Who has time?

The PRESIDING OFFICER. The managers of the bill have time.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I ask that while we are discussing this, that the amendment be temporarily laid aside. So that the rest of us can make our opening statement.

I make the request that the Curtis amendment be temporarily laid aside.

The PRESIDING OFFICER. Senators may make their opening statements any time.

Mr. DOLE. Will the Senator yield me time?

The PRESIDING OFFICER. How much time does the Senator yield?

Mr. TALMADGE. I made my statement.

Mr. DOLE. Will the Senator yield me time?

Mr. TALMADGE. Yes; how much time does the Senator desire?

Mr. DOLE. Five minutes.

Mr. TALMADGE. I yield 5 minutes to the distinguished ranking minority member of the subcommittee

MEDICARE/MEDICAID ADMINISTRATIVE/REFORM REIMBURSEMENT ACT

Mr. DOLE. Mr. President, for more than a year now, four committees of Congress have been considering proposals which either mandate economic controls on hospital revenues or deal with fundamental changes in the medicare and medicaid reimbursement system.

COST OF HEALTH CARE

The myriad of statistics dealing with the rapid rise in health care expenditures—particularly the Federal share of those expenditures — hardly needs repeating. As a member of the Budget Committee, I have been exposed to the concerns of those who fear that, without some form of health cost containment, other national priorities will be downplayed if we are to retain any semblance of fiscal solvency. We are all familiar with the figures which indicate that total health care spending comprised 4.5 percent of the GNP in 1950, while today it amounts to approximately 8.6 percent. Projected fiscal year 1979 spending for the medicare and medicaid programs alone accounts for approximately $47 billion. It is generally acknowledged that the medicare and medicaid programs themselves have contributed markedly to the rapid increase in total health care expenditures, as the average rate of increase has gone from 7.5 percent between 1950 and 1965, to 14 percent in the 12-year period following enactment of these programs.

RISING HOSPITAL COSTS

Hospital expenditures specifically are growing faster than almost all other health care expenditures. The rapid growth in the cost of hospital care has focused increasing attention on hospitals and the present methods currently used to reimburse hospitals. Cost-based reimbursement in particular has been the subject of wide criticism. There is little in the way of pressure of hospitals so paid to contain their costs, and any increases are simply passed along to the third parties that reimburse on a cost basis. At present, the Federal Government pays approximately 44.5 percent of the hospital costs in this country. The present "reasonable cost" procedures under the medicare program are not only inherently inflationary because of ineffective limits on what costs will be recognized as reasonable—but also because they contain neither incentives for efficient performance nor true disincentives to inefficient operation.

REIMBURSEMENT REFORMS

Current Governmental efforts to control hospital costs are threefold: Supply control, utilization controls, and reimbursement reforms. The objective of the bill which is pending before us today, Mr. President, is to make a fundamental change in the method of reimbursement for hospital services under the medicare and medicaid programs. Our proposal would reimburse for hospital services in a fundamentally different way. Similar hospitals would be grouped together and

each group's average daily routine costs calculated. The reimbursement rate for the hospitals in each group would then be based on the group's average costs. Hospitals with per day costs below the average would be rewarded. Those that performed significantly worse than average would not be fully reimbursed. These reimbursement restrictions and incentives apply to medicare and medicaid payments only.

The advantage of this method for determining reasonable costs of hospital services under our proposal is its flexibility. Under the proposal, similar hospitals would be compared with one another, not with an absolute standard. As a result, there is less danger that limits on the revenue of hospitals in unusual circumstances would be too stringent. This flexibility would also provide us the opportunity to recognize the efficient and separate out the inefficient, an accomplishment that the administration proposal cannot duplicate.

There are those, Mr. President, who have criticized our efforts as an ineffective approach to cost containment. But again, Mr. President, I must remind my colleagues that this legislation provides for a long-term, more rational system of reimbursement. It is not a cost containment proposal such as those being proposed by other Members of the Congress.

Our legislation attempts to make the Federal Government a prudent buyer of services. It is not our intention to overhaul and control the entire hospital industry.

Certainly there are improvements which could be made in the system we have proposed. For example, at the present time, the legislation attempts only to address the routine costs of hospitals rather than the more expensive ancillary costs. I am hopeful that as the state of the art develops, and we are better able to examine, compare, and contrast ancillary costs, we will also be able to provide some incentives and disincentives to the efficient and inefficient hospitals in relation to these costs.

ANTICIPATED SAVINGS

By moderating routine hospital costs alone, our bill would reduce projected Federal and State expenditures by more than one-half billion dollars during the first 5 years of the program. But these savings are on routine costs alone. They do not take into account anticipated changes in hospital management resulting from a system of incentive reimbursement. Also, we anticipate that by the second or third year, assuming advances in the state of the art, hospital cost comparisons for some or all of the ancillary costs as well will be possible.

When and if ancillary costs are incorporated, the Congressional Budget Office estimates annual medicare and medicaid savings should, after the first few years, reach billions of dollars annually.

This effort, along with the voluntary effort of hospitals to control their costs, will certainly help moderate the average costs of hospitals as they are recalculated each year. We can anticipate that over time, Mr. President, the savings in medicare and medicaid expenditures under this proposal will increase.

In my view, the proposal we are presenting to the Senate today represents a responsible alternative to the administration proposal. If there are savings to be realized from increased efficiency in Federal health program administration, then the provisions of H.R. 5285 are designed to bring them about while maintaining a realistic view of changes which providers are not able to make.

OTHER PROVISIONS IN THE BILL

Attention should also be given to the other important proposals contained in the legislation. I would like to make particular note of a number of these.

Section 7, which deals with the criteria for determining reasonable charge for physician services, contains a particular incentive designed to encourage new physicians to locate their practices in areas designated by the Secretary's physician shortage areas.

In my own State of Kansas, there are many areas in which physicians are badly needed, but for which recruitment efforts have been hampered in part by the discriminating nature of current medicare reimbursement practices. The bill would now permit physicians in localities designated as these shortage areas to establish their customary charges at the 75th percentile of prevailing charges as a means of encouraging them to locate in these areas. It would also permit those physicians presently practicing in these areas to move up to the 75th percentile on the basis of their actual fee levels.

LONG-TERM CARE SERVICES

Another provision which will be particularly important to rural areas will permit medicare and medicaid reimbursement to small rural hospitals that use the facilities' beds interchangeably as either acute or long-term care beds, depending on need.

As the committee report points out—

Many rural hospitals are the only source of acute care in their communities, and, as such, are a necessary and vital resource to the people they serve.

Additionally, there is, in many instances, a shortage of long-term care beds available to individuals in these rural communities, forcing them to look to their hospitals for these services.

Present law makes utilization of acute care beds for long-term care purposes difficult in many instances. It is the intent of our provision to ease these restrictions for hospitals of less than 50 beds, located in rural areas, which have been granted a certificate of need for the provision of long-term care services.

HOME HEALTH CARE SERVICES

The potential of home health care services in assisting individuals to avoid unnecessary hospitalization are far-ranging. Without question, the person who has the opportunity to stay at home in a more positive environment, and retain as much independence as possible is better off.

Unfortunately, under present law, there are restrictions that require hospitalization for 3 days prior to an individual being eligible for home care benefits. In addition to limiting the number of home health care visits per spell of illness under part A of medicare to 100 visits after this hospitalization, the number of home visits available under part B of medicare is limited without the requirement of prior hospitalization, to 100 days also.

The bill removes these restrictions on the number of visits and prior hospitalization requirements. We are hopeful that this will make the benefit available to more individuals for more extended periods of time, thereby avoiding in many instances, inappropriate hospitalization.

There are many other provisions in the bill which I believe will be equally important and helpful to those citizens in our country who are presently participants in the medicare and medicaid programs.

I certainly wish to commend my distinguished colleague, Senator TALMADGE, and the members of the staff and others who have helped put together what I consider to be a rational approach to reimbursement reform; because of its flexibility, and because of its incentives.

VOLUNTARY EFFORT

Finally, Mr. President, I believe special mention must be made regarding the efforts of the American Hospital Association, the American Medical Association, and the Federation of American Hospitals, to initiate a voluntary effort to control hospital cost increases. The sponsors of this volunteer program have stated that the program intended to achieve a "significant reduction in the rate of increase in health care costs." Specifically, it is their intention to reduce the rate of increase in hospital expenditures by 2 percentage points a year over this year and the next. I believe this effort should be given the very strong support of Congress.

Additionally, I believe the States that have attempted to devise and operate their own health care cost containment systems, should be complimented on their efforts and encouraged to proceed. Without question, the best system to hold down health care costs will be one in which the Federal Government plays the least role. This legislation, which we will consider today, provides the Federal Government an opportunity to clean up its own house, to reform the Government-financed programs, medicare and medicaid. We do not intend to solve all the problems or provide all the answers. The citizens of this country have a right to look to our efforts to improve and make more efficient the utilization of their tax dollars.

I believe our efforts to reform medicare and medicaid will accomplish this purpose. And during the first few years, save billions of dolars.

Mr. President, I yield back the remainder of my time.

Mr. TALMADGE. Mr. President, I ask unanimous consent that Ellen Akst of the Human Resources Committee, may have the privileges of the floor during the debate and votes on the pending measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I send an amendment to the desk on behalf of myself and the Senator from Wisconsin.

The PRESIDING OFFICER (Mr. HODGES). There is an amendment pending, an amendment of the Senator from Nebraska.

Mr. CURTIS. Mr. President, may I inquire if the distinguished Senator from Ohio has any objection? If not, we can have a vote without any further discussion.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. CURTIS. I move the adoption of my amendment.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. TALMADGE. I yield back my time.

Mr. CURTIS. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska.

The amendment was agreed to.

Mr. TALMADGE. I move to reconsider the vote by which the amendment was agreed to.

Mr. CURTIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 2064

The PRESIDING OFFICER. The Senator from Massachusetts has sent an amendment to the desk which the clerk will report.

The legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY), for himself, Mr. NELSON, Mr. WILLIAMS, Mr. PELL, Mr. CRANSTON and Mr. HATHAWAY) proposes an unprinted amendment numbered 2064.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the ending clause and substitute the following:

"REPORT ON PERMANENT REFORM IN THE DELIVERY AND FINANCING OF HEALTH CARE

"SEC. 1. The Secretary of Health, Education, and Welfare (hereinafter in this Act referred to as the 'Secretary') shall submit to the Congress, no later than March 1, 1979, a report setting forth his recommendation for permanent reforms in the delivery and financing of health care which will increase the efficiency, effectiveness, and quality of health care in the United States and which will replace the transitional provisions of .

"TITLE I—TRANSITIONAL HOSPITAL COST CONSTRAINT PROVISIONS

"PART A—PURPOSE OF THE PROGRAM

"SEC. 101. It is the purpose of the transitional hospital cost containment program established by this title to constrain the rate of increase in total hospital inpatient costs, beginning January 1, 1979, and continuing until the adoption of the permanent reforms referred to in section , by limiting the amount of revenue which may be received by the hospitals that are subject to the provisions of this title from Government programs, private insurers, and individuals who pay directly for hospital care.

"PART B—ESTABLISHMENT OF HOSPITAL COST CONTAINMENT PROGRAM

"IMPOSITION OF LIMIT ON HOSPITAL REVENUE INCREASES

"SEC. 111. (a) The average reimbursement payable per admission to a hospital by any cost payer, and the average inpatient charges per admission of a hospital for any accounting year any part of which occurs after December 31, 1978, may not (except as provided in subsection (b), or in section 114, 115, 117, 118, 119, 124, or 131) exceed such average reimbursement payable per admission or such average inpatient charges per admission, respectively, for the hospital's base accounting year adjusted by a percentage equal to the product of the following factors—

"(1) one hundred plus the percentage by which the hospital's costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) would have increased in the period after the close of the hospital's base accounting year and prior to January 1, 1979, if such costs had increased (during that period) at the average annual rate of increase in the hospital's costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) during the two-year period ending with the close of such base accounting year, except that such percentage as applied for purposes of this section shall not be more than 15 per centum nor less than 6 per centum.

"(2) one hundred plus the percentage by which such average reimbursement payable per admission or average inpatient charges per admission would have increased in the period after December 31, 1978 (or after the close of the hospital's base accounting year, if later), and prior to the first day of the accounting year for which the limit is being imposed if such average reimbursement payable per admission or average inpatient charges per admission had increased (during such period) at an annual rate equal to the inpatient hospital revenue increase limit determined and promulgated under section 112(b), and

"(3) one hundred plus the percentage by which such average reimbursement payable per admission on average inpatient charges per admission would increase (or decrease) in the hospital's accounting year (except for any part thereof occurring before January 1, 1979) for which the limit is being imposed if such average reimbursement payable per admission or average inpatient charges per admission increase (or decrease) during such accounting year at an annual rate equal to the adjusted inpatient hospital revenue increase limit applicable to the hospital under section 112(a).

"(b) For an accounting year which ends after December 31, 1978, but before December 31, 1979, the ceiling established under subsection (a) for average inpatient charges per admission of a hospital and for average reimbursement payable per admission to that hospital by each cost payer shall be applied only to that percentage of the inpatient charges or reimbursement paid, respectively, as the number of days in that accounting year occurring after December 31, 1978, is of the total number of days in that accounting year.

"(c) For purposes of subsection (a), in the case of the admission of an individual whose inpatient hospital services are paid for in part by more than one cost payer, the admission shall be attributed to the cost payer which pays for any such services excluding any amounts paid as a deductible by a cost payer.

"DETERMINATION OF ADJUSTED INPATIENT HOSPITAL REVENUE INCREASE LIMIT

"SEC. 112. (a) The 'adjusted inpatient hospital revenue increase limit' which is applicable to any hospital for purposes of section 111(a)(3) with respect to any accounting year shall (subject to sections 124 and 131) be equal to the inpatient hospital revenue increase limit determined and promulgated under subsection (b) of this section for the twelve-month period in which such accounting year ends, modified by the application of the 'volume load formula' which is promulgated under section 113 and applied to that hospital.

"(b)(1) Between October 1 and December 31 of each calendar year beginning with 1978, the Secretary shall promulgate a figure which (subject to paragraph (2)) shall be the 'inpatient hospital revenue increase limit' applicable to accounting years ending in the twelve-month period beginning January 1 of the next year. Such figure shall be, except as provided in section 131, the sum of—

"(A) the rate of increase in the implicit price deflator of the gross national product as calculated by the Bureau of Economic Analysis of the Department of Commerce and published in the Survey of Current Business (hereinafter in this title referred to as the 'GNP deflator') for the twelve-month period ending September 30 of such year over the GNP deflator for the previous twelve-month period and

"(B) one-third of the difference between—

"(i) the average annual rate of increase in total expenditures of hospitals (or distinct parts thereof) which satisfy the requirements of section 121(a) which is found by the Secretary to have occurred during the two previous calendar years, and

"(ii) the average annual rate of increase in the GNP deflator for the two previous calendar years.

"(2) If the Secretary finds that for any twelve-month period for which a figure is promulgated under paragraph (1) the GNP deflator with respect to such period has exceeded or is expected to exceed by more than 1 percentage point the GNP deflator which was used in making the determination under paragraph (1) (or in making prior adjustment under this paragraph), the Secretary shall increase (or further increase) the GNP deflator so used by the amount of such excess; except that no adjustment made under this paragraph shall be effective with respect to any accounting year ending prior to the calendar quarter preceding the calendar quarter in which such adjustment is made.

"PROMULGATION OF VOLUME LOAD FORMULA

"SEC. 113. (a) The volume load formula shall be promulgated by the Secretary within thirty days after the date of enactment of this Act. It shall be defined for any accounting year for which an adjusted inpatient hospital revenue increase limit is determined as the average of—

"(1) the per centum change in the number of admissions since the base year, and

"(2) the per centum change in the number of patient days since the base year.

"(b) The volume load formula shall be applied to generate an adjusted inpatient hospital revenue increase limit for each hospital applicable to the average inpatient charges per admission of the hospital and to the average reimbursement payable per admission to the hospital by each cost payer, and for a hospital whose volume load (in the accounting year to which the adjusted inpatient hospital revenue increase limit applies)—

"(1) increases by less than 2 per centum or declines by less than 10 per centum of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the maximum total patient charges and the maximum reimbursements payable by cost payers permitted by the inpatient hospital revenue increase limit if there were no charge in volume load.

"(2) increases by 2 per centum or more but by less than 15 per centum of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the sum of (A) the amount specified under clause (1), and (B) one-half of the amount specified under clause (1) multiplied by the increase in volume load above the 2 per centum limit,

"(3) declines by 10 per centum or more but by less than 15 per centum of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the difference between (A) the amount specified under clause (1), and (B) one-half of the amount specified under clause (1) multiplied by the decline in volume load below the 10 per centum limit,

"(4) increases by 15 per centum or more of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the greatest maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted under clause (2), or

"(5) decreases by 15 per centum or more of the total volume load in the hospital's base accounting year, the maximum total inpatient charges and the maximum reimbursements payable by cost payers permitted for that accounting year shall equal the difference between (A) the smallest maximum total inpatient charges and the smallest maximum reimbursements payable by cost payers permitted under clause (3), and (B) the amount specified under clause (1) multiplied by the decline in volume load below the 15 per centum limit.

"BASE ACCOUNTING YEAR AND MODIFICATION OF CHARGES AND REIMBURSEMENT FOR THAT YEAR

"SEC. 114. (a) For purposes of this title, a hospital's 'base accounting year' is its accounting year which ended in 1977, or, if later, the second accounting year during all of which the hospital has been a hospital as defined in section 121.

"(b) For purposes of calculating under section 111(a) the average inpatient charges per admission of a hospital and the average reimbursement payable per admission to the hospital by each cost payer for the base accounting year, the inpatient charges of the hospital (and the reimbursement payable to the hospital by a cost payer) for the base accounting year shall (except as provided in subsection (c)) be reduced by an amount equal to any inpatient charges (in the case if a cost payer, inpatient charges attributable to that cost payer) for such base accounting year for elements of inpatient hospital services which cease to be furnished in an accounting year which is subject to this title, multiplied by the portion of that accounting year (or part thereof) subject to this title during which such services are not furnished.

"(c) Subsection (b) shall not apply with respect to inpatient hospital services which have been found to be not appropriate pursuant to section 1523(a)(6) of the Public Health Service Act by the State health planning and development agency designated under section 1521 of such Act for the State in which the hospital is located.

"ESTABLISHMENT OF EXCEPTIONS

"SEC. 115. (a) Upon request by a hospital, the Secretary may grant exceptions from the limits established under this title to such hospital to the extent that such hospital provides evidence satisfactory to the Secretary—

"(1) of the extent to which costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) for such hospital in an accounting year exceed such costs in the base accounting year as the result of—

"(A) changes in volume load in the range specified in clause (4) or (5) of section 113, or

"(B) changes in capacity or in the character of inpatient hospital services available in the hospital, or renovation or replacement of physical plant which changes, renovation, or replacement increase costs for inpatient hospital services per admission by more than the per centum specified in section 112(b)(1)(B) over costs for inpatient hospital services per admission in the previous accounting year; and

"(2) that the current ratio of assets to liabilities (determined in accordance with the last sentence of this subsection) is less than two; and

"(3) that the changes in volume load, capacity, or character of inpatient hospital services, or the renovation or replacement generating the excess costs described in paragraph (1) have been found, pursuant to section 1523 of the Public Health Service Act, to be needed or appropriate by the State health planning and development agency designated under section 1521 of such Act for the State in which such hospital is located.

For purposes of paragraph (2), the term current ratio of assets to liabilities', with respect to any hospital means the sum of the cash, notes and accounts receivable (less reserves for bad debts), marketable securities, and inventories held by such hospital divided by the sum of all liabilities of that hospital falling due in an accounting year for which the exception is requested under this section.

"(b) Upon request by a hospital, the Secretary may grant exceptions from the limits established under this title to such hospital to the extent that such hospital provides evidence satisfactory to the Secretary that—

"(1) there has been a change in the inpatient hospital services for such hospital for which reimbursement is payable by a cost payer, or the basis on which the reimbursement payable by a cost payer is calculated has changed, or

"(2) the percentage of inpatient charges attributable to any cost payer has changed for such hospital, and such change has reduced the total revenue of such hospital by at least the per centum specified in section 112(b)(1)(B) of the costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act).

"(c) The Secretary shall either approve any request for an exception made by a hospital under subsection (a) or (b), or deny such request, within a period not to exceed ninety days after the hospital has filed in a manner and form prescribed by the Secretary the evidence required by such subsection. (If such hospital has not received written notice within fifteen days that such request has not been filed in such manner and form, such request shall be deemed to have been filed in the prescribed manner and form.) Any such request not denied within such ninety-day period shall be deemed approved.

"(d) Any hospital granted an exception under subsection (a) shall make itself available for an operational review by the Secretary. As a result of such review, the Secretary may make recommendations to such hospital for improvements to increase such hospital's efficiency and economy. The Secretary may discontinue, after notice and an opportunity for a hearing on the record, any such exception for failure of the hospital to implement any such recommendation.

"(e)(1) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (a)(1)(A), the upper or lower 15 per centum limitation specified in clauses (2) and (3), respectively, of section 113(b) shall be permanently changed for that hospital to the upper or lower per centum limitation determined by the Secretary.

"(2) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (a)(1)(B), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year and all subsequent accounting years (and the limit on the allowable rate of increase under section 111 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount no greater than the amount the Secretary estimates, at the time he grants the exception, is necessary to maintain the current ratio of its assets to liabilities (determined in accordance with the last sentence of subsection (a)) at the level specified in subsection (a)(2).

"(3) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (b)(1), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year and all subsequent accounting years (and the limit on the allowable rate of increase under section 111 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount equal to the amount the Secretary estimates, at the time he grants the exception, is necessary to offset the loss in revenue caused by the changes for which the exception was granted.

"(4) If the Secretary grants an exception with respect to any accounting year to a hospital on the grounds set forth in subsection (b)(2), such hospital shall be allowed increased total revenue for purposes of this title for such accounting year (and the limit on the allowable rate of increase under section 111 for charges imposed by the hospital and reimbursement from its cost payers shall be adjusted upward accordingly) in an amount equal to the amount the Secretary estimates, at the time he grants the exception, is necessary to offset the loss in revenue caused by the changes for which the exception was granted.

"(f)(1) Any hospital, or any entity described in section 1842(f)(1) of the Social Security Act, which is dissatisfied with a determination of the Secretary made under this section may obtain a hearing before the Provider Reimbursement Review Board established under section 1878 of the Social Security Act, if the amount in controversy is $10,000 or more and the request for such hearing is filed within one hundred and eighty days after receipt of the Secretary's determination.

"(2) The Secretary (notwithstanding section 1878(h) of the Social Security Act) shall appoint five additional members to the Provider Reimbursement Review Board, following the specifications for expertise applicable to the existing five members. Such five additional members shall constitute the Board for purposes of reviewing appeals under this title. The other provisions of subsections (c), (d), (e), (f), (h), and (i) of section 1878 of the Social Security Act shall apply, except that the Board as so constituted shall be considered as reviewing decisions of the Secretary rather than of a fiscal intermediary.

"(g) Upon request by a hospital, the State health planning and development agency designated under section 1521 of the Public Health Service Act for the State in which the hospital is located shall make a finding as to the appropriateness of specific institutional health services for purposes of subsection (a)(3) or section 114(c) of this title, after requesting the recommendations of the

appropriate health systems agency. The finding of a State health planning and development agency under this subsection shall not be subject to further review.

"ENFORCEMENT

"SEC. 116. (a) Notwithstanding any provision of title XVIII of the Social Security Act, reimbursement for inpatient hospital services under the program established by that title shall not be payable, on an interim basis or in final settlement, to the extent that it exceeds the applicable limits established under this title or under the program for a State whose hospitals have been excluded under section 117 or 119 from the application of this title.

"(b) Notwithstanding any provision of title V or XIX of such Act, payment shall not be required to be made by any State under either such title with respect to any amount paid for inpatient hospital services in excess of the applicable limits established under this title; nor shall payment be made to any State under either such title with respect to any amount paid for inpatient hospital services in excess of such limits.

"(c) Notwithstanding any other provision of law, the imposition by any hospital of inpatient charges in excess of the applicable limit established under this title, or any payment by any cost payer (as defined in section 122(e)(2)) for inpatient hospital services in excess of such limit, shall subject such hospital or cost payer—

"(1) to the Federal excise tax imposed by section 4991 of the Internal Revenue Code of 1954 (as added by section 128 of this Act), and

"(2) to exclusion, at the discretion of the Secretary, from participation in any or all of the programs established by title V, XVIII, or XIX of the Social Security Act.

"(d) Any hospital shall be exempt from the penalties set forth in subsection (c) if it holds in escrow an amount equal to its inpatient charges in excess of the applicable limit established under this title multiplied by the percentage of such charges not attributable to cost payers until such time as future inpatient hospital charges fall below the applicable limits established under this title, in an amount equal to the amount in escrow; but any such hospital which fails to do so shall be subject to such penalties.

"EXEMPTIONS FOR HOSPITALS IN CERTAIN STATES

"SEC. 117. At the request of the Governor (or other chief executive) of any State the Secretary may exclude from the application of this title except for sections 125 and 126 all hospitals (as defined in section 121(c)) physically located in such State if—

"(a) the Secretary finds that such State has in operation as of the date of such request a program capable of containing hospital costs for inpatient hospital services in the State which covers at least 90 per centum of the hospitals in the State which would otherwise be covered under the program established by this title;

"(b) the Secretary finds that the State program applies at least to all revenues for inpatient hospital services of hospitals covered by the program and has applied for at least one year prior to the date of such request to at least half of those revenues (excluding revenues received under title XVIII of the Social Security Act);

"(c) the Governor (or chief executive) certifies, and the Secretary determines, that the aggregate rate of increase in revenues over the previous accounting year for inpatient hospital services for all hospitals in the State will not (1) exceed 110 per centum of the inpatient hospital revenue increase limit determined pursuant to paragraphs (b)(1) and (b)(2) of section 112, except that, at the option of the State, the above limit shall increase by the amount of increases in revenues attributable to increases in regular wages (as defined in section 124(b)(1)) which are exempt under section 124, nor (2) be less than the increase in the GNP deflator applicable to that fiscal period; and

"(d) the Governor (or chief executive) has submitted, and had approved by the Secretary, a plan for recovering any excess of total revenue which (notwithstanding paragraph (c)) may occur.

"EXEMPTION FOR HOSPITALS ENGAGED IN CERTAIN EXPERIMENTS OR DEMONSTRATIONS

"SEC. 118. A hospital or group of hospitals (as defined in section 121(c)) may be excluded from the application of this title except for sections 125 and 126 if the Secretary determines that (1) such exclusion is necessary to facilitate or continue an experiment or demonstration entered into under section 402 of the Social Security Amendments of 1967, section 222 of the Social Security Amendments of 1972, or section 1526 of the Public Health Service Act, and (2) such experiment or such demonstration is not inconsistent with the provisions of this title.

"EXEMPTION FOR STATES WITH COST CONTAINMENT PROGRAMS

"SEC. 119. (a) Any State may submit to the Secretary a plan for a hospital cost containment program for approval. The Secretary shall approve such a program and exempt from the application of this title except for sections 125 and 126 all hospitals (as defined in section 121(c)) physically located in such State if the Secretary determines that such program—

"(1) designates an identifiable unit of State government which has the authority to supervise the administration of the program;

"(2) provides for a methodology to assure that the aggregate rate of increase in revenues for inpatient hospital services over the previous year for all hospitals in the State will not exceed 110 per centum of the inpatient hospital revenue increase limit determined pursuant to paragraphs (b)(1) and (b)(2) of section 112 nor be less than the increase in the GNP deflator applicable to that fiscal period. Such methodology may include alternative methods for classifying hospitals, for establishing prospective rates of payment, and for implementing on a gradual, selective, or other basis the establishment of a prospective payment system, in order to stimulate hospitals through positive (or negative) financial incentives to use their facilities and personnel more efficiently without adversely affecting the quality of services;

"(3) includes a methodology for the recovery of any excess of total revenues which (notwithstanding paragraph (2)) may occur;

"(4) provides for sanctions and enforcement procedures adequate to insure compliance with the program;

"(5) provides for uniform definition of all costs;

"(6) provides for the evaluation of standards of institutional performance;

"(7) provides that the limit specified in paragraph (2) shall increase by the amount of increases in regular wages (as defined in section 124(b)(1)); and

"(8) provides for compliance with such other criteria as the Secretary deems necessary to accomplish the purposes of this title and which are not inconsistent with the provisions of this title.

"(b) The Secretary may make grants to any State which has an approved program pursuant to subsection (a) to assist such State in the implementation of its program. For the purposes of this subsection, there are authorized to be appropriated $10,000,000 for the fiscal year ending September 30, 1979, and such sums shall remain available until expended.

"(c) The Secretary shall promulgate regulations to implement this section within one hundred and eighty days of the date of enactment of this Act.

"REVOCATION OF EXEMPTIONS UNDER SECTIONS 117, 118, AND 119

"SEC. 120. (a) The Secretary shall review annually any program, experiment, or demonstration that has received an exemption pursuant to section 117, 118, or 119 to determine whether such program, experiment, or demonstration is in compliance with such section and the regulations promulgated thereunder. The Secretary may revoke, after notice and an opportunity for a hearing on the record, any such exemption if he determines that such exemption is no longer justified because the conditions for such exemption are no longer being met.

"(b) Upon revocation of an exemption awarded under section 117, 118, or 119 each hospital that would otherwise be subject to this title will be subject to the limits established under this title for each full accounting year as defined by section 122(a)(1) any part of which was not subject to the program, experiment, or demonstration established under section 117, 118, or 119.

"PART C—DEFINITIONS AND MISCELLANEOUS PROVISIONS

"DEFINITION OF HOSPITAL AND APPLICABILITY OF TITLE

"SEC. 121. (a) For purposes of this title (subject to subsections (b), (c), and (d) of this section), the term "hospital", with respect to any accounting year, means an institution (including a distinct part of an institution if the distinct part participates in the program established under title XVIII of the Social Security Act) which—

"(1) satisfies clauses (1) and (7) of section 1861 (e) of the Social Security Act, and

"(2) had an average duration of stay of thirty days or less in the preceding accounting year.

"(b) A hospital shall not be subject to this title except for the purposes of sections 125 and 126 for an accounting year if it—

"(1) has met the conditions specified in subsection (a) (under present and previous ownership) for less than two years before such accounting year;

"(2) derives more than 75 per centum of its inpatient care revenues, disregarding revenues received under title XVIII of the Social Security Act, from one or more health maintenance organizations (as defined in section 1301(a) of the Public Health Service Act) during such accounting year;

"(3) has had, in the three accounting years preceding such accounting year, average annual admissions of two thousand or less; or

"(4) has had in the three accounting years preceding such accounting year, average admissions that are greater than two thousand and less than four thousand; is a sole community provider, as defined by the Secretary; and, is not physically located within a standard metropolitan statistical area.

"(c) For the purposes of sections 117, 118, and 119, the term 'hospital', with respect to any accounting year, means an institution (including a distinct part of an institution if the distinct part participates in the program established under title XVIII of the Social Security Act) which meets the requirements of paragraphs (1) and (2) of subsection (a) except that a hospital shall not be subject to the provisions of such sections if it meets the requirements of paragraph (2) of subsection (b).

"(d) A hospital shall not be subject to any provisions of this title if it is a Federal hospital.

"OTHER DEFINITIONS

"SEC. 122. For purposes of this title—

"Accounting Year

"(a)(1) The term 'accounting year' means, except as provided in paragraph (2)—

"(A) in the case of a hospital participating in the program established by title XVIII of the Social Security Act, a period of twelve consecutive full calendar months including

the same months as the last full reporting period allowed for reimbursement purposes under such title; and

"(B) in the case of a hospital not participating in the program established by title XVIII of the Social Security Act, a calendar year, or, if requested by the hospital, such other period of twelve consecutive full calendar months as the Secretary may designate.

"(2) The Secretary may establish an 'accounting year' of less than twelve months, and make appropriate adjustments in the application of this title to that period, for an entity whose 'accounting year' under paragraph (1) is changed from one twelve month period to another or for other reasons that the Secretary deems appropriate.

"Inpatient Hospital Services

"(b) The term 'inpatient hospital services' has the meaning given it by section 1861(b) of the Social Security Act including in addition the services otherwise excluded by paragraph (5) thereof.

"Inpatient Charges

"(c) The term 'inpatient charges' means (1) charges (as defined in section 405.452(d)(4) of title 20 of the Code of Federal Regulations as in effect on the date of enactment of this Act) for inpatient hospital services or (2) except for purposes of subsection (e), the hospitals costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act), if such costs are greater than the charges as defined in clause (1).

"Admission

"(d) The term 'admission' means the formal acceptance of an inpatient by a hospital, excluding newborn children (unless retained after discharge of the mother) and excluding transfers within inpatient units of the same institution.

"Cost Payer

"(e) The term 'cost payer' means—

"(1) a program established under title V, XVIII, or XIX of the Social Security Act, and

"(2) any organization which (A) meets the definition in section 1842(f)(1) of the Social Security Act, and (B) reimburses a hospital subject to this title for inpatient hospital services on a basis related to the hospital's costs in furnishing those services or on any other basis other than inpatient charges.

"(f) The term 'reimbursement payable by a cost payer' means the sum of—

"(1) the amounts payable by the cost payer to a hospital for inpatient hospital services, and

"(2) the amounts payable by an individual to the hospital for inpatient hospital services if the individual's expenses for such services are payable in part by the cost payer, to the extent that those amounts are calculated as a portion of the costs or other basis on which the amounts payable by the cost payer are determined.

"State

"(g) The term 'State' includes Puerto Rico, Guam, the District of Columbia, and the Virgin Islands.

"DETERMINATION OF INPATIENT REIMBURSEMENT

"SEC. 123. For purposes of section 111, inpatient reimbursement under a program established under title V, XVIII, or XIX of the Social Security Act shall be determined without regard to adjustments resulting from the application of section 405.460(g), 405.455(d), 405.415(f), or 405.415(d)(3) of title 20 of the Code of Federal Regulations.

"EXEMPTION OF NONSUPERVISORY PERSONNEL WAGE INCREASES FROM REVENUE LIMIT

"SEC. 124. (a) The Secretary shall modify the inpatient hospital revenue increase limit (for purposes of section 111(a)(2)) and the adjusted inpatient hospital revenue increase limit (for purposes of section 111(a)(3)) otherwise established for any hospital which is subject to the provisions of this title except for those hospitals exempted pursuant to section 117, 118 or 119 for any accounting year beginning before April 1980, as prescribed in subsection (b).

"(b) Such modified limits for any accounting year shall be calculated by adding together—

"(1) the average percentage increase in regular wages (as that term is used for purposes of the Fair Labor Standards Act of 1938) per employee per hour granted to employees other than doctors of medicine or osteopathy and supervisors (as defined in section 2(12) of the National Labor Relations Act) during that accounting year multiplied by the percentage of total costs for inpatient hospital services (as calculated for purposes of title XVIII of the Social Security Act) attributable to such wages in the preceding accounting year; and

"(2) the adjusted inpatient hospital revenue increase limit otherwise applicable to the hospital for that accounting year under this title multiplied by the percentage of such costs attributable to all other expenses in the preceding accounting year; and

"(3) 100 percent plus the average percentage increase in regular wages (as defined in clause (1)) per employee per hour granted to employees specified in clause (1), multiplied by the product of (A) the percentage of total costs for inpatient hospital services (as calculated under clause (1)) attributable to such wages in the preceding accounting year, and (B) the fractional increase in the average number of such employees in the accounting year for which the modified limit is calculated over the average number of such employees in the preceding accounting year; provided, that the total percentage determined under this clause may not exceed the difference between the percentage which would be obtained under clause (1) if the adjusted inpatient hospital revenue increase limit were used instead of the average percentage increase in regular wages per employee per hour, and the percentage actually calculated under clause (1).

"(c) The modified inpatient hospital revenue increase limit and adjusted inpatient hospital revenue increase limit established under subsection (b) for any hospital with respect to any accounting year shall constitute such hospital's inpatient hospital revenue increase limit under section 111(a)(2) or, as appropriate, the adjusted inpatient hospital revenue increase limit under section 111(a)(3), for such accounting year for all purposes of this title.

"DISCLOSURE OF FISCAL INFORMATION

"SEC. 125. (a) Every hospital shall submit to the health systems agency designated under section 1515 of the Public Health Service Act for the health service area in which it is located by March 1 and September 1 of each year, a report, in a form prescribed by the Secretary, the rates charged for each of the thirty most frequently used hospital services, as specified by the Secretary, including the average semiprivate and private room rates.

"(b) Each such hospital shall submit annually to such health systems agency, within ninety days of the close of each such hospital's accounting year, a report, in a form prescribed by the Secretary, which contains information, as specified by the Secretary, describing the ownership, management, and financial status of each such hospital including:

"(1) a balance sheet as of the end of such accounting year, setting forth assets and liabilities at such date, including all capital, surplus, reserve, and depreciation;

"(2) a statement of operations for such accounting year, setting forth all operating and nonoperating revenues and expenses including the percent increase in wages for nonsupervisory personnel during such accounting year (including a comparison with all previous accounting years subsequent to the date of enactment of this Act);

"(3) the name and address of any person—

"(A) who has (directly or indirectly) an ownership, lease, or rental interest of 5 per centum or more in such hospital, or who is the owner (directly or indirectly) of an interest of 5 per centum or more in any mortgage, deed or trust, note, or other obligation secured (in whole or in part) by such hospital or any of the property or assets thereof, or

"(B) who is an officer or director of the hospital if it is organized as a corporation; and

"(4) the name and address of any individual, corporation, partnership, or other legal entity with whom the hospital has had, during the previous twelve months, business transactions in an aggregate amount in excess of $5,000 if a person described in paragraph (3) or a person who exercises discretionary authority or discretionary control respecting the financial management of the hospital (A) is such an individual or (B) has (directly or indirectly) an ownership interest of 5 per centum or more in such corporation, partnership, or other legal entity; and

"(5) the names and annual compensation including salary and benefit increases of the hospital's principal operating personnel, as defined by the Secretary.

"(c) Every hospital shall submit annually to such health systems agency all costs reports submitted to each cost payer, as defined in section 122(e) of this Act, and its overall plan and budget described in section 1861(z) of the Social Security Act (if it participates in the program established by title XVIII of that Act).

"(d) If a hospital fails to fully comply with the requirements of subparagraphs (a), (b), and (c) and any regulation promulgated thereunder, the Secretary shall notify the hospital and any payment due to such hospital pursuant to titles XVIII, XIX, and XX of the Social Security Act or any other program supported in whole or in part by funds supplied by the United States shall be reduced by 10 per centum effective with the date of such notice and such reduction shall continue in effect until the hospital fully complies with the requirements of subparagraphs (a), (b), and (c) or any regulation promulgated thereunder: *Provided*, That if the Secretary finds that the hospital has fully complied with such requirements within ninety days of notification by the Secretary of a violation, the Secretary may, in his discretion, waive all or part of the reduction in payments prescribed herein.

"(e) Each such health systems agency shall make available to the public for inspection and copying (at the reasonable expenses of the public) the information supplied to the health systems agency pursuant to this section in readily understandable language and in a manner designed to facilitate comparisons among the hospitals in the health systems agency's health service area.

"IMPROPER CHANGES IN ADMISSION PRACTICES

"SEC. 126. Upon written complaint by any person that one or more hospitals has changed its admission practices in a manner that would tend to reduce the proportion of inpatients of such hospital or hospitals for whom reimbursement is less than the anticipated inpatient charges applicable to such inpatients, the Secretary shall investigate the complaint. The Secretary may impose, after notice and an opportunity for a hearing on the record, the sanction set forth in section 116(c)(2) if he determines that such complaint is justified.

"REVIEW OF CERTAIN DETERMINATIONS

"SEC. 127. Any determinations made on behalf of the Secretary under this title with

respect to the application of its provisions to individual hospitals (other than determinations made under section 115 or 126) shall be subject to the provisions of section 1878 of the Social Security Act in the same manner as determinations with respect to the amount of reimbursement due a provider of services under title XVIII of such Act.

"EXCISE TAX ON EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

"SEC. 128. (a) Subtitle D of the Internal Revenue Code of 1954 (relating to miscellaneous excise taxes) is amended by adding at the end thereof the following new chapter:

" 'CHAPTER 45—TAX ON CERTAIN EXCESSIVE PAYMENTS FOR INPATIENT HOSPITAL SERVICES

" 'SEC. 4991. IMPOSITION OF TAX.

" '(a) IN GENERAL.—(1) There is hereby imposed, with respect to the receipt by any hospital of any payment made by any cost payer for inpatient hospital services in excess of the applicable limit established by

, and with respect to any payment made by any cost payer as defined in section 122(e)(2) of such Act for inpatient hospital services in excess of such limit, a tax equal to 150 percent of the amount of such excess. The tax imposed by this paragraph shall be paid both by the hospital and by the cost payer.

" '(2) There is hereby imposed, with respect to the inpatient charges of any hospital in excess of the applicable limits established by

multiplied by the percentage of such charges not attributable to cost payers, a tax equal to 150 percent of the amount of such excess. The tax imposed by this paragraph shall be paid by the hospital.

" '(b) EXCEPTION.—The tax imposed by subsection (a)(2) shall not apply with respect to any hospital so long as it is determined by the Secretary of Health, Education, and Welfare to be taking the corrective action described in section 116(d)(2) of the

" 'DEFINITIONS.—Terms used in subsections (a) and (b) have the meanings given them by

" '(d) ADMINISTRATION.—Under and to the extent provided by regulations of the Secretary, the appropriate provisions of subtitle F (relating to procedure and administration) shall be made applicable with respect to the tax imposed by subsection (a) of this section.'.

"(b) The table of chapters for subtitle D of such Code is amended by adding at the end thereof the following new item:

" 'Chapter 45. Tax on certain excessive payments for inpatient hospital services.'.

"EFFECT OF ACT ON PAYMENTS BELOW THE ESTABLISHED LIMITS

"SEC. 129. This Act shall not require any Federal or State program or any person to pay a hospital more than that program or person would have been required to pay had this Act not been enacted.

"CITIZEN'S CIVIL ACTIONS

"SEC. 130. (a) Except as provided in paragraph (b) of this section, any person may commence a civil action for injunctive relief, including interim equitable relief, on his own behalf, whenever such action constitutes a case or controversy—

"(1) against any person (including the Secretary) who is alleged to be in violation of sections 125, 126, 128, or 129 of this title or any regulation promulgated thereunder; or

"(2) against the Secretary where there is alleged a failure of the Secretary to perform any act or duty pursuant to sections 125, 126, 128, or 129 of this title or any regulation promulgated thereunder.

The district courts of the United States shall have jurisdiction over actions brought under this section, without regard to the amount of controversy, or of the citizenship of the parties.

"(b) No civil action may be commenced—

"(1) under paragraph (a)(1) of this section—

"(A) prior to sixty days after the plaintiff has given notice of the alleged violation to the Secretary and to any alleged violator in such manner as the Secretary may by regulation require; or

"(B) if the Attorney General or the Secretary has commenced and is diligently pursuing judicial proceedings or administrative action with respect to such alleged violation; or

"(2) under paragraph (a)(2) of this section, prior to sixty days after the plaintiff has given notice to the Secretary of such alleged failure to perform an act or duty.

"(c) In any action under this section, the Attorney General or the Secretary may intervene as a matter of right. The decision and rulings of the court, in any judicial proceeding commenced under this section, shall not be a bar to the institution of any judicial proceeding or administrative action by the Secretary against a party to such judicial proceeding. No factual finding by such court shall be determinative as to any fact in any subsequent judicial proceeding or administrative action brought by the Secretary, unless the Secretary is a party to the proceeding under this section.

"(d) The court, in issuing any final order in any action brought pursuant to subsection (a), may award costs of litigation (including a reasonable attorney's fee, based on the prevailing rates for such services, and expert witness fees) to any party, whenever the court determines that such an award is appropriate.

"(e) Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or at common law to seek enforcement of any regulation or order or to seek any other relief.

"(f) Nothing in this section shall require the disclosure of any trade secret information or any other confidential information except as provided by the Federal Rules of Civil Procedure.

SEC. 131. (a) Within one year of the date of enactment of this Act, the Secretary shall—

"(1) after consultation with the Bureau of Labor Statistics of the Department of Labor, the Bureau of Economic Analysis of the Department of Commerce, and other appropriate public and private organizations, promulgate a figure that more accurately reflects the rate of increase in the prices of the inputs necessary for the production and delivery of hospital services. Such figure shall replace the figure promulgated pursuant to section 112 as the new inpatient hospital revenue increase limit; and

"(2) make any changes in the exceptions process established by section 115 as deemed necessary or appropriate by the Secretary as a result of the promulgation of the new inpatient hospital revenue increase limit pursuant to paragraph (1) of this section. The Secretary shall make such changes in order to insure that—

"(A) only hospitals that are experiencing financial crises, as defined by the Secretary, and that have not incurred expenses in excess of those found to be necessary pursuant to section 1861(v)(1)(A) of the Social Security Act are allowed to receive exceptions; and

"(B) exceptions will only be granted to hospitals that qualify under clause (A) and that have—

"(i) experienced an unforeseeable or unavoidable rise in the price of malpractice insurance, other liability insurance, energy or such other items as the Secretary deems appropriate which result in hospital expenditures in excess of the figure promulgated pursuant to paragraph (1) of this subsection;

"(ii) experienced a change in patient mix resulting from expanded institutional capacity provided such expansion has been either found by a State health planning and development agency designated under section 1521 of the Public Health Service Act to be in conformity with applicable standards, criteria, and plans under an agreement pursuant to section 1122 of the Social Security Act or approved by such agency under a certificate-of-need program which is satisfactory to the Secretary under section 1523(a)(4) of the Public Health Service Act;

"(iii) experienced unusual increased expenses, as defined by the Secretary, associated with the closing, modifying, or changing usage of all or part of its facilities by eliminating excess bed capacity; discontinuing an underutilized service for which there are adequate alternative sources; or, substituting for the underutilized service some other service which is needed in the area and which is consistent with the findings of an appropriate health planning agency; or

"(iv) experienced such other change in condition that the Secretary deems an appropriate justification for an exception:

Provided, That such reasons for hospitals qualifying for exceptions as set forth in clauses (i) through (iv) have been found pursuant to section 1523 of the Public Health Service Act to be needed or appropriate by the State health planning and development agency designated under section 1521 of such Act for the State in which the hospital requesting the exception is located.

"(b) The changes in the inpatient hospital revenue increase limit and the exceptions process prescribed by subsection (a) shall apply to hospitals for their accounting years commencing after such changes are in effect.

"(c) Any changes made pursuant to sections (a)(1) and (a)(2) shall become effective after sixty days of continuous session of the Congress after the Secretary has submitted such changes to the Congress together with a detailed statement of the reasons underlying such changes, unless either House passes a resolution during such sixty-day period stating in substance that it does not favor such changes.

"SEC. 132. The Secretary, after consultation with appropriate public and private organizations, shall establish within one year of the date of enactment of this Act the following:

"(a) an accounting and uniform functional cost reporting system (including uniform procedures for allocation of costs) for determining operating and capital costs of hospitals providing services;

"(b) a system which will classify hospitals according to size, geographical location, and other criteria which will reflect efficiency and services provided;

"(c) a system that more accurately measures the changes in hospital cost associated with changes in hospital volume;

"(d) a system that monitors, on a current basis, shifts in case mix including shifts of cases with higher than average costs per admission;

"(e) a system that measures the output of hospitals which includes a way to identify hospitals that provide better than average care than hospitals of similar characteristics; and

"(f) a system that would reimburse hospitals of similar characteristics differently based on the system established pursuant to subsection (e).

"SEC. 133. (a) The Secretary shall arrange for the conduct of a study or studies of

methods for controlling the cost of and/or revenue received for hospital outpatient services, long term care services, and ambulatory care services.

"(b) The study or studies required by subsection (a) shall be conducted within one year of the date of enactment of this Act. Within thirty days of the date of completion of such study or studies, such study or studies and the report or reports thereon shall be submitted to Congress. Such report or reports shall include recommendations, if any, for legislative and administrative action.

"SEC. 134. The Secretary shall monitor, on a current basis, the economic impact of all the provisions of this title including sections 117, 118, 119, and 124. He shall report annually to the Congress the results of such monitoring including the percentage of increase in the cost of energy, malpractice, and other liability insurance, and the wages for nonsupervisory personnel.

"SEC. 135. In carrying out the purposes of this title the Secretary or a State is authorized to enter into contracts with State or national cooperative information centers established under section 304 or 306 of the Public Health Service Act.".

The table of contents on page 3 is amended by striking item 2 and substituting:

"Sec. 2. Report on permanent reform in the delivery and financing of health care.

"TITLE I—TRANSACTION HOSPITAL COST CONSTRAINT PROVISIONS

"PART A—PURPOSE OF THE PROGRAM

"PART B—ESTABLISHMENT OF HOSPITAL COST CONTAINMENT PROGRAM

"PART C—DEFINITIONS AND MISCELLANEOUS PROVISIONS".

The PRESIDING OFFICER. Will the Senator indicate to the Chair whether this is the amendment on which there is a 40-minute time limitation?

Mr. KENNEDY. Forty minutes, 20 minutes to each side, as I understand it.

I yield such time as I might need, Mr. President.

Mr. President, this amendment that I offer is basically the Human Resources Committee legislation that was reported favorably from that committee some 14 months ago. It is essentially the administration's proposal.

The earlier budget estimates, as indicated by the charts back here, would show that there would be a saving of some $60 billion by 1983.

Effectively this particular legislation provides a cap on the expenditures for hospital costs, a cap which is reflected by an index related to the gross national product, and then an additional health index.

This legislation, Mr. President, is very similar to the type of legislation that was passed in my own State of Massachusetts, and which has been implemented there for about a year and a half, and has seen a reduction in the growth of hospital costs in my own State of Massachusetts from 17.7 percent to some 10.5 percent.

We have seen some nine different States that have different forms of cost containment, with Colorado reducing their hospitalization cost increases from 22.9 percent in 1975 to 15.1 percent in 1977; in Connecticut, from 16.8 percent to 11.4 percent.

The fact of the matter is, Mr. President, the nine States that have incorporated a mandatory program have seen a reduction of expenditures on hospital costs from 15.8 percent to 12 percent. And, Mr. President, I believe that the 12 percent will continue to go down. Most of those States have passed their laws recently, and the full impact of their program has not been realized.

Under the proposal of the Senate Finance Committee, according to the older budget figures, the savings would be some $400 million by 1983. By the amendment which will be introduced by the Senator from Wisconsin, and in which I will join with him as a cosponsor if this amendment is not successful, we will save some $34 billion—$11.6 billion on medicare and medicaid alone.

And under the proposal of the administration and the Human Resources Committee, some $19 billion will be saved by 1983 in medicare and medicaid alone.

Mr. NELSON. Mr. President, will the Senator yield for a question?

Mr. KENNEDY. I yield to the Senator from Wisconsin.

Mr. NELSON. Or I can withhold it if——

Mr. KENNEDY. No; I will be glad.

Mr. NELSON. The Senator is aware, as is everyone else here, of all the conversation and all the activity and proposals to reduce spending. We are passing resolutions with all kinds of rhetoric, saying, "Let's cut Federal spending." I think it is fascinating to note the tremendous Federal savings in the Kennedy-administration bill, which—the Senator will correct me if I am wrong—I believe, in the 5-year period, the Federal savings in expenditures for hospital care is about $23 billion; is that not correct?

Mr. KENNEDY. The Senator has stated it accurately and compellingly. That is what we are attempting to implement, Mr. President. It gives the maximum flexibility to the local hospital to find the ways and means by which this can be done.

Mr. President, I yield to no one in the diversity of the types of hospitals that we have in my own State of Massachusetts. We have some of the great teaching hospitals, like Massachusetts General Hospital. We have some of the great medical schools, which are tied in to a number of other teaching hospitals. We have small county hospitals, and a number of other types of hospitals, but nonetheless there has been a limit, and I daresay that has been applied all the way across the board.

Under a more detailed type of approach in terms of national health insurance and other types of programs, we would need a more refund mechanism in terms of classification, but what we are effectively talking about is an interim but important measure to be used initially to cap what is probably the top No. 1 or No. 2 inflator in our economy. As I pointed out earlier the Consumer Price Index has advanced at one half the rate of the hospital semiprivate room.

With this bill, we will be getting a handle effectively on about 40 percent of the principal inflators in our economy, and, as illustrated by the experience of these States, in an effective way that will save billions and billions of dollars.

Mr. President, I think this really is effectively a test of whether this body is interested in the rhetoric of the arguments on inflation, or really the substance of them. The Senator from Wisconsin has pointed out very well the savings to be achieved in the public sector. What will be saved even more is in the private sector, from the out-of-pocket expenses and from the health care premiums that have been increased, and from the payments that will be made by local communities, local agencies, and local and State governments.

The savings there, Mr. President, will of course be in terms of savings to local communities and State governments.

It seems to me, Mr. President, when this body is concerned about and interested in doing something about the rate of inflation, we would here come to grips with this problem in a very important way, and a way which we believe will counter more than the cost of health care being provided by these services.

I reserve the remainder of my time. I am prepared to get an early vote on this matter.

I yield to the Senator from New York.

Mr. JAVITS. Mr. President, I feel it my duty to say a word about this measure, since I am the ranking minority member of the committee which reported it.

At the time it was reported, 14 months ago, Mr. President, already the cost of hospitalization represented the big pressure point in respect of medical care costs, which have twice the inflationary effect of any other group of costs of appreciable character. In the Consumer Price Index, the rate of inflation in these costs is generally held at 12 to 14 percent, as against an overall rate of inflation of 6 to 7 percent.

I shall be, like the Senator from Wisconsin, supporting the work of the committee which is contained in this amendment, and also supporting Senator NELSON's amendment, which represents a modernization of our position brought up to date. One particular point that I would like to make is especially addressed, Mr. President, to those who have deep concern about what is called national health insurance, which will come along as a major issue in the next 2 years.

I believe that though there are many who have deep feelings about national health insurance, its desirability, the terms, the degree to which private enterprise sholuld be involved, the possible changes in the relationship between the doctor and the patient, I can tell those on the side of the national health plan, which I like to call it, that it is absolutely essential to have a measure like this as a threshold if the national health plan is to be manageable; and I can tell those who are against it, because it applies equally to both, that there is no single element which will drive the American people, their constituents, more to demand national health insurance than the failure to adopt a measure of this kind, whether it is this one or the Nelson amendment.

Mr. President, the American consumer of medical care is getting des-

perate, and he is right, absolutely right, when you realize the piece of the individual's budget which is attributable to these costs, and the inadequacy of practically every form of insurance, including Blue Cross and Blue Shield, and, yes, even medicare, because there is really no check, no roof on the charges of the providers, and hence I am like everybody else when I see what I have expended and what I have to pay. The individual is constantly at hazard, and constantly paying through the nose.

I deeply believe, therefore, Mr. President, that whether you are for or against national health insurance, those on both sides should vote, when we have the opportunity, as we have it today, for a measure for hospital cost containment.

Now, finally, all of us have had a lot of experience with hospitals. I have been on this health subcommittee for a long time, and for years have been the ranking minority member of the committee.

Mr. President, the degree to which water can be squeezed out of hospital costs is, for all practical purposes, limited.

The proliferation of equipment, the inefficiency of bookkeeping, the use of computers, the duplication of facilities in given areas which could easily be consolidated, the degree of personal services which can easily be streamlined with the use of modern facilities and modern management techniques, all show that it is a sense of urgency which has been absent.

We have all done a lot of talking, as Senator NELSON just said in his discussion with Senator KENNEDY, but we have not done anything to bring about the desired result.

It is for those reasons, Mr. President, that I hope the Senate will take this opportunity today to vote for an effective hospital cost containment measure. I trust if this amendment fails, they will support the Nelson amendment.

Mr. KENNEDY. Mr. President, I yield myself an additional 3 minutes.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Finally, what we are talking about, Mr. President, is the impact of inflation upon people.

For our elderly people, the first day deductible for elderly people was in 1970 $43, projected for 1983 it will be $276. This is for the medicare deductible for hospitalization. We are not talking about the needs of people who may think they are sick. This is when they are sick and they have to go to the hispital. The inflator that we provide under social security does not live up to that. The elderly people are paying more and more and, as a matter of fact, are paying more out of their budgets, than they were paying prior to the enactment of medicare.

Without effective cost containment that will escalate at a dramatic rate, as our other figures show, far exceeding the inflation rate.

That is one fact.

Mr. President, we are talking about local savings for State and local governments. In 1968, $4 billion on hospital care; 1978, $11.9 billion; 1983, without cost containment, $23 billion, double what we are doing now in 1978. We are talking about the impact on the local community, the property tax, the taxes that are going to exist in the State, essentially for health care. They are going to double in the period of the next 4 years.

Make no mistake about it , the kind of increases that are documented by State and local governments and by medicare also apply to the middle class, to companies and corporations. They are paying more and more in terms of premiums. The blue collar worker is working longer and longer hours in order to afford the premiums. That is going to continue, Mr. President, to take an increasing amount out of the paychecks of workers, of middle class people, unless we are going to be effective in getting cost containment.

We have a program which has been tried, which is effective, and which I think will provide the average consumer of this country significant savings in taxes. I hope it will be accepted.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. TALMADGE. In due course, I will move to table the amendment.

Mr. KENNEDY. I reserve the remainder of my time, Mr. President.

Mr. TALMADGE. Mr. President, the Senator from Massachusetts and his distinguished colleagues on the Committee on Human Resources are to be commended.

They have made a significant contribution to our search for a sensible, realistic solution to the problem of soaring hospital costs.

While we may disagree about the remedy and its timing, we see a common problem.

The proposed amendment would establish a limit on the percentage by which a hospital may increase its revenues from year to year.

In the first year, the formula in the bill would permit an increase of about 10 percent.

Apart from the arbitrary nature of the formula—which has nothing to do with a hospital's legitimate financial needs—this flat cap approach has several major defects.

A flat cap by its very nature tends to penalize those who have been efficient in the past and reward those who have been inefficient.

Hospitals with bloated costs will be allowed a larger increase than identical hospitals that have kept their costs down.

For example, a $300-a-day hospital could increase its revenue by $30 while an identical hospital run at $200 a day would be allowed additional revenues of only $20.

For some hospitals, the allowable increase will be more than they need; for others it will fall tragically short.

As I stated to Secretary Califano in response to his reference to obese hospitals, placing all hospitals, fat and lean, under a 9-percent cap is akin to placing them all on a 1,200 calorie a day diet.

Some hospitals may be "obese and profligate" but others are clearly underfinanced, more a threat to health and safety than the pocketbook.

For them, a hospital cost containment measure geared to reduce spending by $60 billion in the first 5 years may require a gutting of essential services.

Nobody knows how much of the reduced spending would be accomplished by reducing waste—and how much would be at the expense of necessary patient care.

The amendment also provides for the Secretary of HEW to change the statutory formula for calculating revenue limits.

Thus, it would make him czar of cost control for every hospital in the United States of America.

Thus, after the first year, the amendment gives HEW a blank check to change the program as it sees fit, subject to congressional veto.

There are serious concerns about the so-called mandatory wage pass-through feature of the bill.

Like the three members of the Human Resources Committee who presented their minority views on the proposed amendment, I am concerned that the program would exempt a major part of hospital budgets from controls.

Wages of nonsupervisory workers account for 40 to 45 percent of a hospital's costs.

While you were safe a decade ago in generalizing about hospital workers being underpaid, this is no longer true.

In 1977 the wage levels of nonsupervisory hospital workers caught up with—and passed—the wage levels paid for comparable work outside the hospital.

In one major city, pot scrubbers working for hospitals are paid about half again as much as the clerk typists working in medicare regional offices.

It does not make sense to exempt such workers from a hospital cost containment program regardless of whether their wages are substandard.

Mr. President, we are talking here about a permanent program that will cut total hospital revenues by $60 billion in just 5 years.

While clearly—and perhaps brutally—effective as a cost control device, it entails risks for the sick and disabled and their families that few Americans would wish to take.

I yield 4 minutes to the distinguished Senator from Pennsylvania.

Mr. SCHWEIKER. Mr. President, as the ranking Republican on the Subcommittee on Health and Scientific Research, I must rise to oppose the amendment of my distinguished colleague from Massachusetts. The amendment represents in large part the administration's approach to hospital cost containment. It is also the bill reported by the Human Resources Committee more than 1 year ago.

There is no question about the need to do something about the skyrocketing costs of health care in this country. In my view, however, the basic issue facing the Congress right now is not whether to do something about this problem, but how.

For the better part of the spring and

summer of 1977, Senator KENNEDY and I, along with the other members of the Human Resources Committee, spent many long hours analyzing the administration's approach to this problem in great detail. This was before the major medical and hospital interest of this country responded to cost containment pressures by organizing a "voluntary effort" to lower hospital costs through their own initiative. Even then, before the voluntary effort, I voted against approval of the bill by the Human Resources Committee. I had then and I still have grave doubts about the fairness and workability of federalized hospital cost containment. In addition, I was, and still am, opposed to the "mandatory wage pass-through" contained in the bill—a provision which removes the costs of nonsupervisory workers wages, which account for as much as 40 percent of hospitals' budgets, from hospital costs containment limits.

With this wage passthrough, we are attempting to solve one problem while creating another. We say we are going to put ceilings and caps on hospital costs, but 40 percent of the costs, which are nonsupervisory workers' wages, will be exempt. We are creating, in this bill, a mechanism to escalate a highly inflationary segment of hospital costs, because there will be no restraints on pages. In negotiating sessions, the labor negotiators will say, "Look, we don't have to worry about it; you can give it to us because wages are not under the controls." It is like having wage and price controls on just only wages or just prices. It is rather ludicrous to say there is going to be hospital cost containment when 40 percent of hospital costs will not be under the controls. It is rather ridiculous to implement an economic control system when you are only controlling wages or only controlling prices. It does not make any sense to have only half of the economic input under control and the other half not under control.

We are going to try to cure one malady by creating another. I think that is an illogical approach. I think that is an unreasonable approach. When we put that provision in the human resources bill, I announced my opposition to it. I voted against the bill. That is exactly the bill that is here before us today.

Mr. President, events since the Human Resources Committee reported out its bill—the proposal the Senator from Massachusetts now offers—have only heightened my concern about this approach. I believe that we must move away from an ever-increasing Federal bureaucracy as the approach to national problems, particularly in health care. Instead, we must move toward private sector and competitive solutions to the extent they are possible in the health care industry.

The voluntary effort has been an exciting and promising alternative approach to this difficult issue. Estimates of reduced hospital costs under the voluntary effort have been impressive. Its goal is to decrease by 2 percentage points the rate of increase of non-Federal, community hospital expenditures this year as well as next. For the first 5 months of 1978, hospital expenditures rose by only 12.7 percent under the voluntary effort—a decline of 3.3 percentage points, compared to the same period in 1977.

Imposing a flat cap, as this amendment proposes, on all hospital expenditures will clearly have a detrimental effect on our most promising way to contain hospital costs because it will cause hospitals to abandon the voluntary approach, surrender to Federal controls, and increase their costs up to the Federal limit. So how can this be called an anti-inflation amendment?

In my own State of Pennsylvania, the voluntary effort is well underway, with the vast majority of eligible hospitals now participating in the locally organized program for the containment of hospital costs. I think their efforts, as well as the efforts of hospitals in other States, should be encouraged, not preempted.

Mr. President, with this innovative voluntary approach, utilizing private sector initiative, so fully under way, I do not believe that there is a need to move precipitously into another Federal regulatory program to contain hospital costs. The 9-percent cap proposed by the administration would be a nightmare to administer and it would be a nightmare to be subject to it. It might also lead to ever-increasing Government regulation of our health care system, an issue which the National health insurance discussions we anticipate in the near future will address in due course.

I think this is a dangerous, unnecessary, and inequitable approach.

Again, and in conclusion, I do not know how we can put cost controls on half the system and not on the other half. I know of no other system where we put wage controls in effect and not price controls, or price controls and not wage controls. I doubt it will work here and I oppose this amendment.

Mr. TALMADGE. Mr. President, I yield 3 minutes to the distinguished Senator from Nebraska.

Mr. CURTIS. Mr. President, the Kennedy amendment incorporates the provisions of title I of the administration cost containment bill reported by the Senate Committee on Human Resources. It places an absolute cap on inpatient hospital revenue, from all payers, of 1½ times the GNP deflator.

The reasons why the Kennedy amendment should be opposed are many:

First. Such a lid would be inequitable and unworkable, and would have a deleterious effect upon the provision of high quality health services.

Second. Hospitals are in the position of being unable to control the costs of the things that they buy; the items in the hospital market basket are escalating in costs for reasons other than those under the hospital's control. It is ironic to have Government attempting to mandate a ceiling under which hospitals must live when it is the actions of Government, not the hospitals, which are fueling inflation.

Third. The voluntary effort, a formal program begun by three major groups (the American Medical Association, the American Hospital Association, and the Federation of American Hospitals), already has been very successful in moderating the rise in hospital costs. It should be given a further chance to work.

Fourth. The kind of arbitrary ceiling in the Kennedy bill would become a floor—that is, "fat" hospitals would tend to get "fatter," and lean hospitals might go under. It would tend to reward hospitals which already are inefficient.

Fifth. It would inject Government even more pervasively, with attendant complex, bureaucratic controls, into our health care delivery system.

Sixth. Under the bill, limits would become even more stringent over time—there would be a "ratcheting down" effect which would impose even a more difficult test upon hospitals.

Seventh. The GNP deflator is not appropriate as an index of hospital inflation. Sixty percent of hospitals' costs are for labor, and labor costs clearly have risen faster than the inflation rate; AHA measures show hospital inflation far outstrips the GNP deflator.

Eighth. Hospitals that are without fault might be forced into bankruptcy—bankruptcy is not a basis for exception.

Ninth. Hospitals would be required to consume their resources to avoid insolvency.

Tenth. The cost of hospital care varies considerably among hospitals and areas, which the legislation fails to recognize.

Mr. President, all persons of good will would like to see hospital costs not only kept down, but actually reduced. The question is, how do you do it if everything the hospital buys, all the utility business, all the bandages, all the wages and everything else, go up? How are you going to put a cap on and say that hospitals cannot go beyond that cap?

Well, you can cause the hospital to go bankrupt. You can have them reduce their services. In case that cap only applies to Government patients, you can force them to charge other patients more. This, I believe, applies to all of them. It is totally an unworkable remedy.

Furthermore, suppose a hospital is charging $140 a day. Maybe it is a fat hospital, overloaded with extra costs that could be reduced. They would get to raise their rates by $14. There might be another hospital that is only charging $80. Maybe that $80 charge ought to be raised by $15 for them to meet their bills and upgrade their services. But they would be limited to $8. The rich get richer and the poor get poorer. The fat hospitals get fatter, the lean hospitals get leaner.

It is not a workable remedy, it is not equitable. It says to the hospitals, those who have raised their rates, who have not been successful in holding down costs, you can raise them a lot more. To the efficient hospital, to the conscientious administrator—and that is most of them, maybe all of them—who has tried and tried to hold down his costs and has been successful, any raise that he can make to meet the additional costs that fall upon him is limited.

It should be the reverse. It should be that the hospitals costs are way down. They could have a greater raise to meet present day costs than the hospital

whose costs are already up there. It is unsound, it is unworkable, it is unfair.

It may cause some hospitals to close. It is not an effective arrangement that exempts labor. As the distinguished Senator from Pennsylvania said, you cannot have price control without wage control, you cannot have wage control without price control.

Furthermore, this is a departure in that it involves contracts where the Government is not a party. Therefore, it is price control and does not belong in either committee that claims jurisdiction.

Mr. TALMADGE. Mr. President, I yield 3 minutes to the distinguished ranking minority member of the subcommittee, the Senator from Kansas (Mr. DOLE).

Mr. DOLE. I will defer to the Senator from New Hampshire.

Mr. KENNEDY. I yield 3 minutes to the Senator from New Hampshire.

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. DURKIN. Mr. President, I thank the Senators from Georgia, Kansas, and Massachusetts.

I rise in support of the proposition of the Senator from Massachusetts. I have had a considerable amount of experience with the whole problem of cost containment with respect to medical care, growing out of 5 years as insurance commissioner, 5 years of trying to hold down Blue Cross and Blue Shield rates in the States of New Hampshire and Vermont.

Mr. President, we are never going to get a comprehensive health insurance program in this country until we start controlling the costs that the people incur with respect to hospitalization.

In going around the State of New Hampshire, rarely do we speak to a group in which there is not at least one person at each table who was faced with economic bankruptcy because of the illness of someone in that family.

This is true whether they be categorized as conservative, liberal, moderate, independent, registered, unregistered.

The people today fear the bill more than they fear the diagnosis. They fear the medical bill more than they fear the surgeon's scalpel.

We are the only industrialized country in the free world that does not have a comprehensive health insurance program. It is something we owe to our citizens. It is something we owe not just to the senior citizens. It is something we owe to citizens of all ages, because when the illness strikes, and the family fortune, no matter how small or how large it may be, is depleted, it just does not bring economic disaster to the senior citizen, it brings economic disaster to that whole family.

I know why some of the groups are opposing this amendment. They know if we do not get this amendment, do not get legislation of this type, we are not going to be able to afford a comprehensive health insurance program.

This is a modest first step. There are going to be problems working it out. HEW is going to have a few problems working this out. But it is nowhere near the problem that every family in America faces, rich or poor.

So, Mr. President, I urge that the Senate look favorably upon this proposal of the Senator from Massachusetts. I think if we could pass this, we would go a long way to improving the record of the Senate and the 95th Congress.

Mr. DOLE. Will the Senator from Georgia yield?

Mr. TALMADGE. Yes. I yield the Senator 3 minutes.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I appreciate the Senator's yielding. I appreciate the concern everyone has expressed.

Mr. President, for more than a year now, four committees of Congress have been considering a proposal to mandate economic countrol of hospital revenues. Since the Carter administration introduced its hospital cost containment bill last year, a number of my distinguished colleagues in both the Senate and House have devoted considerable efforts to developing a workable solution to the incredibly complicated issues articulated by that legislation. The amendment that Senator KENNEDY proposes today places a cap on annual increases in the inpatient revenues of our Nation's community hospitals. It advances this proposal as a temporary short-term measure intended only to get a handle on the immediate critical problem of inflationary hospital costs. I strongly oppose any Federal controls that would go into effect if this proposal were accepted. I believe that such economic controls are arbitrary, compounded by the fact that the proposal focuses unfairly on only one segment of the health industry in the economy at large.

Earlier this year, the American Hosital Association, the American Medical Association, and the Federation of American Hospitals, on behalf of the Nation's hospitals and physicians, initiated a voluntary effort to control hospital cost increases. The sponsors of this voluntary program have stated that the program is intended to achieve a "significant reduction in the rate of increase in hospital care costs." Specifically, the program aims to reduce the rate of increase in hospital expenditures by 2 percentage points a year over this year and the next, to assure that no net increase in hospital beds occur during 1978, and reduce new capital investments during the coming year. The program is to be administered in large part at the State level. I believe this voluntary program should be given every opportunity to meet its objectives.

RESPONSIBLE ALTERNATIVE

I believe that the distinguished Senator from Massachusetts and his colleagues on the Human Resources Health Subcommittee have made a valiant effort to address the very difficult problems that confront us, I, too, have a deep concern for the impact which health care costs have had on all Americans. I also recognize that the delivery system itself is not completely responsible for generating those inflationary pressures. Rising labor and supply costs; the need to constantly operate equipment and facilities; skyrocketing malpractice premiums; and compliance with a proliferation of new regulations have all played a part in the dilemma we have managed to reach today.

Those are conditions which apparently have gone unnoticed by the proposal to arbitrarily impose a cap on hospital reimbursement increases. Without assuring that corresponding limits would be placed on price hikes and improved services which the hospital must purchase, however, it is unrealistic and inequitable to expect our health care institutions to bear the entire burden of alleviating the rising health care cost problem.

I think the most sensible and thoughtful approach toward moderating health care costs to the Government is represented by H.R. 5285, which contains our medicare and medicaid reimbursement reforms which were originally sponsored by Senator TALMADGE and a number of other Senators including myself. As my distinguished colleague, Senator TALMADGE has said, "this legislation provides a long-term basic structural answer to the problem of rising hospital costs, whereas the administration is calling for a short-term interim cap on revenues to be in place until only a long-term solution can be established."

I fully support Senator TALMADGE'S concerns about the effectiveness of the administrations' cap on revenues. First, an undifferentiated, across-the-board revenue limit may become a floor. Second, it may serve to penalize these hospitals who have tried to economize while rewarding those who have been inefficient. Third, if hospitals have to switch from current control mechanisms on reimbursement, to a temporary revenue cap for several years, and then on to another permanent reimbursement control mechanism, any savings resulting from the cap may be swallowed up in the chaos of adjusting to the imposition of these controls.

Mr. President, I do not believe in mandating economic controls over hospital revenues. I do believe it is necessary to reform the current mechanisms for reimbursing hospitals in order to insure the reasonableness of hospital costs. I also believe the private sector is making a bona fide effort to keep down the rate of hospital cost increases. I therefore oppose the amendment pending before us sponsored by Senator KENNEDY.

We have before us the efforts of the chairman of our Subcommittee on Finance, and we have before us an amendment by the distinguished Senator from Massachusetts.

Certainly, I think everyone has the same objective and the same goal. I think everybody has the same concern. But I am not certain we yet understand how to achieve it, whether it is from the voluntary effort that is being developed and tried now by some of the hospitals or some other methods.

It is easy to stand up and say that we are going to save $60 billion. I understand that since that chart was made, there is another estimate by the Budget Office that now indicates the savings have dropped to $33 billion. I do not

quarrel with the figures, but I quarrel with what we are attempting to do.

There is not anyone in this Chamber I know of who is not concerned about controlling hospital costs, if it can be done fairly and with a great deal of equity and reward to the good hospitals, and perhaps not result in breaking the bad hospitals.

It is certainly not fair, as the distinguished Senator from Pennsylvania pointed out, to pass through certain costs and not pass through anything else as this amendment suggests. That is not cost containment.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts has 1 minute remaining.

Mr. KENNEDY. Mr. President, the best response to the arguments of the Senator from Kansas is that nine States now have mandatory programs and they are saving their local governments, State governments, tens of millions of dollars.

Under our particular proposal, if the State meets the requirements, they are completely free from this program.

Those States that have the voluntary program, have gone down from 15.8 percent to only 15.6 percent; while those that have had the mandatory program have gone down to about 12 percent.

So the fact of the matter is, Mr. President, that this concept is, in fact, working successfully in the States. But with our program we will save the taxpayers under medicare and medicaid, and we think the workers, the farm workers, the businessmen, and the elderly people, billions of dollars.

Mr. President, I guess the time has expired.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that John McLaren of my staff be granted privileges of the floor during consideration of this bill and votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, I believe all the time of the Senator from Massachusetts has expired. I am willing to yield back the remainder of my time.

Mr. President, I move to table the amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having expired or been yielded back, the question is on agreeing to the motion to lay on the table the amendment of the Senator from Massachusetts. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from Iowa (Mr. CLARK), the Senator from Alaska (Mr. GRAVEL), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY) and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Michigan (Mr. GRIFFIN), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan (Mr. GRIFFIN), the Senator from Idaho (Mr. MCCLURE) and the Senator from Texas (Mr. TOWER) would each vote "yea."

The PRESIDING OFFICER (Mr. GLENN). Have all the Senators in the Chamber voted?

The result was announced—yeas 69, nays 18, as follows:

[Rollcall Vote No. 483 Leg.]

YEAS—69

Allen	Hansen	Moynihan
Baker	Hart	Nunn
Bartlett	Hatch	Packwood
Bayh	Hatfield, Mark O.	Pearson
Bellmon	Hatfield, Paul G.	Percy
Bentsen	Hayakawa	Proxmire
Biden	Heinz	Riegle
Brooke	Helms	Roth
Bumpers	Hodges	Sarbanes
Burdick	Hollings	Sasser
Cannon	Huddleston	Schmitt
Chafee	Inouye	Schweiker
Chiles	Jackson	Sparkman
Church	Johnston	Stafford
Curtis	Laxalt	Stennis
Danforth	Leahy	Stevens
DeConcini	Long	Stevenson
Dole	Lugar	Stone
Eagleton	Magnuson	Talmadge
Eastland	Matsunaga	Thurmond
Ford	Melcher	Wallop
Garn	Morgan	Young
Glenn	Moynihan	Zorinsky
Goldwater	Nunn	

NAYS—18

Abourezk	Durkin	Muskie
Anderson	Humphrey	Nelson
Byrd, Robert C.	Javits	Pell
Case	Kennedy	Randolph
Cranston	McGovern	Ribicoff
Culver	Metzenbaum	Williams

NOT VOTING—13

Byrd, Harry F., Jr.	Griffin	McIntyre
Clark	Haskell	Scott
Domenici	Hathaway	Tower
Gravel	Mathias	Weicker
	McClure	

So the motion to table Mr. KENNEDY's amendment (No. 3477), as modified, was agreed to.

Mr. TALMADGE. Mr. President, on the bill I yield 2 minutes to the distinguished Senator from California for a privileged matter.

PRIVILEGE OF THE FLOOR—CONFERENCE REPORT ON H.R. 10173

Mr. CRANSTON. I thank the Senator very, very much.

I ask unanimous consent that John Pressly, Garner Shriver, and Mary Sears, be accorded the privilege of the floor during consideration of this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

VETERANS' AND SURVIVORS' PENSION IMPROVEMENT ACT OF 1978—CONFERENCE REPORT

Mr. CRANSTON. Mr. President, I submit a report of the committee of conference on H.R. 10173 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 10173) to amend title 38, United States Code, to improve the pension programs for veterans, and survivors of veterans, of the Mexican border period, World War I, World War II, the Korean conflict, and the Vietnam era, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the proceedings of the House of Representatives.)

Mr. CRANSTON. Mr. President, this matter has been cleared on both sides. It is a fine bill.

Mr. President, I rise to urge my colleagues to support the conference report on H.R. 10173, the proposed "Veterans' and Survivors' Pension Improvement Act of 1978." This measure reflects the best efforts of the Senate and House conferees charged with the responsibility of resolving the differences between H.R. 10173, as passed by the House on June 28, 1978, and the Senate amendment to H.R. 10173, agreed to by the Senate on July 31, 1978. The conferees met on September 29, 1978, and October 3, 1978, and I strongly believe that the product of our work is an equitable and reasonable resolution of the differences between the two versions.

Mr. President, our committee established as a major priority in the 95th Congress the enactment of meaningful pension-reform legislation. The conference agreement represents the achievement of this goal and is the culmination of a sustained 5-year effort to reform and restructure the need-based VA pension program.

BACKGROUND

Mr. President, with the cosponsorship of all the members of the Committee on Veterans' Affairs, and the Senator from New Jersey (Mr. WILLIAMS), on December 15, 1977, I introduced S. 2384, a bill intended to correct very serious inequities and deficiencies in the Veterans' Administration need-based pension program for wartime veterans who are totally and permanently disabled from nonservice-connected causes or age 65 or over and the survivors of wartime veterans. Mr. President, there are about 2.6 million persons receiving VA pension benefits under the current program—1 million veterans and 1.6 million surviving spouses and children. In fiscal year 1978, the VA budget for this program was $3.4 billion according to CBO.

The Senate Committee on Veterans'

Affairs unanimously reported S. 2384 with an amendment in the nature of a substitute on July 17, 1978, and on July 31, the Senate passed—by a vote of 85 to 0—S. 2384, the provisions of which were then substituted into H.R. 10173, the pension-reform measure previously passed by the House.

BASIC PURPOSE OF PENSION-REFORM LEGISLATION

Mr. President, The conference agreement generally achieves the purposes set forth in our committee report on S. 2384 (S. Rept. 95-1016), and thus will provide for a new, more equitable, and adequate pension program that will:

First, assure an income standard sufficiently above the Department of Labor's poverty guidelines so that all eligible veterans and survivors receive a pension commensurate with their need;

Second, prevent eligible veterans and survivors from having to turn to welfare;

Third, guarantee regular annual increases in pension benefits based on the increase in the Consumer Price Index;

Fourth, guarantee that annual increases in pension benefits occur at the same rate and at the same time as cost-of-living increases in social security benefit rates—so that no person in the pension program will suffer a reduction in pension solely attributable to a cost-of-living increase in benefits paid under the social security or any other Federal retirement program; and

Fifth, ensure that our needy World War I veterans are not forgotten.

MEETING WITH PRESIDENT

Mr. President, on September 15, 1978, members of the Senate and House Veterans' Affairs Committees met with the President to exchange views on the necessity for pension reform. Although the President was not in full accord with either the House or the Senate versions, he agreed with us that it is very important to correct the inadequacies and deficiencies of the VA pension program. He asked us to act responsibly with respect to the difficulties that could be created by a very costly bill—in terms of short-range and long-range costs—and assured us that he supports the VA pension program and, generally, the objectives I have just set forth.

MAJOR DIFFERENCES BETWEEN HOUSE AND SENATE VERSIONS AND CONFERENCE RESOLUTION

Mr. President, although the House and the Senate were in agreement on two key concepts—the change to an annual income-standard approach and automatic annual cost-of-living increases—there were a number of substantive and technical differences between the two versions. I would like to outline briefly the major issues and summarize the resolutions reached under the conference agreement:

First, the House bill provided for a maximum annual rate of $4,000 for a veteran without dependents; under the Senate amendment, that rate would be $3,240. The conferees agreed on a rate of $3,550, with proportionate increases in the rates for veterans who have one dependent and for those who are in need of regular aid and attendance or who are permanently housebound.

Second, the House bill provided for automatic eligibility for the higher "housebound" rate—$4,804—for any veteran attaining the age of 80. The Senate amendment provided for a 25-percent increase in the rate payable to veterans—principally World War I veterans—who were never made eligible for GI bill benefits such as educational assistance or home-loan guaranties. The conference provides for an $800 increase in the income standard for those veterans—World War I and the Mexican border period veterans—who were never made eligible for GI bill benefits.

Third, the Senate amendment, but not the House bill, provided for a partial exclusion of the current-work income of the family of a veteran or surviving spouse. The conference agreement—most regrettably, I believe—does not contain this provision.

Fourth, with respect to grandfather provisions, the House bill generally provided for the continuation of pension benefits at the same rate as the pensioner is receiving prior to the effective date of the bill for any current-law pensioner who does not apply for benefits under the new program. The Senate amendment provided that such pensioners would continue under the current program so long as they remain eligible. The conference agreement provides for grandfathering along the lines of the House bill, and continues the current-law requirements with respect to basic eligibility and net worth limitations. Also, grandfathered pensioners would continue to be subject to annual income limitations—increased by 7.1 percent as of January 1, 1978—and indexed thereafter in accordance with social security cost-of-living increases.

Fifth, the Senate amendment would have restructured the parents' dependency and indemnity compensation program—a need-based program for the surviving parents of veterans whose deaths were service connected—along the lines of the restructured pension program. The House bill did not contain a comparable provision; but the conferees noted that on September 18, 1978, the House passed H.R. 11887, a bill to provide a cost-of-living increase of approximately 6 percent in that program. The conference agreement provides for a cost-of-living increase of 7.1 percent—the most recent Congressional Budget Office estimate of the appropriate increase—effective January 1, 1979, and automatic annual adjustments in that program thereafter in accordance with social security cost-of-living increases.

I would like to note that the Senate amendment, as amended on the floor by the Senator from Oklahoma (Mr. BELLMON)—unprinted amendment No. 1541—contained a provision to require a report by OMB on VA-Social Security coordination with respect to the income security programs of those agencies. In lieu of this provision, the conferees agreed to request the Comptroller General, in consultation with OMB, to prepare the report along the lines of the Senate amendment. Also, the conference agreement does not contain the amendment—unprinted amendment No. 1539—added by the Senator from New York (Mr. JAVITS) eliminating the State-local matching requirement for the repayment of VA educational loans in connection with the program of accelerated payment of educational assistance benefits. The House conferees were adamant in their opposition to this amendment, which they asserted would have been subject to a point of order in the other body as a part of this bill. The Senate conferees did their utmost to convince the House on this point, but in vain.

COST IMPACT OF CONFERENCE REPORT

Mr. President, before turning to a description of the provisions of the conference report, I would like to note that on October 6, 1978, the committee received from the Congressional Budget Office an estimate of the costs of the conference agreement on H.R. 10173. The CBO estimate indicates that the increased outlays required for the last three-quarters of 1979 and the 4 following years would be: $465,800,000 in fiscal year 1979; $947,000,000 in fiscal year 1980; $1,268,000,000 in fiscal year 1981; $1,648,100,000 in fiscal year 1982; and $2,041,400,000 in fiscal year 1983.

Mr. President, those costs do not indicate the net increased Federal outlays required for each fiscal year, taking into account offsetting outlay reductions in function 600 for AFDC and SSI benefits and in function 550 for medicaid expenditures; and they are based on the assumption that, in the absence of pension restructuring legislation along the lines of the committee bill, Congress would not enact any cost-of-living increases in the current pension program. That assumption is, however, in my view, not realistic in light of continuing inflation and consistent congressional actions in the last decade granting cost-of-living increases. Rather, it is much more realistic to measure the costs of the conference agreement against the "current policy" costs of the present program, that is, against the estimated costs of the present program including future cost-of-living increases which could be expected in the absence of the enactment of pension reform. The CBO estimate of the 5-year outlay costs of the conference agreement in those terms, by fiscal years, is as follows:

[In millions]

1979	$258.2
1980	416.3
1981	431.3
1982	492.7
1983	561.6

The Federal costs of the legislation would, as I have noted, be further reduced by offsetting savings in functions 550 and 600, estimated by CBO as approximately $122,000,000 in fiscal year 1979 and rising to $572,000,000 in fiscal year 1983.

In addition, I would also note, Mr. President, that the Office of Management and Budget has prepared a long-range cost estimate of the costs of the current program, compared to the estimated long-range costs of the conference agreement; this comparison indicates that sizable cost savings—in the vicinity of $200 million—would be achieved by 1990 if the conference agreement is approved and those savings would rise thereafter

to approximately $500 million annually by fiscal year 2000.

DISCUSSION OF CONFERENCE REPORT

Mr. President, the conference agreement has 5 titles: I—Pension for Veterans and Survivors; II—Dependency and Indemnity Compensation for Surviving Parents; III—Miscellaneous Provisions and Conforming Amendments, and IV—Effective Dates.

TITLE I: PENSION FOR VETERANS AND SURVIVORS

Mr. President, the provisions of title I would:

First, establish a restructured program of pension benefits, generally payable monthly to needy wartime veterans who are permanently and totally disabled by reason of non-service-connected disability, or who are age 65 or over, with the following annual rates, reduced by the amount of the annual countable income of the veteran and that of the veteran's spouse and dependent children, if any:

Veteran without dependent spouse or child	$ 3,550
Veteran with one dependent (spouse or child)	4,651
Veteran in need of regular aid and attendance without dependents	5,680
Veteran in need of regular aid and attendance with one dependent	6,781
Veteran permanently housebound without dependents	4,340
Veteran permanently housebound with one dependent	5,441
Two veterans married to one another	4,651
Increase for each additional dependent child	600

Second, provide for an increase of $800 in the maximum annual rate—income standard—in pension payable to veterans of a period of war if veterans of that period of war—such as World War I—were not made eligible for VA educational assistance or home loan benefits similar to those provided under chapters 34 and 37 of title 38, United States Code, or prior corresponding provisions of law.

Third, establish a restructured program of pension benefits payable monthly to needy surviving spouses of wartime veterans. The applicable annual rates, reduced by the amount of the surviving spouse's annual countable income, and by the income of dependent children, if any, are as follows:

Surviving spouse without dependent child	$2,379
Surviving spouse with one dependent child	3,116
Surviving spouse in need of regular aid and attendance without dependent child	3,806
Surviving spouse in need of regular aid and attendance with one dependent child	4,543
Surviving spouse permanently housebound without dependent child	2,908
Surviving spouse permanently housebound with one dependent child	3,645
Increase for each additional dependent child	600

Fourth, restructure the program of pension benefits payable monthly to each of the needy surviving children of wartime veterans. Such children would be eligible if there is no surviving spouse, if the surviving spouse is ineligible for pension by reason of income or remarriage, or if such children are not in the custody of the surviving spouse. The maximum annual rate, reduced by the child's annual countable income and by the incomes of any persons with whom the child is residing who are legally responsible for the child's support, would be $600.

Fifth, require that all income from whatever source derived be counted for purposes of determining eligibility and the amount of pension payable for a veteran or surviving spouse, subject to nine exclusions. They are:

First. Donations from public or private relief or welfare organizations.

Second. Amounts equal to amounts paid by a surviving spouse or child for the veteran's just debts and the unreimbursed expenses of the veteran's last illness and burial.

Third. Amounts equal to amounts paid for the last illness and burial expenses of a veteran's spouse or child.

Fourth. Fire insurance policy proceeds.

Fifth. Profit from the sale of real or personal property other than in the course of a business.

Sixth. Amounts in joint accounts acquired by reason of the death of the other coowner.

Seventh. Current-work income of a dependent or surviving child, up to the amount of income required before the child must file a Federal income tax return under section 6012 of the Internal Revenue Code of 1954—currently $2,950; and amounts of the child's current-work income equal to amounts paid by the child for postsecondary educational or vocational rehabilitation training expenses.

Eighth. Amounts equal to amounts paid by a veteran or surviving spouse pursuing a course of education or vocational rehabilitation or training for educational expenses, including tuition, fees, books, materials, and, in the case of such a veteran or surviving spouse in need of regular aid and attendance, related unusual transportation expenses.

Ninth. Amounts equal to the amount exceeding 5 percent of the basic maximum annual rate—including increases for dependent children—for unreimbursed medical expenses paid by the veteran, the veteran's spouse, the surviving spouse, or by or on behalf of the surviving children.

Further, the conference report would:

Sixth, require that the payment of pension be denied or discontinued when the net worth of a veteran, including the net worth of a veteran's spouse, is such that some portion thereof could reasonably be expected to be used for the support of the veteran. Similar provisions would require the denial or discontinuance of pension if the net worth of a surviving spouse, including the net worth of dependents, or of a surviving child, including the net worth of any persons with whom the child is residing who are legally responsible for the child's support, is excessive.

Seventh, require income and net worth reports to be filed annually with the VA by any person applying for or receiving pension; and require prompt notifications to the VA by such persons of changes in income and net worth and in the dependency status of family members.

TITLE II: DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING PARENTS

Mr. President, the provisions of title II would:

First, provide for a cost-of-living increase of 7.1 percent in the maximum monthly rates and annual income limitations under the parents' DIC program, and cost-of-living adjustments in the less-than-maximum rates.

Second, provide for annual automatic adjustments in parents' DIC benefits, to take place at the same time and by the same percentage as social security cost-of-living increases.

TITLE III: MISCELLANEOUS PROVISIONS AND CONFORMING AMENDMENTS

Mr. President, the provisions of title III would:

First, provide that a reduction in or discontinuance of pension or parents' DIC benefits resulting from a change in income would be effective at the end of the month in which the change occurs.

Second, require the VA to increase pension rates annually by the same percentage and at the same time as social security cost-of-living increases.

Third, provide that any person who is receiving pension on the effective date of the new program who elects benefits under the restructured program within 9 calendar months after such effective date shall be paid benefits retroactive to the effective date to the extent they exceed benefits already paid.

Fourth, provide generally that current pensioners who do not elect pension under the restructured program shall continue to receive pension benefits at the same rate as they are receiving on December 31, 1978, and prevent terminations of such persons so long as their incomes do not rise at a rate higher than the Consumer Price Index.

Fifth, require a comprehensive study by the VA of the issues involved in payment of pension benefits to persons residing outside the 50 States and the District of Columbia, including analyses of relevant aspects of the economies of the countries or U.S. territories, possessions, or commonwealths where such persons reside, estimates of present and future costs of pension benefits to such persons, and recommendations to the Congress on the desirability of modifying the pension program for such persons.

Sixth, provide that the maximum pension payable to a veteran who has no spouse or child shall not exceed $60 per month after, first, 2 full calendar months of VA domiciliary care; second, 3 full calendar months of VA hospital or nursing home care; or third, the month of readmission for such care if the readmission occurs within 6 months after a period of care lasting 2 full calendar months or more.

TITLE IV: EFFECTIVE DATES

Mr. President, title IV provides for an effective date of January 1, 1979, for the title 38 amendments concerning the pension and parents' DIC programs. Other

provisions of the conference report would be effective upon enactment.

Mr. President, as I previously noted, CBO has prepared a cost estimate, and the Office of Management and Budget has prepared a cost estimate of the long-range costs—for the years between 1980 and the year 2000—of the conference report. I ask unanimous consent that the CBO cost estimate be printed in the RECORD at this point followed by the OMB estimate.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGRESSIONAL BUDGET OFFICE,
U.S. CONGRESS,
Washington, D.C., October 6, 1978.

Hon. ALAN CRANSTON,
Chairman, Committee on Veterans Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has prepared the attached cost estimate for H.R. 10173, the Veterans' and Survivors' Pension Improvement Act of 1978, as agreed upon in Conference.

Should the Committee so desire, we would be pleased to provide further details on the attached cost estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

CONGRESSIONAL BUDGET OFFICE COST ESTIMATE
OCTOBER 6, 1978.

1. Bill number: H.R. 10173.

2. Bill title: The Veterans' and Survivors' Pension Improvement Act of 1978.

3. Bill status: As agreed upon in Conference, October 3, 1978.

4. Bill purpose: The bill would establish a new non-service-connected pension program for the veterans and survivors of the Mexican Border Period, World War I, World War II, the Korean Conflict, and the Vietnam Era. The new program, which would take effect on January 1, 1979, would operate concurrently with the existing program. Those individuals who are receiving benefits under the existing program on the effective date of the bill would have the option of selecting whichever program offered them the higher benefit. The pension payable to a beneficiary electing to remain under the current program would not be adjusted for changes in income unless the income of the beneficiary exceeded the income limits for the current program. These income limits, however, would be adjusted annually for inflation in the same manner as rates under the reform program. Election of the reformed program, however, would be irrevocable, and all new cases would only be eligible for the reformed pension.

The maximum benefit levels set by H.R. 10173 would be $3,550 annually for a veteran with no dependents and $4,651 for a veteran with one dependent. A surviving spouse would be paid at rates that are two-thirds those for veterans ($2,379 annually for a surviving spouse without dependents, and $3,116 for a surviving spouse with a child). The benefit level for all pensioners would be increased by $600 a year for each dependent after the first. All rates under the reformed pension program would be adjusted annually for increases in the cost of living using the same percentage by which social security benefits are raised. Such increases would be effective at the same time as social security increases.

The treatment of non-pension income under the reformed program would be based on the family-income concept, whereby the incomes of all beneficiaries in the family are treated the same. Under current law, for example, social security survivors' benefits paid to dependent children of surviving spouses or to children alone are not counted against their pension payment, on the theory that this money is considered a trust for the child's education. The reformed pension, however, would treat the income of children in the same fashion as the income of other family members to the extent that such income is reasonably available to the veteran or surviving spouse.

Many of the exclusions of non-pension income permitted under current law would not be allowed in the reformed program. The exclusion of 10 percent of retirement or annuity income would no longer be permitted. The current provisions dealing with the income of a veteran's spouse would also be discontinued.

Whereas the current pension program uses a formula rate structure to determine the payment level, the reformed program would employ the single-variable method now utilized by the Supplemental Security Income program. The pension payment would be calculated by subtracting countable income from the maximum benefit level.

H.R. 10173 would also increase the benefits payable to parents under the dependency and indemnity compensation program by 7.1 percent. In future years these benefits would be indexed by the same increases as apply to reform pension rates.

5. Cost estimate:

[By fiscal years; in millions of dollars]

	1979	1980	1981	1982	1983
Benefit costs:					
Outlays	465.8	947.0	1,268.0	1,648.1	2,041.4
Savings:					
SSI	−56.9	−102.6	−153.2	−208.9	−270.7
AFDC	−15.2	−22.7	−31.0	−40.0	−50.0
Medicaid	−50.3	−90.9	−137.6	−190.8	−251.5
Net outlays	343.4	730.8	946.2	1,208.4	1,469.2
Required budget authority	523.4	966.8	1,294.2	1,678.9	2,072.9
Savings:					
SSI	−56.9	−102.6	−153.2	−208.9	−270.7
AFDC	−15.2	−22.7	−31.0	−40.0	−50.0
Medicaid	−50.3	−90.9	−137.6	−190.8	−251.5
Net required budget authority	401.0	750.6	972.4	1,239.2	1,500.7

The costs of this bill fall within budget function 700. The offsetting savings in the AFDC and SSI programs apply to function 600 and the offsetting savings in Medicaid to function 550.

6. Basis for estimate:

Cost model for VA benefit costs: The gross program costs of this bill were estimated through the use of a microsimulation model. The data base for this computer model is a one percent sample of all veteran and surviving spouse cases receiving pension under the currently active VA pension program. The sample, which includes the records of nearly 20,000 cases, was extracted from the master file of pension cases in March, 1977. Each record contains, in addition to statistical data such as age, number of dependents, and period of military service, detailed data on the amounts and sources of income received by the case.

To compute the cost of pension program alternatives, the model operates on each of the 20,000 records individually. A case is first aged and mortality assumptions are applied. The non-pension income reported by the case is then updated, using specific economic indicators for each source of income. If the case is a current pension recipient, the model determines which pension program would return the highest payment amount. The case is then assigned to the most advantageous program and recycled through the procedures until all five years of the simulation have been completed. Once the model "switches" a case from the existing pension to reform pension, the model assumes the case to be ineligible under the old program in future years.

When the entire data base has been analyzed to estimate how current beneficiaries would behave given the choice of new or old pension benefits, the process is reinitiated to select new cases. An estimated number of new cases that could be expected to accede to the current program is used to represent the number of potential applicants to the reformed system. This number of cases, once it has been reduced to correspond to the sample size, is randomly selected from the data base of current recipients. These "new" cases are then analyzed in the same manner as current beneficiaries, with the exception that they are assumed to be eligible for the reformed pension only. Counts are kept of the movement and disposition of cases at every stage of the model operation by period of service, type of beneficiary, and year. These counts are then inflated to the full population size to calculate the cost of the proposal.

Other factors: It is not practical to show the cost of H.R. 10173 on a section-by-section basis, because a change in one section will affect the number of individuals who switch to the new program and, thereby, change the cost of other sections. A few sections which could not be handled by the microsimulation model, however, are discussed below.

Payments to Institutionalized Pensioners: H.R. 10173 would increase from $50 to $60 the maximum pension payable to a veteran with no dependents who is being furnished hospital, nursing home, or domiciliary care by the VA. This section also provides that full pension benefits could be paid for as long as six months in the case of hospital and nursing home patients if it is shown that the extension of full benefits would facilitate the veteran's ability to return to the community. Based on information from VA that there were 7,430 such institutionalized pensioners in June 1977, the estimated cost of this provision is shown below:

[By fiscal years; in millions of dollars]

	1979	1980	1981	1982	1983
Outlays	1	1.1	1.2	1.3	1.4
Required budget authority	1	1.1	1.2	1.3	1.4

Counting Childrens' Income: In keeping with the family-income concept on which the reformed pension is based, H.R. 10173 provides that all income of dependent children and children alone (those children not in the custody of an eligible surviving spouse) would be considered in determining their pension benefit level. Although no

data are currently available on the incomes of pension children, as they are not required to submit an annual income questionnaire, it is expected that the vast majority of children alone and dependent children of widows receive social security benefits in amounts sufficient to render the cases ineligible under the reformed program. Those children cases presently receiving pension would, therefore, remain under the existing pension program and have no impact on the cost of the new program. There would, however, be substantially fewer new children cases under the reformed program than would be expected under the current program. The amount of the resulting savings cannot be determined with any precision given the data available.

DIC Parents Program: H.R. 10173 would index the benefits for Dependency and Indemnity Compensation for increases in the cost of living. Based on an April, 1977 income distribution of these beneficiaries, the estimated cost of this provision would be as follows:

[By fiscal years; in millions of dollars]

	1979	1980	1981	1982	1983
Outlays	4.0	11.0	15.8	20.2	24.4
Required budget authority	4.5	11.4	16.2	20.5	24.8

"Grandparenting" Current Recipients: In addition, H.R. 10173 would allow individuals who are receiving benefits under the current program on the effective date of the bill to remain under the provisions of current law or to elect to receive the new program as they see fit. Election of the reformed program can be made at any time, but once made, the switch is irrevocable. A similar election provision was contained in P.L. 86–211, which established the present pension program in 1960. A study made by the VA in 1966, six years after the enactment of the program, found that there were still over 100,000 cases who were losing money through failure to elect the new program. Unfortunately, there is insufficient data to determine what percentage this represents of the total number of pensioners who were initially expected to benefit from switching to the new program. Based on what little information is available from this study, it can be expected that some number of persons will choose not to elect the reformed program even though it would provide them with higher benefits.

The experience of P.L. 86–211 will not correspond directly to what would be expected to occur following the enactment of H.R. 10173, however. Under the provisions of the earlier law, there were several reasons for some pensioners to refuse election. In some cases a pensioner could have lost money in the long run by switching to P.L. 86–211 pension, even though the benefits were higher at the time of election, because of changes in the sources of the veteran's income. For this reason the veterans' service organizations did not support P.L. 86–211 and did not encourage the pensioners in their membership to elect it.

Situations of this sort should not occur in the reformed pension program. If an individual is ever better off under reformed pension, that individual should always be better off under that program. Therefore, although the rate of switching to the reformed program will not be 100 percent of those who would benefit, it should be higher than the rate experienced after enactment of P.L. 86–211. This estimate assumes that every pensioner who would benefit by $1 or more from electing the reformed pension program will make the switch. Because past experience suggests that this may happen for reasons which cannot be predicted, it is possible that the costs of H.R. 10173 could be lower than estimated for the first five years.

Budget Authority: Although this bill would result in additional future federal liabilities through an extension of an existing entitlement, the bill would require subsequent appropriation action to provide the necessary budget authority. These figures shown in the cost estimate above as "Required Budget Authority" represent that amount of budget authority needed to cover the estimated outlays that would result from enactment of H.R. 10173.

The outlays shown in this estimate are lower than the budget authority, because pension benefits paid in any given month are the results of beneficiary entitlement in the prior month. The obligations created in each September, therefore, would not outlay until October, which would be in the next fiscal year.

VA costs assuming inflation in the current program: Although veterans benefits are not indexed for inflation, the non-service-connected pension program has received legislated cost-of-living increases every year except one since 1971. Given this precedent, it may be of value to examine the cost of H.R. 10173 over the cost of the current program with annual cost-of-living adjustments. These costs are shown below for informational purposes only. They do not reflect the budgetary impact of H.R. 10173.

[By fiscal years; in millions of dollars]

	1979	1980	1981	1982	1983
Gross outlays assuming inflation in the current program [1]	258.2	416.3	431.3	492.7	561.6

[1] These are gross outlay estimates only. The offsets shown on p. 3 do not correspond to these figures.

7. Estimate comparison: A VA cost estimate of the conference version of H.R. 10173 was not available in time for inclusion here.

8. Previous CBO estimate: CBO has provided numerous cost estimates of pension reform proposals to both Veterans Affairs Committees. The same methodology, however, was employed for all such estimates. Any variances would be attributable to changes in provisions or economic assumptions.

9. Estimate prepared by: K. W. Shepherd (225–7766).

10. Estimate approved by:

C. A. NUCKOLS
(for James L. Blum,
Assistant Director
for Budget Analysis).

ESTIMATES OF THE LONG-RANGE COSTS OF THE VETERANS PENSION REFORM (CONFERENCE REPORT), EARLIER YEARS REFLECT INTERPOLATION BETWEEN RESULTS OF THE SHORT-TERM AND LONG-RANGE SIMULATION MODELS—COST OF PARENTS' DIC IS OMITTED

[In millions of dollars]

	Short term (fiscal years)					Cumulative short term	Long range (selected years)					Cumulative long range
	1979 [1]	1980	1981	1982	1983	(1979–83)	1980	1985	1990	1995	2000	(1979–2000)
Total costs:												
Reform (conference report)	2,960	4,150	4,260	4,370	4,480	20,220	4,150	4,700	4,900	5,500	6,500	110,410
Current practice	2,590	3,615	3,802	3,989	4,176	18,172	3,615	4,550	5,161	5,825	6,030	109,204
Current law	2,440	3,155	3,052	2,949	2,846	14,442	3,155	2,640	1,825	1,440	1,105	44,745
Incremental costs (minus indicates savings):												
Reform over current practice [2]	370	535	458	381	304	2,048	535	150	−178	−328	470	1,190
Reform over current law	520	995	1,208	1,421	1,634	5,778	995	2,060	3,075	4,060	5,395	65,665

[1] Three-fourths year.
[2] Reform is expected to show savings over current practice in about 1987.

CONCLUSION

Mr. CRANSTON. Mr. President, in closing I want to express my deep gratitude to the chairman of the Subcommittee on Compensation, Pension, and Insurance of the House Committee on Veterans' Affairs (Mr. MONTGOMERY) and the chairman of the full Committee (Mr. ROBERTS), as well as the ranking minority members of the Subcommittee on Compensation, Pension, and Insurance (Mr. WYLIE) and of the full Committee (Mr. HAMMERSCHMIDT), all of whom ably participated in the conference, for their cooperative spirit and open-mindedness in fashioning the conference report, which deals with difficult and complex matters of great significance for VA pensioners. I am also very grateful to my distinguished colleagues, the ranking minority member of the Senate Committee on Veterans' Affairs, the Senator from Vermont (Mr. STAFFORD), and, for their continuing contributions, the chairman of the Subcommittee on Compensation and Pension, the Senator from Georgia (Mr. TALMADGE); the Senator from West Virginia (Mr. RANDOLPH); the Senator from Florida (Mr. STONE); the Senator from New Hampshire (Mr. DURKIN); the Senator from Hawaii (Mr. MATSUNAGA); the Senator from South Carolina (Mr. THURMOND); and the Senator from Wyoming (Mr. HANSEN).

In addition, I would also like to congratulate several members of the House Committee staff whose expertise and extraordinary diligence were invaluable in the development of this measure—Mack Fleming, Lou Townsend, Arnold Moon, John Holden, and Charles Parkinson—as well as the members of our committee staff who participated in this effort—Mary Sears, Ed Scott, Jon Steinberg, Garner Shriver, Gary Crawford, John Pressley, Harold Carter, Molly Milligan, Terri Morgan, Janice Orr, Ingrid Post Ann Garman, and Mikki Day. We also are very much indebted to our legislative counsels, Bob Cover of the House and Hugh Evans of the Senate; to Nina Shepherd of CBO; and to Judith Selvidge of OMB's Special Studies division; Guy McMichael, the VA's General Coun-

sel; J. C. Peckarsky, Director, VA Compensation and Pension Service; and other VA staff for their technical assistance.

I believe that this conference report is fully deserving of the Senate's support, and I urge its adoption.

I yield to the distinguished ranking minority member of the Committee on Veterans' Affairs, my colleague from Vermont, Bob STAFFORD, who worked so ably and hard, for any comments he chooses to make.

Mr. STAFFORD. Mr. President, I certainly appreciate the words of the distinguished Senator from California.

Mr. President, it has been a real pleasure to work with the distinguished Senator from California, and the other members of our committee, on this important matter.

Mr. President, the Veterans' and Survivors' Pension Improvement Act was considered and passed by the Senate on July 31, 1978. The improved program of veterans' pension benefits is a result of several years' study and effort on the part of many people to correct the inequities and deficiencies in the Veterans' Administration's pension program. Members of the Senate Committee on Veterans' Affairs are of the strong belief that the bill passed by the Senate was well-conceived and carefully structured to improve the pension benefits for those veterans and their survivors in need of income support.

The House of Representatives passed H.R. 10173 on June 28, 1978. There were many differences between the Senate and House versions of pension reform legislation, making necessary a conference to resolve the differences. It should be stated, however, that both House and Senate Committees on Veterans' Affairs have been in substantial agreement with reference to the major purposes of the legislation. Each committee produced a bill that would end the problem experienced by many veterans who receive VA pensions in the matter of a reduction in pension attributable to a social security cost-of-living increase. A reduction in pension attributable to adjustments in social security and other Federal retirement benefits has been the cause of a great deal of criticism and correspondence.

Both Senate and House versions would provide for increases in pension to levels where no disabled or elderly wartime veteran would have to go on welfare. Both Senate and House bills provided for annual automatic cost-of-living increases in their pension with such increase based on the Consumer Price Index. Consequently, those who most need the help against inflation would receive cost-of-living increase protection. Both bills provided substantial increases to the basic rates for the veteran's or surviving spouse's dependents and to the rates of severely disabled.

There remained, however, several major points of difference, and the conferees, on the part of both bodies, have compromised these differences and present the amended bill for Senate and House approval. The conferees spent considerable time on two occasions, and the conference was preceded by an informal meeting with the President in an effort of arriving at a fair and adequate pension program which the Nation's wartime veterans deserve, which both Senate and House will agree upon, and which the President will sign into law.

We do not contend that the end-product is as good or superior to the Senate-passed pension bill. We do believe the bill before us at this time is the best that could come from the conference between Senate and House. In this statement I intend to mention some of the important results of the Senate-House conference.

Both Senate and House bills attempted to meet the needs of older veterans—the veterans of World War I. It should be noted that veterans of World War I did not receive readjustment benefits generally available to veterans of later periods of war. The Senate bill's language relative to educational assistance benefits and home loan guaranty benefits to identify those eligible was retained in the amended bill now before us, and the bill provides for an increase of $800 in the income standards for these older veterans. In other words, the bill provides for an $800 annual add-on to the basic income standard for those veterans who are not eligible for educational and housing benefits.

The conference proposes a new income standard of $3,550 for the veteran who has no dependents. This represents a compromise between the positions of the two bodies. The basic principle continues, as previously stated, to be sure that pension rates should be determined by reference to a national minimum standard of need so that beneficiaries will have sufficient assured income to permit them to live in dignity.

It is appropriate to again acknowledge the special obligation our Nation owes to those veterans who served our country during time of war. An effective pension program should provide assurance that no veteran who served on active duty in wartime who is unable to support himself by reason of permanent and total nonservice-connected disability or age will be relegated to poverty levels of subsistence or to welfare programs to meet basic subsistence needs. We are of the view that the $3,550 provided for the veteran with no dependents, is a reasonable, responsible and adequate amount for the basic income standard. At $3,550 the percentage increase over the maximum annual benefit in the current pension program is a 50-percent increase. Of course, the income standards for other veterans—those with dependents and those who are housebound or in need of aid-and-attendance, and the income standard for survivors would be set at levels corresponding proportionately to the income standard for the veteran with no dependents.

There are other provisions of interest and importance in the veteran's reformed pension program. The statement of the conference report fully explains the provisions of H.R. 10173, as amended and as recommended for Senate approval. I urge adoption of the results of the conference, so that the veteran's pension reform legislation can proceed to the President and final passage of this needed legislation.

Mr. CRANSTON. Mr. President, I yield to Senator THURMOND, who also has done fine work on this measure, and who is a fine member of the committee.

Mr. THURMOND. Mr. President, I am pleased to support the Veterans' and Survivors' Pension Improvement Act (H.R. 10173), as amended. This measure will provide relief to the more than 1 million veterans and survivors currently receiving nonservice-connected veterans' pension benefits.

One of the most important provisions of this bill provides that a veteran's pension benefit will not be reduced solely due to a cost-of-living increase in social security. Also, those survivors receiving disability and indemnity (DIC) benefits will receive similar cost-of-living increases as well. This provision, I hope, will eliminate instances where a veteran and his family receive less social security and pension benefits after a social security cost-of-living increase than they did before the social security increase became effective. The bill further provides a new program of DIC for eligible surviving parents of a veteran who died of a service-connected disability.

Mr. President, an additional provision provides an $800 annual add-on benefit to the basic income standard for those veterans who are not eligible for educational and housing benefits. These veterans are primarily of the World War I era and have supported this Nation during some of its darkest periods.

Mr. President, as senior Republican member of the Senate Committee on Veterans' Affairs, I was extremely pleased to be a cosponsor of this bill and to labor in behalf of the veteran. It is often said that nothing is too good for the veteran during a time of war, but during a time of peace, veterans' benefits and entitlements should be reduced. I do not share that sentiment; rather, I believe that this Nation has a commitment to the men and women who served their country in a time of peril, especially those who lost their lives while rendering such service.

Mr. President, I fully support H.R. 10173, as amended, and urge my colleagues to do likewise.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. CRANSTON. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the conference report on H.R. 10173 be printed as a Senate report, along with the Cordon rule, which I send to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. I thank the Senator very much for yielding.

MEDICARE-MEDICAID ADMINISTRATIVE AND REIMBURSEMENT REFORM ACT

The Senate resumed consideration of the bill (H.R. 5285).

The PRESIDING OFFICER. The Senator from Wisconsin.

AMENDMENT NO. 3478

Mr. NELSON. Mr. President, I call up amendment No. 3478.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON), for himself, Mr. KENNEDY, Mr. JAVITS, Mr. ANDERSON, Mr. CRANSTON, Mr. EAGLETON, Mr. HASKELL, Mr. HATHAWAY, Mr. MOYNIHAN, Mr. PELL, Mr. RIBICOFF, Mr. RIEGLE, and Mr. WILLIAMS, proposes an amendment numbered 3478.

Mr. NELSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, may I say to the Members who are present that this amendment is the voluntary hospital cost containment amendment. This amendment simply implements by statute the voluntary program that has been put in place by the American Hospital Association. It simply provides that there will be standby controls that would go into effect on July 1, 1979, if the voluntary effort failed.

Mr. President, the distinguished Senator from Nevada wished to make a brief statement. I yield to him without losing my right to the floor.

Mr. CANNON. If I might engage in a short colloquy with the distinguished Senator from Wisconsin, for purposes of legislative history, I would like to clarify the meaning behind your amendment as modified by the amendment of the Senator from Florida, Mr. STONE.

The State of Nevada is one of the fastest growing States in the Nation. Last year, Nevada experienced the second largest population gain in the United States since 1970, according to the U.S. Census Bureau. Second only to Alaska, Nevada registered an increase of 29.6 percent. All evidence suggests that this growth is continuing. That is why the Stone amendment is so important, so as not to penalize Nevada hospitals whose increased expenses are largely a consequence of a burgeoning population.

A hidden factor in the demography of Nevada relates to our No. 1 industry: Tourism. This transient population exceeds 20 million persons each year and is evergrowing. Major construction of hotel and gaming facilities in Reno, Las Vegas, and Lake Tahoe is increasing expenses and burdens for hospitals in those areas.

I ask the Senator from Wisconsin if it is his understanding that this transient population will be considered by the Secretary of HEW in developing a formula reflecting increases in population, as would be established by the Stone amendment?

Mr. NELSON. I would understand the Stone amendment as giving the Secretary of HEW the authority to establish a formula to permit the maximum allowable rate of increases in total hospital expenses to reflect increases in population, higher rates of utilization of inpatient hospital services by individuals 65 years of age and older "and such other factors as he deems feasible and appropriate."

I would certainly consider the transient population described by the Senator from Nevada as an appropriate factor for the Secretary to include in offsetting the effects of increasing populations.

The hospitals of Nevada, and any other State for that matter, must provide care for those temporary residents known as tourists. The costs and responsibilities owed to these visitors is no less important than the service provided to permanent residents of a State. Because this reality generates a greater flow of money in a popular tourist State such as Nevada, hospitals serving that State should not be penalized for increasing business over which they have no control.

This is my reading of the Stone modification that is part of my amendment instituting standby hospital cost controls. I hope that it has reassured the Senator.

Mr. CANNON. I thank the Senator from Wisconsin for his explanation.

AMENDMENT NO. 3478 (AS MODIFIED)

(Purpose: Nelson modification to his amendment)

Mr. NELSON. Mr. President I send to the desk a modification of amendment No. 3478.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes a modified version of amendment numbered 3478.

The PRESIDING OFFICER. Is there objection to the modification being accepted? The Chair hears none, and it is so ordered.

The amendment, as modified, is as follows:

Page 3, line 3, is amended by striking out "Section 2(a)(1)" and by inserting in lieu thereof "(a)(2)" and by inserting before such line the following:

"SEC. 2. (a)(1) The amendments to the Social Security Act included in this section provide a more equitable basis for reimbursing hospitals for routine operating costs under titles XVIII and XIX, establish a Health Facilities Cost Commission to develop a more equitable basis for reimbursing hospitals for all costs covered by titles XVIII and XIX, set voluntary goals for hospital cost containment and impose standby increase limits on total inpatient reimbursement in the event that the voluntary goals are not met. The amendments to the Internal Revenue Code included in this section extend the standby increase limits to all payers by imposing excise taxes on hospital charges and reimbursements in excess of such limits.".

SEC. 2. Page 3, line 6, is amended by striking out "(2)" and inserting in lieu thereof "(3)".

SEC. 3. Page 3, line 5, is amended by striking out "subsection (bb)" and inserting in lieu thereof "subsections (bb), (cc), (dd), and (ee)".

SEC. 4. Page 3, line 10, is amended by striking out "subsection (bb)" and inserting in lieu thereof "subsections (bb), (cc), (dd), and (ee)".

SEC. 5. Page 6, line 6, is amended by striking out the word "and" and by inserting after such line the following: "and, the word "not."

SEC. 6. Page 9, line 22, is amended by striking out the word "and" and by inserting after such line the following: "and, under either division I or division II, not exceeding (on a per diem basis) the hospital's actual routine operating costs in its immediately preceding accounting year (or, with respect to the first accounting starting on or after July 1, 1979, an amount that the Secretary estimates would equal the hospital's routine operating costs in such preceding accounting year had routine operating costs in such preceding year represented the same proportion of the hospital's total routine cost as the Secretary finds in the subject year) increased by a rate equal to 150 percent of the rate of increase in the index established pursuant to subparagraph (4)(A) in the same period, subject to modification for the rate of increase in the regular wages granted to nonsupervisory employees under paragraph (dd)(5) of this section, and".

SEC. 7. Page 10, line 7, is amended by adding after the word "costs" the following: "but not exceeding (on a per diem basis) the hospital's routine operating costs in its immediately preceding accounting year (or, with respect to the first accounting year starting on or after July 1, 1979, an amount that the Secretary estimates would equal the hospital's routine operating costs in such preceding accounting year had routine operating costs in such preceding year represented the same proportion of the hospital's total routine costs as the Secretary finds in the subject year) increased by a rate equal to 150 percent of the rate of increase in the index established pursuant to subparagraph (4)(A) in the same period, subject to modification for the rate of increase in the regular wages granted to nonsupervisory employees under paragraph (dd)(5) of this section,".

SEC. 8. Page 10, line 4, is amended by striking out the word "or" and inserting after "(b)" the following: "200 percent of the amount due in incentive payments to employees of the hospital under a plan established prior to the start of the hospital's accounting year and designed to encourage efficiency and economy, or (c)".

SEC. 9. Page 18, line 10, is amended by redesigning subsection "(c)" as paragraph "(c)(1)".

SEC. 10. Page 18, line 15, is amended by striking out the words "criteria established by section 1861(bb)" and inserting in lieu thereof the words "implementation of subsections 1861 (bb) through (ee)".

SEC. 11. Page 18, line 20, is amended by striking out the words "and the Congress".

SEC. 12. Page 19 is amended by inserting after line 4 the following new paragraph:

"(c)(2) The Secretary may adopt for purposes of reimbursement under title XVIII and XIX of the Social Security Act measures recommended by the Commission and put such measures into effect in lieu of section 1861 (v), (bb), or (dd) of title XVIII of the Social Security Act starting at least sixty days after the Secretary notifies the Congress of his intent to adopt such measures.".

SEC. 13. Page 20, line 18, is amended by striking out "(bb)" and inserting in lieu thereof "(bb), (cc), (dd), and (ee)".

SEC. 14. Page 20 is amended by inserting after line 19 the following new sections (f) and (g):

"(f) Title XVIII of the Act as amended by subsection (b) of this section is further amended by adding after subsection (bb) as added to such title by such subsection (b) the following new subsections:

"'Voluntary Goals for Hospital Cost Containment

"'(cc)(1) If the Secretary finds, after consultation with the Health Facilities Cost Commission, that hospitals in the United States have failed to voluntarily reduce the rate of increase in their total expenses (other than expenses arising from increases in the average hourly regular wage rate for nonsupervisory employees) consistent with the goals established in subparagraph (2)(A) of this subsection, the standby increase limits on total inpatient reimbursement per admission provided in subsection (dd) shall go into effect. However, the hospitals located in a State shall be exempt from such limits if the Secretary finds that the hospitals in that particular State have held the rate of increase in expenses (other than expenses arising from increases in the average hourly regular wage rate for nonsupervisory employees) to a level at or below the adjusted maximum allowable rate specified under subparagraph (2)(B) of this subsection for hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) in the United States. For purposes of the preceding sentence the term "State" includes the District of Columbia and the Commonwealth of Puerto Rico and the term "United States" means all the States and all the possessions of the United States. Notwithstanding the foregoing provisions of this paragraph, a hospital shall be exempt from such limits if the Secretary finds that such hospital has held the rate of increase in its expenses (other than expenses arising from increases in the average hourly regular wage rate for nonsupervisory employees) to a level at or below the maximum allowable rate specified under paragraph (2) of this subsection for hospital expenses (other than increases arising from increases in the average hourly wage rates for nonsupervisory employees) in the United States.'".

"'(2) The maximum allowable rate of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) in the United States for calendar year—

"'(i) 1978, is equal to 2 percentage points less than the rate of increase in such hospital expenses for 1977, and

"'(ii) 1979, 1980, 1981, and 1982 is equal to 4 percentage points less than the rate of increase in such hospital expenses for 1977,

except that such maximum allowable rate of increase for a calendar year may not be less than one and one-half times the rate of increase in the implicit price deflator of the gross national product as calculated by the Bureau of Economic Analysis of the Department of Commerce and published in the Survey of Current Business for such calendar year.

"'(B) The goals established in subparagraph (A) of this paragraph shall be adjusted by a formula established by the Secretary to take into account the estimated impact of increases in population on the total expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) of hospitals located in a particular state. The formula established by the Secretary pursuant to the preceding sentence shall be such that it will increase the maximum allowable rate of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) to the extent necessary to compensate for anticipated increases in hospital utilization experience in a particular state from hospital utilization experience in the United States arising from increases in population. For this purpose, the Secretary shall assume that increases in population in a particular state and in the United States in a calendar year will be based upon the changes estimated by the Bureau of the Census in the last twelve-month period for which the Bureau of the Census has issued estimates of the populations of individual states. In determining the effect of such increases in population on hospital utilization, the Secretary shall take into account the higher rates of utilization of inpatient hospital services by individuals 65 years of age and over and such other factors as he deems feasible and appropriate.

"'(3) Each hospital shall provide the Secretary—

"'(i) not later than December 31, 1978, with such data with respect to the hospital's expenses for each calendar quarter of 1976 and 1977 and for the first three calendar quarters of 1978 as the Secretary determines to be necessary to compute and monitor the maximum allowable rates of increases in hospital expenses for calendar years under paragraph (2), and

"'(ii) not later than 60 days after the end of each calendar quarter which ends after September 30, 1978, with such data with respect to the hospital's expenses during the calendar quarter as the Secretary determines to be necessary to monitor hospitals' compliance with the maximum allowable rate of increase in hospital expenses under paragraph (2).

The Secretary may prescribe the form and manner in which these data must be provided.

"'(B) In determining reasonable costs for purposes of this Act—

"'(i) data on hospital expenses reported under paragraph (1) for any period shall be used instead of the hospital cost data otherwise reported for purposes of this Act to the extent that this would result in lower reimbursement to the hospital, and

"'(ii) in the case of a hospital failing to provide in full the information required under paragraph (A) for any period, the hospital's expenses (other than expenses arising from increases in average hourly wage rates for nonsupervisory employees) for any accounting year (ending after December 31, 1977) may not be taken into account to the extent such expenses exceed such expenses in the hospital's immediately preceding accounting year by a percentage greater than the maximum allowable rate of increase in total hospital expenses specified under paragraph (2) for the latest calendar year any part of which is included in the accounting year in question.

"'(4)(A) The Secretary shall monitor the data received under subparagraph (3)(A) and shall report at least quarterly to the appropriate committees of Congress on progress in meeting the maximum allowable rate of increase in hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) for each year.

"'(B) Not later than 90 days after the first day of each calendar year after 1978, the Secretary shall determine (on the basis of data received from hospitals that have provided data under subparagraph (A) in a form and manner acceptable to the Secretary for all calendar quarters of 1976, 1977, 1978, and, in the specified time, for all subsequent calendar quarters) and announce whether or not the rate of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) for the preceding calendar year has exceeded the maximum allowable rate of increase in such hospital expenses for the year, as specified under paragraph (2).

"'(5) For purposes of this subsection:

"'(A) The term "rate of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees)" means, for a calendar year, the percentage by which the total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) for the calendar year exceed such hospital expenses for the previous calendar year.

"'(B) The term "total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees)" means, for a calendar year, the total expenses, excluding expenses arising from increases in the average hourly wage rates for nonsupervisory employees (as defined in clauses (dd)(5)(D)(iii) of this section), of hospitals (as defined in subparagraph (C)) in the calendar year, as such expenses are defined by the Secretary.

"'(C) The term "hospital" means a hospital (other than a psychiatric hospital or tuberculosis hospital, as defined in subsections (f) and (g), respectively, of this section or a hospital that derived more than 75 percent of its inpatient care revenues on a capitation basis, disregarding revenues received under this title, from one or more health maintenance organizations as defined in section 1301(a) of the Public Health Services Act) which has an agreement in effect under section 1866 of title XVIII of the Social Security Act during all calendar quarters elapsing after calendar year 1975 and which has had 4,000 or more admissions during all full accounting years elapsing after calendar year 1977.

"'Standby Increase Limits on Total Inpatient Reimbursement

"'(dd)(1) If the Secretary finds, after consultation with the Health Facilities Cost Commission, that hospitals have failed in calendar year 1978 or any subsequent calendar year to voluntarily reduce the rate of increase in their expenses consistent with the goals established in paragraph (2) of subsection (cc)), average inpatient costs otherwise reimbursable per inpatient admission shall, in the case of a hospital (other than a psychiatric hospital or a tuberculosis hospital, as defined in subsections (f) and (g), respectively, of this section or a hospital that derived more than 75 percent of its inpatient care revenues on a capitation basis, disregarding revenues received under this title, from one or more health maintenance organizations, as defined in section 1301(a) of the Public Health Service Act) with 4,000 or more admissions in its last preceding full accounting year, be deemed unreasonable and shall not be reimbursable for purposes of this title or for purposes of title XIX of this Act in hospital accounting years any part of which occur after such calendar year and also after June 30, 1979, to the extent that such costs exceed average costs per inpatient admission reimbursable under such titles in the hospital's immediately preceding accounting year by the sum of the following percentages as adjusted by paragraphs (3), (4), and (5) of this subsection:

"'(A) The highest rate by which routine operating costs could have increased in the subject accounting year without being subject to disallowance under subsection (bb) multiplied by the ratio of routine operating costs to total inpatient costs in such prior accounting year;

"'(B) The rate by which general wage levels in the hospital's geographic area increased during the latest 2-year period for which data are available multiplied by the ratio of the labor costs are not included in routine operating costs to total inpatient hospital costs in the prior accounting year; and

"'(C) The rate of increase the Secretary

finds appropriate (based on such index composed of weighted components of available national indicators of price changes in the general economy as the Secretary finds appropriate for the purpose) multiplied by the ratio of nonlabor inpatient costs not included in routine operating costs to total inpatient costs in the prior accounting year.

"'(2)(A) For purposes of paragraph (1) of this subsection, the Secretary shall deem the proportions of total inpatient costs represented by routine operating costs and the labor and nonlabor components of all other costs in accounting years starting prior to July 1, 1979, to be equal to the proportions of total inpatient costs represented by such components of costs—

"'(i) as he finds in the succeeding accounting year of a hospital, where such succeeding accounting year starts on or after July 1, 1979, or

"'(ii) as he estimates for all hospitals in the same category as a hospital for purposes of paragraph (3) of subsection (bb) of this section on the basis of available data, where the succeeding accounting year starts prior to July 1, 1979.

"'(B) Where less than the full accounting year of a hospital occurs in a period subject to paragraph (1) of this subsection, the Secretary shall impose any disallowance of reimbursement otherwise required under such paragraph (1) only in the proportion that the number of days in such accounting year occurring in such period bears to the total number of days in that accounting year.

"'(C) Where less than the full accounting year of a hospital occurs after July 1, 1979, the Secretary shall, for purposes of subparagraph (1)(A), deem the highest rate by which routine operating costs could have increased in such accounting year without being subject to disallowance under subsection (bb) to be such rate as it would be determined if such accounting year began on July 1, 1979, except that the Secretary shall determine the percentage increase in costs under subparagraph (bb)(4)(A) in a manner appropriate to the actual accounting year of the hospital.

"'(3) The sum of the percentages determined under paragraph (1) of this subsection shall be reduced by the product of—

"'(A) the number of percentage points (or fraction thereof) by which the increase in a particular hospital's total expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) in a calendar year specified in paragraph (1), as reported for purposes of subsection (cc), exceeded the maximum allowable rate of increase in total hospital expenses (other than expenses arising from increases in the average hourly wage rates for nonsupervisory employees) in the United States set forth in paragraph (2) of such subsection, and

"'(B) the percentage of such hospital's total expenses that do not arise from the regular wages of nonsupervisory employees.

"'(4) The sum of the percentages determined under paragraph (1) of this subsection and reduced where required under paragraph (3) of this subsection shall be adjusted in accordance with a formula established by the Secretary to take into account the estimated impact of changes in the total number of inpatient admissions experienced by a hospital in a subject accounting year, as compared to the total number of admissions such hospital experienced in its immediately preceding accounting year. Such formula shall be designed to adjust the percentage limitation on increases in average inpatient costs otherwise reimbursable per inpatient admission applicable to a hospital under this section for any substantial increase or decrease in total inpatient cost per admission that the Secretary estimates (based on data available to him) would generally result from increases or decreases in total admissions taking into account the size of the hospital, its occupancy rate, and such other factors as the Secretary deems appropriate.

"'(5)(A) The Secretary shall modify, for each hospital, in accordance with subparagraph (2) of this paragraph, the increase limits otherwise established under this subsection and the limitation (to 150 percent of the rate of increase in the economic index established pursuant to subparagraph (4)(A) of subsection (bb) of this section), otherwise established under subparagraphs (4)(B)(i) and (4)(B)(ii) of subsection (bb) of this section) to allow the hospital a passthrough of any increase in the rate of regular wages granted in the accompanying year to its nonsupervisory employees.

"'(B) The hospital shall promptly provide the data necessary for the required calculation, in accordance with regulations of the Secretary. A hospital that fails to supply the data required shall be presumed to have granted no increase in the rate of regular wages to its nonsupervisory employees in any accounting year for which it has failed to supply the required data.

"'(C) Such modified limits for an accounting year shall be calculated as follows:

"'The modified limit applicable to a hospital's accounting year is equal to the sum of—

"'(i) the product of

"'(I) the percentage by which the average hourly regular wage for nonsupervisory employees for the accounting year exceeds the average hourly regular wage rate for nonsupervisory employees for the preceding accounting year, and

"'(II) the percentage of costs for inpatient hospital services attributable to regular wages paid to nonsupervisory employees in the preceding accounting year; and

"'(ii) the increase limit, otherwise applicable to the hospital for that accounting year, multiplied by the percentage of costs attributable to all expenses other than regular wages paid to nonsupervisory employees in the preceding accounting year.

"'(D) For purposes of this subsection:

"'(i) The term "regular wages" means wages paid to an employee at the regular rate at which he is employed (within the meaning of section 7 of the Fair Labor Standards Act of 1938), but does not include overtime wages or shift differentials.

"'(ii) The term "nonsupervisory employee" means an individual who is employed by a hospital and who is not a supervisor or a physician, as determined under regulations prescribed by the Secretary.

"'(iii) The term "average hourly regular wage rate for nonsupervisory employees" means, with respect to a hospital for an accounting year—

"'(I) the total amount of regular wages incurred by the hospital during the accounting year for work of the hospital's nonsupervisory employees, divided by—

"'(II) the total number of nonsupervisory employee hours of work for which such regular wages were paid.

"'(6) The Secretary shall issue such regulations as he deems necessary and appropriate in applying the provisions of this section including:

"'(A) such exceptions and exemptions as he determines are warranted,

"'(B) such definitions of the terms used in this subsection as he finds necessary to carry out its intent, and

"'(C) such safeguards against attempts to avoid the intent of these provisions as he finds appropriate.

"'Exemptions

"'(ee)(1) At the request of the Governor (or other chief executive) of any State, the Secretary may exclude from the application of subsection (dd) of this section hospitals physically located in such State, if—

"'(A) the Secretary finds that such State has in operation as of the date of such a request a program capable of containing hospital costs for inpatient hospital services in the State which covers at least 90 percent of the hospitals in the State, which would otherwise be covered under subsection (dd) of this section;

"'(B) the Secretary finds that the State program applies at least to all revenues for inpatient hospital services of hospitals covered by the program, and has applied for at least one year prior to the date of such request to at least half of those revenues (excluding revenues received under this title);

"'(C) the Governor (or chief executive) certifies, and the Secretary determines that the aggregate rate of increase in revenues over the previous accounting year for inpatient hospital services for all hospitals in the State will not exceed (i) the increase that the Secretary estimates would be permitted if subsection 1861(dd) (including the passthrough of any increase in the rate of regular wages paid to nonsupervisory employees) applied to the hospitals in the State, nor (ii) be less than the increase in the GNP deflator applicable to that fiscal period; and

"'(D) the Governor (or chief executive) has submitted, and had approved by the Secretary, a plan for recovering any excess of total revenue which (notwithstanding (C)) may occur.

"'(2) A hospital or group of hospitals may be excluded from the application of subsection 1861(dd) if the Secretary determines that—

"'(A) such exclusion is necessary to facilitate or continue an experiment or demonstration entered into under section 402 of the Social Security Amendments of 1967, section 222 of the Social Security Amendments of 1972, or section 1526 of the Public Health Service Act, and

"'(B) such experiment or such demonstration is not inconsistent with the purposes of such subsection 1861(dd).

"'(3)(A) Any State may submit to the Secretary a plan for a hospital cost containment program for approval. The Secretary shall approve such a program and exemption from the application of subsection 1861(dd) hospitals physicially located in such State if the Secretary determines that such program—

"'(i) designates an identifiable unit of State government which has the authority to supervise the administration of the program;

"'(ii) provides for a methodology to assure that the aggregate rate of increase in revenues for inpatient hospital services over the previous year for all hospitals in the State will not exceed the increase that the Secretary estimates would be permitted if subsection 1861(dd) (including the passthrough of any increase in the rate of regular wages paid to nonsupervisory employees) applied to hospitals in the State nor be less than the increase in GNP deflator applicable to that fiscal period. Such methodology may include alternative methods for classifying hospitals, for estabilshing prospective rates of payment, and for implementing on a gradual, selective, or other basis the establishment of a prospective payment system, in order to stimulate hospitals through positive (or negative) financial incentives to use their facilities and personnel more efficiently without adversely affecting the quality of services;

"'(iii) includes a methodology for the recovery of any excess of total revenues which (notwithstanding clause (ii)) may occur;

"'(iv) provides for sanctions and enforcement procedures adequate to insure compliance with the program;

"'(v) provides for uniform definition of all costs;

"'(vi) provides for the evaluation of standards of institutional performance;

"'(vii) provides protection against inhibition of increases in the rate of regular wages

granted to nonsupervisory employees comparable in effect to the protection against such inhibition provided under paragraph (5) of subsection (dd) of this section;

"'(viii) provides for compliance with such other criteria as the Secretary deems necessary to accomplish the purposes of subsection (dd).

"'(B) The Secretary may make grants to any State which has an approved program pursuant to subparagraph (A) to assist such State in the implementation of its program. For the purposes of this subsection, there are authorized to be appropriated $10,000,000 for the fiscal year ending September 30, 1979, and such sums shall remain available until expended.

"'(C) The Secretary shall promulgate regulations to implement this subsection prior to May 1, 1979.

"'(4)(A) The Secretary shall review annually any program, experiment, or demonstration that has received an exemption pursuant to this subsection to determine whether such program, experiment, or demonstration is in compliance with such subsection and the regulations promulgated thereunder. The Secretary may revoke, after notice and an opportunity for a hearing on the record, any such exemption if he determines that such exemption is no longer justified because the conditions for such exemption are no longer being met.

"'(B) Upon revocation of an exemption awarded under this subsection each hospital that would otherwise be subject to subsection (dd) will be subject to the limits established under such subsection.

"'(5) Where the Secretary has granted an exemption under this subseciton he shall reimburse the State, District, or Commonwealth operating the qualifying hospital cost or revenue containment program for the portion of the administrative expenses of such qualifying program that he deems equitable considering the proportions of hospital costs reimbursable under this title and shall treat as administrative expenses incurred in the operation of a plan established under title XIX of this Act the portion of the administrative expenses of such qualifying program that he deems equitable considering the proportion of hospital costs reimbursable under a plan established under title XIX of this Act.

"'(g) Chapter 36 of the Internal Revenue Code of 1954 (relating to certain other excise taxes) is amended by adding at the end thereof the following new subchapter:

"'"Subchapter F—Taxes on Certain Excess Reimbursement and Charges for Inpatient Hospital Services

"'"SEC. 495. IMPOSITION OF TAXES.

"'"(a) TAXES ON EXCESS REIMBURSEMENT.—

"'"(1) TAX ON HOSPITAL.—If a covered hospital has excess reimbursement with respect to a private cost payer for an accounting year, there is hereby imposed on the covered hospital a tax equal to 150 percent of the amount of excess reimbursement from the private cost payer to the covered hospital for the accounting year.

"'"(2) TAX ON PRIVATE COST PAYER.—If a covered hospital has excess reimbursement with respect to a private cost payer for an accounting year, there is hereby imposed on the private cost payer a tax equal to 150 percent of the amount of excess reimbursement from the private cost payer to the covered hospital for the accounting year.

"'"(b) TAX ON EXCESS HOSPITAL CHARGES.—If a covered hospital has excess charges for an accounting year, there is hereby imposed on the covered hospital a tax equal to 150 percent of the amount of excess charges of the covered hospital for the accounting year.

"'"(c) PAYMENT OF TAXES.—

"'"(1) TAX ON EXCESS REIMBURSEMENT.—Any tax imposed by paragraph (1) or (2) of subsection (a), with respect to excess reimbursement payable to a covered hospital by a private cost payer in an accounting year, shall be paid not later than 30 days after the date of the Secretary of Health, Education, and Welfare notifies the Secretary—

"'"(A) of the excess reimbursement, and

"'"(B) of the amount of taxes which are due from the covered hospital and the private cost payer under paragraph (1) or (2), respectively, of subsection (a).

"'"(2) TAX ON EXCESS CHARGES.—

"'"(A) IN GENERAL.—Any tax imposed by subsection (b) with respect to any covered hospital for any accounting year shall be paid not later than 30 days after the date the Secretary of Health, Education, and Welfare notifies the Secretary—

"'"(i) of the excess charges, and

"'"(ii) of the amount of taxes that are due from the covered hospital under subsection (b).

"'"(B) DEFERRAL.—If the Secretary of Health, Education, and Welfare certifies to the Secretary that a covered hospital has established an approved escrow account and certifies the amount deposited into the account, then an equal amount of any tax imposed on the covered hospital by subsection (b) shall be deferred. Such deferral shall continue so long as such amount remains in such account.

"'"(C) ABATEMENT.—If the Secretary of Health, Education, and Welfare certifies to the Secretary that a covered hospital has withdrawn an amount from an approved escrow account of the hospital in accordance with the terms of the account, then an equal amount of any tax imposed on the covered hospital by subsection (b) shall be abated.

"'"(D) WITHDRAWALS FROM APPROVED ESCROW ACCOUNT.—Amounts deposited into an approved escrow account shall be treated as withdrawn from the account in the order in which they were deposited into the account.

"'"(d) DEFINITIONS.—For purposes of this section—

"'"(1) COVERED HOSPITAL.—The term 'covered hospital' means, for an accounting year of a hospital, a hospital which is subject, under subsection 1861(dd) of the Social Security Act, to a limit on its increases in reimbursement for the accounting year.

"'"(2) PRIVATE COST PAYER.—The term 'private cost payer' means any organization which (A) meets the definition contained in section 1842(f)(1) of the Social Security Act, and (B) reimburses a covered hospital for inpatient hospital services on a basis related to the hospital's costs in furnishing those services or on any other basis other than charges imposed by such hospital. An organization shall not be considered to be a cost payer with respect to its payment to a hospital of another payer's coinsurance or deductible amounts.

"'"(3) EXCESS REIMBURSEMENT.—A covered hospital has excess reimbursement with respect to a private cost payer for an accounting year if the Secretary of Health, Education, and Welfare determines that reimbursement per inpatient admission to the covered hospital for inpatient hospital services covered by the private cost payer for the hospital's accounting year exceeds such reimbursement in the hospital's immediately preceding accounting year by a percentage greater than the increase in reimbursement per admission permitted for purposes of title XVIII of the Social Security Act under limitations imposed by subsection 1861(dd) of the Social Security Act.

"'"(4) EXCESS CHARGES.—A covered hospital has excess charges for an accounting year if the Secretary of Health, Education, and Welfare determines that average inpatient charges per admission made by the hospital in the hospital's accounting year, exceeds such charges in the hospital's immediately preceding accounting year by a percentage greater than the average in reimbursement per admission permitted for purposes of title XVIII of the Social Security Act under the limitations imposed by section 1861(dd) of the Social Security Act.

"'"(5) AMOUNT OF EXCESS REIMBURSEMENT.—The amount of excess reimbursement from a private cost payer to a covered hospital for an accounting year shall be determined by the Secretary of Health, Education, and Welfare and shall be equal to the amount by which such reimbursement per admission to the covered hospital for inpatient hospital services covered by the private cost payer for the hospital's accounting year, exceeds such reimbursement in the hospital's immediately preceding accounting year by a percentage greater than the increase in reimbursement per admission permitted for title XVIII of the Social Security Act under limitations imposed by section 1861(dd) of the Social Security Act.

"'"(6) AMOUNT OF EXCESS CHARGES.—The amount of excess charges of a covered hospital for an accounting year shall be determined by the Secretary of Health, Education, and Welfare and shall be equal in amount to the product of—

"'"(A) the amount by which the amount of average inpatient charges per admission for inpatient services made by the hospital in the hospital's accounting year, exceeds such charges in its immediately preceding accounting year by a percentage greater than the increase in average reimbursement per admission permitted for purposes of title XVIII of the Social Security Act under the limitations imposed by section 1861(dd) of the Social Security Act, and

"'"(B) the percentage of inpatient charges in the accounting year which are attributable to patients other than those for which the responsibility for payment has been assumed by a private cost payer (as defined in paragraph (2)) or a program established under title V. XVIII, or XIX of the Social Security Act.

"'"(7) APPROVED ESCROW ACCOUNT.—The term 'approved escrow account' means an escrow account—

"'"(A) which is established and maintained by a covered hospital in a manner approved by the Secretary of Health, Education, and Welfare, and

"'"(B) from which funds may be withdrawn by the hospital only in an amount which is not greater than an amount which, if added to inpatient charges in an accounting year, would not constitute excess charges."'".

Mr. NELSON. Mr. President, let me explain the modification. In response to a number of inquiries from Senators, including the distinguished Senator from Florida (Mr. STONE) and the distinguished Senator from Nevada (Mr. CANNON), I have agreed to make two modifications which, in my judgment, make good sense, in order to take into account, first, the effects on hospital costs of population increases in States which are experiencing rapid population growth or fluctuation—and which are primarily the so-called "sun belt" States—and second, to take into account the application of mandatory standby programs for hospitals which themselves can meet voluntary goals even if the State fails to meet such goals. That is to say, pursuant to this modification, individual hospitals which meet the voluntary controls in a State would be exempt from the standby controls, even though that particular State in which they are located has failed to meet the goals.

I think that is a good modification. What it means is that in the event the effort to reduce by a total of 4 percent

the rate of increase in hospital costs over the year 1977 should fail and trigger controls, not only would those States that meet the national voluntary target, not only those States that have a mandatory program, but, in fact, those hospitals that met the voluntary goal in States that failed to meet the target will be exempt from mandatory controls.

Mr. STONE. Mr. President, will the Senator yield for a series of questions?

Mr. NELSON. Yes.

The PRESIDING OFFICER. Before the Senator starts, may we have order in the Senate before someone calls for it, which we are going to have any minute now? May we have order? Conversations will cease so that we can hear the discussion on the floor. Please take discussions to the cloakroom.

I thank the Members.

Mr. STONE. It is my understanding that a number of Senators like myself are concerned about these two matters which gave rise to the proposed modifications that I asked to be made and which the Senator sent to the desk. One is taking care of the problems of hospitals in States where the population is rapidly growing and particularly growing with old people who, by their very nature, need more hospital and health care.

The second is taking care of a situation in which an individual hospital, an individual institution, is able to meet the voluntary goals, the goals of cost containment, even when enough other institutions in a State trigger the standby controls.

Is it not the case that by adopting these modifications, which the Senator was kind enough to assure me he thought he could accept, that these two problems are directly met and overcome?

Mr. NELSON. Yes. They were two very good suggestions. We had not thought of the question of rapidly expanding population. On the other question of any single hospital in any State that has not met the national standard, but which single hospital within that State has, we have agreed, and I have modified the amendment so that such hospitals are exempt, too, along with every hospital in any State that has 4,000 annual admissions or less.

Mr. STONE. I thank the distinguished Senator and manager of this amendment.

I ask if it is not also the case that having proposed these changes and shown them to the Senator and his staff, whether or not it is the case that we also showed them to the Secretary of Health, Education, and Welfare, and received from Secretary Califano approval of these amendments and assurances that HEW could administer with no increased burden both of these modifications?

Mr. NELSON. Yes. The Senator from Florida is correct.

Let me assure the Senator that Secretary Califano examined the amendments and agreed that they were good proposals and they are acceptable to the Secretary. They are not only acceptable to the proponent of this pending amendment, the Senator from Wisconsin, but I enthusiastically support them because I think they are very good ideas for additions to this.

Mr. STONE. I thank the Senator.

Mr. President, the first modification in the Nelson amendment would require HEW to adjust the States' voluntary hospital cost containment goals to allow for cost increases which result from substantial population growth and from the higher rates of hospital utilization by persons age 65 and older. HEW's guidelines recognize that persons over age 65 utilize hospital care at four times the rate of persons under age 65.

The original Nelson measure would have applied voluntary goals to all States without adjusting the maximum allowable rate of increase to reflect increasing or decreasing population, or changes in the "mix" of population—the relative percentage of persons over age 65 compared with the percentage under age 65—both of which have a significant effect on total hospital expenses.

It is possible that a particular State could meet the 2-percent requirement without any cost containment effort because of a decreasing population, or because of a level population but a decrease in the population over age 65. These conditions would naturally result in decreasing a State's hospital cost expenses.

Conversely, a State whose population is increasing and is experiencing a net gain in population age 65 or older, could be subject to the mandatory controls, in spite of substantial cost containment efforts.

This unfair situation would be remedied by the modified Nelson amendment. I am pleased that the administration does not oppose the Nelson amendment, as modified, and I thank Senator NELSON for modifying his amendment to allow for growth in population.

Mr. President, the second modification in the Nelson amendment would provide greater recognition for the voluntary cost control efforts being made by individual hospitals than does the original measure. It would exempt from the mandatory controls individual hospitals that are meeting the voluntary goal even if the State in which the hospital is located is not exempted from the controls.

The original Nelson measure would put hospital cost controls into effect if the voluntary goal is not met on a nationwide basis in 1978 or subsequent years. Individual States would be exempted from the controls if they met the voluntary national goal. The modified version would go further and provide a greater incentive for hospitals to reduce their costs.

With this modification to the Nelson measure, each hospital would be capable of avoiding mandatory controls by meeting the voluntary goal the hospital industry has set for itself. Efficiently managed hospitals would not come under mandatory cost controls as a result of being combined with grossly inefficient hospitals. But States would continue to be exempted if they met the voluntary national goal.

The modified Nelson amendment would not require any additional data-collection, personnel or other redtape to administer. The data which the HEW Secretary would require from each hospital in order to administer the State exemption provision of the original measure would be sufficient to administer exemptions for individual hospitals meeting the voluntary goal.

HEW estimates that this amendment would save hospital consumers an amount somewhere in between the amount saved by the voluntary effort and the amount saved by the original Nelson measure, assuming that the voluntary effort fails in 1979. The difference in the savings, however, would result from the application of the more stringent mandatory controls to hospitals which are meeting their commitments under the voluntary effort. I do not think that this is fair, especially if, with this legislation, we intend to recognize the success of the voluntary effort and impose controls on hospitals only in the event that this effort fails.

Mr. President, I want to thank Senator NELSON for modifying his proposal to allow individual hospitals which are meeting the voluntary cost containment goal to be exempted from mandatory cost controls.

I ask unanimous consent that a letter to me from the Secretary of HEW be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, D.C.,
October 6, 1978.

Hon. RICHARD STONE,
U.S. Senate,
Washington, D.C.

DEAR DICK: You have proposed two changes to the hospital cost containment amendment proposed by Senator Nelson.

An amendment to change the voluntary goals in those States with changing populations. This amendment provides that if the overall goal is not met on a national basis, then the goal which a State must meet in order to be exempted is adjusted to reflect changing population in a State.

An amendment to exempt individual hospitals which meet the voluntary goals. This amendment provides that controls are placed on a hospital only if:

The national goal was not met;

The State goal in that hospital's State was not met; and

The individual hospital also did not meet the goal.

We have no objection to these amendments.

Sincerely,

JOSEPH A. CALIFANO, Jr.

Mr. STONE. I, therefore, enthusiastically support this amendment.

Mr. WILLIAMS. Mr. President, I am pleased to join with Senators NELSON, KENNEDY, and others in cosponsoring Senate amendment 3478 to H R. 5285. the Medicare and Medicaid Administration and Reimbursement Reform Act.

For the last five decades, national health care expenditures have increased dramatically by every measure—in aggregate terms, on a per capita basis, and as a percentage of the gross national product. These increases have become the subject of considerable public debate in recent years, because an increasing share of these expenditures is borne by the Federal, State, and local government. There is also concern that this growth in

spending has not produced a proportionate improvement in the health of our Nation's citizens.

The largest share of national health expenditures—almost 40 percent of the private sector and 60 percent of the public sector costs—is used for hospital care. For this reason, congressional proposals to control expenditures have most recently concentrated on the hospital portion of the health care delivery system.

Last year, the Committee on Human Resources worked long and hard on hospital cost-containment legislation. During these deliberations, we established that the sustained growth in hospital expenditures since 1900 is attributable to a variety of factors. Among them are changes in the size and age distribution of our population, inflation in the prices of medical services and goods, and increases in the quality and character of services and goods provided, including changes in patient utilization patterns.

After a thorough review of the record, the committee agreed to use the approach in the administration's bill, S. 1391, to contain unnecessary increases in the cost of hospital services, This approach would provide immediate relief to health care consumers through the rationalization of hospital care financing policy. It would control spiraling inflation without reducing the amount or quality of hospital care for any American.

As ordered reported by the Senate Committee on Human Resources, S. 1391 would limit total inpatient hospital revenues to an annual growth reflecting increases in the general price index. The limits apply to payment from all third-party payors such as blue cross, medicare, medicaid, and private insurance companies, as well as self-pay patients. Exceptions to the limit are permitted for hospitals whose costs have escalated due to unusual circumstances.

Estimates by the Congressional Budget Office and the administration indicate that enactment of S. 1391 would result in $55 billion in total health care savings, including over $19 billion in Federal expenditures and $2.3 billion in State expenditures, over the next 5 years.

The Committee on Human Resources finished consideration of S. 1391 and ordered it reported August 2, 1977. After that, the Finance Committee began serious deliberations on the jointly referred hospital cost-containment legislation, but did not report it. Instead, the Finance Committee reported H.R. 5285, the Medicare and Medicaid Administration and Reimbursement Reform Act.

I am very disappointed in H.R. 5285 as reported by that committee. I believe that the concepts of hospital classification and prospective, incentive reimbursement for the long-term control of hospital costs are sound. However, the bill's narrow approach, limited to routine operating costs and medicare and medicaid payors, cannot control the rapid rate of inflation in hospital costs. In fact, it can be argued that the bill will ultimately result in even higher costs for many American consumers.

The proposed amendment we offer today has been developed as a compromise between the immediate, mandatory, and comprehensive, Federal controls contained in the Human Resources Committee's bill and the delayed, limited, medicare and medicaid controls in H.R. 5285. It is structured to curb the rate of increase in hospital costs for all Americans, not only those who participate in federally sponsored health care programs. This proposal is a good, well-thought-out compromise worthy of support by each Member of this body who is concerned about the rising costs of health care and the need to distribute our scarce health dollars more equitably and efficiently.

As introduced, the Senate amendment 3478 would:

First. Maintain the general structure of control in the Talmadge bill, H.R. 5285, making only minor revisions. The revisions would permit increased cost savings.

Second. Permit the hospital industry to bring overall hospital cost increases under control through voluntary efforts. The voluntary limits of increase, or goals, would apply to all hospitals. The rate of increase would be held to 2 percent less in 1978 than the rate by which such expenses increased in 1977. A 4-percent increase over 1977 expenses would be permitted in 1979 and 1980. To avoid unfairly penalizing hospitals for increases in inflation for which health care costs are not responsible, the goals would never be less than 1½ times the increase in the general inflation rate.

Third. Provide that if the national voluntary effort by the Nation's hospitals fails, mandatory controls would go into effect for the following year. These controls would place limitations on the rate of increase for all hospital costs and all payors of those costs. The allowable increase for all hospitals with more than 4,000 annual admissions would be derived through a calculation based on increases in routine operating costs allowable under the Talmadge bill, general wages in the hospital's area, and a "market basket" index of several goods and services purchased by hospitals. Increases beyond the established limits would not be paid by medicare and medicaid for either ancillary or routine costs. For private payors such as the insurance companies and blue cross, any excesses paid by such payors after the imposition of controls would be held in escrow until returned to payors in the form of reduced rates of hospital costs. Exemptions to the percentage limitations could be provided when warranted by changes in the number of admissions or increases in the wage rates of nonsupervisory hospital employees.

Senate amendment 3478 offers the Senate the opportunity to achieve substantial and immediate savings of between $30 and $35 billion in total health care savings, including $11.6 billion in Federal expenditures and $1.5 in State expenditures, over the next 5 years. It is an opportunity to remove what is, in effect, a most inequitable and inappropriate kind of tax, a hospital tax. I urge each of my colleagues to think carefully about this amendment and vote for its adoption.

● Mr. SCHMITT. Mr. President, I rise in opposition to the Nelson amendment. While its intentions are noble in attempting to offer relief to the American public from the stress of escalating hospital costs, the actual effect will be a drop in the availability and the quality of medical care in this country. A temporary relief in hospital care costs will result in a long-term burden on all Americans, particularly in those areas of the country where there are medically underserved, or unserved, populations.

This amendment, Mr. President, is the classic example of treating the symptom rather than the cause of a problem. Hospitals are as much the victim of inflation as is the consumer. The control of hospital costs requires legislation with long-term goals of reducing the sources of inflation while enabling hospitals to continually upgrade and expand their services so as to achieve highly competent and accessible health care services for all Americans. The goals of this amendment are short-term cash benefits resulting in debilitated medical services in the long run.

In New Mexico, a large Albuquerque hospital from 1975 to 1978 suffered an average annual inflation rate of approximately 40 percent for utilities alone while a small rural hospital's utilities increased by approximately 30 percent annually. Clamping a lid on hospital costs is no way to logically deal with these inflationary pressures. Rather, we should look for areas in which the Government can reduce operating expenses for hospitals and provide incentives to encourage hospitals to make every effort to voluntarily reduce those costs over which they have control.

Certainly we all recognize that there have been abuses in hospitals in various areas of the country, where inflation rates rose dramatically, but I think hospital administrators and medical personnel have become quite conscious of the need to implement cost containment programs. Certainly, in New Mexico hospitals have and are making every possible effort to reduce costs.

In the first 2 years of operation, the New Mexico Hospital Consortium, a cost containment group of 13 small hospitals, saved $535,750 after costs of operation were deducted. These constituted considerable savings due to the small size of these hospitals. Five larger New Mexico hospitals achieved total savings of $22 million through refinancing of long-term debt with industrial revenue bonds. The New Mexico Hospital Association has saved over $6 million during the past 6 years through the development of the joint employment insurance program covering seven city/county facilities.

Nationwide, the voluntary effort has reduced hospital expenditures by 2.9 percent during the first 6 months of 1978 as compared to the first 6 months of 1977.

Although New Mexico's length of hospital stay during 1977 of 5.7 days compares favorably with 7.7 days nationwide and places the cost per stay there in the lowest quartile, New Mexico has additional inflationary pressures resulting from the expansion of services to underserved rural areas and small communities, and the upgrading of old facilities in similar areas. A significant percentage

of hospital cost inflation in New Mexico and other States attempting to create adequate health services, is due to the expansion of services. New, and extremely necessary, facilities replacing inadequate hospitals and services have created a higher rate of inflation in some areas of New Mexico.

Our new facilities have been opened within the last year in Farmington, Clovis, Belen, and Carlsbad, N. Mex. which serve those communities and many outlying rural areas. They provide a variety of previously unavailable services. Lovelace Medical Center in Albuquerque has opened two clini s in rural areas of the State and plans additional clinics. Presybterian Medical Services operates several clinics in remote and financially poor areas of New Mexico. Extension and maintenance of these services may very well be curtailed or eliminated under this amendment.

Before the Government makes a move to clamp price controls on hospitals, it had better take a hard look at how it contributes to those costs. It is highly ironical, Mr. President, for the Government to penalize those institutions whose costs it directly contributes to. I am talking about the regulatory disaster our Federal agencies have created, Mr. President. I have recently held hearings on S. 2011, a regulatory reduction, reform, and congressional control act. During those hearings I heard from Mr. Alexander McMahon, president of the American Hospital Association, on the highly inflationary impact of duplicative and ineffective regulations that have been piled on the hospital industry. In New York State alone, Mr. President, the American Hospital Association estimates 25 percent of all hospital costs are spent on complying with Government regulations. That is almost $40 per day of additional cost for each patient's stay in New York State. Furthermore, the cost of new hospital regulations in New York State is estimated to increase by 4 percent each year.

Thus far, no other States have concluded comprehensive studies on regulatory cost, but this study, Mr. President, is a fairly accurate representation of regulatory cost we will find imposed on hospitals all over this Nation.

My bill, S. 2011, seeks to deal with this problem, reducing a source of inflation rather than a symptom. This is the method by which we must deal with the problem of increased health care costs, not by debilitating the ability of hospitals to provide modern improved techniques of medical care or to extend services to unserved areas.

Mr. President, I submit for the RECORD letters from Mr. Fred Mondragon, Mr. John Saint, Mr. Glenn Jones, and Mr. Richard Barr, and also background material on the voluntary effort in New Mexico and two news releases from Lovelace Medical Center and the Hospital Association of New York.

The material follows:

AUGUST 22, 1978.

Hon. HARRISON SCHMITT,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SCHMITT: I am writing to urge your vote against the Nelson Amendment to the Talmadge Bill which will very likely be introduced in the Senate this week.

We are concerned about the amendment for several reasons:

1. It will place an arbitrary cap on hospital revenues of 115%. This kind of approach does not recognize individual differences among hospitals and is counter-productive to improvements in patient care.

2. In our new hospital in Clovis, New Mexico, we are concerned that these limits imposed by the proposal would severely cripple the operation since the hospital will be adding significant new services to improve the health care of residents in Curry County.

3. In Espanola, New Mexico, we have had to increase our rates to upgrade the quality of care provided in that facility since it had fallen behind in equipment purchases. The amendment would not allow us to pay for this equipment.

4. The voluntary cost containment effort, jointly sponsored by the American Hospital Association, the American Medical Association, and the Federation of American Hospitals has made a significant impact by reducing the rate of increase in hospital costs from 15% to 12%.

5. The New Mexico hospital experience indicates a similar drop in the rate of increase in hospital costs from last year to this year.

6. The Nelson amendment gives unprecedented powers to the Secretary of HEW to impose arbitrary caps on hospital revenue without congressional approval.

In summary, the Nelson amendment to the Talmadge Bill (H.R. 5285) is a dangerous approach to cost containment and could hurt New Mexico hospitals. It is also unnecessary in view of the positive attempts of the voluntary cost containment efforts. We urge that you vote against this bill and encourage you to convince your fellow Senators to do likewise.

Sincerely,

FRED E. MONDRAGON,
Regional Administrator.

AUGUST 23, 1978.

Hon. HARRISON SCHMITT,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SCHMITT: Administrators all over the country are being urged to take pen in hand to write and urge lawmakers to defeat the latest proposal against hospitals in the continuing saga by the Administration against the "bad guys", to wit, the hospital industry.

This letter, of course, refers to the Talmadge Bill and Gaylord Nelson's attempt to restrict hospitals, but please perish the thought for the inclusion of restriction suppliers, utilities, unions and wages.

The problem of inflation is not only hospitals, as you well know, but it is obvious we are the whipping boys. Let Califano clean up his own inept bureaucrats to cut down fraud, overcharges and waste; then evaluate the system.

How can Las Vegas Hospital continue to operate when the New Mexico State Hospital with taxpayers' money offers registered nurses two dollars more an hour than we can pay, and that figure is just for starters. Take all federal and state health care institutions, deduct those costs, and see where we are.

Admittedly, there are hospitals whose administration operates out of ivory towers. Of course, in this situation they are just emulating the bureaucrats. So, stop penalizing those hospitals where economic conditions will not allow this sort of thing. Stop sending subordinates and spend a little time yourself where "the action is", then maybe you will see the true picture.

Las Vegas Hospital is the only fully staffed and equipped health facility within a radius of seventy miles, serving an estimated 30,000 people. How would you cope with some of the following problems?

We are holding down costs, as you will see from the enclosed sheet. We are constantly being harassed by red tape, and incidentally, are you aware that Califano "is going behind your back" i.e. pressure on the intermediary to harass the hospitals, and pressure on the P.S.R.O. to start denying claims for any reason.

During badly needed construction and reconstruction it was necessary to demolish an entire working area, yet Medicare regulations say we cannot take 18,000 in unrecovered depreciation as other businesses do.

Being the only hospital in a wide geographical area, we do offer all services; forty percent of our revenue coming from Medicare. Yet, because of the staffing problems, many nursing hours were denied. Medicare auditors contend this is because we have an O.B. Department. Do we deny mothers hospital care? Conclusion, raise all prices to cover.

I wonder, if you gentlemen are aware that all third party payors except Medicare and Medicaid pay at 100 percent billed charges. We at present are receiving 80 percent.

Is this the way to contain costs? With the desperately needed new equipment and repairs on equipment, as well as, a new roof, should I raise all prices to cover because Medicare limits the income to this hospital?

Are you aware that Medicare regulations do not allow benefits that other businesses get. Example, non-reimbursable expense for all bad debts. They do not allow for needed Hill-Burton charity writeoffs. So, do we look at raising our prices again to compensate?

Effective January, 1979, the government has mandated an increase in minimum wage. Tell me how to compensate for that without raising prices. The government has even mandated to the general public that they must be provided first rate medical care, so we raise our prices again to compensate.

We seem to be the only industry mandated by law to allow government auditors to enter our place of business, change cost figures, then give us fifteen days to pay. Yet frequently, it takes governmental entities, such as Medicare and Medicaid, 60 to 180 days to pay us for services rendered.

Raise your prices against to compensate. Sock it to the other third party payors. Sock it to the patients without insurance.

In an analysis I received from state welfare patients, and this has been going on for three years, payment has been delayed for up to two years and up to $40,000. Tell me, if you can, what the dollar value on these accounts are. Conclusion, raise your prices again to compensate.

We the hospital administrators need the help of Congress, but apparently they are not willing to give it. And, if they don't, costs can only keep rising and the pressure continues on the hospitals. Look at those hospitals with the ivory towers and look at those hospitals who are struggling to provide quality care.

In conclusion, if you cannot personally take enough time to look at the plight of the small isolated hospital, at least put someone on your staff who fully understands and can fairly state the problems faced by each of us.

Sincerely,

JOHN E. SAINT,
Administrator.

Please outline how to live with this without increase in prices?

COMPARATIVE STATISTICS FOR HOSPITAL EXECUTIVES—NATIONAL PANEL SURVEY DATA, APRIL 1978

	Data reported by your hospital (1)	Regional mean data reported by similar panel hospitals [1] (2)	Number of respondents (3)	National mean data reported by similar panel hospitals [1] (4)	Number of respondents (5)
Beds	51	69	19	72	153
Admissions	225	247	19	226	153
Inpatient days	912	1,145	19	1,343	153
Outpatient visits	$1,299	$1,101	14	$1,116	125
Net inpatient revenue	147,108	219,758	19	216,007	150
Net outpatient revenue	36,777	33,061	19	33,375	150
Total net revenue [2]	187,127	275,741	18	260,346	147
Payroll expenses	87,259	125,665	19	120,596	149
Employee benefits	12,491	17,195	19	16,561	149
Other expenses	82,841	98,316	19	95,398	147
Total expenses [3]	193,602	267,961	17	248,697	140
65-plus admissions	43	64	18	70	147
65-plus inpatient days	363	460	18	612	146
Expenses per adjusted patient day	$169.83	$210.31	17	$167.08	140
Expenses per adjusted admission	$688.36	$1,077.46	17	$1,019.58	140

[1] Your hospital's data, when reported, are included in these means for nonmetro, 50 to 99 beds: Mountain, (col. 2) and national, (col. 4).

[2] Note that "other revenue" is not included as a separate item.

[3] Note that depreciation expense and interest expense———.

AUGUST 22, 1978.

RE Nelson Amendment to the Talmadge Bill.

Hon. HARRISON J. SCHMITT,
U.S. Senate, Dirksen Office Building, Washintgon, D.C.

DEAR SENATOR SCHMITT: I am writing this letter to urge your support in opposing the Nelson Amendment to the Talmadge Bill and in support of any efforts which would reduce further regulation of hospitals.

I have taken the liberty to enclose newspaper clippings of the efforts of this particular hospital and the community over the last several years to obtain a means whereby a facility could be either built or the existing facility remodeled to satisfy current codes and regulations. These include the efforts of local State Legislators in securing a bill on the statutes which would allow creation of Hospital Tax Districts. Such was successful. They also include the authorization by local county officials authorizing such an election. They further include the report of an architect relative to his recommendations.

What the attached articles do not show is the fact that it has taken some 5 years of very detailed effort to contain operational costs; to secure adequate physicians for the community as well as paramedical professionals; and to secure the necessary legislation which would enable this and other communities in similar situations in this state to maintain facilities which would allow continued health care for the citizens they serve.

My concern and I am sure this concern is shared by other administrators or rural facilities, is that if the Nelson Amendment to the Talmadge Bill is successful the revenue controls will be so restrictive as to obviate any type of remodeling or rebuilding for existing facilities. Even though the local electorate may decide to tax themselves for their health care rather than depending upon the nebulous possibilities of revenue and rate approval through the Federal Government.

Again I urge your strongest opposition to the proposed Nelson Amendment or any such amendments which contain the same philosophy.

JUNE 24, 1977.

Sen. PETER V. DOMENICI,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DOMENICI: The two basic arguments against the President's hospital revenue "cap" proposal are that hospitals suffer from inflation like all businesses and individuals, and hospital costs increase because of expended and improved technology and service.

To provide you with additional information, we compiled fiscal data comparing our 1976 and 1977 fiscal years, and our department heads identified services and procedures we now routinely offer our patients that were not offered ten years ago. Many items on the list have only been offered in the last five years.

I contend that "hospital inflation" defined as increased costs of what we purchase, rises at a rate significantly greater than "general inflation" or the gross national product deflator. Our fiscal study demonstrates a 14.6% "hospital inflation" increase in 1977 over 1976 for 70% of our expenses compared to the 6% GNP deflator for the same time period that is used in calculating the "9% cap".

In fiscal year 1977, Presbyterian Hospital inpatient days increased 2½% over 1976, and outpatient visits increased 24%. To provide this service, expenditures at Presbyterian Hospital for the fiscal year ended March 31, 1977, increased $4.9 million or 21% over the previous fiscal year. The major categories of expense are shown in the following table:

[In dollars; fiscal years]

	Operating expenses		Total increase	
	1977	1976	Amount	Percent
Salaries and benefits	15,015,794	12,285,790	2,730,004	22.2
Professional fees	1,633,032	1,386,853	246,179	17.8
Supplies and purchased services	8,481,939	6,819,837	1,662,102	24.4
Insurance	715,731	471,214	244,417	51.9
All other	345,531	477,718	(132,187)	(27.7)
Subtotal	26,191,927	21,441,412	4,750,515	22.2
Depreciation and interest	1,494,991	1,364,918	130,073	9.5
Total	27,686,918	22,806,330	4,880,588	21.4

Of the total increase, approximately 15% was due to inflation. The overall rate of inflation was determined by examining the changes in volume which had occurred in certain large expense areas in the two fiscal years. The areas examined are shown on the attached table and represent more than 70% of the total expenses excluding the fixed costs of depreciation and interest.

In the area of Supplies and Purchased Services, the sample items listed account for 37% of the total expenditures for this category. The Supply and Purchased Services sample items increased 16.8%, including inflation and volume, compared to 24.4% overall increase in this category. The sample increase was expected to be lower since it included the high volume items that are somtimes amenable to cost containment by aggressive purchasing.

It is interesting to note that the only decreases (unemployment taxes, IV solutions, food, and X-Ray film) were the result of an active ongoing cost containment program. The only changed purchasing practice in the four areas of savings affected IV solutions.

Because of Presbyterian's pioneering efforts in founding an offshore mutual insurance company, general liability insurance was held to a 50.2% increase compared to 100%+ increases nationally. Many of the other increases, excluding salaries, were mandated by law, regulation, or a sole supplier.

The services we offer today that were unavailable to our patients ten years ago include:

Coronary Care Unit.
Total hip & joint replacement.
Oxytocin Challenge Testing.
Dialysis.
Amniocentesis.
Fetal Heart Monitoring.
Cardiac Catheterization Laboratory.
EKG Telemetry.
Pressure Monitoring.
Ultrasound.
Nuclear Medicine.
Pulmonary Function Studies.
Cardiopulmonary Resuscitation Team.
Home Care Planning.
Patient Education Programs.
Patient Assistance & Counseling.
Hyperbaric Chamber.
Interaortic Balloon Pump.
Intensive Care Unit.
Retinal Surgery.
Therapeutic Drug Levels.
Laminar Flow.
Infection surveillance nurse.
Enterostomal Therapy.
Blood Gases.
Professional Standards Review Organization.
Open Heart Surgery.
Emergency Department full-time M.D. coverage.
Day Surgery Unit.
Ambulance Company.
Laparoscopy.
Micro-surgery.
Malpractice monitoring.
Blood Component Therapy.
Patient Representatives.
Newborn Intensive Care Unit.
Intravenous Therapy Team.

The hospital cost spiral is explainable. The real issues of how we allocate our national health resources and the cost benefit analysis of improving the quality of a life, or even extending it, are ignored in the President's proposal.

AUGUST 23, 1978.

HON. HARRISON SCHMITT,
U. S. Senator,
Senate Office Building,
Washington, D.C.

DEAR SENATOR SCHMITT: Senator Nelson's proposed amendment has the inherent major deficiency of establishing price controls on a limited segment of the economy without taking into consideration the true reason for hospital costs and prices.

While I have no objection to incentive systems, the number of experiments with incentive systems within hospitals has been extremely limited and I consider it folly to propose legislation that would mandate cash incentive programs for employees in order to qualify a hospital to participate in an overall incentive program conducted by the federal government. This appears to be one of a number of "catchy" provisions of the Nelson proposal that are designed to illicit a positive emotional response, but have not been carefully thought out or have any documented basis of predictable success.

We are strong supporters of the Voluntary Effort of the AHA, AMA, and FAH. So far the results are extremely positive and encouraging. My concern as an administrator is that the obviously increasing rate of inflation in the overall economy will have its inevitable impact on hospitals and may negate the results so far of the Voluntary Effort and make it impossible to meet future Voluntary Effort goals.

It is especially ironic that during the past week this cost containment legislation has been heralded as necessary to combat inflation when in effect, the increase in hospital expenditures this calendar year has been significantly less than the overall increase in the CPI. The rhetoric that labels hospitals as "villains" in the inflation struggle is shallow when confronted by that fact. Frankly, I am concerned that we will be able to retain the exemplary record of the Voluntary Effort because we are now seeing the reality and pressure of increasing inflation in the economy.

I am enclosing for your information a letter prepared last June that remains pertinent to the current question of the Nelson Amendment. We are proud of our record in containing costs. We are committed to continuing our efforts regardless of legislation that may affect us. We only ask that the problem be viewed realistically and treated equitably.

Thank you for your consideration. Please let me know if we can provide additional information.

Cordially,

RICHARD R. BARR,
Administrator.

AUGUST 29, 1978.

A new plan that will save many hospitalized patients at Lovelace Medical Center, Albuquerque, New Mexico, approximately $48,000 a year has been instituted as part of a major cost containment drive recently begun by the Medical Center.

A special cost containment task force committee was established in June with a goal of saving at least a half a million dollars in operating costs for a two year period. To date the center can account for combined savings of $85,000 from various projects, according to Nick Brown, Chairman of the Task Force and Director of the Lovelace Pharmacy Department.

The rapidly rising costs of materials and supplies triggered the establishment of the cost containment program to prevent unnecessary cost increases and where possible to actually reduce operating costs. The $48,000 estimated yearly savings for patients will result from the introduction of a new prepackaged piggy back IV anti-biotic container which, when required by hospitalized patients, will result in a direct savings to those patients of $12 to $24 a day.

Additional suggestions from employees have resulted in considerable savings for the center even during the first two months of activity in this area. Included in these implemented suggestions are a new telephone system which saves the center $14,000 a year and installation of a new laundry facility at LMC's Ridgecrest Manor Nursing Home, resulting in a $12,000 a year savings.

In a recent report Brown paid tribute to employees whose many suggestions are resulting in additional savings ranging from $15 a month to $100 a month. "The total of all these efforts is, I think, an excellent example of how the Medical Center is striving to face the problems of rapidly escalating costs of supplies and materials," said Brown.

STATEMENT OF THE NEW MEXICO HOSPITAL ASSOCIATION WITH REGARD TO HEARINGS BEFORE THE ADMINISTRATIVE PRACTICE AND PROCEDURE SUBCOMMITTEE ON SENATOR HARRISON SCHMITT'S BILL, S. 2011, THE REGULATORY REDUCTION AND CONGRESSIONAL CONTROL ACT, SEPTEMBER 12, 1978

AUGUST 30, 1978.

Federal Regulations have added billions to the cost of health care in the United States since the passage of Medicare and Medicaid legislation followed by PL 92-603, PL 93-641, and others.

New Mexico, as a rural state with many small hospitals serving remote communities, has had a very difficult and costly experience in complying with mountains of federal regulations which often contribute nothing to increasing the quality of health care or the safety of the patient.

Most costly Federal Regulations to New Mexico's hospitals include:

Medicare and Medicaid Reimbursement and other Regulations.

Life Safety Codes (Facility Codes and Standards).

Hill-Burton Regulations.

Health Planning Regulations, including Section 1122, Social Security Act, and Certificate of Need, PL 93-641.

Utilization Review and Professional Standards Review Organizations.

Rehabilitation Regulations.

OSHA.

Wage-Price Control Regulations under the Economic Stabilization Program.

Workmen's Compensation Regulations.

Unemployment Compensation Regulations.

The New Mexico Hospital Association has long criticized Federal Regulatory authorities for:

Excessive reporting and inspection, which often results in duplication and conflicting requirements;

Creation of multiple centers of authority and accountability;

Lack of incentives to institutions and professionals to achieve effective delivery of health care;

Lack of time given to respond to Proposed Regulations, usually 30 days;

Lack of flexibility of Regulations for rural hospitals; and

Lack of consideration of cost to the hospital for implementation.

New Mexico's hospitals have not had the financial and manpower resources to make a formal cost study of these complex and costly regulatory issues. However, we would invite the Subcommittee's attention to and urge your contact with the following Hospital Associations who have researched these important regulatory cost issues.

1. The American Hospital Association, 840 North Lake Shore Drive, Chicago, Illinois 60611. The AHA has published on May 18, 1977, a booklet entitled "Hospital Regulation, Report of the Special Committee on the Regulatory Process," which is an in-depth study of the regulatory process and special problems with Health Care Regulations. Copies of this booklet have been furnished Senator Schmitt's office, and more are available through the AHA Washington Office.

2. The Michigan Hospital Association and the South Carolina Hospital Association have comprehensive reports recently published by Arthur Young & Company entitled "Hospital Costs Attributable to Government Regulations."

We believe the above studies would be especially valuable to your Subcommittee's deliberations on these expensive regulatory matters.

Finally, we fully support the concept of S. 2011 to establish a uniform procedure for Congressional review of Executive Branch rules which may have a harmful impact on the public, etc. This is legislation long needed and overdue.

Please contact us if we can be of further assistance to your Subcommittee on these important hearings.

Respectfully,

JAMES L. LACOMBE,
Executive Vice President.

From Manning, Selvage & Lee, Inc., 1750 Pennsylvania Avenue, N.W., Washington, D.C. 20006. Contact: Jean Rainey (202) 393-6550.

For Hospital Association of New York State, Inc., 15 Computer Drive West, Albany, New York 12205. Contact: Andy Foster or Jim Chapman (518) 458-7940.

Twenty-five percent of hospital costs in New York are spent complying with government regulations. This adds almost $40 to the daily cost of each patient's stay, according to a report released today by the Hospital Association of New York State.

The two-year study, covering costs for 1976, reveals that hospitals in New York State spend more than $1.1 billion to satisfy regulations imposed by federal, state and local agencies. News briefings were held in 11 New York cities to announce the results of this study which includes detailed information from almost 150 hospitals in the state. According to spokesmen at these meetings, "We recognize the need for some regulation but the question is not whether there should be regulation of hospitals, but rather how much regulation is necessary."

This is the second report on regulation released by the Hospital Association of New York State which represents more than 300 hospitals and health care institutions in New York. In the earlier study, released in 1976, the Association identified 164 different agencies with authority over hospitals in the state. The president of the Association, George B. Allen, said, "When we identified the 164 different agencies, the next most obvious question to be answered was the one of cost. How much does it cost to complete the countless forms, questionnaires and other inquiries by government? How much time is taken from patient care to comply with regulations? All of the people involved in the study knew that the amount would be high, but I don't think anyone knew it would amount to more than a billion dollars."

Some of the highlights of the report include:

Twenty-five percent of hospital costs are attributable to meeting government regulatory requirements.

The annual cost to hospitals and the patients they serve is in excess of $1.1 billion.

About 115 million man-hours per year are needed to meet regulatory requirements.

The annual commitment of 115 million man-hours to regulatory matters is equivalent of more than 56,000 hospital employees

spending all of their time on regulatory matters. This is enough people to staff 75 hospitals, each with an average of 250 beds. Further, 56,000 hospital personnel could provide medical services to approximately 600,000 hospital patients.

The cost of new hospital regulations is estimated to be 4% more each year.

About $38.86 is spent each day for each patient in meeting regulatory requirements.

More than $125,000 per hour, 24 hours a day, 7 days a week is spent by hospitals in meeting the cost of regulations.

Three million dollars a day, 7 days a week, 52 weeks a year is spent on meeting the cost of regulation.

Each Registered Professional Nurse must spend the equivalent of more than one day each week involved in regulatory functions.

Allen added, "The billion dollars reported today is only part of the cost, no one that we know of has any idea of the total various government agencies spend. Conservatively, the billion dollar figure could be double. We will formally ask the State to ascertain the amounts they spend on the regulation of hospitals and we will ask the Legislature to establish a State Health Services Commission to attempt to bring some rationality into what is clearly a situation that has grown out of proportion."

BACKGROUND MATERIAL AND INFORMATION ON VOLUNTARY EFFORT, NEW MEXICO HOSPITAL COSTS, AND THE NELSON AMENDMENT

(Presented to Senator Pete Domenici and Senator Harrison Schmitt)

With national concern for hospital costs hospital cost containment legislation was introduced in 1977 at the urging of President Carter. Several attempts for passage of this legislation have failed. Once these efforts failed in the House, the Administration and supporters, specifically Senator Nelson, attempted to amend the Talmadge Bill, H.R. 5285, to include a Carter cost cap. This type of control would be very detrimental to New Mexico hospitals and patients served. Included in this document is information regarding voluntary cost containment efforts and specific increases in costs. Also included is information on the impact of the Nelson Amendment upon New Mexico hospitals and their ability to provide existing services, expand existing services, and provide added services to New Mexico's citizens and specifically in unserved and underserved areas of New Mexico.

EXAMPLES OF INCREASING COSTS OF GOODS AND SERVICES PURCHASED BY HOSPITALS

Costs of goods and services which are purchased in the current highly inflationary market have increased greatly for hospitals. In many instances the costs of these goods and services have increased at a greater rate than the already rapidly increasing Consumer Price Index. A recent analysis by Rate Controls, a hospital-industry publication, estimates that inflation to hospitals for the goods and services which they purchase will increase during 1978 by 8.4% to 8.9%. Thus, we can anticipate, if these projections are accurate, that the cost to hospitals for their goods and services will increase by this amount. Thus, any increases in intensity of services provided and/or addition of services will be above that amount. We anticipate that in many sections of New Mexico the increase would be significantly greater due to provision of services to otherwise underserved populations and areas.

Some specific examples within New Mexico of these increases are in the area of utilities. For two sample hospitals, a very large Albuquerque hospital and a 100 bed rural hospital, the utilities expense has increased dramatically without an increase or change in the size of the facility.

	Total utility expense	Percent increase	Percent annual increase
Albuquerque hospital:			
May 1975	$29,450	133	[1] 40
May 1978	68,650		
Fiscal year ending June 30:			
1975	365,000	91	[1] 30
1978	698,000		
Rural hospital (approximately 100 beds):			
June 1977	5,100		43
June 1978	7,300		

[1] Approximately.

In this rural hospital, which recently moved into a new facility, the most recent electricity bill received August 21, 1978 totalled $11,600 compared with a previous bill of $4,800. Their water and natural gas expense are expected to increase drastically. Such expenses, when included in a cap proposal, certainly cannot be significantly reduced regardless of numerous energy conservation efforts.

Other examples of the significant increases were sent to you recently in a letter from Richard Barr, Executive Vice President, Presbyterian Hospital Center. For your ease in reviewing this I am enclosing an additional copy. There are several other examples of significant increases in costs.

IMPROVEMENTS IN TECHNOLOGY

You also requested information on improvements in technology. One specific example is the recent opening of a replacement hospital for San Juan Regional Medical Center in Farmington. This new facility replaces a very old and inadequate structure. Costs of operation of this new facility will increase greatly due to combination of general inflation and new technology.

The facility which increased in size from 118 to 144 beds also had a significant increase in square footage per bed. The old facility had 533 square feet per bed compared to the new facility with 1,025. It is anticipated that upon completion of the remodeling of the old facility, which is adjacent to and connected with the replacement facility, that the approximate square footage per bed will increase to 1,200. This additional square footage resulted from a combination of more spacious and adequate inpatient capability, such as larger operating rooms and other facilities, plus significant expansion of outpatient services and capabilities to better meet the needs of individuals within the community. This facility at a total cost of $12 million including building and equipment will be of much greater service to the community.

In addition to the replacement of services several additional capabilities have been added to improve service to the community such as Ultrasound with a capital expenditure of $66,000 and an estimated first year operating cost of $60,000. Attached for your information is an excerpt from the San Juan Regional Medical Center "Vital Signs" regarding the new Ultrasound services. In addition, their facility is planning an alcohol treatment program which will provide 15 beds with a first year operating cost of approximately $275,000. As you are aware alcoholism is a significant problem in the Farmington area and this service is intended to meet that need. Obviously with a cap this service might not be possible. In the very near future neurosurgical services will be provided in the facility with a neurosurgeon arriving in November of 1978 and an additional neurosurgeon in the spring of 1979. These increased services which are necessary to meet the needs of numerous accident victims in the area will significantly add to the cost of providing total services to that community. Other additional medical staff are being added to the area to meet the needs of the growing community. In addition, speech pathology and audiology services have been added at a total capital expenditure of $38,000 with a first year operating expense of approximately $100,000.

Other improvements in technology in New Mexico include the replacement hospital in Clovis to be dedicated September 17 and a replacement facility in Belen opened in July. Other recent improvements have been a new facility opened in August, 1977, in Carlsbad. This replaced two existing facilities of which one was very old and outmoded. In addition to the mere physical structures several additional services or improved services are now being provided to the Carlsbad area. In addition to replacement facilities several hospitals are providing additional services as additional physicians are attracted to the area. These include primary care as well as secondary care physicians which will meet the needs of the community. Likewise, several new services have been or are being planned for New Mexico. Lovelace Medical Center recently opened satellite clinics in Roswell and plans additional clinics in other areas of New Mexico. With a cap such services could be curtailed or eliminated although greatly needed. Additionally, Presbyterian Medical Services which operates two hospitals in Taos and Cuba plus several clinics in remote and financially poor areas of Northern New Mexico and Southern Colorado could be severely limited by a cap. Several other hospitals are planning and/or providing new and/or expanded services which would be severely limited by a cap. Gerald Champion Hospital in Alamogordo is currently constructing added service space and replacement and/or remodeling of existing inadequate facilities.

WHAT NEW MEXICO HOSPITALS ARE DOING TO CONTAIN COSTS

While New Mexico hospitals are faced with significantly increasing costs for goods and services which are purchased on a very inflationary economy and while significant improvements in technology and thus greater benefit to patients are being provided New Mexico hospitals are continuing cost containment efforts. In addition to those efforts which were identified to your staff on our visit to Washington which related to Presbyterian Hospital Center efforts and Presbyterian Hospital Center-St. Joseph Hospital combined efforts we have included several other cost saving activities. For your information I am enclosing "The President Speaks" from a recent Lovelace Medical Center Intercom which points out the efforts of that facility and the need for voluntary cost containment. Also enclosed is a news release from Lovelace Medical Center which identifies some of the specific savings achieved by their voluntary cost containment committee.

Enclosed is a summary of savings totalling $535,750 for the first two years of operation of the New Mexico Hospital Consortium whose members include:

Cibola General Hospital, Grants.
Memorial Osteopathic Hospital, Roswell.
Rehoboth Christian Hospital, Gallup.
St. Joseph Hospital, Albuquerque.
University Heights Hospital, Albuquerque.
Dan C. Trigg Memorial Hospital, Tucumcari.
Gerald Champion Hospital, Alamogordo.
Mimbres Memorial Hospital, Deming.
San Juan Regional Medical Center, Farmington.
St. Ann's Hospital, Truth or Consequences.
Vista Sandia Hospital, Albuquerque.

Several other hospitals have made significant efforts at cost containment. Memorial Hospital, Las Cruces, significantly reduced the number of employees through attrition.

We indicated to you that significant sav-

ings also had been achieved through refinancing of long debt with industrial revenue bonds. Specific savings thus far are:

	Million
Presbyterian Hospital Center, Anna Kaseman Hospital Clovis High Plains Hospital	$4
St. Joseph Hospital	8
St. Vincent Hospital	10
Total	22

Other hospitals are in the process of refinancing which will result in additional savings.

The New Mexico Hospital Association through the development of the Joint Unemployment Insurance Program recently was expanded to cover seven city/county facilities and has over the past six years saved in excess of $6 million.

PROBLEMS WITH AND IMPACT OF NELSON AMENDMENT

During our discussion we mentioned certain technical defects in the Nelson Amendment which would have a detrimental impact upon New Mexico and other western states. Although the amendment appears to establish an upper limit of payment at 115% of the average per diem routine cost for hospitals in each classification group, it does not. The amendment provides that the computation of the group averages would exclude from consideration *all* costs in the previous year in excess of 115%. Under this methodology it is estimated that over 30% of all hospitals would be paid below their actual cost. Further, in the western region of the United States almost two-thirds of the hospitals would be reimbursed below their costs. The reason for this significant impact on the western states and specifically New Mexico is the short length of stay. New Mexico's length of stay during 1977 of 5.7 days compares favorably with 7.7 days for the United States. Using the Nelson Amendment computations New Mexico hospitals' costs per day would be considerably higher although the cost per stay is in the lowest quartile. Obviously the intent is to reward effective and efficient facilities. This amendment does not. It would penalize those facilities with short stays and low costs per stay. Likewise, the elimination from the computation of all costs above the 115% does not result in a real average. There may be legitimate reasons why facilities are above the 115% factor, especially on a per diem basis.

Another major area of concern is the requirement that one-half of any incentive payments must be returned to employees. While it obviously is important to have increases in productivity and other reductions in cost that may relate to employees, a number of cost containment activities are not affected by employees. Savings due to improved purchasing practices, refinancing of long-term debt, and energy conservation are not the result of better employee performance.

The 115 percent factor, i.e., payment only up to 115 percent of the average, will have an even greater impact when applied to ancillary services. As you are aware as technology advances more ancillary services are provided and again significantly impacts on New Mexico short stay hospitals.

IMPACT ON SERVICES

All of this, of course, has a tremendous impact not only on expansion of existing services but on the maintenance of existing services and the provision of new services. If a hospital has not previously provided a service or has only provided a limited service the facility's cost per day for ancillary services or for other services would be pushed significantly higher and the hospital would be prevented from the addition and/or expansion of that service although greatly needed. Also with an existing service additional costs which could not be controlled such as utilities expenses or supply costs could very easily damage the ability to continue the service although it was efficiently operated.

VOLUNTARY EFFORT PROGRESS

In consideration of the various methods of achieving effective cost containment while at the same time insuring quality patient care and access to that care by all citizens of the nation and specifically New Mexico, the Voluntary Effort, which is a cooperative effort of the American Hospital Association, American Medical Association, and the Federation of American Hospitals, was developed. The Voluntary Effort which depends on individual hospital participation is organized in each state. New Mexico established one of the first voluntary cost containment committees and asked that each hospital provide a cost containment resolution adopted by their board of directors, medical staff, and also signed by administration. We are pleased to report that we currently have received or have indications from all hospitals in New Mexico that their board has passed or soon will pass a resolution. We are very pleased with this progress but will continue our commitment to the Voluntary Effort here in New Mexico while recognizing the need for assurance of quality care and provision of access to that care for New Mexico citizens.

The progress thus far nationally has been very significant. As you are aware for the past several months the rate of inflation in hospitals has been lower than in the economy as a whole. During the first five months of 1978 the rate of increase in total hospital costs, as reported by the American Hospital Association Panel Survey, was 3.3 percentage points lower than the same period of 1977.

We also point to recent Consumer Price Index information, specifically for June, 1978. We have enclosed a copy of the Bureau of Labor Statistics report which shows that medical care, of which hospital care is a component, for the three months ending June, 1978, was fourth lowest out of seven items reported. While we continue to be concerned about overall inflation we are pleased that health care is not increasing at the rate other segments are. This is extremely significant when the cost of all goods and services of hospitals is increasing rapidly. It is significant that of the four basics—energy, food, housing, and health—only one segment, i.e., health care, is decreasing.

In New Mexico the progress also appears quite favorable. It is important to note that with the several new or replacement facilities coupled with the addition of new physicians and improving technology that the total expenditures for hospital care in New Mexico may increase at a higher rate than nationally. For the first six months of 1978 compared to the same period of 1977 the total revenue for a sample of 20 New Mexico hospitals, which provide a significant portion of hospital care in New Mexico, increased 10%. During this same period the total expense increased by 17%. We are quite pleased with this progress although we will continue our efforts. Several of these will include the provisions of services that are alternatives to inpatient care, ie., ambulatory surgery and home health care.

VOLUNTARY EFFORT VS. NELSON AMENDMENT

Please find enclosed a comparison of the estimated savings under various hospital cost containment plans. This document prepared by the Health Care Financing Administration estimates the Voluntary Effort will save $31.3 billion compared to the projected savings of the Nelson Amendment of $37 billion. Even if HEW estimates are considered valid, and we consider those to be understated, we question whether the bureaucracy created by the Nelson Amendment would result in more net savings than the Voluntary effort.

It is inconsistent for health care to be the only area of the economy for which the Administration or Congress is considering a regulatory approach. One of President Carter's key advisors, Robert Strauss, supports voluntary contracts by industry in other segments of the economy and warns against standby controls. A copy of his comments specifically related to the steel industry is enclosed. You will note that Mr. Strauss points to the impact on anticipatory increases of such standby controls. We fear such anticipatory increases could occur if standby controls are placed on hospitals. The Voluntary Effort is flexible in recognizing each individual institution's difference from others and its changing role within its community from year to year.

CONCLUSION

New Mexico hospitals through individual and combined efforts are effectively impacting on the increasing costs of hospital care. New Mexico with its low length of stay and a cost per stay which is in the lowest quartile will continue these efforts. The Voluntary Effort on the one hand recognizes the uniqueness of each individual hospital, the patients it serves, and their individual efforts. On the other hand the Nelson Amendment makes no recognition of individual hospitals' needs or the community needs and would stifle the provision of needed services to New Mexico citizens, especially in unserved and underserved areas. The Voluntary Effort is a more reasonable approach than the Nelson cost cap.

COMPARISON OF ESTIMATED SAVINGS UNDER VARIOUS HOSPITAL COST CONTAINMENT PLANS

	Hospital revenues under current law (billions)	Estimated savings: Administration bill, if effective Jan. 1, 1979 (billions)	Estimated savings: Senator Kennedy's bill, if effective Oct. 1, 1978 (billions)	Estimated savings: Senator Nelson's amendment: Voluntary program (billions)	Estimated savings: Senator Nelson's amendment: If voluntary program fails in 1979, standby program effective in 1980 (billions)	Estimated savings: Sec. 2 of Senator Talmadge's bill (millions)
1978	$54.5			−$0.4	−$0.4	
1979	63.0	−$2.2	−$2.8	−2.0	−1.7	
1980	72.7	−5.2	−6.4	−4.0	−3.6	−16
1981	83.5	−9.9	−10.7	−6.3	−7.3	−70
1982	95.2	−15.9	−16.5	−8.4	−10.4	−122
1983	107.6	−22.6	−23.2	−10.2	−13.6	−175
Total	476.5	−55.8	−59.6	−31.3	−37.0	−373
Total for medicare and Federal medicaid	178.9	−18.7	−29.0	−11.5	−12.8	−373

Note: Estimate of Senator Kennedy's bill done by the Congressional Budget Office, the estimate indicates a relatively higher savings under medicare and medicaid because the CBO projected higher current law growth rates for the Federal programs, resulting in greater savings upon application of the limit.

SUMMARY OF SAVINGS TO NEW MEXICO HOSPITALS IN THE 1ST 2 YR OF OPERATION OF THE NEW MEXICO HOSPITAL CONSORTIUM

[Purchasing program (4 examples out of 200 purchasing contracts)]

Example	Estimated savings	
	Per year	Over 2 yr
IV solutions	$132,000	$264,000
Needles and syringes	36,000	62,000
Disposable linen packs	8,880	17,760
Underpads	6,600	13,200
Total savings over 2 yr on examples given		356,960
Education program: Savings over 2 years		$50,000
Biomedical engineering:		
Savings in cost of service—2 years		60,000
Reduction in insurance premium—2 years		108,000
Total savings		168,000
Provider representative:		
Savings over 2 years resulting from a reduction in accounts receivable using a cost of cas of 12%		28,000
Physician recruitment: Savings of $1,500 per physician placement		3,000
Consultation: Medical Records Savings over 1.5 years		12,420
Construction and maintenance: Savings on one project		9,000
Long-range planning: Savings on one study		4,000
Total savings over 2 years		632,180
Less costs of NMHS operation		96,430
Net saving to participating New Mexico Hospitals (using only 4 examples of purchasing contracts)		535,750

● Mr. DANFORTH. I believe that one of the best qualities of the American people is their generosity; their spirit of volunteerism; their willingness to give of themselves, their time, and their money. I am afraid that our Government more often than not stifles or even kills that spirit of giving rather than fosters and supports.

If I gave $100 to my community hospital and instead of the $100 benefiting that hospital, the $100 replaced dollar for dollar the Government's medicare and medicaid bill to that hospital, I probably would stop giving. Fortunately, the Government has recognized the problem in this situation, and HEW has issued regulations which try to encourage gifts without creating a situation where the Government is being billed for specific items which are paid for by designated gifts.

I am pleased that section 30 of H.R. 5285, which was added by an amendment of Senator BOB DOLE, recognizes the importance of philanthropic support for health care and codifies the HEW regulations with respect to unrestricted gifts. I believe it is useful to have the rules regarding the important area of philanthropic support in the statute itself, not merely in regulations. In that regard, I would like Senator DOLE and Senator TALMADGE to clarify one point for me. Section 30 refers only to "unrestricted gifts," not restricted gifts, and does not define what "unrestricted gifts" are. Am I correct that section 30 is not intended to change existing regulations with respect to restricted and unrestricted gifts and intends the same definition to apply? More specifically, if an individual makes a donation to a hospital with the understanding that it will be spent as the hospital deems best, and the hospital then chooses to restrict the spending of the contribution to some specific purpose, my understanding is that HEW would regard those funds as "unrestricted." I take it those funds would also be termed "unrestricted" within the meaning of section 30. Is that correct?

Mr. TALMADGE. That is correct. The bill would not change existing policy with respect to philanthropic support.●

HOSPITAL COSTS ARE UNDER CONTROLS IN RHODE ISLAND

● Mr. PELL. Mr. President, the subject of hospital cost containment is of pressing importance to all of us, and of special interest to me because of the uniquely successful and commendable efforts being made in my State to combat this serious, inflationary problem.

In the State of Rhode Island for the last 4 years, we have seen a cooperative and successful effort at health cost containment and hospital utilization planning. Spearheaded by Rhode Island's Governor, the State's hospitals—all of them—Blue Cross/Blue Shield of Rhode Island, and the 94 percent of our doctors who are Blue Cross/Blue Shield participants, this unique mutual effort has kept health cost inflation significantly below the national average.

This effort is voluntary, and it is working because all of the partners want it to work. It shows what can be done when responsible hospitals, insurers, doctors, and State officials work together.

A fine article recently appeared in the Providence Evening Bulletin entitled, "R.I. Called Model for Nation on Hospital Costs," written by Bruce DeSilva, and I submit it for the RECORD at this time to bring it to the attention of my colleagues.

R.I. CALLED MODEL FOR NATION ON HOSPITAL COSTS

(By Bruce DeSilva)

PROVIDENCE.—Key U.S. senators, the Secretary of Health, Education and Welfare and President Carter are calling Rhode Island a model for national hospital cost containment.

Here's why:

Hospital costs in Rhode Island for the 12-month period which ended Saturday were $290 million, an increase of 10 percent over the previous 12 months.

During the same period, hospital costs nationally increased 14 to 15 percent. (The final figure has yet to be precisely tabulated.)

For the coming year, Rhode Island hopes to improve on its record: It was announced last week that room rates at most hospitals in the state will rise 9.7 percent.

For several years, Rhode Island's hospital rates have been climbing more slowly than those of any other state in the nation.

The success is due to a program called "prospective reimbursement."

What it means is that late in the summer of each year, officers of Blue Cross and Blue Shield of Rhode Island, representatives of the state budget office and officials of the state's 16 hospitals sit down around a negotiating table and haggle over money.

The sessions are grueling, with negotiators often emerging from the meetings with sweat-soaked shirts and short tempers.

But the result is an agreement on how much the hospital bill for Rhode Island will be for the coming year and how much of that bill will be allotted to each of the hospitals.

The program is voluntary. The hospitals could walk out on it anytime, and Blue Cross and the state medical assistance program would have to pay higher, unnegotiated rates.

But it is the hospitals who suggested the system in the first place, and all of the participants are under enormous pressures to make it work.

The system had its genesis in the late 1960s, when some General Assembly members became alarmed by hospital cost increases which at the time were about 20 percent a year.

Study commissions were appointed and several bills were introduced (but not passed) to control costs.

Meanwhile, Blue Cross was expressing similar concern, and hospitals were worrying that one of those cost control bills might eventually pass.

It was in this climate that Francis Fazzano, then director of business regulation and now a Superior Court justice, issued what amounted to an ultimatum to Blue Cross in 1971.

The Department of Business Regulation, Fazzano said, was no longer willing to allow hospital cost increases to be passed along to the consumer through Blue Cross rate increases.

From now on, Fazzano said, Blue Cross would have to justify the hospital costs it attempted to pass along in higher rates.

"That was the trigger," said John Murray, state budget officer. It forced all those groups who had been talking about hospital cost containment into action.

Rhode Island Hospital told Blue Cross it would be willing to negotiate, in advance, the amount of money it would spend in the coming year. Blue Cross agreed, other hospitals jumped on the band wagon, and the state budget office, with millions in state medical assistance payments to protect, opted in.

The young program was superseded by President Nixon's wage and price controls, but by 1974 it was working.

For fiscal 1975, when national hospital costs went up 19.5 percent, prospective reimbursement held Rhode Island's to 14.23. In fiscal 1975, the figures were 15.4 percent national and 12.48 Rhode Island. The following year they were 16.1 percent national and 10.98 percent Rhode Island.

President Carter's hospital cost containment program, which is having a hard time in Congress because it is regarded as too tough, calls for the national rate of increase to be reduced in stages until it reaches 12 percent in fiscal 1981.

President Carter and HEW Secretary Joseph Califano have both repeatedly cited Rhode Island's experience in supporting the legislation and in boosting even stiffer measures. Further, they have invited Rhode Islanders to Washington to discuss with bureaucrats and congressmen the state's experience.

The reduction to 12 percent isn't reasonable say opponents of the bill, now being debated in the Senate.

Yes it is, reply Senators Claiborne Pell and Edward F. Kennedy. Rhode Island already is doing even better, they have said in the course of debate.

"The national proposal," said Francis R. Dietz, administrator of Memorial Hospital in Pawtucket, "doesn't even set as a goal what we have already achieved here."

Why has the Rhode Island system worked?

First of all, said William D. Sweeney,

senior vice president of the Hospital Association of Rhode Is and, it works because the hospital officials here are as concerned about rising costs as anyone.

Secondly, said Paul Carvisiglia, director of the Health Planning Council (a nonprofit planning agency which provides opinions to the state on all new hospital programs), it works because there is an element of trust among the participants. In this small state, key men in the health system have long been accustomed to dealing with each other on a wide range of complicated issues, he said.

Thirdly, offered Murray, it works because the hospitals fear that the alternative to this voluntary program is a mandatory program that would be enacted by the state.

Each of the participants, in fact, has a major stake in the success of the program.

While for the hospitals it is the threat of a mandatory program, for Blue Cross it is the threat of a denial of rate hike applications by the Department of Business Regulation. And for the budget office it is the enormous pressures on the state budget and the political consequences of increased spending.

One of the key factors in the Rhode Island program is its flexibility, said Douglas J. McIntosh, Blue Cross president.

The mandatory cap on hospital spending in many of the national proposals is an across-the-board lid that applies universally and arbitrarily to all hospitals, he noted.

But in Rhode Island, he said, the negotiated cap figure is not applied equally to all hospitals.

Last year, for example, the overall negotiated cap was 10.42 percent. (The hospitals actually spent a bit less.)

But within that overall figure, some hospitals had individual caps as low as 8.9 percent, and But'er Hospital, which is in the midst of a major expansion program, was allowed to increase its spending by 18.6 percent.

Actually, all of Rhode Island's hospitals, particularly those affiliated with Brown University, have been expanding in the last few years. Teaching programs, research programs and sophisticated technology have been added.

"We've been bringing costs down at a time when our programs have increased dramatically," said Dietz. "The hospitals can be quite proud."●

Mr. NELSON. Mr. President, how much time does the Senator from Wisconsin have remaining?

The PRESIDING OFFICER. There are 13 minutes remaining.

Mr. MATSUNAGA. Mr. President, will the Senator yield?

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. NELSON. I had agreed to yield to the distinguished Senator from Maine who, I understand, desired to propose an amendment.

Mr. MUSKIE. That is correct.

Mr. NELSON. Is there time allowed on each amendment to these amendments, may I ask the Chair, or is that the amount of time that the author of the amendment has?

The PRESIDING OFFICER. An amendment in the second degree will be in order when time has expired on the amendment in the first degree. There are 20 minutes of debate equally divided on each side.

Mr. NELSON. It is not in order at this time?

The PRESIDING OFFICER. Not without unanimous consent.

Mr. NELSON. I ask unanimous consent that the amendment to be proposed by the Senator from Maine be permitted to be taken up.

Mr. JAVITS. Mr. President, reserving the right to object. It may be necessary for a little more time because there are a number of us who would like to make statements.

Mr. NELSON. I understand the time will be charged to the Senator from Maine's amendment.

The PRESIDING OFFICER. If there is unanimous consent, 20 minutes to Senator MUSKIE, equally divided, those 20 minutes would not impinge on the Senator's amendment.

Mr. NELSON. I ask unanimous consent to that effect.

The PRESIDING OFFICER. Is there objection?

Mr. CURTIS. Mr. President, reserving the right to object, is the Muskie amendment an amendment to the Nelson amendment?

Mr. NELSON. Yes; it is simply an amendment to allow a State creating its own voluntary program prior to July 1, 1979, 1 year to prove their case.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. MATSUNAGA. If I may put a question to the Senator from Wisconsin, is this amendment being offered by the Senator from Maine acceptable to the Senator from Wisconsin?

Mr. NELSON. Yes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wisconsin?

Mr. NELSON. And I think it is acceptable to the Secretary of HEW, as a matter of fact.

Mr. MAGNUSON. Will the Senator yield for a question?

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Maine is recognized.

Mr. MAGNUSON. Under the so-called Nelson amendment, it is my understanding that a State like my own State of Washington——

Mr. NELSON. Yes; the Senator from Washington raises a question about what the effect is if a State has in place its own mandatory program: Are such programs exempt under any provisions of this pending amendment, even though it was triggered for cost control? The answer is "Yes."

Mr. MAGNUSON. Such as that of the State of Washington.

Mr. NELSON. Such as that of the State of Washington.

Mr. MAGNUSON. I thank the Senator.

Mr. MUSKIE. Mr. President, I yield 2 minutes to the distinguished Senator from Michigan.

Mr. RIEGLE. I thank the Senator.

Mr. President, I would like to express my support for the amendment offered by the Senator from Wisconsin (Mr. NELSON).

The PRESIDING OFFICER. Excuse the Chair for interrupting. Does the Senator from Maine wish to offer an amendment?

UP AMENDMENT NO. 2065

Mr. MUSKIE. Yes; I call up my amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. MUSKIE) for himself and Mr. HATHAWAY, proposes an unprinted amendment numbered 2065.

Mr. MUSKIE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 21, insert the following: Strike out the word "subsection" and all that follows through "increase in the" on page 18, line 16, and insert in lieu thereof the following: "subsection (dd) of this section hospitals physically located in such State, if—

'(A) The Secretary finds that such State enacted prior to the enactment of this section a program capable of containing hospital costs for inpatient hospital services in the State which covers at least 90 per centum of the hospitals in the State, which would otherwise be covered under subsection (dd) of this section;

'(B) The Secretary finds that the State program applies at least to all revenues for inpatient hospital services of hospitals covered by the program;

'(C) One year after the effective implementation of the State program the Governor (or chief executive) certifies and the Secretary determines, that the aggregate rate of increase in revenues over the previous accounting year for inpatient hospital services for all hospitals in the State will not exceed (i) the increase that the Secretary estimates would be permitted if subsection 1861(dd) (including the passthrough of any increase in the * * *."

Mr. MUSKIE. I yield to the Senator from Michigan.

Mr. RIEGLE. Mr. President, I would like to express my support for the amendment offered by Mr. NELSON, which I believe forges a reasonable compromise between mandatory cost controls and the limited voluntary effort suggested by the Finance Committee. I believe the Nelson amendment should encourge effective, cooperative approaches to controlling hospital costs such as the innovative approach now underway in my home State of Michigan.

I would like to point out to my colleagues that the Nelson amendment does not, like Procrustes, treat all cost control approaches alike. Rather, it leaves ample leeway for innovative approaches to controlling hospital cost increases, provided they meet the ultimate test of success in the long run.

One of the most promising approaches to controlling hospital costs is, of course, prospective budget reviews. In the State of Michigan, a cooperative budget review mechanism involving providers as well as public and private payors has recently been developed and has begun to show promising results. It is my belief that this system, reinforced by a universal commitment on the part of health professionals to control cost increases, will enable Michigan to meet the voluntary goals.

I would like to point out, additionally, that the Nelson amendment we are considering today specifically exempts all new hospitals from the voluntary program. New hospitals would also be ex-

empt from the standby controls until they have had at least a 2-year chance to get underway and establish efficient procedures for providing essential health services to previously underserved areas.

More specifically, I would like to discuss with the sponsor of this amendment our understanding of the exemption processes provided for under his amendment. The Senator from Wisconsin has repeatedly explained that hospitals in a given State would be subject to the standby cost controls only if the national voluntary effort failed to meet its national goal, and if the average in that State also failed to meet the national goal. Even in such cases, however, the Secretary of HEW would be instructed to exempt State programs that have the capability of effectively controlling hospital cost increases.

These HEW-determined exemptions are designed, at least in part, to encourage the development of innovative and effective cost containment programs in the various States. In discussing the most promising cost containment mechanisms being considered, HEW representatives have repeatedly praised the type of prospective budget review mechanism recently implemented in Michigan. I would therefore anticipate that the Secretary would look favorably on this sort of cooperative approach—which involves State participation and, therefore, supervision without mandating complete State dominance of cost containment processes—in developing his policy on State exemptions. In addition, the Secretary would, of course, give considerable weight to the cost-containment accomplishments already achieved during the initial years of implementing such a statewide system.

Mr. NELSON. I thank the Senator from Michigan for his support of my amendment, and I would like to add that I wholeheartedly agree with his discussion of the implications of the amendment. This proposal includes a number of "escape valves" for effective cost containment programs, including the standby nature of controls if the national voluntary goal is met, the exemption for hospitals in States meeting the national goal, and the discretion given the Secretary of HEW to exempt additional programs that show promise of effectively reducing the rate of increase in hospital costs. In particular, I definitely agree that, in granting such exemptions, the Secretary would, of course, take into account both a State's experience in controlling costs in earlier years and the long-term potential of prospective budget review as a means of coping with inflationary pressures through cooperative means involving both public and private payors as well as health care providers.

Mr. RIEGLE. In order to clarify one additional matter concerning the interpretation of the exemption clauses of the amendment, I would like to ask the Senator if he agrees that a State could qualify for an exemption under section 1861 (ee) if the State uses differing methodologies for different payors?

Mr. NELSON. I thank the Senator for raising this issue. I can assure the Senator that a State could be approved for an exemption under section 1861(ee) even with several different methodologies within that State if all the other requirements for an exemption were met, and if the methodologies provide comparable results, taking into consideration the State's capability to move toward identical results in the near future. I understand that the Department of HEW concurs with this interpretation of my amendment, so I can assure the Senator that his understanding is correct.

Mr. RIEGLE. I appreciate the Senator from Wisconsin's assistance in clarifying this provision, and I wish to reemphasize my support for his amendment, which I hope may lend additional impetus to cooperative cost control efforts throughout the country.

Mr. MUSKIE. Mr. President, I will explain my amendment briefly. I have already discussed it with Senator NELSON. Before I discuss my amendment, I would like to say that I have had occasion to study all of these proposals for cost containment, and Senator NELSON'S to my mind, has been the best from the beginning; and I have been inclined to support it from the beginning. I think it is a happy combination stimulating voluntary action to bring costs down, and I do not really believe we can get independent effectiveness without voluntary participation, but also need mandatory programs to be enacted in the event voluntary programs do not work.

The purpose of this amendment, Mr. President, is to exempt from mandatory controls any State which enacted a hospital cost containment proposal prior to the enactment of the pending legislation. Federal mandatory controls would go into effect if a State which has enacted such a program did not, after 1 full year of operation, keep its hospital costs down to the level required by the Nelson amendment.

The effect on my State would be this: the last session of the legislature, last winter, enacted such a program. It takes 90 days under our constitution for legislation to take effect, and so the organizing for that effort has just begun, and so the program will go into effect next July. So it will take a year from next July to know the full effect of that program.

It seems to me that States in this situation ought to have that opportunity to prove out their programs. I have full confidence that the program will prove effective.

I think there is much to be said for stimulating effective State programs. I think it would reduce the bureaucratic load. I think it would, in many cases, if the programs are effective, do a better job. But in any case, as of now, when States have already enacted such programs, my achievement would simply give them that year to prove themselves effective.

I have discussed this proposal with the proponent of the Nelson amendment.

Mr. NELSON. Mr. President, let me say that I am happy to accept the amendment of the distinguished Senator from Maine. So far as I can determine, he addresses himself to the case in which a statute has been passed, but by July 1 there may not be enough experience for the Secretary to make a valid determination. This amendment, in that kind of a case, where a statute has already been passed, permits them to have 1 year to prove that their system will work. If not, of course, the Secretary can withdraw their exemption.

Mr. MUSKIE. I understand.

Mr. NELSON. I think it makes eminently good sense.

Mr. MUSKIE. I thank the Senator. Incidentally, this amendment is cosponsored by myself and my distinguished colleague from Maine (Mr. HATHAWAY).

Mr. NELSON. I yield back the remainder of my time.

Mr. MUSKIE. I yield back the remainder of my time.

Mr. NELSON. I move the adoption of the amendment.

Mr. MATSUNAGA. Mr. President, before the Senator does that, will the Senator from Wisconsin yield for a few questions?

Mr. NELSON. As soon as we adopt the amendment. I move the adoption of the amendment.

The PRESIDING OFFICER. Is all remaining time yielded back?

Mr. MUSKIE. All remaining time is yielded back.

Mr. CHAFEE. Mr. President, will the Senator yield for a question?

Mr. NELSON. I yield.

Mr. CHAFEE. Mr. President, we are moving, now, on the adoption of the Muskie amendment?

The PRESIDING OFFICER. That is correct.

Mr. CHAFEE. We will soon have a time to inquire as to the Nelson amendment?

The PRESIDING OFFICER. That is correct.

Mr. CHAFEE. Why yield back all the time now on the Muskie amendment? We may need that later. Why not reserve the time?

The PRESIDING OFFICER. Time must be yielded back now before the question is put.

Mr. MUSKIE. I would have no objection to utilizing the remaining time on my amendment. I yield to the Senator from Rhode Island.

Mr. CHAFEE. May I direct a question to the Senator from Wisconsin on the Muskie amendment?

Mr. MUSKIE. I have no objection.

Mr. CHAFEE. I have a question for the Senator from Wisconsin.

Mr. NELSON. I wonder if the Senator will withhold. I did agree to respond to the Senator from Hawaii.

Mr. CHAFEE. Fine.

Mr. NELSON. We have not yielded back our time, I take it.

Mr. MATSUNAGA. I thank the Senator from Wisconsin for yielding.

The PRESIDING OFFICER. Time still remains on both sides.

Mr. MATSUNAGA. As I understand it, the Senator from Wisconsin had modified his amendment by accepting the Stone amendment; am I correct.

Mr. NELSON. That is correct. There were amendments proposed by Senator STONE and Senator CANNON, and I thought they were very good additions to the legislation, and they were incor-

porated in a modified amendment that I sent to the desk. So that is the amendment that is pending, and it does, as I am sure the Senator is familiar, permit any hospital in any State, if there is a trigger of the controls, even though that State is covered by the controls, if that hospital meets the national voluntary goal, that hospital is exempt; and it also contains a provision on rapid growth, to take into consideration the growing populations of different States.

Mr. MATSUNAGA. About the Senator from Wisconsin so modifying his amendment, in the event that the Senator's amendment, as modified, is agreed to and it becomes law, assuming that a hospital in the State of Hawaii does not meet the State standards but does provide, perhaps, a semblance of effective standards; who is to determine whether that one hospital is operating efficiently so as to qualify within the Stone amendment, as accepted by the Senator from Wisconsin?

Mr. NELSON. All hospitals now make an annual report on their costs. So if any hospital in Hawaii in its report is showing that it met the national goal, it is automatically exempt even though the State may not meet the national standard.

Mr. MATSUNAGA. The national goal being the ceiling of 15 percent, is it?

Mr. NELSON. Here is the way that works: The assumption is, though not finally determined, that starting in 1977 there should be a 2-percent reduction in the rate of increase, not in the expenditure in the first year, and 2 percent in 1979, a total of 4-percent reduction nationally in the average rate of increase in hospital costs, and that would hold through 1982. That is the American Hospital Association voluntary effort.

The assumption is that we are starting at 15.6 for 1977, and that a 2-percent reduction in 1978 would bring it to 13.6 and a 2-percent reduction in 1979 would bring it to 11.6. So if the Nation meets 11.6, this amendment never goes into effect at all. We all hope it does, and there are many hospitals which are doing very well.

We hope we never trigger it. But if, in fact, the national rate does not get down to the 11.6 rate of increase, which is at least 1½ times the national inflation rate, the controls would trigger. If they triggered then, only those States that did not meet the national goal of 11.6 would be covered by mandatory controls, with further exceptions.

No hospitals with 4,000 or less annual admissions would be covered in any event. That is half of the hospitals in America.

The next exemption is that even if a State did not meet the national goal of 11.6 but had in place an approved plan for controlling costs, and even though their costs were 12.6 or 13 or 14, whatever, if they had a plan in place to meet it and it was approved by the Secretary, they would be exempt, too, because they are going to get down to that level.

In the case of Hawaii, if they have a plan in place which is approved, or have one in place by July 1978, they would be exempt under any circumstance. If they meet the 11.6, they are exempt under any circumstance. And if they do not meet 11.6, any and all hospitals within Hawaii that do meet it would be exempt even though the State itself was not.

Mr. MATSUNAGA. So that the Senator's amendment, as modified, would not seek to impose a national standard as a whole but would take into consideration the differences as they exist from State to State.

Mr. NELSON. That is correct.

Mr. MATSUNAGA. I thank the Senator for his answers. I commend the Senator for accepting the modification.

The PRESIDING OFFICER (Mr. ABOUREZK). If the Senators will suspend, the time of the proponents has expired. There is 10 minutes remaining to the manager of the bill on this second-degree amendment.

Mr. NELSON. I would like to reserve that time and agree to yield to the distinguished Senator——

The PRESIDING OFFICER. The Senator does not have any time remaining.

Mr. MUSKIE. There is time of the manager on my amendment, is there not?

The PRESIDING OFFICER. But it is controlled by Senator TALMADGE.

Mr. NELSON. Does the Senator from Wisconsin have any time left?

The PRESIDING OFFICER. The Senator from Wisconsin has no time left on the second-degree amendment.

Mr. NELSON. Does the Senator from Maine have any time left?

The PRESIDING OFFICER. No.

Mr. NELSON. Then we should vote on the amendment.

The PRESIDING OFFICER. Let me clarify this. The Senator from Georgia has 10 minutes on the amendment which has not been used and that time is available if he wishes to yield. I recognize the Senator from Massachusetts.

Mr. KENNEDY. This is a very important matter. I just want to propose a unanimous-consent request, whether we can get an additional 15 minutes for the Senator from Wisconsin and an additional 5 minutes for the Senator from Georgia.

Mr. TALMADGE. Let us make it 10 additional minutes for the Senator from Wisconsin and I will not ask for any.

The PRESIDING OFFICER. Does the Senator from Georgia yield his time to the Senator from Wisconsin?

Mr. TALMADGE. Yes.

Mr. JAVITS. Will the Senator yield?

Mr. NELSON. I will yield whatever time the Senator desires.

Mr. KENNEDY. Will the Senator reserve 3 minutes for me?

Mr. NELSON. Yes. I yield 4 minutes to the Senator from New York, who has done a great amount of work on this amendment.

Mr. JAVITS. I yield 1 minute to the Senator from Rhode Island.

Mr. CHAFEE. I would like to ask a question of the Senator from Wisconsin. If we have a situation where the national average percentage of increase in 1977 was 15 percent, just assuming that, and a State's increase, because they had a program in effect, was only 10 percent, in 1978 the State does not have to go down to 8 percent? As long as they are below 13 percent they are not triggered into Federal controls?

Mr. NELSON. That is correct. They do not have to go below 8. They would be well below the national average. In fact, they could go up.

Mr. CHAFEE. They could go up. So the point is if a State is below the national average, they do not have to go below it in 1978 or 1979, they do not have to go to 2-percent below what they had in the previous year. All they have to gear themselves to is the national average rate of increase?

Mr. NELSON. That is correct. If the national goal is a reduction of 4 percentage points from 1977 to 1979, if that ends up at 11.6 and the State was at 10, it could go up to 11.6, if it wanted to. If it is at 11.6, it does not have to go down lower. Furthermore, if the rate of inflation went up, say to 8 percent, the national rates would go up because they are permitted to have a rate of increase of 1.5 times the rate of inflation. So if inflation went to 10 percent, they would be allowed to increase their rate to 15 percent.

Mr. CHAFEE. I thank the Senator very much.

Mr. JAVITS. Mr. President, I rise to express my support of the Nelson amendment.

Mr. President, It is the kind of compromise which we always seek. I would like to point out the salient differences between it and the approach which the manager of the basic bill has taken.

Let me pay a tribute to Senator TALMADGE. He has been wonderful on this issue. We may disagree on this particular matter, but I know of nobody who has had a sharper eye for how to cut down on medical care costs. So, if we differ, it is only in detail and not in the fundamental thrust at all.

Mr. TALMADGE. I thank my distinguished colleague.

Mr. JAVITS. The detail is that we are trying to reach all costs, whereas Senator Talmadge's amendment, as far as it goes, tries to reach medicaid and medicare costs. That it does well. Indeed, so well, that this amendment in terms of all costs is heavily built, almost completely built, upon the Talmadge amendment. So that is a fundamental point that Members should know about when they vote.

We are trying to reach in the Nelson amendment limitations on all costs with full precautions. Senator TALMADGE has had a limited objective.

As far as it went, it is fine.

Second, Mr. President, and this is very important, we want to allow the hospitals to have their voluntary shot. We are raising them two points in the second year; that is, 1979 and onward. But essentially, we want them to have their opportunity to decrease their costs themselves. If they do, they are free of controls and so on. We make it four points after 1979.

Last, Mr. President, we seek a pass-through of increases in the wage rates of "nonsupervisory employees."

Mr. President, there are tens, really hundreds, of thousands of employees involved that are known to have very low

wage scales. We just did not feel that we wanted to put the pressure of wage controls under this guise on them and felt that that was not necessary to effect the desired result.

Those are the differences and those are honestly and directly stated with the Muskie amendment and the Stone amendment. On the Hawaiian question, many States have individual problems. This is the solution and I hope very much the Senate will accept it.

Mr. President, for the past several years I, along with other Members of Congress, officials in the administration, and leaders from a diverse group of organizations in the private sector have grown increasingly alarmed at the tremendous rise in health care costs, much of which has taken place during the last 15 years. In 1963 the Nation's total health bill amounted to $32.4 billion; today that figure has climbed to $183 billion.

An increasingly significant proportion of these health care expenditures is devoted to hospital care. Consider, for example, these statistics recently issued by the Department of Health, Education, and Welfare:

The nation's hospital bill jumped from $3.8 billion in 1950 to $55.4 billion in 1976—a 15-fold increase—while the GNP increased only six-fold. This costs each person $254 or each family $890 a year and pushes the total annual medical bill per family to over $2200.

Since 1965, the rate of increase in hospital costs has accelerated to 15 percent per year—doubling every five years. It is estimated that, if left unchecked, this growth rate would lead to hospital expenditures of $220 billion by 1985.

Since 1965 the cost of an average hospital stay has jumped from less than $300 to over $1300.

Hospital costs are the largest and fastest growing portion of medical expenses. Today, hospital outlays account for 40 percent of all health care costs as compared to just over 30 percent in 1950.

These staggering statistics call for immediate remedial action. If we are ever to achieve equity in the delivery of medical care in this country, containing health care costs must receive our priority attention. Since hospital costs represent such a large proportion of overall health care expenses, I firmly believe that enacting a carefully designed program aimed at controlling hospital costs would be a wise first step which would move us closer to our goal of controlling all health care costs.

The administration introduced in April of last year the Hospital Cost Containment Act of 1977. This measure, if enacted, would have set an annual limit of approximately 9 percent on hospital cost increases. The Human Resources Committee, of which I am ranking minority member, reported a modified version of this bill in July of last year. Since that time, the legislation has become bottled up in other congressional committees. In the meantime, however, I am pleased to note that an effort has been undertaken by key organizations in the private sector—the American Medical Association, the American Hospital Association, and the Federation of American Hospitals—to fight voluntarily hospital cost inflation. This initiative, called by industry leaders the Voluntary Effort (VE), has my full support. The goal of the Voluntary Effort is to reduce hospital cost increases by 2 percent per year for the next 2 years and remain steady thereafter. In 1977, total hospital expenses increased 15.6 percent. In order to achieve the VE goal by the end of 1978, the rate of increase should be 13.6 percent. I have been pleased to learn that initial reports from representatives of the Voluntary Effort indicate that for the first 5 months of 1978 the increase in total hospital costs was 12.7 percent.

Despite the initial short-term success of VE, I have serious concerns about the long-term viability of such an effort. I am concerned that the industry on its own initiative will not be able to sustain the momentum necessary to turn this effort into a permanent reform. Therefore, while I believe that the voluntary effort should be given every reasonable opportunity to succeed, I also firmly believe that the Congress should take immediate steps to enact a program which could be activated in the event that the voluntary effort is not able permanently to control hospital costs.

This standby approach to hospital cost containment is embodied in the Nelson amendment. Unlike the administration's original cost containment proposal or the Human Resources Committee-passed bill, the Nelson proposal would trigger Federal controls only if the voluntary effort fails to meet its self-imposed targets. This approach, of course, allows the voluntary effort to succeed or fail on its own merits. However, standby authority must be viewed as an important element of an overall cost containment strategy. In the event VE fails, I believe the best interests of this country would not be well served if additional time were allowed to elapse while the Congress debated various cost containment strategies.

The cost containment provisions in H.R. 5285 (the Talmadge bill) are confined to setting medicare and medicaid limits on routine operating costs. While I cosponsored this measure and fully support passage of the bill, I believe it has two serious deficiencies which would be remedied upon adoption of the Nelson amendment. First, by limiting cost containment efforts only to medicare and medicaid, cost savings which would be realized through a more comprehensive cost containment program cannot be achieved.

Second—and more important—I fear that an unavoidable consequence of the Talmadge approach would be undesirable and unintended discrimination against this country's poor and aged. The proposed constraints on routine service costs contained in the bill acknowledge the need for holding down the currently unacceptable rate of hospital cost inflation. However, imposing such limitations only on medicare and medicaid virtually invites further discrimination by private hospitals against medicare and medicaid beneficiaries. In addition, these selective limitations bear disproportionately hard on those public hospitals which now serve large numbers of medicare and medicaid beneficiaries, thereby reducing the ability of these already financially strained institutions to provide quality care to the poor and elderly.

While I recognize and fully support the need to enact measures which will achieve cost savings in Federal programs, I do not believe we should blindly adopt such programs at the expense of the poor and aged. To do so, in my opinion, would be tantamount to abdicating the responsibility that the Federal Government has to these citizens. In pursuing cost containment programs, we must insure that no single segment of the population is unfairly burdened with the effects of such programs.

The Nelson amendment builds on the approach adopted in H.R. 5285, but in my opinion provides for a more complete cost containment strategy. First, it recognizes the hospital industry's voluntary goals for limiting the rate of increase in hospital expenses. Second, it remedies the deficiencies which I mentioned earlier by putting in place standby controls which would cover all inpatient costs for all payors if the voluntary goals are not met.

I believe this is an important, if not critical, amendment which warrants the support of every Member of Congress. In my judgment, this amendment represents a sound approach to hospital cost containment. I urge my colleagues to vote in favor of the Nelson amendment.

Mr. SASSER. Will the Senator yield?

The PRESIDING OFFICER. The Senator from Tennessee is recognized for 10 seconds.

Mr. SASSER. Mr. President, after careful deliberation and consideration, I have concluded that the amendment offered by the distinguished Senator from Wisconsin is worthy of my support and I shall vote for it.

The approach of the Senator from Wisconsin encourages continuation of the voluntary industry effort to contain hospital costs, but it permits the imposition of cost controls if the voluntary effort is unsuccessful. My hope is that controls will not be necessary. With the exception of August's 1.3 percent increase in health costs, the voluntary effort has been relatively successful. The 1.3 percent increase disturbs me, however, and I hope that it does not portend a new cost increase trend.

If there is a new cost-increase trend, this amendment is designed to protect American consumers from drastically increasing hospital costs. There is no such protection now, and my constituents have long implored me to encourage passage of legislation to provide this safeguard.

I would like to share with my colleagues some of the views expressed to me by concerned Tennesseans.

A small businessman from Chattanooga wrote:

Very seldom do I write any of our government officials, but recently I saw where Washington refused to put a lid on hospital costs. This came as distressing news to me. How long is it going to be before the American public's interest is aroused, as far as reasonable medical cost relief is concerned?

Every facet is outrageously unreasonable, as far as cost is concerned. At a luncheon, the other day, while we were all grumbling about the ridiculous medical situation in this country, one of the fellows sitting at our table remarked that Socialized Medicine, as they have in England, could not be any worse than what we have here. It has just about reached the point, in this country, where it is out of the reach of a lot of folks.

An elderly gentleman from Memphis expressed his problem this way:

There has been a lot said the past few years about the extremely high cost of medical care, but very little, so far, has been done to ease the burden on most people, especially us elderly people on low fixed incomes.

A recent experience with this problem has prompted me to write this letter. My wife and I are in our seventies and are trying to survive on very limited income. My wife entered the hospital recently for the purpose of having a small cyst removed from her arm. The operation took approximately twenty minutes. She stayed one night in the hospital. The surgeon's bill was $370; the hospital bill was $440, and the anesthesiologist's bill was $156. Adding to these bills a few incidentals, and the total cost of this minor operation came to nearly $1,000.

Medicare paid $108 on the surgeon's bill; approximately $300 on the hospital bill and $56 on the anesthesiologist's bill, leaving over $500 for us to pay out of our pockets.

We feel that these charges are completely unreasonable and are working a tremendous financial hardship on thousands of elderly people on low fixed incomes, and that some kind of legislation should be enacted to give some relief to the many people like us.

We hope that you will use your office and position to do whatever you can to stop, or at least slow down, the continued spiraling cost of medical care.

Finally, a citizen from Gatlinburg, after discussing a recent visit to his doctor, stated:

For those of us in the middle (fixed income) brackets, health care is becoming so high priced that we no longer can afford it. We aren't too interested in socialized medicine, but surely would like to see a ceiling on costs—or else the easiest way out would be "hope to die". Thanks if you will give this your consideration.

Mr. President, I share the opinions of these three Tennesseans: Something must be done. Senator NELSON's approach is balanced and fair. I endorse it as the best way to reach the problem without upsetting the voluntary efforts of the medical industry.

I realize that this decision will be unpopular in some quarters. It is not a decision made lightly, but it is a decision which will benefit all the people of Tennessee.

The PRESIDING OFFICER. Will the Senator yield back his time?

Mr. SASSER. I yield back the remainder of my time.

Mr. NELSON. Mr. President, how much time does the Senator from Wisconsin have left?

The PRESIDING OFFICER. The Senator from Wisconsin has 4 minutes remaining.

Mr. NELSON. I yield to the Senator from Massachusetts whatever time he needs.

Mr. KENNEDY. Mr. President, I welcome the opportunity to join with the Senator from Wisconsin on this amendment. I think, from the earlier vote, that it is very clear that the sense of the Senate is to try to give the voluntary system an opportunity to function. I think the Senator from Wisconsin has effectively stated the views of the hospital association and they said that they could live by these guidelines, the 2-percent reduction in the first year, and the 2-percent reduction thereafter, "OK, we will develop an amendment that will say we will follow and see what you can do with the voluntary sector for these next 2 years before we implement the other provisions of the legislation."

It seems to me that this is where the Senate wants to go. This is really the last opportunity for the Senate to take meaningful action to save the American taxpayer, the elderly citizens as well as for workers, billions and billions of dollars over the next several years in this area of cost containment. In the voluntary effort, the bill establishes for 2 years the goals which the hospital sector itself said they could live up to. It really brings a blending of interests of the voluntary sector as well as a final judgment that if, after 2 years, that is not realized, not achieved, the other provisions will be implemented.

With the acceptance of this amendment, we can at least give assurance to the millions of taxpayers that we shall be saving them billions of dollars. This is the last opportunity to do it.

I certainly urge the Members to join in this amendment. It is a sound one from a cost point of view, it is a sound one from a quality of health point of view, it is a sound one from the view of saving the taxpayers money.

Mr. President, I should like at this point to have printed in the RECORD a list of about 30 organizations—life insurance companies, health planning organizations, HMO's, a number of different groups, business groups, worker groups—that support this program.

Mr. NELSON. Will the Senator yield?

Mr. KENNEDY. Yes.

Mr. NELSON. I wonder if the Senator is looking at this long list of 30-some organizations?

Mr. KENNEDY. The Senator is correct. It starts with the life insurance companies, the insurance companies themselves.

Mr. NELSON. I think it is a very important point to get into the Record. The U.S. Conference of Mayors support it, Aetna Life Insurance, the Lions of America, the American Association of Retired Persons, American Nurses Association, American Health Planning Association, American Association of State and Territorial Health Officers, Group Health Association of America—a whole, long list—National Association of Counties.

Mr. KENNEDY. Could the Senator, just in the brief time remaining, yield to me? As I understand it, just about every organization supports it. It seems to me that those involved in the whole health industry, whether it is the insurance companies, professional organizations, or those who represent other groups, support it. There are only two who do not, the hospital associations and the American Medical Association.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Aetna Life and Casualty.
Alliance of American Insurers.
American Association of Retired Persons.
American Health Planning Association.
American Nurses Association.
American Public Health Association.
American Speech and Hearing Association.
Association of State and Territorial Health Officers.
Connecticut General Life Insurance Company.
Epilepsy Foundation of America.
Family Health Program.
Group Health Association of America.
Health Insurance Association of America.
Kaiser Foundation Health Plan.
Kemper Insurance Company.
National Association of Casualty and Surety
National Association of Community Health Centers.
National Association of Counties.
National Association of Life Underwriters.
National Caucus on the Black Aged.
National Coalition of Hispanic Mental Health and Human Services Organizations.
National Conference of State Legislatures.
National Council of Community Mental Health Centers.
National Council of Senior Citizens.
National Governors Association.
National Indian Council on Aging.
National League of Cities.
National Mental Health Association.
Prudential Insurance of America.
United Auto Workers.
U.S. Conference of Mayors.

Mr. MUSKIE. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by Senator HATHAWAY.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR HATHAWAY

I am pleased to offer with my distinguished colleague from Maine an amendment to the Nelson amendment to H.R. 5285 to exempt from mandatory hospital cost controls those States which have enacted hospital cost containment legislation prior to the enactment of the Nelson proposal.

This amendment will give those states which have already enacted laws, but have not had their programs in effect for at least one year, a chance to demonstrate that their programs are effective in keeping costs down. I fully support the Nelson proposal because I believe we must act now to ensure that hospital costs are contained. However, I have been concerned that, as introduced, the Nelson measure failed to address the special situation posed by states which had been responsible enough to enact a state cost control law, but had not yet had a year of operation to show that costs were in fact kept down, as required by the Nelson amendment.

The amendment which we are offering recognizes the current state efforts to contain hospital costs by providing an exemption from mandatory controls for those states which have enacted cost control programs. The exemption would be for a period of one year from the date of implementation of those programs. If, at the end of that time, the Governor certifies and the Secretary of HEW determines that the state program is capable of keeping the increase in hospital revenues in line with the mandatory goals, the state would be eligible for continued exemption from mandatory cost controls.

Mr. NELSON. Let me say to the Senator from Massachusetts that we do have time on the bill if he needs some.

Mr. KENNEDY. No.

Mr. NELSON. I thought it was important to point out that almost every group in America involved in health endorses this. It has a very broad-based support across the country.

The PRESIDING OFFICER. The time of the Senator from Wisconsin has expired.

All time has expired on this amendment. The question is on agreeing to the amendment.

Mr. KENNEDY. Yeas and nays, Mr. President.

Mr. BUMPERS. Mr. President, has the Muskie amendment been adopted?

Mr. MATSUNAGA. This is the Muskie amendment, is it not, that time has expired on?

Mr. BUMPERS. I ask recognition, Mr. President.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. A parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUMPERS. Has the Muskie amendment been adopted?

The PRESIDING OFFICER. No, it has not. That is the question at this point.

The question is on agreeing to the amendment of the Senator from Maine.

The amendment was agreed to.

Mr. BUMPERS. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The Chair reminds the Senator from Arkansas that the underlying Nelson amendment is still pending and the amendment would have to relate to that.

Mr. BUMPERS. The amendment is an amendment to the Nelson amendment, Mr. President. I ask for its immediate consideration.

Mr. TALMADGE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. TALMADGE. As I understand the parliamentary situation, no amendment is in order to the Nelson amendment until all time has been yielded back by both sides.

The PRESIDING OFFICER. The Senator is correct. The amendment is not in order unless by unanimous consent.

Mr. TALMADGE. Mr. President, I seek recognition.

The PRESIDING OFFICER. The Senator from Georgia.

Mr. BUMPERS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. BUMPERS. A moment ago, there was a unanimous-consent request that the Senator from Wisconsin have an additional 10 minutes and the Senator from Georgia yielded his remaining 10 minutes to the Senator from Wisconsin. Now all that time is used. Has all time expired and are amendments to the Nelson amendment in order?

The PRESIDING OFFICER. The Chair states to the Senator from Arkansas that the time has expired on the Muskie amendment. The Muskie amendment has been acted upon. There is time remaining on the Nelson amendment. In fact, the Senator from Wisconsin has 10 minutes remaining, the Senator from Georgia has 20 minutes remaining on the underlying Nelson amendment. It would require unanimous consent at this point for the amendment of the Senator from Arkansas to be considered.

Mr. TALMADGE. Mr. President, the committee opposes this amendment.

It is similar to an amendment which the Finance Committee rejected by a vote of 7 to 11.

The amendment would establish standby controls on hospital revenues.

The controls would apply to most hospitals in the event of failure of the so-called voluntary effort.

It is said that the Nelson amendment builds upon the system of hospital classification and comparison established under the committee bill.

The committee provision is used only for purposes of medicare and medicaid reimbursement.

Mr. President, the Nelson amendment differs significantly from the committee bill—apart from its potential application as a form of price control on most hospitals.

The committee bill would allow increases above ordinary limits where the wages of nonsupervisory personnel were less than those prevailing in the area for reasonably comparable work.

In contrast, the Nelson amendment allows a blank check for wages of nonsupervisory hospital personnel without regard to whether they are below average or above average relative to prevailing pay in an area.

Thus, a major part of hospital budgets would be uncontrolled.

While there are obvious exceptions, here and there, on a national basis, according to BLS, the wage levels of nonsupervisory hospital workers had, by 1977, caught up with and passed wage levels for comparable work outside of hospitals.

Again, there is no justification for a blanket wage passthrough.

The committee bill applies to all hospitals—small or large.

It differentiates by establishing separate groupings based upon size, type, and location of hospital.

Efficiency and inefficiency may be found within the hospitals in each grouping.

In contrast, the Nelson amendment exempts all hospitals with less than 4,000 admissions annually.

On the surface, this appears sensible.

These hospitals account for about 10 percent of all hospital revenues.

But there is a fatal flaw in this reasoning.

Apart from those areas which have only one small hospital, there are many areas of the country where the multiplicity of small, low-occupancy hospitals has an adverse impact on the larger hospitals.

They drain and divert patients from the larger hospitals contributing to occupancy and costs problems.

For example, Los Angeles and Orange Counties in California have been cited repeatedly as "over-bedded" and with too many hospitals.

Yet, many small hospitals in those counties would be exempt under the 4,000 admissions test in the Nelson amendment.

The committee bill requires annual recalculation of the average costs of care in all hospitals in each grouping.

Hospitals below the average receive incentive payments from medicare and medicaid.

Hospitals whose costs do not exceed the average by more than a specified amount are paid their actual costs.

Hospitals whose costs are above the limit are paid only at the limit.

In recalculating the average costs each year, under the committee bill one-half of hospital costs in excess of the limit are disregarded.

In contrast, under the Nelson amendment all costs in excess of the limit would be disregarded in calculating the average.

The effect of this is to severely ratchet down the average from 1 year to the next.

A conscious decision was made with respect to the committee bill not to exclude all excess costs but only one-half.

The reason was not only the severe downward effect but also a real sense of potential inequity.

We wanted to allow some reasonable latitude—particularly during the initial several years of the program—while the skills and state of the art of costs comparison advanced to the point of reasonable confidence in our ability to say "you're efficient and you're inefficient." The Nelson amendment does not allow that necessary latitude.

There are other differences between the basics of the committee bill and the Nelson amendment but I believe I have dealt with the major conceptual distinctions.

Mr. President, we do not need to vote for standby hospital price controls now.

The voluntary effort of the hospitals to moderate their increases in costs is conceded to be "on target" this year.

We can evaluate its effectiveness again next year.

We can act to establish overall hospital revenue limits next year—if necessary.

The amendment is potentially inflationary because, if enacted, it could well stimulate anticipatory charge and cost increases.

As it stands, it may well impair the quality of care and service in many outstanding hospitals doing a responsible job of watching their expenses.

At the same time, it may only marginally affect those hospitals with substantial room for improvement in managing their costs.

The Nelson amendment tries—but fails—to sort them out.

Mr. President, we will do what we have to do when we have to do it.

And, we do not have to do it now.

On behalf of the Committee on Finance, I urge the Senate to reject this amendment.

Mr. President, at the appropriate time, I shall make a motion to table, but I yield now such time as the distinguished ranking minority member of the subcommittee may desire.

Mr. DOLE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOLE. How much time remains?

The PRESIDING OFFICER. Thirteen minutes to the Senator from Georgia.

Mr. DOLE. Mr. President, there are four on this side who would like to speak. Are there any other requests for time?

Mr. TALMADGE. I think the Senator from Illinois desires time.

Mr. DOLE. He is one of the four.

If it is all right with the distinguished chairman, we can divide that 13 minutes.

Mr. TALMADGE. Two minutes each, and let me retain the remainder of the time.

Mr. DOLE. I yield 2 minutes to the Senator from Pennsylvania.

Mr. SCHWEIKER. I thank the Senator.

Mr. President, I would like to oppose the Nelson amendment. The Nelson amendment has some of the same faults the previous amendment had.

The most obvious one is that the wage passthrough feature is still in the bill. We still attempt to regulate prices, but not wages.

So we are still going to exempt from consideration 40 percent of the system to be placed under control, and we will still invite wage escalations, because one aspect will be controlled and one will not be.

A second problem relates to implementing the legislation. We are going to have to engage in a great number of statistical arguments about this hospital and that hospital.

As soon as we put an amendment in to exempt individual hospitals, I guarantee that every Senator's office is going to have dozens of hospitals coming into his office with a battery of lawyers to get exempted, and each Senator here is going to be arguing with or cajoling HEW about whether one of their hospitals back home is going to be covered or not.

So we are moving the problem right into the Senators' and Congressmen's offices, encouraging the Senators to be an advocate for their cause before HEW.

It is one thing to write exemptions for hospitals, but that determination would be made by HEW, and we know what redtape and bureaucracy that involves.

We will have every hospital camped on our doorstep to argue whether they did or did not meet that regulation 5 for an exemption. We will be the buffers and the administrators of the program.

Finally, there is another fault with this program. Whenever we move toward standby controls, history has shown that they are themselves inflationary. We learned that in the last wage and price standby controls. That is why we eliminated it.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. TALMADGE. I yield 2 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 2 minutes.

Mr. PERCY. Mr. President, we are here today to discuss the issue of hospital cost containment. I believe it is important that we realize that the true issue at hand here today is more complex than containing hospital costs. The issue at hand is really how to control this country's increasing inflation rates.

In 1976, expenditures for hospital care consumed 39.8 percent of the Nation's total health budget. It is important to recognize that inflation accounted for a larger proportion of the 1976 increase in hospital expenditures than did any other factor. Inflation represented $2.23 billion or 37.2 percent of the $6 billion increase in community hospital expenditures nationwide.

Currently, we have an inflation rate at 10.4 percent, a rate which is continuing to rise. In addition, inflation accounts for more than 9 percent of the annual increase in hospital costs. Yet, since 1970, the medical care index has risen less than food, fuel, and utilities.

With the implementation of medicare and medicaid, demand for services was augmented by the removal of financial barriers to care for the elderly and poor. There was a 26-percent increase in the number of admissions to hospitals between 1966 and 1976. As a result, we saw demand outstrip supply.

In 1969, 65.5 percent of the increase in hospital expenses per adjusted patient day could be attributed to increases in the quantities of goods, services and labor purchased. In 1975, less than 25 percent of the increased costs were due to greater quantities; the rest was due to increased prices of goods and services. And today, according to a recent analysis by Rate Controls, a hospital-industry publication, it is estimated that inflation to hospitals for the goods and services which they purchase will increase during 1978 by 8.4 to 8.9 percent. Thus, if these projections are accurate, the cost to hospitals for their goods and services will increase by this amount. With this in mind, I believe it is necessary that we examine the factors which contribute to the growth of hospital costs.

First, wage, salary, and fringe benefit costs are a major contributor to rising hospital costs. The health care industry employs five times as many people as the automobile industry; nationally it ranks third, after agriculture and construction, in terms of numbers of employees.

Sixty percent of the average hospital budget is payroll expenses. By contrast, wages account for an average of 28 percent of expenses in other U.S. industries. Thus hospital budgets are adversely affected by increases in payroll costs brought about by inflation, wage and benefit legislation, collective bargaining, and the need for additional and more highly trained staff.

Second, while technological innovations in health care have an undesired effect of increasing hospital costs, these same innovations in technology and services have also had a tremendous effect of healing or sustaining the lives of millions of Americans.

It is important to also note that 75 percent of today's drugs and 40 percent of today's laboratory procedures were unknown 10 years ago.

Third, the "increased demand" for health care services have contributed heavily to the increasing hospital costs. A HEW publication entitled, "The Size and Shape of the Medical Care Dollar" estimates that 46 percent of the increase in health care costs is due to overall inflation, and 15 percent to the result of population growth.

However, there are other factors which have contributed to the increased demand. As mentioned earlier, with the implementation of medicare and medicaid, the availability of hospital care services also increased. More people are able to afford hospital care, and many more Americans today have some form of hospitalization insurance, thus allowing greater access to hospital services. We also have a population which is living longer. Research indicates that with increasing age there is also an increase in usage of hospital services.

Fourth, Government regulation and intervention, sometimes known as redtape, are some of the most substantial contributors to increasing hospital costs. Eight Federal regulations alone add $22 to every hospital bill.

Fifth, professional liability is another factor which contributes to increasing hospital costs. Malpractice awards and trends boost insurance premiums and stimulate doctors to protect themselves by ordering more, and sometimes unnecessary tests, and, in some cases, longer treatment.

Specifically regarding Senator NELSON's amendment, it appears to establish an upper limit of payment of 115 percent of the average per diem routine cost for hospitals in each classification group. But it does not. The amendment provides that the computation of the group averages would exclude from consideration all costs in the previous year in excess of 115 percent. Under this methodology it is estimated that over 30 percent of all hospitals would be paid below their actual cost. While the intent of the Nelson amendment is to reward effective and efficient facilities, the pending amendment does not seem to work out that way. It would penalize those facilities with short stays and low costs per stay.

Furthermore, we must also be concerned about what impact the Nelson amendment would have on services. That is, what impact would this amendment have on maintaining existing services, and more importantly, on expanding services. We have a tremendous amount of medically underserved and unserved areas in this country, and we must give careful thought as to what impact the Nelson amendment would have if hospitals are not allowed to expand services into these areas.

Moreover, if the Secretary of HEW is given the authority to place "caps, or standby controls" on hospital costs, we must be prepared for a counterproductive effect; that is, that the hospital industry's response may very well be to raise prices right away, thus discouraging price decreases, and more importantly, discouraging any voluntary cost containment effort.

I think that was the point my distinguished colleague from Pennsylvania was very perceptively making.

The voluntary effort, on the one hand, recognizes the uniqueness of each individual hospital and the patients it serves. On the other hand, the Nelson amendment gives no recognition of individual hospital needs or the community needs, and would stifle the provision of needed services to citizens of this country, especially in unserved and underserved areas.

The objective of the voluntary effort is to achieve a 4 percent reduction in hospital cost expenditures over the last 2 years that the program is in effect. We must allow the voluntary effort sufficient time to prove its effectiveness before we impose Federal controls over the hospital industry that might well be counterproductive.

We are trying to repeal human nature. If we say it is like standby controls, what happens under standby controls? Labor wants to push wages up as fast as they can get them up, and as much as they can get, before wages are controlled. As to hospital costs, they cannot get caught. Therefore, they get their rates up as possibly as they can, and that will automatically bring on the very kind of controls that we feel would be inflationary and counterproductive in this effort.

The PRESIDING OFICER. The Senator's 2 minutes have expired.

Mr. TALMADGE. Mr. President, I yield 3 minutes to the distinguished Senator from Nebraska.

Mr. CURTIS. Mr. President, as the distinguished chairman, who is in charge of this bill, has pointed out, the Finance Committee went into this very carefully, and it was defeated rather decisively.

I concur in what has been said here by the Senators—Senator SCHWEIKER, Senator PERCY, and the chairman. Price controls have not been the answer to anything. Price controls without wage controls, and wage controls without price controls, are just inviting trouble. It will not be successful, as the distinguished Senator from Pennsylvania pointed out.

Also, I point out that this exemption for hospitals with not to exceed 4,000 admissions a year is not very much. That is about 11 admissions per day. So there is no great advantage to that.

Furthermore, Mr. President, this is not voluntary. It is voluntary—or else; and then it is no longer voluntary. It is the same as when you have the draft. You have a great many voluntary enlistments in the National Guard. It is voluntary because they volunteer—or else. So it has an element of coercion all the way through. It does not affect the big item of cost of hospitals—the wage cost.

It goes beyond the point we have a right to go. The committees having jurisdiction of this have jurisdiction over Government medical programs. We do not have jurisdiction to impose price control across the board for nongovernment medicine.

Mr. TALMADGE. Mr. President, I yield 3 minutes to the distinguished Senator from Kansas, the ranking minority member of the subcommittee.

Mr. DOLE. I thank the chairman.

Mr. President, I commend Senator NELSON for addressing a very serious problem.

The Senator from Wisconsin indicated that he would save $34 billion. I do not know how that figure was arrived at, but the most recent estimate is $23 billion. So I suggest that there is a difference in what can be saved, based on probable inflation——

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. DOLE. I do not have much time.

Mr. MUSKIE. I think it would be useful at this point to put that table in the RECORD.

I have shown this to Senator NELSON. These are the latest CBO figures, which are consistent with the ones the Senator from Kansas uses.

I ask unanimous consent to have this table printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ESTIMATE OF SAVINGS IN HOSPITAL COSTS FROM NELSON AMENDMENT (NO. 3478) TO H.R. 5285

[Effective date: Apr. 1, 1980; [1] in millions of dollars]

Fiscal years	Medicare	Federal medicaid	Total Federal	Other	Total industry
1980	(370)	(50)	420	640	1,060
1981	(1,330)	(170)	1,500	2,370	3,870
1982	(2,440)	(310)	2,750	4,520	7,270
1983	(3,810)	(500)	4,310	7,150	11,460
Total	(7,950)	(1,030)	8,980	14,680	23,660

[1] Assumes voluntary effort failing in 1979.

Estimate done by: Lawrence A. Wilson, Congressional Budget Office, Oct. 7, 1978.

Mr. DOLE. The point is, we do not know how much money will be "saved." We are not certain whether we have a good program or a bad program.

I note that everybody on the floor is trying to be exempt: "If you exempt Maine, you have my vote." "If you exempt Florida, you have my vote." "If you exempt Hawaii, you have my vote."

I am not certain what hospitals are left. Everybody talks about Federal mandatory controls. They are great, "if you don't include my State." That is the trouble with this approach.

I am not certain how you are going to have a test. There are no hospitals left.

I think every State is trying to devise some cost control program. Why not give them a chance? This is a Federal control program. If we find in the future that the hospitals do not comply with their voluntary programs, then perhaps we will have to do something.

I think the very weakness of this program has been demonstrated on the floor today by one amendment after another: "Take me out of the program, and I'll vote for it."

The Senator from Pennsylvania hit the nail on the head. If you are not exempt, how do you get exempt? You call your Senator, and he will get hold of somebody in HEW and will get you exempt. We will exempt this hospital in Topeka; we will exempt this hospital in Pittsburgh; we will exempt this hospital in Jackson, Miss.; and maybe, sooner or later, everybody will be exempt.

This is the wrong approach. Either it applies or it does not apply. Nobody is left. If we need four more votes, let us exempt Kansas and Pennsylvania. If we need six more votes, let us exempt Georgia. If we need eight more votes, let us exempt Mississippi. That is the weakness of the program.

Mr. President, earlier this year the American Hospital Association, the American Medical Association, and the Federation of American Hospitals initiated a voluntary effort to control hospital cost increases. The sponsors of this voluntary program have stated that the program is "intended to achieve a significant reduction in the rate of increase in health care costs." Specifically, the program aims to reduce the rate of increase in hospital expenditures by 2 percentage points a year for this year and the next, insure that no net increases in hospital beds occur during 1978, and reduce new capital investments during the coming year. The program is to be administered in large part at the State level.

Sponsors of the voluntary program believe that they can meet the objectives of their cost containment program; and, they believe it can be done without the threat of Federal intervention as outlined in the Nelson proposal. I believe that they must be given the opportunity to prove it. Therefore, I oppose the amendment as introduced by Senator NELSON.

ECONOMIC CONTROLS

The Nelson amendment purports to represent a compromise between the administration's "CAP" proposal and the Finance Committee's reimbursement reform proposal. But make no mistake about it, it is a form of a cap. The main difference is that it would only go into effect if the voluntary effort failed. It seems to this Senator, that the proposal for standby controls could serve to undercut the voluntary effort.

DISINCENTIVES TO VOLUNTARY EFFORT

For example, let us consider the hospital which has been efficient in the past. This hospital has little so-called fat to protect them if economic controls are put into place, based on their historical performance. This hospital may believe that their costs are so minimal that they will have little effect on whether or not the trigger is pulled. If they have been efficient in the past and the trigger is pulled because of the failure of the rest of the industry to hold down costs, they, too, will be faced with economic controls, so their efficient performance in the past will not protect them. On the other hand, they may also believe that if they increase their costs, they again will have little influence on the overall program, but would be protecting themselves by building up an increase in anticipation of a trigger being pulled. Their behavior may be mirrored by many other small hospitals and lead to the demise of voluntary effort.

WAGE AND PRICE CONTROLS

Mr. President, our experience with wage and price controls, such as the ones suggested, has shown that they are in-

effective in the long run and may actually result in increasing inflation. Similarly, attempting to bring hospital cost increases in line with an arbitrary goal based on the general inflation rate may have the same effect, because hospitals provide a unique set of services. The causes of cost increases in these services are tied not only to general inflationary trends, but also the changing quality and quantity of care provided.

Using a general rate of inflation, even with an attempt to look more carefully at those market basket items which a hospital utilizes in particular, there is still the imposition of an arbitrary numerical limit and the inherent inefficiency that may result.

QUALITY AND QUANTITY OF HEALTH CARE

Unfortunately, the imposition of an undifferentiated revenue ceiling which causes hospitals to seek out areas where hospitals can be controlled, may result in a loss of quality and quantity in health care. We cannot assure citizens that the fat in hospital expenditures, which Secretary Califano so gleefully described, will be the area where the hospitals choose to make their reductions. We may, in fact, see the elimination of vital services and a reduction in the quality of care.

Certainly, there may well be waste in unnecessary expenses. But it seems to me that we need to develop a system that sorts out the efficient from the inefficient hospitals and not settle for simple solutions in an area as complex as health care. It is argued that the incentives for patients and doctors also determine the behavior of hospital administrators. In fact, Harris argues that policymakers sometimes forget that "the hospital" is actually two separate "firms"—a medical staff that orders services and an administration that supplies them. Consequently, they also forget that the administration's control over hospital cost is limited. According to Harris, "the medical staff and administration are locked in a noncooperative oligopoly-type game * * *." Frequently, the only way to resolve conflicts over the control of hospital capacity is for the firm to get bigger and more complicated.

Our current regulatory policy toward hospitals is too one-sided. Attempts to control expenditures or restrict the supply of investment funds to hospital administrators without accompanying it at the level of the physician/patient relationship will lead to bitterness and bad medical care. Neither patients nor physicians have strong economic incentives to control hospital costs when 90 percent of such expenses are paid by insurors or the Government; most patients pay little, if anything, out of pocket for additional hospital services.

Both patients and doctors have good reasons to use more, and better, hospital services. Patients want to get well, and tend to trust their physicians' judgments about the best treatment. Physicians prescribe hospital services for a variety of reasons. One consideration is that in a fee-for-service system they are paid according to the number of services they deliver. Other factors which influence doctors to prescribe hospital services are: Their ethical responsibility to provide "the best possible care" for their patients, concern for the professional prestige attached to the use of high technology and specialization, and a wish to protect themselves from malpractice claims.

SHORT-TERM LIMIT VERSUS LONG-TERM REFORM

I, too, have a deep concern for the impact which escalating health care costs have had on all Americans. There is no doubt that serious budget pressures have come to bear on the medicare and medicaid programs, and on the population as a whole. But the Senator from Kansas believes that the best action we could take at this time is for the Federal Government to first address the problems of the reimbursement methods presently used by its own medicare and medicaid program. Improving the operating efficiencies of these programs while insuring that costs are not just shifted to non-Federal payors, will be a significant contribution to reducing escalating health care costs.

The Federal Government has contributed substantially to the shift from patient payment to third-party payment of hospital costs through the medicare and medicaid programs. Part A of medicare provides hospital insurance financed out of social security taxes for over 99 percent of those age 65 and older, approximately 25 million persons. Medicaid is a mix of Federal and State programs for the poor, each State has its own benefit levels and eligibility requirements. Medicare and medicaid systems reimburse hospitals for the portion of the hospitals' total cost attributable to their insured patients. Cost limits are established each year for the routine cost portion of hospital costs—essentially, the costs related to bed and board. Limits on ancillary services have not been established. Individual hospitals are assigned to one of various groups, depending on the hospital's size and the per capita income of the area where it is located. The cost limits of the hospitals in each group is set by a formula that establishes the limit high enough to permit the routine costs of well over 80 percent of the hospital to be covered in full.

I do believe it is necessary to reform our current mechanism for reimbursement. It is for this reason that I feel that the most sensible and reasonable approach toward hospital cost containment is represented by H.R. 5285, which contains the Finance Committee's provisions for medicare and medicaid reimbursement and administrative reform. This legislation, sponsored by the distinguished chairman of the Finance Health Subcommittee, Senator HERMAN TALMADGE, and a number of other Senators, including the Senator from Kansas, provides a long term structural answer to the problem of rising hospital costs. This effort, in addition to the continued efforts of the voluntary program, designed by the American Hospital Association, Federation of American Hospitals, and the American Medical Association, may not result in an immediate drastic reduction of health care costs but will, in the long run, help to alter hospitals' behavior while reforming the system. The end result will, without question, be cost savings.

ADDITIONAL EFFORTS TO CONTROL HEALTH CARE COSTS

Utilization review programs offer a second means of regulating health costs. The nationwide system of professional standards review organizations to review care provided to medicare and medicaid patients is beginning to show very positive results. The PSRO's which are community-based and operated by private physicians, are charged with insuring that payment is made only for services that are medically necessary; compatible with professionally recognized standards of care; and, in the case of inpatient hospital services, not as effectively provided on an outpatient basis or in a less expensive inpatient facility.

Clearly, PSRO implementation alone is not apt to cause significant changes in either hospital utilization or associated governmental expenditures, but it is an additional effort, Mr. President, one that we should give a chance.

STATE RATE CONTROL PROGRAMS

As of April 1978, 15 States have enacted legislation which requires the disclosure, review, or regulation of hospital rates or budgets. Additional States are considering such action. In some States these programs will be mandatory, in others, voluntary. There is a trend for individual States who are certainly more sensitive to their own population and needs to begin to consider more seriously efforts with respect to hospital costs. All of the plans that have been presented to us, Mr. President, suggest that the States have an opportunity to consider such action and, if successful, to be exempt from any Federal program. I believe that the best cost containment and cost control program will be the one which has the least Government interference.

I believe we can also count on the States to respond to the need for some action. State programs, coupled with reform in medicare and medicaid, coupled with the other activities in the area of hospital costs, certainly including the voluntary effort, will undoubtedly produce a positive result. A Federal triggered program is not necessary at this time, Mr. President, and is unwise to even suggest.

CONCLUSION

Mr. President, as I have indicated in the past, I do not believe we need to single out hospitals at this time for economic controls. I do believe, however, that reimbursement reform is in order and appropriate. I also believe that the private sector is making a real effort to keep down the rate of hospital increases and should be encouraged. I therefore, propose that we encourage these efforts—not by hovering and waiting for them to die—but by taking careful watch of and encouraging its progress.

If the voluntary effort should fail, if the States should fail to respond to

our plea, if reimbursement reform is unsuccessful, we could then move to consider other alternatives to moderate hospital costs. Let us not move precipitously, the health of the Nation should not be treated lightly.

I appreciate the efforts made by the distinguished Senator from Wisconsin.

Mr. NELSON addressed the Chair.

The PRESIDING OFFICER (Mr. HOLLINGS). The Senator from Wisconsin.

Mr. NELSON. Mr. President, I appreciate those delightful remarks by the distinguished Senator from Kansas, even though nothing he said was a fact. [Laughter.]

With respect to the question of the savings, it is correct that in the statement I released sometime ago, I used the figure $30 billion to $34 billion in savings. Those were the CBO and HEW estimates. As time went by, the CBO made another estimate, with additional facts in hand, and the estimate now is $23 billion.

Mr. CURTIS. Mr. President, will the Senator yield for a question?

Mr. NELSON. I yield.

Mr. CURTIS. How much of that saving was voluntary?

Mr. NELSON. I am advised by a staff member that CBO has factored out those elements based upon the voluntary effort alone.

Mr. President, the new figures by the CBO are $23 billion.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. NELSON. I yield.

Mr. MUSKIE. The table I put in the RECORD begins with fiscal year 1980, so it does not assume any savings attributable to the hospitals' voluntary efforts.

The fact is that the assumptions as to what hospital costs would be in 1980 through 1983 without any controls, voluntary or otherwise, were lower than was assumed in the earlier estimates. Now there are more recent figures, and it is on the basis of those recent figures that the latest table, with which Senator DOLE and I agree, was produced.

Mr. NELSON. I say to the Senator from Kansas that I corrected my remarks, before he made his remarks on the floor, to incorporate the latest CBO figures, which were received today.

However, that is an interesting point made by the Senator from Kansas: $23 billion will be saved by this measure. Of that, $8.980 billion are in Federal savings, Federal appropriations. In medicare, savings are $7.950 billion; Federal medicaid, $1.30 billion; and other savings, private sector and others, would be $14.680 billion.

This is a larger saving than has been made by any action of this Congress—perhaps any action of Congress so long as anybody can remember—in one proposal.

Furthermore, it is the most important contribution that we can make in the fight against inflation.

As I said once before, I hope the voluntary effort succeeds across the board, and maybe it will, and we will all cheer if it does.

One thing that will help improve the chances of the voluntary effort succeeding is for all the hospitals to know that if the national standard is not met then there will be mandatory controls and that those States that have a program of their own and those States that meet the national target will be exempt and the rest will come down.

For heaven's sake, who can argue that to control increases in cost at 1½ times the national rate of inflation is unreasonable? The fact of the matter is that for 10 years, the average over that 10-year period has been a rate of increase in cost at 2 to 2½ times the rate of the national increase in inflation.

What is so peculiar about hospital costs that they have to go up twice or 2½ times the rate of other costs in the whole economy? Why does it happen?

Well, they are all paid by third party payers. That is why. The Federal Government pays it. The insurors pay it. Someone else pays it but not the person who is going to the hospital, except indirectly in his taxes or in his insurance.

And about 5 percent of it is paid by that poor soul who does not have any insurance or is not covered by medicare or any other program.

So where is the discipline to require them to control costs? There is not any. When there is no discipline to control costs, of course, they will go up.

In those nine States that went ahead and put in a program, they are running at a 12-percent rate right now and they probably will be down below the national target in July.

If they can do it, why should not they all do it? And if they go ahead and do it on their own, this amendment does not affect them at all.

If we are going to save this country from being destroyed by inflation, there has to be something done about it. And all this amendment says is, go ahead and do it yourself, but if you do not, we are going to hold you to at least 1½ times the national inflation rate.

I do not think that is unreasonable. And it is a very imporant factor in expenditures in this country with hospital costs rising from the mid-1960's total of $12 billion to $68 billion last year. Someone has to stop it some place, and I am puzzled by the reaction of so many Members in this body and the other one who give marvelous speeches about how we have to stop spending, slow it down, stop inflation, but when you ask them to do something about it they all run for cover with excuses of one kind or another. Oh, we cannot do that, they say. We cannot do anything. To every proposal you make, someone has a marvelous excuse not to do anything. So the inflation and cost go on and on and on.

Mr. MATSUNAGA. Mr. President, will the Senator from Wisconsin yield for a question?

Mr. NELSON. I yield to the Senator from Hawaii.

Mr. MATSUNAGA. One of the greatest concerns I think of Members of this body is that cost control might bring the quality of hospital care down. Will the amendment, as modified, of the Senator from Wisconsin favor cost cuts over quality in hospital care?

Mr. NELSON. No; as a matter of fact, what we did in this amendment was adopt what the American Medical Association and the American Hospital Association said were the goals that they could get to. So we took what the doctors said and what the hospital administrators through their association said and we said: "All right, we will make that the target. If you meet it there are no controls."

So I am satisfied that the doctors and the hospital administrators would not set a target of more than 1½ times the inflation rate if they thought it was going to interfere with or in any way compromise or reduce the quality of medical care.

Mr. MATSUNAGA. So the answer is no, that the quality of hospital care under the Senator's amendment will not be reduced.

Mr. NELSON. That is correct.

In one of the finest clinics in America, and one of the largest ones, in the city of Marshfield, Wis., in a hospital with 155 doctors, there is magnificent medical care. If my memory is correct, they are down to a rate of about 9 percent, and there is no better care given in any other place or in any other hospital or in any other clinic that I know of in this country.

The PRESIDING OFFICER. The time of the proponents has expired.

Mr. MATSUNAGA. I thank the Senator from Wisconsin.

Mr. NELSON. I did not hear the Chair.

The PRESIDING OFFICER. The time of the proponents of the amendment has expired.

Mr. NELSON. Does the Chair mean to say I am going to sit here and never be able to respond to the Senator from Kansas?

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield.

Mr. CURTIS. Mr. President, no one can project costs 5 to 6 years in this inflationary period and say how much you are going to save.

Here is a guess that came out of HEW. It is dated August 1, 1978. Five-sixths of the savings under the Nelson proposal comes from the voluntary program. Five-sixths of it. I think probably the Nelson mandatory part will do more to spur prices, to get on while they can, than it will ever accomplish. This is the guess of the HEW.

I hope that inflation disappears, but there is no one who can guess on these things and so I do not submit it other than as a guess.

Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. Mr. President, will the Senator yield to me?

Mr. TALMADGE. I yield to the Senator.

Mr. EAGLETON. Mr. President, in 1965, Mr. President, $41 bought a day's stay in the average American hospital. Today, just 13 years later, that amount buys a patient less than 6 hours of hospitalization. The rising cost of medical care commands increasing public attention, and it makes the general inflation of our economy look like small change.

The statistics on hospital costs have been often repeated, but I think they are worth going over again. Since 1950, the total amount of money we spend on health care has gone up fifteenfold, outpacing the general inflation rate 7 times over. The percentage of our gross national product comprised of health care expenditures has risen from barely 5 percent in 1960 to almost 9 percent today—no small increase considering the 13-digit dimensions of the GNP. Health care now consumes about 15 percent of the average family's budget. Forty percent of that health care expenditure pays for inpatient and outpatient care in hospitals.

But the story of runaway health costs is not just one of dry statistics. More importantly, Mr. President, it is the story of human suffering. Consider just a few of the case histories I have come across recently. Consider, for example, the case of a man in Oklahoma who died after being hospitalized for just 1 day. His wife received a bill for $6,587.78 for that 1 day's care.

Or how about the young man treated in a Maryland hospital after an automobile accident? He spent 3 days, running up a hospital bill of $31,507.46, plus physicians' fees of $1,865. More than $33,000 for just 3 days.

Another man—this one from my home State of Missouri—was hospitalized in Arizona for 1 day, and went home owing $1,560.

A woman in Georgia had premature twins. One baby was hospitalized for 1½ months, the other for more than 4 months. As you can imagine, the bill was staggering. More than $60,000 for a family which had no health insurance.

Despite these staggering increases, however, the health care cost spiral has had minimal direct impact on most consumers. This is because for most health care, private or Government insurance programs do pay the bill, a situation which is both good and bad. It is good, because with the cost of health care so high very few individuals can afford to pay the bills alone. But it is bad, because the third-party payment system provides little or no incentive for physicians, hospitals, or patients to control costs.

This is not to say that the health care industry is blithely unconcerned with the continuing spiral. Quite to the contrary, the industry in recent years has taken some commendable actions to lasso runaway costs. In response to the introduction of cost containment legislation, the Federation of American Hospitals, the American Hospital Association, and the American Medical Association announced a joint "voluntary effort" to curb increases in hospital costs. The goal of this voluntary effort is to reduce the rate of inflation of hospital costs by two percentage points in 1978, by four percentage points in 1979, and to hold cost inflation below the 1979 rate thereafter. The American Hospital Association estimated the 1977 inflation rate at 15.6 percent, which would mean targets for the voluntary effort of 13.6 percent in 1978 and 11.6 percent in 1979 and thereafter. Labor Department statisticians now believe that the total hospital cost inflation for 1978 may be less than 13 percent. so the industry effort appears to be ahead of schedule.

I am very pleased by this splendid progress, and I think the industry deserves to be commended for its effort. However, I am not prepared to leave well enough alone. While I realize that economic self-regulation and voluntary restraint almost always are better than Government-imposed controls, I also realize that it was not until the industry faced the very real spectre of compulsory cost containment that they made any real progress on curbing cost increases. Furthermore, it should be noted that the most dramatic decreases in hospital cost inflation have come in the nine States which already have some form of cost-containment law. In the remaining 41 States, hospital cost increases still average about 16 percent per year.

For this reason, I feel it is necessary that the Federal Government take some action to insure continued progress on the cost-containment front, and I think the most effective and reasonable such action is embodied in the Nelson amendment. Under the terms of this amendment, the hospital industry would be encouraged to continue its voluntary cost-containment program. This program would continue without Government interference as long as it meets with success. Should the hospital cost inflation rate rise back above the program's stated goals, compulsory cost containment would begin.

As a cosponsor of the Nelson amendment, I realize that it is not perfect—a statement I make with no disrespect for my distinguished colleague from Wisconsin. However, I feel that this amendment clearly is the best of the plans before us—particularly with the agreed-to modifications to exempt individual hospitals which meet the voluntary goals, even though the State in which the hospital is located may not meet such voluntary goals, and to allow adjustments to reflect rapid population growth. The amendment recognizes both the need for Government action to bring runaway costs under control, and the advantages of pursuing this goal through self-regulation and voluntary restraint. It promises a minimum of Federal interference. At the same time, it insures that total health care spending will be reduced by 34 billion, and that the Federal health care budget will be trimmed by $12 billion. It insures some savings for virtually all Americans and will without question reduce medical expenses for the elderly. The Nelson amendment clearly offers the best of both worlds, and I wholeheartedly support it.

Mr. DOLE. Mr. President, will the Senator yield me 1 minute?

Mr. TALMADGE. I yield 1 minute to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I shall just address the same question that the Senator from Hawaii raised, and that is the quality of care.

I do not know anything in the Nelson amendment that says that the quality of hospital care could not be reduced. It means you are going to have to have shift costs some place if you take away some of the revenues. I do not believe anyone can stand in the Chamber and say with assurance that if we pass this bill we can be satisfied we are not going to upset the quality of care.

I do not suggest that would be anyone's intention. But I suggest there is certainly no guarantee that I can find that would indicate that we can assure any Member of this body that that would not happen.

Mr. TALMADGE. Mr. President, I yield myself such time as I may have remaining.

In sum and substance, Mr. President, the Finance Committee bill tries to compare costs with similar hospitals, in their size, purpose, and effort throughout the United States. And we try to penalize those hospitals that are inefficient and reward those hospitals that are efficient.

We think that that will bring down the costs substantially of hospitals that have been fat and have been charging too much money, paying out too much, and costs have been too great.

The Nelson approach takes the bludgeon approach rather than the carrot-and-stick approach. The Finance Committee has been studying this thing for 5 long years. We have consulted and advised with virtually every expert in the field of hospital care and health delivery service in the whole United States of America.

When the President was running for President back during his campaign he specifically endorsed the bill that I had introduced that was then pending before the Finance Committee known as S. 3205.

He endorsed it by number. That is the committee bill that is pending before you now, and I urge you to approve it.

If it does not work we can come back later with stronger medicine, such as Senator NELSON proposes.

I think it will work; the people of this country think it will work. Our staff who have studied it for 5 years with every expert in the United States thinks it will work. We think it will do the job without having these arbitrary cost controls and labor passthrough, which is 45 percent of the cost of hospitals.

I move to table the Nelson amendment and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I have 30 minutes just on the bill, and if I might be able to yield myself 2 minutes prior to the tabling motion.

The PRESIDING OFFICER. Does the Senator from Georgia withhold his tabling motion?

Mr. TALMADGE. I withhold it for 2 minutes.

Mr. KENNEDY. Mr. President, two or three quick points. There has been some mention made about the labor passthrough. The fact of the matter is that the labor index has been 7.2 percent, which is virtually half of what the Nelson amendment would provide. So I think it is appropriate that we look at that fact.

Second, I would say on the quality issue, my own State of Massachusetts has now had an increase of 10.5 percent. We

have some of the finest hospitals in the world, one of which is Massachusetts General Hospital, where people come from all over the world. Under the voluntary effort, it will be 12 percent.

Connecticut is less than that, New York is less than that, with Yale Medical Center and Cornell, two of the finest medical institutions in the world, providing some of the finest medical care in the world.

Finally, Mr. President, I think the tragedy is, with all the good efforts of the Finance Committee, it just is not going to save the taxpayer any money. I mean, that is the fact of the matter. You can call it cost containment, you can say it is going to cost a good deal, but with the figures of the Budget Committee, which all of us asked to cost these programs out, it just is not going to save the resources.

The Nelson amendment is built on the voluntary effort. It gives the States a chance to develop voluntary programs. It seems to me that it combines the best blend of voluntarism in order to permit that sector to work. But it also gives the assurance of saving billions of dollars.

Mr. TALMADGE. I yield 2 minutes on the bill to the distinguished Senator from Pennsylvania.

The PRESIDING OFFICER. Without objection, the Senator from Pennsylvania is recognized.

Mr. SCHWEIKER. Mr. President, I would like to address the wage passthrough issue that has been discussed. We are not giving the States the right to decide for themselves; we are mandating that they have a wage passthrough. There is not the local option on the wage passthrough question. We are saying that any new State program has to have it even though the existing programs do not. It is interesting to note that proponents cite the existing programs as having the greatest record—those without the wage passthrough. They are the ones who do not have it. They are the ones they cite.

We are opening up a whole new can of worms by mandating that States are going to have to have a wage passthrough, so 41 other States have been mandated under this program. If they want local option they have to have a mandatory wage passthrough.

So let us put it all out on the table and let us see the discrimination against the new States when, in fact, the old States have a system that does not include a wage passthrough.

Mr. TALMADGE. Mr. President, I move to lay on the table the amendment of the Senator from Wisconsin.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Georgia to lay on the table the amendment of the Senator from Wisconsin. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Iowa (Mr. CLARK), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Michigan (Mr. GRIFFIN), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Idaho (Mr. MCCLURE) would vote "yea."

On this vote, the Senator from Texas (Mr. TOWER) is paired with the Senator from Michigan (Mr. GRIFFIN). If present and voting, the Senator from Texas would vote "yea" and the Senator from Michigan would vote "nay."

Mr. RIEGLE. Regular order.

Mr. NELSON. Regular order, Mr. President.

The PRESIDING OFFICER. The Senate is in order. Senators will please clear the well.

Mr. ROBERT C. BYRD. Mr. President, have all Senators voted? There is so much noise in here it is difficult to hear.

The PRESIDING OFFICER. Are there any Senators in the Chamber who have not yet voted?

The result was announced—yeas 42, nays 47, as follows:

[Rollcall Vote No. 484 Leg.]

YEAS—42

Allen	Hansen	Morgan
Baker	Hatch	Nunn
Bartlett	Hatfield, Mark O.	Packwood
Bentsen	Hayakawa	Pearson
Byrd, Harry F., Jr.	Heinz	Percy
Church	Helms	Roth
Curtis	Hollings	Schmitt
Danforth	Huddleston	Schweiker
DeConcini	Inouye	Stennis
Dole	Johnston	Stevens
Eastland	Laxalt	Talmadge
Ford	Long	Thurmond
Garn	Lugar	Wallop
Goldwater	Melcher	Young

NAYS—47

Abourezk	Eagleton	Moynihan
Anderson	Glenn	Muskie
Bayh	Gravel	Nelson
Bellmon	Hart	Pell
Biden	Hatfield, Paul G.	Proxmire
Brooke	Hodges	Randolph
Bumpers	Humphrey	Ribicoff
Burdick	Jackson	Riegle
Byrd, Robert C.	Javits	Sarbanes
Cannon	Kennedy	Sasser
Case	Leahy	Sparkman
Chafee	Magnuson	Stafford
Chiles	Matsunaga	Stevenson
Cranston	McGovern	Stone
Culver	Metzenbaum	Williams
Durkin		Zorinsky

NOT VOTING—11

Clark	Hathaway	Scott
Domenici	Mathias	Tower
Griffin	McClure	Weicker
Haskell	McIntyre	

So the motion to lay on the table amendment No. 3478, as modified, was rejected.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. TALMADGE. Mr. President, may we have order?

Mr. NELSON. If the Senator will accept the amendment——

Mr. DOLE. Mr. President, I have an amendment.

Mr. KENNEDY. Point of order, Mr. President. What is the business before the Senate?

The PRESIDING OFFICER. The Senator from Kansas is recognized.

UP AMENDMENT NO. 2066

(Purpose: To provide for a Congressional veto of the standby limit on total inpatient reimbursement)

Mr. DOLE. I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 2066:

On page 17, between lines 16 and 17, insert the following:

"(7)(A) The limitation on hospital reimbursement provided for under the preceding paragraphs of this subsection shall become effective 90 days after the Secretary makes the finding as required under paragraph (1) that hospitals have failed to voluntarily reduce the rate of increase in their expenses, and reports such finding to the Congress, unless, within such 90-day period, either House of Congress adopts a resolution of disapproval. If either House of Congress adopts such a resolution during such period, reimbursement shall be made without regard to the preceding paragraphs of this subsection.

"(B) For purposes of calculating the 90-day period under subparagraph (A) there shall not be included any period of more than 3 consecutive days during which both Houses of Congress are not in session.

"(C) For purposes of this paragraph a 'resolution of disapproval' means a concurrent resolution of the two Houses of Congress or a resolution of either House of Congress, stating that such House or Houses do not approve of the proposed implementation of standby limits on hospital reimbursement proposed by the Secretary for any specified period of time under this subsection.

Mr. KENNEDY. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. KENNEDY. Is the amendment which is before the Senate now the Talmadge amendment, as modified by the Nelson amendment?

The PRESIDING OFFICER. The Nelson amendment is pending and this is an amendment to the Nelson amendment, a perfecting amendment, by the Senator from Kansas. The time limitation is 20 minutes equally divided. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, this is a very simple amendment. It simply gives the House and the Senate the right to review the report of the Secretary of HEW——

Mr. NELSON. Mr. President, may we have order? I cannot hear the Senator.

The PRESIDING OFFICER. Will the Senate please be in order?

Mr. DOLE. This is the amendment I did not discuss with the distinguished Senator from Wisconsin, but it gives the House and the Senate the right to review the report of the Secretary of HEW with respect to the triggering of Federal mandatory revenue cap should the voluntary effort fail. Rather than attempting to inject the Congress into the technical end of HEW's findings, my amendment would place the Congress in a supervisory position.

Specifically, the amendment would give Congress 90 days in which to act. A resolution of disapproval could be introduced in either House and referred to the appropriate congressional committees. In view of the fact that we are dealing with an extremely controversial and complex matter, I think this congressional veto mechanism is essential to insure that the Department of HEW does not deviate from congressional intent.

Recent events regarding the issuance of guidelines in respect to the health planning legislation have shown again that HEW has not always been consistent in adhering to the policies mandated by the Congress. It is critical that the mechanism be provided to Congress to insure that HEW's actions are, indeed, in line with our intention. The congressional veto amendment will help provide assurance to the public and the Congress that HEW will not drift away from the major policy decision it will make with respect to this legislation.

We are breaking new ground, in the event this amendment should become law. I think it is very important that we give Congress some oversight over the implementation of the program. It is not a case of curbing the powers of a regulatory agency but, rather, making certain the decisions of Congress, as representatives of the people, are followed. It would seem to me this might enhance the chances for this amendment to finally survive. I would hope the distinguished author might be prepared to accept it.

Mr. NELSON. Mr. President, does the Senator have a copy of that amendment? As I understand from what the Senator said, either House, if a voluntary effort fails, either House, by its own action, could stop the implementation of the amendment which was refused tabling by a vote of 47 to 42?

Mr. DOLE. That is right.

Mr. NELSON. I think that is a very bad amendment, if one House has the right to decide to veto the legislation, if it is passed by both Houses and signed by the President.

Mr. KENNEDY. Will the Senator yield?

Mr. NELSON. Yes.

Mr. KENNEDY. Mr. President, I agree with the Senator from Wisconsin. It seems to me that the point still lies in favor of the fundamental parts of the Nelson amendment, and that is that the reason that the voluntary aspects will be successful, or it is the belief of those of us who support this that they will be successful, is because then if they are not successful we will have the implementing parts of the Nelson amendment which will bring the cost controls into effect.

If we effectively wipe out that aspect of the Nelson amendment, I think the chances of achieving what the Nelson amendment wants to achieve through the voluntary sector would be seriously undermined.

Second, I make the point that it seems to me the Nelson amendment has the advantage of using the voluntary system for 2 years to achieve a 12 percent cost figure. It seems to me that if the hospital association and the hospitals cannot reach what they themselves have set out as a goal which is easily reachable, that then the burden ought to be on them to come before the appropriate committees of the Congress to ask for a change in the law rather than the reverse situation which would result if the Dole amendment would be accepted.

I just want to underwrite what the Senator from Wisconsin has mentioned.

Mr. DOLE. Mr. President, in view of this discussion I will modify my amendment as far as it being an action of both Houses. I send the modification to the desk.

The PRESIDING OFFICER. The Senator has the right to modify his amendment.

The amendment, as modified, is as follows:

On page 17, between lines 16 and 17, insert the following:

"(7) (A) The limitation on hospital reimbursement provided for under the preceding paragraphs of this subsection shall become effective 90 days after the Secretary makes the finding as required under paragraph (1) that hospitals have failed to voluntarily reduce the rate of increase in their expenses, and reports such finding to the Congress, unless, within such 90-day period, both Houses of Congress adopt such a resolution of disapproval. If both Houses of Congress adopt such a resolution during such period, reimbursement shall be made without regard to the preceding paragraphs of this subsection.

"(B) For purposes of calculating the 90-day period under subparagraph (A) there shall not be included any period of more than 3 consecutive days during which both Houses of Congress are not in session.

"(C) For purposes of this paragraph a 'resolution of disapproval' means a concurrent resolution of the two Houses of Congress, stating that such House or Houses do not approve of the proposed implementation of standby limits on hospital reimbursement proposed by the Secretary for any specified period of time under this subsection.

Mr. DOLE. That is a step backward from the original proposal that would require concurrent action by both houses.

It would seem to me if we are really concerned about cost containment in the Congress, we ought to have a chance to review it and a chance to review the Secretary's findings. This would be one way to make certain we review that responsibility we talk so much about. It is offered in the spirit of trying to make it work, not in any effort to undermine the efforts of the distinguished Senator from Wisconsin.

Mr. NELSON. Might I inquire? Either the original or the modified proposal, does it require action by both Houses and signature by the President?

Mr. DOLE. No, just both Houses of Congress.

Mr. NELSON. If the Senator would have it to be the action of both Houses and signed by the President, which would be the way this bill will get to the President, I do not see there would be much to quarrel about.

Mr. DOLE. Well, he has so much to do. [Laughter.]

There are just so many things this President can do, or any President, for that matter. We would limit this to congressional review. It is only offered in an effort to help the distinguished Senator from Wisconsin.

Mr. NELSON. He could get up a minute earlier some day and sign it.

[Laughter.]

Mr. DOLE. I do not want him getting up any earlier.

I yield to the Senator from New Jersey.

Mr. CASE. There is a precedent for this kind of amendment. In fact, it bears the name of the distinguished Senator from Wisconsin. The amendment that bears the name of Senator NELSON is one we are all familiar with.

Mr. NELSON. That is hardly fair debate. I wish the Senator would withdraw that.

Do I understand that the proposal is that if the voluntary effort fails as of July 1, 1979, and pursuant to the provisions of this amendment, the trigger would occur, am I to understand that the Senator from Kansas is saying that, by a concurrent resolution passed by both Houses, we may suspend the implementation of the bill?

Mr. DOLE. Right. And if we do not do anything within that 90 days and if they do not have a resolution of disapproval, the Secretary's findings are final.

Mr. KENNEDY. Mr. President, it seems that the only purpose and function of the amendment of the Senator from Kansas is to exclude the President of the United States. That is the only effective function and purpose. I do not understand.

I think the Senator from Wisconsin is right in saying that if we are going to require that it pass both Houses, why not also include the signature of the President of the United States? If we accept this, effectively, we are writing out the President from having any kind of involvement—the President who has responsibilities in terms of the general economy, general impact of inflation. This is an issue that is related to the whole battle on inflation where, under our constitutional powers, we set an important responsibility for the President. It seems to me that we ought at least to share that important responsibility in this amendment. If the Senate is going to exclude the President of the United States, I think it is a clear expression of this body that for, one reason or another, we do not think that his views—and that is essentially what this is saying—on the issue of inflation are sufficiently important to be given balance and consideration in an operational way in this process. It seems to me to be unwise.

If the Senator wants to add "with the signature of the President," I would certainly welcome the addition.

Mr. DOLE. Mr. President, let me point out that certainly it is not an effort to ignore the executive branch; in fact, it is the President's Secretary who makes the findings. It is an expression that we have every confidence in the executive branch, and the Secretary of HEW is the one who makes the findings. All we do—the Executive on one hand and Congress on the other hand—is review the Executive's findings.

Certainly, there is dialog between Secretary Califano and the President and

those who work for the President. So I think we have covered that base without any additional step requiring that we pass some law that is signed by the President. It seems to me we have addressed that concern in a very natural way.

Mr. KENNEDY. Mr. President, the point I make in responding to the Senator is that the function of the Secretary of HEW is primarily an operational, administrative function. The guidelines are sustained in the legislation. They establish, through the procedures of the Nelson amendment, what that percentage is going to be. Then that is the figure in which the percentages are judged. So it is basically a function of the Secretary of HEW to make a judgment based on the various aspects of the amendment.

Those are described. As the Senator from Wisconsin has pointed out, effectively, it is double the inflation rate.

It seems to me, Mr. President, that this is President Carter's major initiative in the area of health cost containment and an extremely important aspect of the initiative in the area of inflation. Effectively, we are talking about a modified program with the Nelson amendment, but one that has been embraced by the strong majority in the Senate. It is President Carter's initiative, it has been accepted by the majority of the Senate. The Senator makes an amendment effectively to exclude the President from being involved in a future activity which may, effectively, vitiate this legislation.

I think it is unwise policy and I think it is unnecessary. I would prefer it, if we were going to follow what I think is the sounder policy—that is, that the burden should be on those who want to alter after 2 years, through the process, which is the routine process, which exists in the Senate for altering legislation, rather than this special procedure.

Mr. CASE. Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. I yield time.

Mr. KENNEDY. I yield 5 minutes on the bill.

Mr. CASE. I thank my colleagues.

Mr. President, I do not know why I got into this thing, except that this area of Presidential authority and congressional review is one that is of deep interest to me, has been over the years, ever since the first experience I had with it under the Reciprocal Trade Act, where the President was granted authority to effect trade subject to congressional veto.

That veto was not by law, which Congress and the President could make at any time, but by concurrent action of the two Houses of Congress.

Regulation of this sort traditionally, historically, is a matter for the legislature. We get in the habit of talking loosely about the President's program. Well, the President is a fine man and the Presidency is a great office, but he does not run this country. This is a country of law and laws are made by the legislature, with the President's right to veto and then a requirement of a two-thirds vote by each House to override.

Here we are, because of the complexity of the situation, like many other situations, granting discretionary authority to the executive branch to carry out legislative mandates.

That is fine, too. But there is absolutely nothing inconsistent with our system. In fact, it is thoroughly consistent with it for us, in a particular instance, to have the right, by joint action of both Houses, to review a legislative action taken under a grant of authority that we give.

I do not think that it is right to say that we are taking anything away from the President. The President, as the Senator from Kansas has noted, has had the initial input.

The President has acted when the Secretary proposes the regulation. Therefore, it would be a complete anachronism to require the President to agree that he was wrong in the first instance. If legislative review is to mean anything, it should be reviewed by concurrent action of both Houses and it is utterly consistent with our system of delegated authority in matters of this kind that we should require the Secretary's authority to be subject to congressional review.

Mr. BROOKE. Mr. President, will the Senator yield a minute?

Mr. KENNEDY. I yield.

Mr. BROOKE. Mr. President, I do not want to get into this Presidential debate. I do not think the amendment of the Senator from Kansas is as wild as it has been characterized, but I do think it is unnecessary. There is a time limitation involved here. There is a time that that has been established by the Nelson amendment for voluntary compliance. There is no doubt that Congress has the power of review, the authority of review. It can do it on its own. It does not have to be written into this law for Congress and the President to act if the hospitals do not work voluntarily. We can act ourselves.

I just do not feel it is necessary to write it into this legislation. That is what I do not understand: why the necessity to have it included in this amendment?

Mr. CASE. Will the Senator yield?

Mr. BROOKE. Yes; because I do not understand.

Mr. CASE. Of course, Congress and the President can act at any time. They can change any law, whether it was enacted earlier by concurrent resolution, as it always is, or not. But the point of this is that a review is effective by the two Houses of Congress without Presidential approval. It would be quite wrong to require such a review to have concurrence by the President, who has already, through his Secretary, made the initial determination.

Mr. BROOKE. Well, I still do not understand the necessity for having an amendment to the Nelson amendment that would require legislative review after this period of time. It is already there. We shall have legislative review. That is the point I am trying to make.

Mr. CASE. We shall have review by the legislature plus the President. This is review by the legislature only.

Mr. BROOKE. What is the objection to having the President? I do not think the Senator from Kansas even objects to the President's being included.

Mr. DOLE. It is just not necessary. It is his Secretary that makes the findings in the first place, and that triggers the mechanism. This amendment gives us 90 days for review, because we deal in an area that is highly controversial.

Mr. BROOKE. Is this not more cosmetic than it is substantive? I mean, what does it really add to the amendment? We know what the Nelson amendment does. Now, the Senator says that we will come back, have a legislative review, but exclude the President. What does it really add? That is the point.

Mr. DOLE. It alerts the Congress and gives us 90 days to do either nothing or review the findings of the Secretary of HEW.

We have had experiences in the past where some of the rules promulgated by HEW have not been all that effective.

We would like to find out, before we implement some vast new program that affects, really, the life and death of many patients, if it is really appropriate and necessary.

Maybe the findings will be perfect, but we need an opportunity to make sure. The amendment would only delay the implementation for 90 days. If we do not act, it goes into effect.

Mr. BROOKE. Is that not implied in the amendment?

Mr. NELSON. I did not hear the question.

Mr. BROOKE. Is it not implied there would be congressional review if, after the period has expired, that it has not worked and we want to have congressional review, we can have congressional review?

Mr. NELSON. After what period is the Senator talking about that has expired?

Mr. BROOKE. The 2 years.

Mr. NELSON. The bill itself automatically will expire in 1982, regardless, unless we do something about it; it just automatically expires.

Mr. BROOKE. Yes.

Mr. DOLE. We are talking about the time when the controls are triggered. There is presently no congressional review provided for specifically, without my amendment. My amendment says then we have 90 days to look at it. That is all we suggest.

Mr. BROOKE. But the Senator does not want the President included.

Mr. DOLE. Well, it is his Secretary of HEW.

Mr. BROOKE. And both houses?

Mr. DOLE. I have changed it to both.

I am prepared to yield back the time.

Mr. NELSON. If the Senator from Kansas will yield, I do not much care about the amendment but, on the other hand, I realize the Senator has a sincere purpose in mind here. I am concerned about his calculation of the 90 days.

I do not know whether there might be a recess period, or something. I wonder if the Senator would be agreeable to make it 45 days and not counting any period in excess of 3 days that was a recess.

If we are going to act, certainly act in that period.

Mr. DOLE. I have that 3-day provision in the amendment. Maybe we can make it 60 days as a compromise.

Mr. NELSON. I would agree to accept it if the Senator would make it 60 days.

Mr. DOLE. I modify the amendment.

Mr. NELSON. Now, I looked at the amendment, and I understand it is a concurrent resolution passed by both Houses, passed within 60 days from the time—the determination of the Secretary is made.

Mr. DOLE. Right, 60 days after the Secretary makes the finding as required under paragraph, first, that hospitals have failed to voluntarily reduce the rate of increase in their costs.

Also, to provide it shall not include any period more than 3 consecutive days in which both Houses of Congress are not in session.

We changed 90 to 60, one House to both Houses.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. NELSON. Is there any other time?

Mr. KENNEDY. I think I have time.

The PRESIDING OFFICER. The Senator has 2 minutes.

Mr. NELSON. I will just take 2 minutes.

So that I have it clear from my rapid reading of this: The option under this amendment, how Congress can act, is dependent on a national trigger occurring under the bill that is pending.

Mr. DOLE. That is correct, under paragraph 1.

Mr. NELSON. All right.

And the Senator is agreeable to changing the days from 90 to 60?

Mr. DOLE. Right.

Mr. NELSON. And to leave the rest of the resolution as introduced applying to concurrent resolution of both Houses.

Mr. DOLE. Right.

I modified it very quickly, but that is the intent, both Houses, concurrent resolution, 60 days, upon the determination that the hospitals have exceeded the voluntary goal.

The PRESIDING OFFICER. The clerk has the modification. The amendment is so modified.

The amendment, as further modified, follows:

On page 17, between lines 16 and 17, insert the following:

"(7)(A) The limitation on hospital reimbursement provided for under the preceding paragraphs of this subsection shall become effective 60 days after the Secretary makes the finding as required under paragraph (1) that hospitals have failed to voluntarily reduce the rate of increase in their expenses, and reports such finding to the Congress, unless, within such 60-day period, both Houses of Congress adopts a resolution of disapproval. If both Houses of Congress adopts such a resolution during such period, reimbursement shall be made without regard to the preceding paragraphs of this subsection.

"(B) For purposes of calculating the 60-day period under subparagraph (A) there shall not be included any period of more than 3 consecutive days during which both Houses of Congress are not in session.

"(C) For purposes of this paragraph a 'resolution of disapproval' means a concurrent resolution of the two Houses of Congress or a resolution of both Houses of Congress, stating that such Houses do not approve of the proposed implementation of standby limits on hospital reimbursement proposed by the Secretary for any specified period of time under this subsection.

Mr. NELSON. Mr. President, I am prepared to accept the amendment.

Mr. TALMADGE. Mr. President, as I stated a moment ago, I am prepared to accept the Nelson amendment, as modified.

The PRESIDING OFFICER. The pending question is on agreeing to the amendment of the Senator from Kansas.

The amendment (UP 2066) as modified, was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the Nelson amendment, as amended.

Mr. CASE. Mr. President, I ask unanimous consent to have my name joined with Senator DOLE's on this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin, as amended.

The amendment (No. 3478), as amended, was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STONE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Several Senators addressed the Chair.

UP AMENDMENT NO. 2067

(Purpose: To provide for a study of availability and need for skilled nursing facility services under medicare and medicaid)

Mr. NELSON. Mr. President, I have an amendment that I believe was agreed to on a study of the nursing homes problem.

Mr. TALMADGE. Will the Senator state what it is?

Mr. NELSON. Yes.

The Finance Committee approved an amendment to the medicare-medicaid law which would require skilled nursing home facilities to participate in both medicare and medicaid as a condition of their participation in either program. Current law does not require it. It was in my proposal in Finance.

We find there are some problems with that and that the HEW Secretary ought to study it instead of mandating that by statute at this time.

This would substitute a study in place of the mandatory language in my amendment in the Finance Committee.

Mr. TALMADGE. I have no objection to the amendment.

Mr. NELSON. I send the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an unprinted amendment numbered 2067.

Mr. NELSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 80, line 1, strike out all through page 81, line 8, and insert in lieu thereof the following:

STUDY OF AVAILABILITY AND NEED FOR SKILLED NURSING FACILITY SERVICES UNDER MEDICARE AND MEDICAID

SEC. 31. (a)(1) The Secretary of Health, Education, and Welfare (hereinafter in this section referred to as the "Secretary") shall conduct a thorough study and investigation of the availability and need for skilled nursing facility services covered under part A of title XVIII of the Social Security Act and under State plans approved under title XIX of such Act.

(2) Such study shall include—

(A) an investigation of the desirability and feasibility of imposing a requirement that skilled nursing facilities (i) which furnish services to patients covered under State plans approved under title XIX of the Social Security Act also furnish such services to patients covered under part A of title XVIII of such Act, and (ii) which furnish services to patients covered under such title XVIII also to furnish such services to patients covered under such State plans,

(B) an evaluation of the impact of existing laws and regulations on skilled nursing facilities and individuals covered under such State plans and under part A of such title XVIII, and an evaluation of the extent to which existing laws and regulations encourage skilled nursing facilities to accept only title XVIII beneficiaries or title XIX recipients, and

(C) an investigation of possible changes in regulations and legislation which would result in encouraging a greater availability of skilled nursing services.

(3) In developing such study, the Secretary shall consult with professional organizations, health experts, private insurers, nursing home providers and consumers of skilled nursing facility services.

(b) Within 6 months after the date of enactment of this Act the Secretary shall complete such study and investigation and shall submit a full and complete report thereon, together with recommendations with respect to the matters covered by such study and investigation (including any recommendations for administrative or legislative changes), to the Committee on Finance of the Senate and to the Committee on Ways and Means and on Interstate and Foreign Commerce of the House of Representatives.

Mr. NELSON. Mr. President, that is the amendment just discussed with the distinguished Senator from Georgia.

Mr. President, the Finance Committee approved an amendment (section 31 of H.R. 5285) to the medicare-medicaid law, which would require skilled nursing facilities (SNF's) to participate in both medicare and medicaid as a condition of their participation in either program. Current law does not require such dual participation.

The amendment was adopted in response to a growing national problem: The unavailability of skilled nursing home beds for medicare and medicaid beneficiaries.

Unforeseen administrative difficulties and policy issues regarding the provision have been pointed out since the Finance Committee's action. Therefore, we are proposing changing the section, to require a thorough study by HEW of the

problem and a report to Congress in 6 months.

This modification is the product of discussions with the nursing home industry, interest groups representing senior citizens, and HEW.

The discussions have produced agreement on all sides that a problem exists, which needs addressing. The causes for the problem are complex, involving reimbursement levels, regulations, levels of care that are required, and other factors.

The important result of the committee-approved section and subsequent discussions is that all parties have focused on the problem, and have demonstrated a willingness to try and correct it in a variety of ways.

We believe an investigation into the many aspects of the problem is the necessary first step.

The reason behind the amendment is that, in the past 10 years, nursing homes have been dropping out of medicaid and medicare programs at an alarming rate, leaving large sections of the country without sufficient numbers of medicare or medicaid nursing home beds to accommodate the need. Thus, patients who have been paying into the Federal insurance programs are not receiving the benefits to which they are entitled. Several unfortunate results may occur: Patients remain in hospitals longer than necessary, at greater cost than necessary; or they are forced to move far from their homes in order to find a participating facility, often after a long wait before there is room for them; or, worst of all, if there is no medicare facility available, patients may enter a nursing home at their own expense (although they are entitled to medicare coverage) and use up their own financial resources, at which point they may become eligible for medicaid, the Federal-State health insurance program for low-income persons. Federal law, incidentally, stipulates that medicaid is to be the provider of last resort.

Thirteen States, including Wisconsin and New York, have laws or policies designed to bring nursing homes back into these programs. Wisconsin's law requires that nursing homes participate in medicare as a condition of participation in the State-Federal medicaid program, if the State determines that there is a need for such care in an area. HEW has ruled that such laws are constitutional. The Wisconsin law was in response to the fact that the entire Northern section of the State (47 out of 72 counties) has no medicare-participating nursing home.

Of approximately 20,000 nursing homes in the Nation, only 4,210 facilities participate in medicare and/or medicaid skilled care: 559 are medicare-only participants; 3,205 are medicaid-only participants; 10,337 participate in the less-skilled medicaid intermediate care facility (ICF) program. In 1969, nearly 5,000 nursing homes participated in skilled care programs. Between 1977 and 1978 alone, participation in the skilled care programs dropped by 251 facilities nationwide. In Wisconsin, which has approximately 400 nursing homes, about 60 participate in medicare, compared to 188 that participated in 1968. (Source: HEW, as of September 1, 1978.)

The problem varies from State to State: in some States, many homes that are eligible for medicare participate only in medicaid; in others, the reverse is true.

The reduction in nursing homes that participate in Federal insurance programs is coming at a time of growth in the Nation's aging population. Eleven percent of the total population, or 22.4 million people, presently are over 65 years of age. The number is estimated to reach 32 million by the year 2000.

WHAT THE MODIFICATION WOULD DO

The Secretary of HEW would be required to conduct a thorough study and investigation of the availability and need for skilled nursing facility services provided under medicare (title XVIII) and medicaid (title XIX).

It would include:

First. A study of the desirability and feasibility of requiring dual participation by skilled nursing homes in both medicare and medicaid programs;

Second. An evaluation of the impact of existing law and regulations on nursing homes and beneficiaries of medicare and medicaid services; and

Third. Recommendations for changes in regulations and legislation with respect to encouraging a greater availability of skilled nursing facility services.

In developing the study, HEW would be required to consult with professional organizations, health experts, private insurers, nursing home providers and consumers of SNF care.

The study and a report would be submitted in 6 months to the Senate Finance Committee and the Committee on Ways and Means and on Interstate and Foreign Commerce of the House of Representatives.

It is our understanding that the manager of the bill has agreed to the amendment. Senator SCHWEIKER and Senator TOWER are joining us in supporting this approach, and has agreed to withdraw his amendment (No. 3583) to delete the original section 31 from H.R. 5285.

Mr. President, I ask unanimous consent that the modification as an amendment to H.R. 5285 be printed in the RECORD following these remarks.

Mr. TALMADGE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 2067) was agreed to.

AMENDMENT NO. 3684

(Purpose: To revise payments for certain physicians' services)

Mr. METZENBAUM. Mr. President, I call up an amendment No. 3684, which is at the desk, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) for himself and Mr. DURKIN, Mr. JAVITS and Mr. KENNEDY, proposes an amendment numbered 3684.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At an appropriate point in the bill, insert the following new section:

SEC. . (a)(1) Section 1861(q) of the Social Security Act is amended by adding "(1)" immediately after "(q)" and by adding, immediately before the period at the end thereof, the following: "; except that the term does not include any service that a physician may perform as an educator, an executive, or a researcher; or any professional patient care service unless the service (A) is personally performed by or personally directed by a physician for the benefit of the patient and (B) is of such nature that its performance by a physician is customary and appropriate".

(2) Section 1861(q) is amended by adding the following paragraphs at the end:

"(2) In the case of anesthesiology services, a procedure would be considered to be "personally performed" in its entirety by a physician where the physician performs the following activities:

"(A) preanesthetic evaluation of the patient;

"(B) prescription of the anesthesia plan;

"(C) personal particpation in the most demanding procedures in this plan, including those of induction and emergence and assuring that a qualified individual, who need not be his employee, performs any of the less demanding procedures which the physician does not personally perform;

"(D) following the course of anesthesia administration at frequent intervals;

"(E) remaining physically available for the immediate diagnosis and treatment of emergencies; and

"(F) providing indicated postanesthesia care:

Provided, however, That during the performance of the activities described in subparagraphs (C), (D), and (E), the physician is not responsible for the care of more than one other patient. Where a physician performs the activities described in subparagraphs (A), (B), (D), and (E) and another individual performs the activities described in subparagraph (C), the physician will be deemed to have personally directed the services if he was responsible for no more than four patients while performing the activities described in subparagraphs (D) and (E) and the reasonable charge for his personal direction shall not exceed one-half the amount that would have been payable if he had personally performed the procedure in its entirety.

"(3) Pathology services shall be considered 'physicians' services' to patients only where the physician personally performs acts or makes decisions with respect to a patient's diagnosis or treatment which require the exercise of medical judgment. These include operating room and clinical consultations, the required interpretation of the significance of any material or data derived from a human being, the aspiration or removal of marrow or other materials, and the administration of test materials or isotopes. Such professional services shall not include professional services such as: the performance of autopsies; and services performed in carrying out responsibilities for supervision, quality control, and for various other aspects of a clinical laboratory's operations that are customarily performed by nonphysician personnel.".

(3) Section 1861(b) of such Act is amended—

(A) by striking out "or" at the end of paragraph (6),

(B) by striking out the period at the end of paragraph (7) and inserting "; or", and

(C) by adding at the end the following paragraph:

"(8) a physician, if the services provided are not physicians' services (within the meaning of subsection (q)).".

(b)(1) Section 1861(s) of the Social Security Act is amended by adding at the end: "The term 'medical and other health services' shall not include services described in paragraphs (2)(A) and (3) if furnished to inpatients of a provider of services unless the Secretary finds that, because of the size of the hospital and the part-time nature of the services or for some other reason acceptable to him, it would be less efficient to have the services furnished by the hospital (or by others under arrangement with them made by the hospital) than to have them furnished by another party.".

(2) Section 1842(b)(4) of such Act, as added by section 7 of this Act, is amended by adding:

"(G) The charge for a physician's or other person's services and items which are related to the income or receipts of a hospital or hospital subdivision shall not be considered in determining his customary charge to the extent that the charge exceeds an amount equal to the salary which would reasonably have been paid for the service together with any additional costs that would have been incurred by the hospital to the physician performing it if it had been performed in an employment relationship with the hospital plus the cost of other expenses (including a reasonable allowance for traveltime and other reasonabe types of expense related to any differences in acceptable methods of organization for the provision of services) incurred by the physician, as the Secretary may determine to be appropriate.".

(c) Section 1861(v) of the Social Security Act is amended by adding:

"(8)(A) Where physicians' services are furnished under an arrangement (including an arrangement under which the physician performing the services is compensated on a basis related to the amount of the income or receipts of the hospital or any department or other subdivision) with a hospital or medical school, the amount included in any payment to the hospital under this title as the reasonable cost of the services (as furnished under the arrangement) shall not exceed an amount equal to the salary which would reasonably have been paid for the services (together with any additional costs that would have been incurred by the hospital) to the physician performing them if they had been performed in an employment relationship with the hospital (rather than under such arrangement) plus the cost of other expenses (including a reasonable allowance for traveltime and other reasonable types of expense related to any differences in acceptable methods of organization for the provision of the services) incurred by the physician, as the Secretary may determine to be appropriate.".

(d)(1) Section 1833(a)(1)(B) of the Social Security Act is amended by inserting "(except as provided in subsection (H))" immediately after "amounts paid shall".

(2) Section 1933(b)(2) of such Act is amended by inserting "(except as otherwise provided in subsection (b))" immediately after "amount paid shall".

(3) Section 1833 of such Act is amended by adding:

"(h) The provisions of subsection (a)(1)(B) and clause (2) of the first sentence of subsection (b) shall not apply to any physician unless he has entered into an agreement with the Secretary under which he agrees to be compensated for all such services on the basis of an assignment the terms of which are described in section 1842(b)(3)(B)(ii).".

Mr. METZENBAUM. Mr. President, this amendment, which Senators KENNEDY, JAVITS, and HATHAWAY join me in offering, eliminates the costly and wholly unnecessary "percentage arrangement" system that is now used widely to compensate hospital-based anesthesiologists, pathologists, and radiologists. It was originally offered in the committee by Senator TALMADGE.

These medical specialists hold a unique position in American medicine.

Unlike most doctors, hospital-based physicians do not hang out a shingle and offer their services to the public. Rather, they contract with hospitals to deliver specialized in-house services.

Unlike most other doctors, hospital-based physicians have contractual arrangements that provide them with assured practices and assured incomes.

And unlike most other doctors, hospital-based physicians have an effective monopoly over the services they provide. That is so, because the patient has no choice where these services are concerned.

A patient in this country may choose his or her own surgeon or heart specialist or general practitioner. But when a biopsy is done in a hospital, the patient does not choose his own pathologist. When a patient is anesthetized, he or she does not choose the doctor who administers the anesthesia. When X-rays are taken, the patient has nothing to say about who takes them and who reads them.

Anesthesiologists, radiologists, and pathologists are highly skilled and highly trained professionals.

I would not for one moment deny that these skilled people deserve generous compensation.

But, Mr. President, "percentage arrangements" can provide hospital-based physicians with incomes that are remarkable by any standards.

"Percentage arrangements" are really quite simple. Instead of salaries, specialists who are lucky enough to have such contracts receive as compensation a percentage of the gross charges or net collections of the hospital departments in which they serve.

These are extremely lucrative arrangements.

Mr. President, may I have order in the Chamber? Can we break up the coffee klatch in the rear?

The PRESIDING OFFICER. The Senate will be in order.

Mr. METZENBAUM. Mr. President, a 1977 Arthur Anderson study, performed for HEW, showed that physicians working on a "percentage arrangement" earned from 20 to 120 percent more than their counterparts who work on a straight salary basis.

The chart I have at the rear of the Chamber illustrates these differences. Here we can see just how much doctors with the same specialties, working the same number of hours, actually earn on salary and through percentage arrangements. These differences are not related to the number of patients seen or tests performed. They relate only to the business arrangements that exist between the doctors and the hospitals.

The Arthur Anderson study is not the only documentation we have about this problem. In 1976, for example, hearings before the Committee on Finance pointed to cases in which specialists were able to earn hundreds of thousands of dollars per year through percentage arrangements. And those hearings also brought out the fact that hospitals have had a very difficult time in persuading specialists to alter or abandon this system. No wonder.

These high incomes—and the high medicare and medicaid costs that follow from them—are possible because advances in medical technology have made the "percentage arrangement" obsolete as a method of compensating doctors. Nowadays, nonphysicians, house staff, and even machines are able to do work that once required the personal attention of a specialist. As a result, specialists who enjoy "percentage arrangements" are often paid for services that they have not personally performed.

This amendment will discourage "percentage arrangements" and their attendant costs to the Treasury by limiting reimbursement for hospital-based physicians to three categories—payment for services rendered personally, payment of salary for supervising others, and payment of salary for teaching. The amendment will bring fees into line with the realities of modern practice.

I want to emphasize, Mr. President, that nothing in this amendment will in any way affect the charges set by individual specialists for specific services.

In addition, I want to make it clear that I am not trying to make a judgment on the level of earnings doctors should have a right to expect. I must say, however, that income in the $100,000 to $200,000 range is quite respectable.

What I am saying with this amendment is that earnings must reflect a relationship between services rendered and fees charged. I see no justification for a system that allows payment for professional services performed by others who are not professionals—and that is precisely what the "percentage arrangement" system provides.

Mr. President, this amendment will save a very substantial amount of money for the American taxpayer.

According to figures prepared by the Department of Health, Education, and Welfare, the amendment will save $27 million in Federal medicare and medicaid expenditures in fiscal year 1979.

By the end of 1933, the total savings from this amendment will reach $214 million.

Monopoly power, whether it exists in iron and steel or in specialized health services, inevitably leads to higher prices for consumers.

There can be no doubt that the exclusive concessions granted to hospital-based physicians create a true monopoly situation.

This amendment will not end exclusive hospital concessions for pathologists, radiologists, and anesthesiologists.

But it will reduce the potential for abuse of monopoly power by eliminating one of the worst results of that power—the "percentage arrangement" system.

Mr. President, I believe that this amendment is a matter of commonsense.

It will not reduce the quantity or the

quality of medical care available to the public.

It will not treat anyone unfairly—spokesmen for the medical profession have already acknowledged that reform is needed in this area.

The College of American Pathologists has testified that—

> Compensation should be related to the pathologist's contribution in time, effort, training, experience, and the range of responsibility he assumes.

They went on to say that a pathologist's—

> Total compensation should be comparable to his peers' practicing pathology in the community and to other medical specialists of similar training and experience.

The American Hospital Association has stated:

> This arrangement, however, provides no incentive to the physician for effecting economies, and it brings about the rather incongruous situation in which any pertinent charge to patients, even one made solely to cover increased department operating expenses, accrues, to a considerable extent, to the financial benefit of the physician.

Mr. President, this amendment will save millions of taxpayer dollars. It will eliminate monopoly abuse and it will insure that doctors are paid for the services that they perform—no more and no less.

Mr. President, this amendment originally was offered by Senator TALMADGE. It has been supported by the American Radiologists Association, the American Anesthesiology Association, and by the administration. It is a step in the right direction, and I strongly urge the Members of the Senate to accept the amendment.

Mr. KENNEDY. Mr. President, will the Senator yield me 2 minutes?

Mr. METZENBAUM. I yield.

Mr. KENNEDY. Mr. President, I commend the Senator from Ohio. He has targeted in on a method of payment which has been extraordinarily expensive for the health care system, without giving any additional assurance of quality of health care.

He has described it exceeding well. Even though the specialists have absolutely nothing to do with the function in terms of skill or supervision or professional training, the way the system functions now, they still would get a certain percentage of the profits of a laboratory or in a particular division of a hospital. The Senator's amendment would alter reimbursement practices and still would provide adequate professional compensation.

I think this will save, as the Senator pointed out, millions of dollars; but it is an important amendment for other reasons as well.

I commend the Senator from Ohio.

Mr. METZENBAUM. Mr. President, I thank the Senator from Massachusetts, who has given great leadership in the whole field of health care services.

Mr. TALMADGE. Mr. President, this provision was in the original bill that I offered as chairman of the Subcommittee on Health of the Finance Committee. There was some opposition among some members of our committee to that particular provision.

The members of the Finance Committee have never voted on this particular provision, and I am not prepared to make a statement endorsing it, though I personally shall vote for it.

I have sent for the distinguished Senator from Nebraska. I understand that he is on his way.

I yield all my time to the distinguished Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. DURKIN. Mr. President, will the distinguished floor manager yield me 1 minute to speak in favor of Senator METZENBAUM'S amendment?

Mr. TALMADGE. Yes, I will later, off the time on the bill.

Mr. DURKIN. I thank the Senator.

Mr. TALMADGE. But first the Senator from Nebraska.

Mr. CURTIS. Mr. President, the Talmadge bill has been worked out by the committee. There has been some give and take in writing the bill.

Sections 12 and 15 were appropriately omitted from the Talmadge bill and they should remain out of the bill.

Section 12 established a stringent redefinition of "physicians' services" which would exclude those services which the physician performs as an educator, an executive, or a researcher. In addition, patient care services would be excluded unless "personally performed by or personally directed by the physician" for the benefit of the patient, and unless the service is of such a nature that its performance by a physician is customary and appropriate.

A strict application of this language would have serious consequences for the proper recognition of, and payment for, all services of physicians under medicare.

One may easily foresee great difficulty encountered by regulation writers in attempting to reach equitable definitions of "personally performed" or "directly supervised."

More seriously, the language of section 12 would allow for an arbitrary redefinition of the practice of medicine. It ignores the fact that the physician, when acting as an educator, researcher, or administrator, continues to be a physician. Teaching and research have long been recognized as intrinsic parts of the practice of medicine. As medicine has become more organized and technologically sophisticated, the role of the physician as a physician-administrator, performing duties most effectively carried out by a physician, becomes more critical.

Section 12 also specifically redefines pathology services. This redefinition ignores the fact that there is actual medical judgment and the potential for medical judgment in every clinical pathology laboratory service.

Further, the classification of supervision and quality control as being customarily performed by others ignores the medical responsibility of the pathologist/director of the laboratory.

The language in section 12 is in direct contradiction to that already in section 1801 of the Social Security Act, which says that—

> Nothing in this (Medicare) title shall be construed to authorize any Federal officer or employee to exercise any supervision or control over the practice of medicine or the manner in which medical services are provided, or over the compensation of any officer, employee, or person providing health services.

Mr. President, in the minds of many of us the pathologist is the most important physician in the hospital. A well operated laboratory that brings in the right answers is the first requirement for enabling people to get well. It is not just handling test tubes and looking into the microscope. It is having the judgment of medical training and medical experience to evaluate everything that is done.

The pathologist did not create inflation in this country, other than their little part as citizens, perhaps.

But we are turning to them with an unusual remedy, a restriction, a definition, a treatment of their contracts in a way that we do not apply to any other physician, that we do not apply to any surgeon.

Mr. President, it is erroneous to say that certain things in a laboratory are routine and could be handled by another employee or a paramedic and, therefore, say that certain existing contracts and arrangements with pathologists must be out so far as medicaid and medicare is concerned. That is wrong.

In every act that the pathologist performs, every direction that he gives to the technicians and every return that he looks at, he is a physician, and he is applying his special knowledge and experience to things that to the outsider looks routine or could be performed merely by technicians.

If we leave this section in the bill it will be hampering the most important physician in the hospital. It will be interfering with his compensation contrary to the medicare law. It will be imposing upon his restrictions as to his type of contract that is not imposed on any other physician.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER (Mr. PAUL G. HATFIELD). The Senator from Georgia has the only time remaining. There is 1 minute remaining.

Mr. METZENBAUM. I yield back the remainder of my time.

Mr. DURKIN. I yield back the remainder of my time.

The PRESIDING OFFICER. The Senator has no time.

Mr. DURKIN. I understood the floor manager yielded 1 minute to me.

Mr. TALMADGE. Mr. President, I promised the distinguished Senator from New Hampshire that I would yield him 1 minute on this amendment.

Mr. DURKIN. I will probably do more good by passing.

I thank the Chair.

Mr. TALMADGE. Mr. President, I yield back my time and am ready to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio. (Putting the question.)

Mr. CURTIS. No.

Yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. CURTIS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order to order the yeas and nays on passage of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays on passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Iowa (Mr. CLARK), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY) and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Michigan (Mr. GRIFFIN), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan (Mr. GRIFFIN) would vote "yea."

The PRESIDING OFFICER. Is there any Senator in the Chamber who wishes to vote?

The result was announced—yeas 78, nays 10, as follows:

[Rollcall Vote No. 485 Leg.]

YEAS—78

Abourezk	Eagleton	Lugar
Anderson	Eastland	Magnuson
Bayh	Garn	Matsunaga
Bellmon	Glenn	McGovern
Bentsen	Gravel	Melcher
Biden	Hansen	Metzenbaum
Brooke	Hart	Morgan
Bumpers	Hatfield,	Moynihan
Burdick	Mark O.	Muskie
Byrd,	Hatfield,	Nelson
Harry F., Jr.	Paul G.	Nunn
Byrd, Robert C.	Hayakawa	Packwood
Cannon	Heinz	Pearson
Case	Hodges	Pell
Chafee	Hollings	Percy
Chiles	Huddleston	Proxmire
Church	Humphrey	Randolph

Curtis	Helms	
Ford	Johnston	

NOT VOTING—12

Allen	Haskell	McIntyre
Clark	Hathaway	Scott
Domenici	Mathias	Tower
Griffin	McClure	Weicker

So the amendment (No. 3684) was agreed to.

Mr. METZENBAUM. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 2068

(Purpose: To extend through October 1, 1979, the interim provisions of the Social Security Act (now in effect) with respect to payment for services of physicians rendered in a teaching hospital)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS), for himself and others, proposes an unprinted amendment numbered 2068: At the end of the bill, insert the following new section:

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill insert the following new section:

PAYMENT FOR SERVICES OF PHYSICIANS RENDERED IN A TEACHING HOSPITAL

SEC. . Section 15(d) of Public Law 93–233 (as amended by section 7(c) of Public Law 93–368, the first section of Public Law 94–368, and section 7 of Public Law 95–292) is amended by striking out "October 1, 1978" and inserting in lieu thereof "October 1, 1979."

Mr. BUMPERS. Mr. President, I offer this amendment on behalf of myself, Mr. SPARKMAN, Mr. BROOKE, Mr. BENTSEN, Mr. TOWER, Mr. MATHIAS, Mr. STONE, Mr. FORD, Mr. SARBANES, Mr. GLENN, Mr. MCINTYRE, Mr. RANDOLPH, Mr. MAGNUSON, Mr. CHILES, Mr. LUGAR, Mr. HODGES, Mrs. ALLEN, Mr. HUDDLESTON, Mr. ANDERSON, Mr. CURTIS, Mr. SCHWEIKER, Mr. HAYAKAWA, Mr. MOYNIHAN, Mr. MORGAN, Mr. SCHMITT, and Mr. KENNEDY, also, Mr. ZORINSKY.

Mr. President, this is a very simple amendment. I think the floor manager is familiar with it.

Mr. DOLE is also a cosponsor. I apologize because he has been one of the strongest proponents of this amendment. I also add Mr. JAVITS as a cosponsor.

Mr. TALMADGE. Mr. President, I am thoroughly familiar with the amendment. The Senator's amendment would postpone the regulations of HEW for 1 year, until the committee can have ample time to study the situation further. I support the Senator's amendment. I strongly urge the Senate to agree to it.

Mr. BUMPERS. I thank the floor manager very much. I would also like to say that Mr. SCHWEIKER, of Pennsylvania, should be added as a cosponsor. I ask unanimous consent that anyone who wishes to become a cosponsor be allowed to do so before the record is closed this evening.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I yield back the remainder of my time.

Mr. TALMADGE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. TALMADGE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BUMPERS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 2069

Mr. HELMS. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 2069.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

"SECTION . (a) That this section may be cited as the 'James B. Allen Taxpayer's Attorney Fee Tax Credit Act of 1978'.

"(b) In any action wherein the United States or the Internal Revenue Service, or any person acting as an agent or employee of either the United States or the Internal Revenue Service or of both, is a party and in which tax liability to the United States on the part of any person is at issue or in which a declaration, refund, payment, or any other matter pertaining to a tax of the United States is in dispute, the court may in its discretion, without regard to fiscal year, certify the amount of a reasonable attorney's fees and costs or the amount of a reasonable practitioner's fees and costs to any prevailing party other than the United States, the Internal Revenue Service, or any person acting as agent or employee of either the United States or the Internal Revenue Service or of both, and the amount so certified shall be creditable against any tax due the United States from such prevailing party in any taxable year beginning with or within any fiscal year beginning after September 30, 1980: *Provided, however,* That no portion of the amount creditable under this section may be carried forward from the first taxable year in which available and creditable to succeeding taxable years or carried forward from any taxable year succeeding the first taxable year in which available to a subsequent taxable

year, unless taxes due in the then-preceding taxable year (less all other tax credits available in that year, if any) were in an amount less than the amount creditable under this section in such preceding year.

"(c) As used in this section, the term 'prevailing party' means any person the court may in its discretion determine to have before that court prevailed substantially on the merits, notwithstanding the outcome or pendency of any appeal."

Mr. HELMS. Mr. President, there is a time limitation on this amendment is there not?

The PRESIDING OFFICER. Twenty minutes.

Mr. HELMS. Ten minutes to each side?

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. It may not be necessary to take that much time, Mr. President. I thank the Chair.

JAMES B. ALLEN TAXPAYER ATTORNEY FEES AWARD ACT

Mr. President, on September 26, 1976, in the last days of the 94th Congress, our late and very respected colleague, and one of the best friends I ever had, Senator James B. Allen, of Alabama, and I offered an amendment to the Civil Rights Attorney's Fees Awards Act of 1976.

The Allen-Helms amendment, adopted by an overwhelming vote of 72 to 0, provided for payment of attorney fees to taxpayers who prevailed in litigation with the IRS. This provision was approved in the House of Representatives and became law as part of Public Law 94-559. The provision has been codified in the United States Code at 42 U.S.C. 1988.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senate will be in order.

Mr. HELMS. I thank the Chairman.

We are all familiar with the rapacious attitude of the Internal Revenue Service in its dealings with small taxpayers, and we are all familiar with the excessive legal fees which burden taxpayers in protracted litigation with the IRS. In short, Mr. President, it is a recognized fact that the IRS uses the threat of protracted litigation to extort tax payment often in cases where the merits of the controversy are heavily against the position of the Government. Thousands of taxpayers have simply coughed up the money rather than face armies of Federal attorneys from the IRS bent on embarrassing and frustrating the taxpayer, regardless of the likely ultimate outcome of a trial on the merits.

Time and again, we have seen the spectacle of the IRS embroiled in litigation involving matters already decided contrary to the position of the IRS by a multitude of courts. Repeatedly, we see the IRS needlessly appealing trial court decisions for the sole purpose of keeping in litigation a disputed tax in the hope that the taxpayer will eventually pay up rather than face more attorney fees and more costs.

So, Mr. President, the Allen-Helms amendment adopted by the Senate and ultimately by the 94th Congress was intended to cure these problems. Regrettably, the courts have given a highly technical and almost ludicrously narrow interpretation of the language of the amendment. Thus, in spite of the clear intent of the 94th Congress, the Tax Court, on May 16, 1977, in the case of Key Buick Co. against Commissioner, rendered the Allen-Helms provision virtually meaningless by holding that the law's provision for payment of attorney fees would apply only when the taxpayer was a named party defendant in an action brought by the United States as a party plaintiff. I am advised that in roughly 99 percent of all tax cases, because of a procedural anomaly, the United States or the Internal Revenue Service is not the plaintiff but is rather the technical party defendant, this notwithstanding the fact that in actuality the Government is in the traditional plaintiff role in seeking to impose a tax liability on the taxpayer who defends by asserting that the tax is not due. Because of this procedural anomaly, the provision adopted in the last Congress has been effectively vitiated by the Tax Court, and, in my judgment, action is therefore now required by Congress to insure that the purpose of the original provision is carried into effect without further delay.

On the other hand, Mr. President, and for completeness, I must state that a few other courts have given an interpretation to the Allen provision which more closely accords with the true intent of Congress. For example, in United States against Garrison Construction Co., the District Court for the Northern District of Alabama on September 13, 1977, held that vexatious conduct by the Government in filing its action against Garrison was sufficient to support an award of attorney fees to the taxpayer, even though there was no showing that the Government had acted in bad faith.

But, Mr. President, the problem still remains. The Garrison holding is of only slight benefit because in that case the Government was in the unusual position of being the actual party plaintiff. The courts have, thus, in practical effect, made the Allen-Helms provision available only to a very few taxpayers across this land who are involved in litigation with the Government when the Government acts as the technical as well as actual plaintiff.

To sum up, the amendment I am offering today, in honor of the late Jim Allen, would correct the deficiency of the original provision, at least as that deficiency has been determined to exist by the various courts. And I might state parenthetically, Mr. President, that I do not believe the Allen-Helms amendment was, in fact, deficient but that only an unusual and strained black-letter interpretation of the provision resulted in its effective emasculation. I find some irony in our liberal courts giving this statute a strict interpretation when the same courts are always ready to stretch the law to the limits in favor of violent criminals and always ready to paint with a broad brush the novel claims of various activist groups who deluge our court system with frivolous causes. But, irony aside, the courts have virtually destroyed this amendment to which I alluded earlier.

Now, Mr. President, I believe that taxpayers are fed up with being abused by the IRS. I believe taxpayers are fed up with being taken for the goat in virtually every litigated tax dispute with the Government. And taxpayers have a right to be, Mr. President. The individual taxpayer or the small businessman is no match for the IRS or for the vast resources of the tax division of the Department of Justice.

Using taxpayer funds, the Department of Justice is willing to support IRS intransigence and stubbornness by the expenditure of vast amounts for legal costs with the sole, true purpose of forcing settlement of disputed tax claims. Against this backdrop, Mr. President, the Congress ought again to adopt a provision, drafted so there can be no doubt about its intent, designed to help taxpayers facing the vast array of resources available to the Government.

But, Mr. President, this provision should apply, and the amendment I am offering would apply, only if the taxpayer's position were proven correct. The chief object of permitting the courts to make a discretionary award of fees and costs in tax cases to prevailing taxpayers is to encourage taxpayers to seek a vindication of their position when they are certain they are right and to discourage the Government from wasting millions in needlessly litigated disputes for the sole purpose or primary purpose of forcing settlement, notwithstanding the actual merits of the controversy.

Senator Allen recognized the need to undo the damage done by the courts in their interpretation of his provision. On May 26, 1977, he joined with Senator CRANSTON in introducing S. 1610, a bill designed to broaden the scope, or rather to correct the interpretation, of the original Allen provision. This bill itself has been the subject of much study and comment. Many changes in it have been recommended to guarantee that the courts do not again weasel out of application of a statute expressing congressional will. The Department of the Treasury has proposed various "compromises" during discussion and study of S. 1610. These so-called compromises have been studied by leading tax attorneys who, in all instances, have advised that the Treasury proposals are devoid of true meaning and represent a retreat from the gains already made for taxpayers in the adoption of the original Allen provision. The amendment I am offering has been drafted in light of public comment on S. 1610, and it is broadly drawn, Mr. President, to guarantee that taxpayers get the relief intended.

I have no doubt but that the Department of the Treasury, various undersecretaries of this and undersecretaries of that, are going to be beating their breasts against this amendment, asserting dire consequences, gnashing their teeth, and generally firing the heavy artillery to work against its enactment. But the issue boils down simply to this: Is the Congress willing to give some small measure of relief to prevailing taxpayers in litigation with the Government? Or are we going to side with the bureaucrats, side with the lawyers at the tax division who fear the embarrassment of costing the

Government an attorney fee in a case they lost? Let us make the lawyers and bureaucrats at Justice and Treasury face that possible embarrassment. Let us make them consider in any dispute with a taxpayer the possibility they may be responsible for the Government paying the taxpayer's costs and attorney fees. That prospect, Mr. President, will cause a needed rebirth of sobriety at the IRS and will be guaranteed to reduce the arrogance of its agents.

I thank Senators for their attention, and I welcome any questions which may be posed regarding the amendment.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. TALMADGE. Mr. President, first, let me say this: I have read the amendment and I personally support it. It is nongermane to this bill. It has no relationship whatsoever to medicaid or medicare. I understood from the distinguished Senator from Ohio that he may be opposed to it, and also some other Senator may desire to come to the floor and make a statement. Does the Senator from Ohio desire some time?

Mr. METZENBAUM. Will the Senator yield 3 minutes?

Mr. TALMADGE. I yield 3 minutes to the Senator from Ohio.

Mr. METZENBAUM. Is this the same amendment that was up the other evening?

Mr. HELMS. Yes.

Mr. METZENBAUM. Did that amendment have a limitation of $10,000 as a maximum fee?

Mr. HELMS. No. It stipulates reasonable attorney fees.

Mr. METZENBAUM. Mr. President, it is difficult to speak against an amendment that is called the James B. Allen memorial amendment because I had tremendous respect for that Member of the Senate. I attended his funeral. Although I was not often on the same side with him, I thought he was one of the finest Members of the U.S. Senate. He battled for what he believed in.

In the same manner, I think he would feel it totally appropriate for me to rise and indicate my objection to this amendment which, as I see it, really has no logic nor reason why a party in a case before the Internal Revenue Service should be allocated fees.

We have many other instances in which we have matters with the Government. In very few of them are fees allocated. This is a special kind of a situation. I do not believe it appropriate that there be any amount allocated. In most instances, we pay our own way. We hire lawyers. I do not know why we should be going to the Government to ask them to pay for our lawyers. I know when the consumer protection legislation has come before this body there has been strong opposition from the Senator from North Carolina to that suggestion.

I believe that in this instance, it is a rather similar situation. I think that if one does not fly, the other does not make that much sense, either.

I, myself, believe that the consumer has a greater problem in finding a lawyer and being able to pay a lawyer than does a litigant in the average tax case. Therefore, I think this amendment should not be adopted and agreed to.

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Will the Senator yield 1 minute?

Mr. HELMS. I am delighted to yield to my friend from Kansas.

Mr. DOLE. Mr. President, I just take 1 minute to say that this amendment is similar to an amendment that the distinguished Senator from Arizona had in for a long time. He originally introduced this 9 or 10 years ago. I know the Senator from Kansas joined as a cosponsor in an attempt to call it to the attention of the Senate. I think it does have widespread support. I do not know if the Senator wants additional cosponsors. I should not think so in this case. I certainly support the amendment.

Mr. HELMS. Mr. President, I ask unanimous consent that the distinguished Senator from Kansas (Mr. DOLE) be added as a cosponsor.

The PRESIDING OFFICER (Mr. PELL). Without objection, it is so ordered.

Mr. BUMPERS. Will the Senator yield?

Mr. HELMS. I yield on the time of the Senator from Georgia.

Mr. BUMPERS. Is this the amendment that deals with the attorneys' fees in IRS cases? I was a cosponsor of the original legislation introduced by Senator Allen on this subject. Am I not a cosponsor of this amendment?

Mr. HELMS. Not as yet, but I shall be glad to have the Senator as a cosoponsor.

Mr. BUMPERS. I heard the Senator from Ohio refer to this as the James B. Allen memorial amendment. Is this the same amendment that the Senator had difficulty getting before the Senate a couple of evenings ago?

Mr. HELMS. That is correct.

Mr. BUMPERS. The Senator from Alabama, Mr. Allen, and I were not often on the same side. The Senator from North Carolina and I are not often on the same side, either, but I think this amendment is meritorious. I think that for a very simple reason: I think that when the Government brings an action, whether civil or criminal, against a taxpayer who honestly believes that he has a cause, the taxpayer should be awarded attorney fees.

Mr. President, how much time does the Senator from North Carolina have?

The PRESIDING OFFICER. The Senator from North Carolina has 2 minutes.

Mr. HELMS. I have 2 minutes, and I am glad to yield them to the Senator.

Mr. BUMPERS. I want to say I have been up against the U.S. Treasury and the U.S. Printing Office in a few cases. I know the ability of the U.S. Government to break somebody even when the taxpayer has the most meritorious case in the world. It is unfair. It is inequitable. It is not in keeping with what the U.S. Government normally says is fair play.

Let me give you an example. I discovered the other day that the Wages and Hours Division can come in and make an assessment on you. If you disagree with it, you can make them take you to court to collect it. No matter how honest you may be in your conviction, they not only get the assessment, they get twice the amount of assessment plus attorneys' fees. After the first of the year, I intend to do my best to do something about that.

Mr. DURKIN. Will the Senator yield 30 seconds?

Mr. HELMS. If I have the time, I will. How much time do I have?

The PRESIDING OFFICER. One minute.

Mr. HELMS. I yield it to the Senator from New Hampshire.

Mr. DURKIN. I thank my friend from North Carolina.

Mr. President, he raised this the other night and I was blind to the parliamentary situation. I should like to cosponsor the Senator's amendment. I think it is long overdue. I still think we have to go one step further next year and, when a citizen gets advice from the IRS, the next level is to stop them from challenging the person's return who received the advice from the IRS. I shall tackle that problem next year.

I agree with the Senator from Arkansas. We have had a similar problem with the Wages and Hours Division at home. We are going to straighten that out next year, too.

Mr. TALMADGE. Does any Senator desire to speak on this amendment? If not I suggest we vote on it.

Mr. KENNEDY. Mr. President, will the Senator yield to me 3 minutes?

Mr. TALMADGE. I yield 3 minutes to the distinguished Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I rise to oppose this amendment at this time. I read the RECORD the other day of the exchange between the Senator from Ohio and the Senator from North Carolina. We have been trying in the Judiciary Committee to work out a combination of different rights—those that the Senator from North Carolina is concerned about, and also the opportunity, under rather strict requirements, for those who appear before regulatory agencies to be able to intervene if they meet certain requirements.

These has also been a concern about small business protection before various agencies. There is a series of this type of legislation which is before the Committee on the Judiciary. It seems to me that, whether it is a small business bill of rights for protection in a similar area, whether we are concerned about the taxpayer or about the public intervening, we ought to consider these issues together, rather than just taking them one at a time.

Beyond that, Mr. President, my own fundamental concern with this process is if we have people whether it is in the Justice Department or any other agency, who are going to abuse their power, I think that they ought to be fired. I think we ought to have notification and they ought to be fired. We ought to hold those with administrative responsibility responsible for various actions, rather than creating a situation which might make agencies hesitant about moving forward in meritorious cases.

If we have bureaucrats who harass the

public, we ought to get rid of them. But we run the risk of tampering with basic presumptions in a complicated area of law in adopting this amendment without more careful consideration.

I do think we ought to consider the range of different issues that could come up before us that the Senator from Ohio has mentioned. I hope that the Senate will vote no on this amendment.

The PRESIDING OFFICER. Has the Senator from Georgia yielded back his time?

Mr. TALMADGE. I am glad to yield back my time.

Mr. BUMPERS. Will the Senator from Georgia yield me 2 minutes? I hate to ask him.

Mr. TALMADGE. I yield the Senator 2 minutes.

Mr. BUMPERS. The Senator from Massachusetts makes a good point. It just overlooks one thing—the human personality. There are good Congressmen, there are good Senators; there are bad Congressmen, there are bad Senators. There are good prosecutors, there are bad prosecutors. There are a lot of prosecutors who run for election and they announce how many scalps they are able to hang up on the pole. That is the way they run for reelection. That is the way a lot of agencies operate, too. That is the reason your mail is so heavy on OSHA, Wages and Hours, and every other Government agency. They have the power to break people and they do break them. If you have never been on the receiving end of that, I promise you, you have missed a treat.

This is a very simple amendment.

During the next session of Congress, I am going to try to put a similar amendment on every one of them. The President has said he wants regulation writers to sign their names to the regulations they write. When you sign your name to something, that is when the accountability period starts. That is what is wrong with the bureaucracy. They hide in the labyrinth of HEW and every other agency around here and nobody knows who is accountable, because they cannot find them.

I tell you something else: Government agencies will think twice before bringing a case against a taxpayer. If they have a good case, they do not have to worry. If they have a criminal on the other end of the line, they can prosecute him and no danger is done. But when they have an innocent citizen who they are trying to break mentally, physically, and financially, as has happened to many people in this country, they are going to think twice if they have this thing hanging over their heads. I think it is the simplest form of justice we can offer to the American taxpayer, and I intend to do it a lot more next year.

Mr. HELMS. I ask unanimous consent that Senators RANDOLPH, THURMOND, DURKIN, BUMPERS, and BAYH be added as cosponsors to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I yield myself 3 minutes.

Did the Senator make this mandatory or just leave it up to the court?

Mr. HELMS. As the Senator knows, it will be determined——

Mr. KENNEDY. I did not know. I regret that I did not know. This has been proposed in different forms.

Does the Senator have any reason to object to amending this to also permit, under the same type of criteria, the awards of intervenor funds giving the same kind of discretion that raise public interest issues which would not otherwise have been raised in the course of a regulatory decision or consideration, and the same kind of criteria that has been spelled out by the Federal Trade Commission and which works extremely well?

Mr. HELMS. The Senator would not agree to this because we have thousands of lawyers being paid by the Federal Government—by the taxpaers—to represent precisely what the Senator is talking about.

Mr. KENNEDY. Well, the point about that is that I expected that answer, Mr. President.

We will find that this year there are about $250 million that will be paid to corporate interests that will appear before regulatory agencies and that will appear in the courts representing those interests, and there will probably be about $4 million to $5 million that will be paid from various public interest groups to intervene in those regulatory agencies.

I guess, either fortunately or unfortunately, we will have an opportunity to debate that at another time.

I am prepared to vote, Mr. President.

The PRESIDING OFFICER. Is all time yielded back?

Mr. TALMADGE. I yield back the time.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from North Carolina.

The amendment (UP No. 2069) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS. I thank the Chair.

The PRESIDING OFFICER. The bill is open to further amendment.

UP AMENDMENT NO. 2070

(Purpose: Modify section 19 pertaining to the waiver of human experimentation provision for Medicare and Medicaid)

Mr. KENNEDY. Mr. President, I have an amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 2070.

The amendment is as follows:

At the end of Section 19 insert the following:

"Notwithstanding the first sentence hereof, the Secretary in reviewing any application for any experimental, pilot or demonstration project pursuant to the Social Security Act shall apply any appropriate requirements of title II of Public Law 93-348 and any regulations promulgated thereunder in making his decision on whether to approve such application."

Mr. KENNEDY. Mr. President, I have talked with the chairman. All this does is provide, when the Secretary approves an experiment under the Social Security Act, that is, a human experiment, he must take into consideration whether the human subjects are adequately protected.

I believe it is acceptable.

Mr. TALMADGE. Mr. President, I have discussed the amendment. I have no objection to it. I hope we can agree to it.

Mr. DOLE. Has that amendment been cleared with Senator CURTIS?

Mr. TALMADGE. Yes.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment (UP No. 2070) was agreed to.

UP AMENDMENT NO. 2071

(Purpose: To provide that failure to comply with a court order for child support shall be grounds for discharge from Federal employment)

Mr. HATCH. Mr. President, I call up my amendment No. 3630 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 2071.

Mr. HATCH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

FAILURE OF FEDERAL EMPLOYEE TO PROVIDE COURT ORDERED CHILD SUPPORT

SEC. 47. (a) Part D of title IV of the Social Security Act is amended by adding at the end thereof the following new section:

Mr. KENNEDY. Mr. President, could we have a copy of those amendments?

Mr. TALMADGE. This is a printed amendment, No. 3630. It adds a provision that requires that failure to comply with a court order for child support shall be grounds for reprimand or discharge from Federal employment.

I certainly have no objection to it. I would urge the Senate to agree to it.

Mr. HATCH. That is basically what it stands for.

I have this and one other technical amendment which corrects the bill on that basis.

Mr. KENNEDY. I have no objection.

Mr. HATCH. I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah.

The amendment (UP No. 2071) was agreed to.

Mr. HATCH. I move to reconsider the vote by which the amendment was agreed to.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 2072

(Purpose: To clarify the effective date of the reimbursement reform provisions)

Mr. HATCH. Mr. President, I call up my amendment No. 3632 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an unprinted amendment numbered 2072.

The amendment is as follows:

On page 8, line 14, after "payment" insert ", for any accounting year beginning on or after July, 1979,".

Mr. HATCH. Mr. President, this amendment provides technical correction for effective date of the committee-approved bill. It is a corrected date. I think the committee is willing to accept it and it is purely technical.

Mr. TALMADGE. If the Senator will yield, as I understood the Senator to explain this to me, it merely authorizes the clerk or Secretary of the Senate to make technical corrections in the bill.

Now, he does not change any of the dates in the bill, does he?

Mr. HATCH. I do not believe so.

Mr. TALMADGE. I do not want any dates changed.

If the Senator will yield, it does change one date. It is a technical amendment, relating to a July 1 date, is that correct?

Mr. HATCH. That is correct.

Mr. TALMADGE. What is the other date change?

Mr. DOLE. That is all.

Mr. TALMADGE. I am perfectly agreeable.

Mr. METZENBAUM. Will the Senator yield for a question?

Mr. HATCH. Yes.

Mr. METZENBAUM. When would this administrative order otherwise be effective, and how much is involved dollarwise?

Mr. HATCH. Just putting in the June, 1979 date, that is all it does.

Mr. METZENBAUM. Instead of what? Is it making it retroactive?

Mr. HATCH. As I understand it, there is a date currently lacking in the bill. This corrects what is a technical error and does not really change the bill.

Mr. METZENBAUM. What is in the bill now?

Mr. HATCH. Nothing. It just puts the date in that should have been in at the beginning, as I understand it.

I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah.

The amendment (UP No. 2072) was agreed to.

Mr. HATCH. I move to reconsider the vote by which the amendment was agreed to.

Mr. TALMADGE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. TALMADGE. Mr. President, if there are no further amendments to be offered, I suggest we proceed to third reading.

Mr. President, I have been informed that the Senator from California is on his way to offer an amendment, so I will ask the Chair not to press for third reading at this point.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CANNON. Mr. President, will the Senator yield me 2 minutes for the purpose of presenting an uncontested bill?

Mr. TALMADGE. I yield 2 minutes to the distinguished Senator from Nevada.

AMENDMENT OF MAGNUSON-MOSS WARRANTY—FEDERAL TRADE COMMISSION IMPROVEMENT ACT

Mr. CANNON. Mr. President, I send to the desk a bill and ask unanimous consent that it be considered as having been read the first and second times, and that the Senate proceed to its immediate consideration.

Mr. METZENBAUM. Mr. President, reserving the right to object, will the Senator from Nevada be good enough to tell us what this bill is?

Mr. CANNON. Mr. President, the measure I have introduced would extend the period of time from July 5, 1978, to June 30, 1979, for the filing date for a report on the Federal Trade Commission's rulemaking procedures as established in the Magnuson-Moss warranty—Federal Trade Commission Improvement Act. When Congress passed this act it was hoped that by now a sufficient number of rules would have been promulgated by the Federal Trade Commission under this act that a meaningful report could be completed. Unfortunately, only one rule so far has been promulgated and therefore I am requesting that the Senate pass this legislation in order to provide more time for a meaningful report to be completed.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 3595) to amend section 202(d) of the Magnuson-Moss warranty—Federal Trade Commission Improvement Act to extend the deadline for filing a report of rulemaking procedures.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada? The Chair hears none, and it is so ordered.

The bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 3595

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 202(d) of the Magnuson-Moss Warranty—Federal Trade Commission Improvement Act is amended by striking out "July 5, 1978", and inserting in lieu thereof "June 30, 1979".

Mr. CANNON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MEDICARE-MEDICAID ADMINISTRATIVE AND REIMBURSEMENT REFORM ACT

The Senate continued with the consideration of the bill.

UP AMENDMENT NO. 2073

(Purpose: To delete the provision prohibiting the disclosure of aggregate payments to physicians)

Mr. KENNEDY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposes an unprinted amendment numbered 2073.

Mr. KENNEDY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike page 62, lines 10–22.

Mr. KENNEDY. Mr. President, this amendment just provides adequate protection for procedures with respect to the release of information dealing with fees. It sets out protection for the physician and provides protection for the public. I think it is acceptable to the committee.

Mr. DOLE. Is this the amendment that authorizes the release of figures——

Mr. KENNEDY. It deletes the provision in the bill which virtually prohibits information about doctors receiving Federal funds.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. TALMADGE. Mr. President, the problem in this area arose when HEW started releasing eroneous and inaccurate statistics about payments to physicians under medicare or medicaid. In many instances, it was discovered that the released figures showed sums that were paid to dead doctors. It was erroneous in many particulars.

So we put a provision in the bill that would prohibit HEW from releasing this information. We might have gone too far, because it is public money.

However, what we were trying to do was to avoid the embarrassment of doctors when HEW was releasing false information. We had Secretary Califano before our committee, and he assured our committee that never in the future would those errors be made again.

If the Senator will assure me that he will be happy to join me in helping to see

that HEW does release accurate and only accurate information, I am prepared to accept the amendment.

Mr. KENNEDY. I welcome the opportunity to work with the chairman of the committee, and I understand that the Secretary would welcome that opportunity. I think that is the best way to proceed.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield.

Mr. DOLE. Has the amendment been accepted? I do not think it has. I have not seen the amendment.

I am not here to plead for the physicians in America, but there was a lot of false information put out about doctors' fees under medicare. Ten or fifteen physicians in my State of Kansas had all sorts of headlines spread across the newspapers, and they are still trying to prove that they did not receive $99,000 from HEW, or $19,000, or $200,000.

It seems to me that it is a disservice to those we ask to participate in the program, the way the information is distributed. It costs HEW about $100,000, I understand, to make the distribution.

I would like to have a chance to look at the amendment.

Mr. KENNEDY. All it does is to eliminate section 20. It returns it to current law, with the assurance that we will work closely with the chairman of the Finance Committee's Health Committee and the Secretary of HEW to develop procedures to insure that those kinds of mistakes do not happen but, that knowledge about those public expendtiures is going to be known.

I think we can work it out. I am glad to work closely with the chairman of the Finance Committee's Health Subcommittee and Secretary of HEW and with the Senator from Kansas.

Mr. DOLE. Why not, in some way, modify section 20, rather than strike section 20? Now we are back to the same situation which allowed the release of information that caused embarrassment to many good physicians in this country.

It seems to me that we tried to address that problem objectively in the committee. There were a lot of disclosures about physicians receiving large payments under medicare, and it turned out that they did not receive the payments, as the distinguished chairman has pointed out.

I recall cases in the State of Kansas in which money never was received by the physician. All she had was the headline and some mild retraction by somebody at HEW.

It is the same old story. We turn it over to the bureaucracy, and it is all run by computers, and nobody cares about the person, whether it is a patient or a physician.

It is always good to stand up and say somebody is going to get money from the Government. I suppose it is always all right to expose some physician who got a lot of money from medicare and medicaid which she should not have received from medicare or medicaid; but if she gets that money, she is entitled to have the facts and not have some mistaken figure printed in the paper in Salina, Kans., or Boston, Mass., or anywhere else.

It seems to me that there might be some way to accommodate the distinguished Senator's objective, as well as to protect some of the physicians. I am not prepared to accept striking section 20 from the bill. Maybe we should vote on it. I believe every Senator in this body has had at least one physician contact him in the past year, suggesting that he should do something about HEW's disclosure when they give false information.

It seems to me that we put the physician in a position of having to prove she is not guilty of something, when the figures never should have been released in the first place, if they are erroneous. There are no safeguards. All the Senator does is strike out section 20. I do not see any safeguards.

Mr. KENNEDY. On the other side, we are talking about public funds, public money, and the public's right to know where the taxpayers' money is going. That is all we are talking about. Under the Finance Committee proposal, there is a virtual prohibition of the public questioning that kind of information.

The Senator from Kansas and I are concerned about the publication of bad information or misinformation. What we want to do is to develop a procedure for the protection of the public's interest and their right to know, and to protect the physicians. But the way the proposed legislation is drafted, it says that in this area of expenditure, the public has no right to know how the public's money is being expended. I do not think that is the right position.

If the Senator has a suggestion to deal with it, I would be glad to consider it. I think that what the chairman said about trying to work out a procedure is entirely satisfactory.

Perhaps we could set it aside, Mr. President, while we consider the amendment of the Senator from California. I ask unanimous consent to set the amendment aside.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from California.

UP AMENDMENT NO. 2074

(Purpose: To extend medicaid eligibility to certain low-income women)

Mr. CRANSTON. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from California (Mr. CRANSTON), for himself and Mr. MOYNIHAN, Mr. BAYH, Mr. CHURCH, Mr. HELMS, Mr. JAVITS, Mr. RIEGLE, Mr. STAFFORD, Mr. WILLIAMS, Mr. CLARK, and Mr. BROOKE proposes unprinted amendment numbered 2074.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

MEDICAID ELIGIBILITY OF PREGNANT WOMEN

SEC. . (a)(1) Section 1902(a)(10) is amended—

(A) by inserting "(i)" after "(A)" in subparagraph (A);

(B) by striking out "clause (A)" and inserting in lieu thereof "subparagraph (A)" each place it appears;

(C) by inserting after subparagraph (A) the following new clause:

"(ii) for making medical assistance available to any woman for a period of her pregnancy and for 60 days following the date of termination of her pregnancy—

"(I) who, on the basis of resources, either is eligible for aid under the State plan approved under part A of title IV or would be eligible for aid under such State plan if she had a dependent child (as defined in part A of title IV) living with her, and

"(II) whose income (including the income of the family of which she is a member) does not exceed the income standard for such a woman to be eligible for any medical assistance under the State plan;".

(2) Section 1902(f) is amended (A) by striking out "clause (10)(C)" and inserting in lieu thereof "paragraph (10)(C)" each place it appears, and (B) by striking out "clause (10)(A)" and inserting in lieu thereof "paragraph (10)(A)(i)" each place it appears.

(3) Sections 1903(a)(1), 1903(f)(4)(C), and 1905(a) are amended by striking out "section 1902(a)(10)(A)" and inserting in lieu thereof "section 1902(a)(10)(A)(i)" each place it appears.

(b)(1) Section 1905(a) is amended—

(A) by striking out "or" at the end of clause (vi);

(B) by inserting "or" at the end of clause (vii);

(C) by inserting below clause (vii) the following new clause:

"(viii) women during pregnancy and during the 60 days following the date of termination of pregnancy,".

(C) This section shall be effective July 1, 1979, except that no State shall be found to have failed to comply with the requirements added by this section for any period prior to the first calendar quarter which commences 30 days or more after the end of the next regular session of the State legislature which commences after the date of enactment of this Act.

Mr. CRANSTON. Mr. President, this amendment, supported by the administration, deals with medicaid coverage of low-income women who are pregnant for the first time.

I am gratified to be joined in cosponsoring this amendment by the following distinguished Senators: from New York (Mr. MOYNIHAN), from Indiana, (Mr. BAYH), from Idaho (Mr. CHURCH), from North Carolina (Mr. HELMS), from New York (Mr. JAVITS), from Michigan (Mr. RIEGLE), from Vermont (Mr. STAFFORD), from New Jersey (Mr. WILLIAMS), from Iowa (Mr. CLARK), and from Massachusetts (Mr. BROOKE).

Experience has shown that without assurance of third-party reimbursement, many low-income women will not seek prenatal care but rather will arrive at the hospital emergency room when the birth of the child is imminent. This practice, obviously, creates a greater risk for the mother as well as the child.

Under the proposed amendment, the expectant mother can seek early prenatal care, secure in the knowledge that the physician fees will be covered. The result will be a greater chance for a

healthy delivery and a greater chance for a healthy child.

I would like to point out, Mr. President, the specific benefits this proposal has in relation to the increased numbers of teenage pregnancies. These young women are particularly susceptible to bearing low-birth-weight infants. The report entitled "11 Million Teenagers" pointed out that low birth weight is not only a major cause of infant mortality, but also can lead to other childhood illnesses and neurological defects which may involve lifelong mental retardation—and quite possibly lifelong dependency on governmental support. That report went on to say that the death rate from complications of pregnancy is significantly higher for adolescents than it is for mothers in their twenties. Good prenatal care can help prevent these tragedies.

Our amendment will insure that these young women will get the all-important health care they need during their pregnancies.

As the chairman of the Subcommittee on Child and Human Development of the Human Resources Committee, these issues are of major concern to me.

Mr. President, last year, as chairman of the Subcommittee on Child and Human Development of the Senate Human Resources Committee, I chaired hearings on the issue of adoption reform. Several witnesses testified that the provision of birth-related costs to women with problem pregnancies would help stem the tide of black market adoptions, since women who have no other way of having their medical costs covered often resort to black marketeers. Babysellers, these women have found, are all too ready to provide prenatal, natal, and post partum medical coverage in exchange for the child. This situation is more tragic when viewed in the context of the teenage pregnancy epidemic. More than three-quarters of mothers who give birth at age 17 or younger have no health insurance at all. Only one-sixth are covered for prenatal care; fewer than one-fifth for payment of their hospital or doctor bill. These youngsters are ripe targets for black market exploitation.

The amendment we are proposing to the medicaid program is one I had suggested last year to the Secretary of Health, Education, and Welfare. That suggestion was to broaden medicaid coverage to low-income women pregnant for the first time whose income level would make them eligible for medicaid coverage if they had a dependent child. It seemed to me inconsistent to provide medicaid coverage to these women after their child was born but to refuse medicaid coverage to these women in the critical prenatal period when, to a major extent, the future health of the infant is determined.

Mr. President, this amendment would not be effective until the last quarter of fiscal year 1979 and in addition allows time for the State legislatures to take the necessary legislative action to comply with its provisions. Thus its fiscal impact will not be great in the current fiscal year—at the maximum a cost of about $17 million.

Mr. President, the following groups have indicated their support for this amendment:

The National Conference of Catholic Charities;

American Parents Committee of the Child Welfare League;

National Alliance Concerned with School Age Parents;

American Citizens Concerned for Life;

American Academy of Pediatrics;

Americal College of Obstetrics and Gynecology; and

Family Service Association of America.

I ask unanimous consent, Mr. President, that letters I have received from the National Conference of Catholic Charities and the American Academy of Pediatrics, as well as the exchange of letters between HEW Secretary Califano and me, be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

COMMITTEE ON HUMAN RESOURCES,
Washington, D.C., July 27, 1977.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare, Washington, D.C.

DEAR JOE: I am delighted that the Administration has moved forward so dramatically in developing its position on adoption and foster care reform, and have greatly enjoyed the opportunity to work with you and your staff to develop these initiatives. I was privileged to introduce as S. 1928 the legislation you transmitted to the Congress yesterday.

There is, however, one specific section of S. 961 as reported which is a matter of great concern to me and, I know, to you and which is not a part of the new S. 1928 or S. 961 as we propose to amend it (Amendment No. 579).

Section 103(a) of S. 961, as reported, provided that States could utilize funds allocated to them under the Act for the provision of pre-natal, natal, and post-partum services to women who are voluntarily planning to place their children for adoption and who are unable to assume such costs, but only to the extent that assistance under other Federal or State programs in the community is not readily available to provide adequately for such services.

The text of the S. 961 provision (clause (2)) is:

The provision of pre-natal, natal, and post-partum services to women who are voluntarily planning to place their children for adoption (after having been informed in writing that the acceptance of such services does not in any way constitute an obligation to proceed with adoption) and who are unable to assume such costs, in order to protect the health and welfare of both the woman and child; but only to the extent that assistance under other Federal or State programs in the community in question is not readily available to provide adequately for such services.

I strongly believe that the provision of such assistance to pregnant women is vitally important. Testimony before Senate committese over the past several years has indicated that a serious problem exists in this area. Young women who are pregnant and are unable to bear the cost of carrying their pregnancies to term are frequently forced either to deal with black market baby-sellers or to resort to abortion because of financial considerations.

Although S. 961 dealt only with those women who were voluntarily planning to place their children for adoption, I am convinced, as I know you are, that all pregnant women should be assured of financial assistance, where necessary, in order to complete their pregnancies. Hence, I joined with Senators Javits and Brooke in introducing (first in 1976 as S. 3593 and in 1977 as S. 370) the "National Health Insurance for Mothers and Children Act", under which all appropriate pre-natal and post-partum (up to 12 weeks after child birth) health care would be provided women.

While I continue to favor strongly this type of comprehensive maternal and child health approach, I would hope that the Administration would be willing to support, as a good beginning in the immediate future, an amendment to title XIX of the Social Security Act to establish a uniform federal standard under which these costs would be covered under Medicaid for any needy woman. This change could be accomplished as an FY 1979 initiative.

In view of your deep commitment to deal with this subject, I am very hopeful that you will be able to develop Administration support for legislation which would provide Medicaid coverage for every needy pregnant woman and newborn infant so that such women will be free to carry their pregnancies to term free of economic or any other forms of direct or indirect pressure or coercion.

I look forward to hearing your views on this matter.

Sincerely,

ALAN CRANSTON,
Chairman, Subcommittee on Child and Human Development.

THE SECRETARY OF HEALTH,
EDUCATION, AND WELFARE,
Washington, D.C., August 18, 1977.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, D.C.

DEAR ALAN: Thank you for your recent letter and for your support in developing our foster care and adoption reform proposal. I was especially pleased to note your introductory statement in the Congressional Record which highlighted the need for these reforms.

I share your concerns that all pregnant women have access to prenatal health care services.

We believe that the needs of pregnant adolescents and low-income women deserve particular attention. I have appointed a task force to examine problems faced by the teenage expectant mother and her child, and to recommend an action agenda which would serve the health, educational, and social support needs of both. I anticipate announcing a major legislative initiative in this area in the very near future.

In this connection, I share your deep concern that Medicaid and Aid to Families with Dependent Children in many States do not uniformly cover costs of prenatal and postpartum care for women otherwise eligible to participate in these programs. It is troubling that some pregnant women forego prenatal and postpartum health care as a result of benefit limitations in these programs.

I am actively considering legislative revisions that would remedy this problem and others facing the pregnant mother and her child.

Sincerely,

JOSEPH A. CALIFANO, JR.

COMMITTEE ON HUMAN RESOURCES,
Washington, D.C., November 1, 1977.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare, Washington, D.C.

DEAR JOE: Many thanks for your prompt response to my letter urging the development of a Federal response to the needs of expectant mothers wishing to carry their pregnancies to term. I'm delighted by your willingness and your own personal desire to move on this issue.

I was greatly pleased to learn about your

plans for a task force to deal with this problem. I'd be interested in knowing who is directing this effort, and about the make up of the task force.

I recently received a copy of the new report published by the Guttmacher Institute—"11 Million Teenagers"—which sets forth the findings of the Institute's study of the problems with which your task force will be dealing. I hope you will be referring to this study in your work.

I'm also pleased to know that you will be developing a major legislative initiative in this area. I had directed my staff to explore legislative remedies, including the possibility of mandating AFDC eligibility for lower income women bearing their first child—which of course would make them eligible for Medicaid as well—and Medicaid eligibility for those women needing assistance whose income levels might nevertheless be above the AFDC eligibility cutoff. I would like to suggest that our staffs work with each other on this, and ask that you share with us an outline of the kinds of approaches you have under review at this time, as well as an indication of your time-table and plans for making such an announcement.

I look forward to working with you on this, Joe, and again want to thank you for your efforts.

Cordially,

ALAN CRANSTON,
Chairman, Subcommittee on Child and Human Development.

NATIONAL CONFERENCE OF CATHOLIC CHARITIES,
Washington, D.C., October 4, 1978.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CRANSTON: We were sorry to learn that the Senate Finance Committee amendments to the Child Health Assessment Program did not include the administration's proposal to extend medicaid coverage to income eligible women who were pregnant for the first time. We were further sorry that your proposed amendment to H.R. 9434 which would have accomplished this was not adopted by the Finance Committee yesterday. We urge you to offer this amendment on the Floor of the Senate when H.R. 9434 is before the body.

As you know we have worked with you for five years in an effort both to encourage the adoptive placement of children with special needs and to provide encouragement for women, pregnant for the first time, to avoid the black market adoption mess and carry their children to term. We are encouraged that good parts of your adoption legislation have been passed. But this additional provision, which has the support of the administration, is an important part of the whole package.

The need has been demonstrated in hearing before your Subcommittee, and in testimony given to the full Human Resources Committee this year on the Administration's proposals to help meet the problems of teen-age pregnancy. The provision of such medicaid coverage would be an important step to provide an alternative to abortion for a woman who wished to carry her child to term, and also would enable her to avoid black market adoptions if she wished to relinquish her baby for adoption. It is well known that at present the inability of some women to pay for birth related costs turns them to black market agents willing to pay those costs. In addition it has also been well demonstrated that the provision of adequate prenatal care is essential to reduce problem pregnancies and to insure, as far as possible, a well-born infant.

For these reasons we urge you to raise the amendment on the Floor of the Senate and we support you in this effort. Once again it is a pleasure to have your leadership on so important a matter.

Sincerely,

REV. MSGR. LAWRENCE J. CORCORAN,
Executive Director.

AMERICAN ACADEMY OF PEDIATRICS,
Arlington, Va., October 5, 1978.

Hon. ALAN CRANSTON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CRANSTON: In view of the recent amendments in the Senate Finance Committee to S. 9434 regarding the Child Health Assessment Act, the American Academy of Pediatrics strongly recommends and urges that the following groups receive purposeful attention under the CHAP program: women who are pregnant for the first time and children ages 7–21 years.

Attention must be focused on pregnant women who become eligible for Medicaid and the CHAP program only at the birth of their children. Exclusion of the "pre-eligible" pregnant women may be a cost-containment measure, but is untenable in light of the increased risk particularly to young mothers and the fetus-newborn. The infant's need for health care begins before birth; preventive care cannot begin with extra-uterine life. Currently, twenty-two states do not consider low-income women eligible for public assistance until after the birth of the child. This has acted as a deterrent to the receipt of adequate prenatal care and cash benefits necessary to obtain nutritional supplementation for many poor women, particularly adolescents not living in AFDC households. Young teenagers experience higher rates of obstetric complications during pregnancy and delivery, higher rates of premature delivery and are at greater risk of giving birth to low birth-weight infants than are women in any other age group. They require closer medical attention, yet 70% of girls under 15 get no prenatal care at all or delay care until the end of pregnancy. Low birth-weight infants are at high risk of sensory, neurological, developmental and physical disorders and the association between receipt of prenatal care and positive health outcomes for both mother and infant have been well documented.

The Academy would urge your support in mandating Medicaid coverage for women who are pregnant for the first time.

As proposed, children ages 7–21 years who are living in families financially eligible but excluded from Medicaid by reason of not meeting other welfare program criteria are to be included in CHAP at the option of individual states. Their exclusion from mandated services appears to be based on economic reasons, and cannot be defended on either a biological or social basis.

The fact that the recommended periodicity of examinations may be less frequent for children ages 7–21 by no means lessens the likelihood of their need for health care or their essential need for the continuty of care. The program's proposed exclusive focus on children 6 years and younger may in fact serve to fragment the provision of health care to young families. Inclusion of 7–21 year olds would increase the ease of program implementation, as record keeping and tracking are frequently done on a family basis, including all children in a family rather than attempting to reach individual children. The focus on children under 6 years would impose upon families the difficult task of maneuvering multiple separate health systems for their children, depending upon the age of each child.

The Academy would urge your support for an amendment to mandate Medicaid coverage to children to 21 years of age.

Finally, we would like to point out that the changes proposed in the Medicaid (EPSDT) program by the Administration and the House and Senate Committees do address useful improvements in such issues as eligibility and financing. However, it is our judgment that unless very definitive changes are made in the administration of the EPSDT component, the legislative improvements alone are insufficient. You and your colleagues rightfully and persistently ask why there is so much difficulty having private medical practitioners participate in Medicaid, including EPSDT. The Academy expresses its firm belief that without a significant voice in the formulation of policy, regulations, guidelines and ongoing advice to the respective state offices from those knowledgeable about child health and the delivery of ambulatory child health care, the Administration of EPSDT and the whole of Medicaid itself has a strictly financial orientation. As important as financial fraud and abuse issues are, they have never been issues in preventive care for children in this country. Our task is rather to seek poor children and have them become part of a sensible, high-quality, ongoing health care program.

We respectfully suggest you examine the number and roles of physicians, nurses and allied health personnel employed in the central and regional offices of the EPSDT and whole Medicaid programs. Without such talent in significant numbers and appropriate positions to direct the program, it is impossible to expect that the program offers to the states the direction and advice intended by Congress.

In closing, we would add that the Academy continues to consult and cooperate with the Administration in the general area of provider participation in Medicaid programs. We are interested in seeing practical, working relationships developed at all levels and in all aspects of that program. Nevertheless, the shortcomings in EPSDT and the effect of those shortcomings on our nation's children force us to speak out in favor of reform.

Sincerely yours,

ELIZABETH J. NOYES,
Chief, Department of Government Liaison.

Mr. CRANSTON. Mr. President, I urge adoption of the amendment.

Mr. MOYNIHAN. Mr. President, will the Senator from California yield?

Mr. CRANSTON. I yield.

Mr. MOYNIHAN. Mr. President, I thank and express my appreciation to the senior Senator from California for his initiative and enterprise in this matter over the last year. What is noteworthy by this amendment, principally in my mind, is that we have not already adopted it. It is eminently sensible, sane, and it is legislation we should be proud of and it is overdue.

I urge the adoption of this amendment.

Mr. TALMADGE. Mr. President, the committee is opposed to this amendment.

As a Senator, I realize the sensitivity of politicians to mothers and babies, but this is one motherhood bill the Senate should not vote for now.

It is an amendment which compounds costs and confusion.

For example, just 2 weeks ago the Senate approved a major new program as part of the "Adolescent Health Services and Pregnancy Prevention and Care Act of 1978," to provide care pirmarily to low-income pregnant teenagers.

We have the $400 million maternal and child health programs under title V of the Social Security Act.

We also have a series of other programs designed to provide assistance to low-income pregnant women.

No one—and I mean no one—has indicated to this Senator or to the Committee on Finance exactly how all of these overlapping and duplicative programs would be coordinated.

As an example of the overlapping, I ask unanimous consent that a short table comparing the major approaches to coverage of pregnant low-income women, prepared by the Congressional Research Service, be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. TALMADGE. Mr. President, estimates of the first full year costs of the proposed amendment range from $100 to $150 million.

A specific concern of the Finance Committee in its work on H.R. 9434 was the proposed cost.

During our markup, we were able to bring that cost down from an estimated $600 million to about $375 million in the first full year.

Those estimates come from HEW and are net of what they believe would be some $40 to $50 million of savings due to "improvements in program efficiency and services."

Mr. President, I think we would have to be very naive to accept a cost estimate which has been specifically reduced to reflect projected efficiency.

Commonsense would seem to dictate to us to take those efficiencies into account when and if they actually materialize—and not before.

I have my own reservations about the feasibility of the CHAP program without piling on more people and more cost and more programs to do the identical same thing.

It seems to me that the first order of business for the President, having passed his Reorganization Act, would be to collapse all of these programs, multiplicity of them, program based on program based on program to do the same thing, collapse them into one agency to make them effective, efficient, and less expensive.

I hope the amendment will be rejected.

EXHIBIT 1

SUGGESTED AMENDMENT TO THE CHAP BILL	MATERNAL AND CHILD HEALTH AND CRIPPLED CHILDREN'S SERVICES—TITLE V OF THE SOCIAL SECURITY ACT	ADOLESCENT HEALTH SERVICES AND PREGNANCY PREVENTION AND CARE ACT OF 1978, PASSED AS AN AMENDMENT TO S. 2474
Would amend title XIX to provide Medicaid coverage to a low income pregnant woman who meets the income and resources requirements of her State for aid to families with dependent children (regardless of the marital and employment status of the woman or her spouse) and would also require States with medically needy programs to cover pregnant women who meet the State's medically needy standard. Would also provide for a two month period of Medicaid coverage following the termination of the pregnancy, and for one additional pregnancy-related check-up beyond the two month period if the fee for the check-up has been included in a single overall charge for all pregnancy care and services.	Authorizes formula grants to the States to enable each State to extend and improve (especially in rural areas and in areas suffering from severe economic distress)—(1) services for reducing infant mortality and otherwise promoting the health of mothers and children; and (2) services for locating children who are crippled or suffering from crippling conditions and providing for them medical, surgical, corrective, and other services and care, and facilities for diagnosis, hospitalization, and after care. Also authorizes supplemental allotments to States to provide for the continuation of services to groups that had previously received services through special grants funded through fiscal year 1974. Among these were Special Projects Grants for Maternity and Infant Care, which pay up to 75 percent of the cost of providing (1) necessary health care to prospective mothers (including, after childbirth, health care to mothers and infants) who have or are likely to have conditions associated with childbearing or are in circumstances which increase the hazards to the health of the mothers or infants (including those which may cause physical or mental defects in the infants), or (2) necessary health care to infants during their first year of life who have any conditions or are in circumstances which increase the hazards to their health, or (3) family planning services.	Authorizes grants to assist in the establishment of networks of community-based services to pregnant adolescents and adolescent parents, particularly those 17 years of age or under. Grantees will be agencies or organizations which will provide care services and other supplemental services. Care services will include pregnancy testing, maternity counseling and referral, family planning services, primary and preventive health services, nutrition information and counseling, referral for screening and treatment of venereal disease, educational and vocational services, and health services. Among applicants given priority will be those serving an area with high incidence of low income families and limited availability of pregnancy related services.

Mr. DOLE. Mr. President, I am not totally familiar with the amendment. I have listened with interest to the discussion by both the Senator from California and the Senator from Georgia.

I do know that the distinguished ranking minority member of the Finance Committee, Senator CURTIS, is opposed to the amendment, and we are trying to find Senator CURTIS right now.

It is also my understanding, although we did have 1 day of pro forma hearing on the CHAP program, there had been no hearings as far as this Senator knows in the Finance Committee on this particular program.

It might be a program the Senator from Kansas would want to support. I do not know. I have not had a chance to listen to any witnesses. The objective certainly cannot be quarreled with, but I would mention that the Senator from Georgia asked about the cost of the program, and it is my understanding we are talking about a program that would cost in excess the first full year——

Mr. TALMADGE. A sum of $100 to $150 million.

Mr. DOLE. One hundred million dollars.

Mr. CRANSTON. Mr. President, will the Senator yield? I believe that includes the State costs. The Federal costs would be $60 million.

This has also been covered in hearings on CHAP. The administration supported and discussed this concept and the specific approach.

Mr. DOLE. The Finance Committee?

Mr CRANSTON. Yes.

Mr. DOLE. I know we had a very brief hearing on the CHAP program, and I support that program. But I did not recall a hearing on the eligibility of pregnant women.

I am reluctant to proceed with consideration at this time. I would like to reserve the remainder of the time in opposition until we can locate Senator CURTIS.

Mr. TALMADGE. Mr. President, according to the Congressional Budget Office, the first year's cost is $149 million for the Federal Government alone.

Mr. President, I move to table the amendment.

The PRESIDING OFFICER. Until the time of the Senator from California has expired, a motion to table is not in order. The Senator from California has 4 minutes.

Mr. TALMADGE. Is the Senator ready to yield back the remainder of his time? I am prepared to yield back the remainder of my time.

Mr. CRANSTON. I would just like to say one thing. The people who would be covered under this amendment are not covered by the programs that presently exist. They have no access to them. This insures they will have coverage.

I am ready to yield back my time.

Mr. TALMADGE. I yield back the remainder of my time.

I move to table the amendment.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Georgia to table the amendment of the Senator from California. [Putting the question]

Mr. TALMADGE. Division, Mr. President.

The PRESIDING OFFICER. All those in favor of tabling the amendment will please stand.

Those opposed to tabling please stand.

The ayes have it.

The motion to lay on the table was agreed to.

Mr. TALMADGE. Mr. President, if there be no further amendments I ask for third reading.

Mr. KENNEDY. We set aside the amendment I offered, and I believe it has been modified.

UP AMENDMENT NO. 2073, AS MODIFIED

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Massachusetts, and he has a right to modify it.

The clerk will report.

Mr. KENNEDY. I ask unanimous consent that the reading of the amendment be dispensed with.

The amendment is as follows:

On line 19 insert after "XIX" the following: Until such time as regulations with respect to such release are issued.

Mr. KENNEDY. Effectively what we are doing is following the sentiment of the Finance Committee until there is a promulgation of regulations.

Mr. TALMADGE. I understand the Senator has cleared this amendment with Senator DOLE.

Mr. DOLE. Keep this prohibition in place until the guidelines are promulgated.

Mr. TALMADGE. I hope the Senate will agree to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, of the Senator from Massachusetts.

The amendment, as modified, was agreed to.

Mr. DOLE. As I understand it, from the committee report, section 4(c) of the bill provides that the sale or lease of an existing and operational health care facility would not be classified as a capital expenditure subject to review under section 1122 of the act where no new beds or services are created in the transfer of ownership. Am I correct in my understanding?

Mr. TALMADGE. The Senator is correct. The Finance Committee adopted the original provision in 1972. Its purpose was to assure that medicare and medicaid funds were not used to support new facilities and expensive equipment which health planning agencies found to be unneeded. It was not the committee's purpose to make existing hospitals and nursing homes go through this review process when a sale or lease occurs unless, of course, there is a substantial change of service or new beds are opened.

Mr. DOLE. My concern, Senator, is for those hospitals and nursing homes who, because of the confusion in the law and regulations on this point, have unwittingly become liable for reimbursement penalties for failure to give timely notice to a planning agency of a simple sale or lease. I understand there are now as many as 300 cases of this type pending final determination by the Secretary. It does not seem fair to penalize these institutions for what amounts to a technical violation when they are providing necessary services in their communities.

Mr. TALMADGE. I understand the Senator's concern and I would hope that should section 4(c) of the bill be enacted, the Secretary would give some consideration to what was intended in those cases where only the failure to give notice of a change of ownership was involved.

Mr. DOLE. I thank the Senator.

Mr. CRANSTON. Mr. President, I would like to clarify with the distinguished Senator from Georgia (Mr. TALMADGE) language in H.R. 5285, as reported from the Senate Finance Committee, which provides for recognition of the unusually greater routine operating costs that accompany the provision of greater intensity of care.

California is privileged to be the home of the City of Hope National Medical Center, a truly unique health facility whose scope of operations stands in sharp contrast to operations of other community hospitals in providing health care.

Mr. President, City of Hope accepts only patients with one of the specific types of catastrophic disease which it treats. These diseases are cancer, severe blod diseases, heart diesase, metabolic disease, with a special emphasis on diabetes, and pulmonary diseases.

City of Hope attracts over 50 percent of its patients from outside of the Los Angeles standard metropolitan statistical area, where it is located. Many of the patients come from throughout the State of California, from States other than California, and from foreign nations.

Mr. President, all of these patients are referred to City of Hope whose medical staff is devoted exclusively to full-time care of City of Hope patients. The fact that patients are referred to City of Hope and from such a wide geographic area is testimony to the recognition which City of Hope and its medical staff have achieved throughout the medical community in the United States and in foreign countries.

Patients also come to City of Hope because the cost of their treatment is so high that they cannot afford care even at those other few institutions which are capable of providing it. City of Hope provides over twice as much unreimbursed care as community hospitals generally.

City of Hope, Mr. President, because of its unique situation, already operates under strong incentives to provide appropriate medical care at the lowest possible cost. Since City of Hope is already providing a very high proportion of unreimbursed care, and since less than one-half of its operating budget is presently funded from patient care, cost containment efforts are necessary in order to permit City of Hope to maximize the use of its own funds in pursuit of its mission.

INTENSITY OF CARE AND ADVERSE IMPACT ON NURSING COSTS

Mr. President, although the patient classification system utilized at City of Hope is designed to ensure the provision of the most appropriate level of nurse staffing, and thereby avoid unnecessary employee costs, the high degree of patient sickness requires a much higher number of hours per day of direct care by registered nurses than would be the case in a community hospital. This high patient sickness level has other impacts on the cost of nurse staffing as well.

Because of the seriousness of the diseases treated at City of Hope, nurses who are employed require substantial additional orientation and training before being assigned to a nursing unit. In a community hospital, new nurses generally receive several days and, rarely, as much as a week of orientation. At City of Hope, however, it is necessary, upon hiring even experienced nurses, to provide up to 3 weeks of special training.

In addition to the new or different techniques that must be mastered, nurses require special training in dealing with City of Hope patients and their families, who typically are suffering unusual, severe emotional, physical, and psychological stress. One indication of the seriousness of the patients' illnesses and the intensity of care required by these nurses is the need to provide to its nurses what City of Hope calls "stress time"; that is, a period of time to permit these nurses to adjust to the strains of dealing with the catastrophically ill. It is even necessary to provide special psychological and related counseling to the nursing staff in order to overcome the emotional effects of dealing with catastrophically ill patients.

In summary, Mr. President, City of Hope treats seriously ill patients, and does more for them than can be done at a community hospital. A highly experienced medical staff, well trained nurses, and sophisticated related services—such as dietary and social service—all pull together to meet the needs of these catastrophically ill patients. As a consequence, these efforts, in many ways innovative, generate higher costs than seemingly similar services at community hospitals.

Mr. President, I believe that the characteristics of City of Hope National Medical Center, which I have outlined, show that it is truly a unique institution, and one which cannot easily be compared to other hospitals because of its special patient population.

HEW has given the City of Hope National Medical Center an exception from the "section 223 reimbursement limits" because of its atypical nursing services, an exception, I am advised, given to specialty hospitals only.

It would seem logical, given the special nature of the care provided by City of Hope National Medical Center and the fact that HEW has already recog-

nized it as a specialty hospital, that City of Hope National Medical Center would meet the conditions of the proposed new section 1861(bb)(1)(H) providing that if a hospital satisfactorily demonstrates that, in the aggregate, its patients require a substantially greater intensity of care than generally is provided by other hospitals in the same category, resulting in unusually greater routine operating costs, then the adjusted per diem target rate shall not apply to that portion of the hospital's routine operating costs attributable to the greater intensity of care required.

I would like to ask the distinguished Senator from Georgia (Mr. TALMADGE) if City of Hope National Medical Center does, as I'm confident it will, demonstrate to the Secretary that it meets those conditions, does it also have to meet the condition of the second sentence of subparagraph (H) that it have consistently shorter lengths-of-stay?

Mr. TALMADGE. I am glad the Senator from California (Mr. CRANSTON) raised the question. The two sentences of paragraph (H) are separate conditions, which may be applied independently. If the hospital the Senator refers to, City of Hope National Medical Center, is able to demonstrate satisfactorily to the Secretary that it meets the conditions of the first sentence of the subparagraph, it would not have to meet the conditions with respect to length-of-stay set forth in the second sentence.

Mr. CRANSTON. I thank the Senator from Georgia (Mr. TALMADGE).

Mr. President, I have one more provision I would like to discuss with the distinguished Senator from Georgia (Mr. TALMADGE). That provision is section 29 of the bill as reported.

This section would require the coordination of audits conducted under the Social Security Act's title XVIII—medicare, title XIX—medicaid, and title V—maternal and child health and crippled children's services. Mr. President, in my State of California, the medicaid agency has done an outstanding job of auditing the medicaid program, and has been discussing with HEW officials the possibility of the State conducting common audits for all three social security health care programs in certain circumstances. I would like to clarify with the distinguished Senator from Georgia (Mr. TALMADGE) that under the provisions of section 29, as reported, medicare can utilize the State's auditing ability in conducting common audits where it is determined that the State has the capacity to carry out that function.

Mr. TALMADGE. Yes, I assure the Senator from California (Mr. CRANSTON) that the provisions of section 29 in the reported bill would not preclude the use of the State auditing ability in conducting the common audit.

● Mr. CHURCH. Mr. President, I would like to take this opportunity to commend Senator TALMADGE and his Subcommittee on Health for their effective work in developing legislation to prevent fraud and abuse in medicaid and medicare. His subcommittee has done a superb job and deserves special praise. At this time I would like to address a question to the distinguished Senator from Georgia concerning an issue of special interest to me.

The medicare-medicaid antifraud and abuse amendments required disclosure of ownership, significant business transactions, and subcontractor relationships as a condition for participation in these programs. This provision was included in the law because congressional hearings and reports documented widespread kickbacks and other fraudulent practices.

It was our intent that this information facilitate the detection of fraudulent practices. In other words, it should provide adequate documentation for the identification of persons with significant ownership interest in more than one facility or in related companies providing goods and services.

My question is this: In developing this legislation was it not our intent that this information be collected on a regular basis with some means of validation and centralization of data?

Mr. TALMADGE. The Senator from Idaho is absolutely correct in his analysis. It was clearly the intent of this legislation to allow this kind of identification process to occur. We consider the disclosure requirements under this legislation to be of critical importance in detecting providers who engage in fraudulent and abusive practices. We expect these disclosure provisions to be implemented and administered in a way to permit regular collection of this information, to establish its authenticity, and to centralize the data. Quite clearly, this type of implementation will be necessary to detect any sophisticated fraud schemes. Access to this information is absolutely crucial. I think the taxpayers have a right to know who is carrying out programs financed, to a very large degree, by their tax dollars.

Mr. CHURCH. I thank the Senator very much.●

Mr. TALMADGE. If there be no further amendments, third reading.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of the Senate amendments to H.R. 5285.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, I am prepared to yield back the remainder of my time if the Senator from Massachusetts is prepared to yield back his time.

Mr. KENNEDY. I am prepared to yield back my time.

Mr. DOLE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall the bill, as amended, pass? The clerk will call the roll.

The second assistant legislative clerk called the roll.

(Mr. EAGLETON assumed the chair.)

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Iowa (Mr. CLARK), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), and the Senator from New Hampshire (Mr. MCINTYRE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

On this vote, the Senator from Michigan (Mr. GRIFFIN) is paired with the Senator from Texas (Mr. Tower). If present and voting, the Senator from Michigan would vote "yea" and the Senator from Texas would vote "nay".

The result was announced—yeas 64, nays 22, as follows:

[Rollcall Vote No. 486 Leg.]

Griffin		Weicker

So the bill (H.R. 5285), as amended, was passed.

Mr. TALMADGE. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. TALMADGE. Mr. President, I move that the Senate insist on its

amendments to the bill, H.R. 5285, and ask for a conference with the House thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Chair appointed Mr. LONG, Mr. TALMADGE, Mr. NELSON, Mr. DOLE, and Mr. PACKWOOD conferees on the part of the Senate.

ORDER OF PROCEDURE

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair recognize the Senator from Mississippi to call up the conference report on H.R. 13635.

The PRESIDING OFFICER. The Senator from Mississippi.

May we have order in the Chamber?

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1979—CONFERENCE REPORT

Mr. STENNIS. Mr. President, I submit a report of the committee of conference on H.R. 13635 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 13635) making appropriations for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the proceedings of the House of Representatives.)

Mr. STENNIS. Mr. President, if I may have the attention of the body, this is a matter that can be handled in a very brief and satisfactory way, so far as time is concerned.

There has been a question, by the way, about the pay for the civilian and uniformed people in the Department of Defense.

The White House has assured Senator MAGNUSON, the chairman of the full committee, that if this bill is down there within an hour or a little more they can have the matter fixed and the checks will go out on time.

Mr. President, as I was saying, the White House has sent word that they can meet the payday tomorrow, October 13, for most military as well as the civilian employees of the Department of Defense for the current pay period; if the fiscal year 1979 Defense Appropriations Act passes the Congress and is signed by the President tonight most of them will be paid tomorrow.

If we do not—this is not a threat—if we do not get some form of spending authority for the Department of Defense until tomorrow or Saturday of this week, military and civilian employees will not receive their full pay until early next week.

Mr. President, this matter is important and serious to many of the individuals concerned.

We had a unanimous-consent report, Mr. President, after 4 or 5 days of intensive negotiations. The conference report went to the House today with three major matters that were submitted in disagreement. The conference report was upheld on all three of these items.

There was no major change in this appropriation bill from the time it left the Senate floor when it was passed last Thursday.

Mr. President, on Tuesday, October 10, 1978, the conferees on the Department of Defense appropriations bill reached agreement on the differences between the two Houses after 4 days of meetings and almost 30 hours of deliberations.

The total amount of new budget authority in this bill is $117,255,621,000. This is $2 billion, or 1.7 percent, below the administration's budget request. It is $1.8 billion below the House bill and $832.6 million above the Senate bill.

Mr. President, since Congress passed the second Military Procurement Authorization Act for fiscal year 1979, the Appropriations Committees of the House and Senate have worked very hard to avoid the need for continuing resolution authority for the Department of Defense for fiscal year 1979. We have made every effort to complete action on this bill before adjournment. The House passed this conference report earlier today by voice vote.

I hope that the Senate can act on this conference report without any delay.

Mr. President, this was a very harmonious conference, conducted in the spirit of compromise. There were 91 amendments made by the Senate to the House bill including 342 individual line item or language differences. All in all, I think the conferees succeeded in putting together a very reasonable compromise that funds the items necessary for the security of our Nation. At the conclusion of my remarks, I am inserting a comparative summary, by appropriation, of the conference committee's action.

MAJOR ITEMS IN CONFERENCE

I would like now to point out some of the major items resolved by the conference committee. In the area of personnel, the conferees have provided funds for all of the military services to meet the strength levels authorized for fiscal year 1979. On the subject of travel allowances for junior enlisted personnel, the conferees agreed to provide $95 million for these allowances as recommended by the House. The conferees have also established the policy of setting a ceiling of 350,000 on the total number of military dependents in overseas areas. The conferees requested a detailed report from the Department of Defense early next year presenting the entire situation relating to the presence of a large dependent population overseas, especially in Europe. Both the House and Senate committees agreed that Congress must begin to examine the extent to which our military readiness and the safety of the dependent population are jeopardized by the presence of these dependents overseas.

The conferees restored $170 million of the $620 million Senate reduction for anticipated inflation in operation and maintenance accounts. The total amount provided for inflation in these accounts is approximately $1 billion, instead of the $1.5 billion request in the Department of Defense budget. In making this reduction, the conferees believe that the Department of Defense should work to offset the effects of inflation through better and more stringent management to the maximum extent possible.

In other matters relating to the operation and maintenance accounts, the conferees agreed to restore the $113 million Senate reduction to the appropriated fund support for military commissaries. For the third consecutive year, the conferees rejected the Defense Department's proposal to consolidate all Defense helicopter training under the Army.

The conference agreement provides $30.2 billion for procurement of new weapons and ammunition. For the Army, the major programs include $116.5 million for 66 AH–1S attack helicopters; $165 million for the Roland missile program; and $300.5 million for 110 XM–1 tanks.

For the Navy, some of the major programs include $110.4 million for 12 A–7E attack aircraft $688.8 million for 36 F–14 fighter aircraft; $198 million in advance procurement funds for the Trident submarine program; and $978.4 million for cost growth in Navy shipbuilding programs.

For the Air Force the conference agreement provides $792.7 million for 144 A–10 close air support aircraft; $1.3 billion for 145 F–16 fighter aircraft; $63.5 million for 8 C–130H cargo aircraft; $120.5 million for 12 TA–7D trainer aircraft for the Air National Guard; and $10.2 million in advance procurement funds for the TR–1 tactical reconnaissance aircraft program.

Mr. President, in examining this conference agreement I discovered that it continues the pattern of the last decade of allocating significantly greater amounts of funds for aircraft than for shipbuilding. This bill provides $12.2 billion for aircraft procurement, but only $3.8 billion for shipbuilding. It is difficult to say exactly what the proper balance should be but this is a matter I intend to look into next year.

The conferees agreed to fund three major programs in research and development that were in dispute. A new joint aircraft engine program was established for the Air Force and Navy, funded from the $15 million in this bill and $26 million in fiscal year 1978 funds. The Army's 120-millimeter tank gun coooperative development program for the XM–1 tank was funded at $35.6 million, and $42 million was provided over the budget request for new ship concepts and designs.

Under the general provisions, the conferees adopted language limiting Federal funds for abortions similar to the lan-

guage which was in effect for the Departments of Labor and Health, Education, and Welfare for fiscal year 1978. This language is also included in the continuing resolution for fiscal year 1979.

Mr. President, I will be glad to answer any questions concerning the items in this conference report. I want to especially thank all the members of the conference, both Senate and House, for their fine work. We were in conference for 4 long days on this matter, beginning just 2 hours after we passed this bill on the Senate floor last week. I believe we have wound up with a bill that every Senator can support without reservation.

Mr. President, I ask unanimous consent to have printed in the RECORD the material to which I have referred.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY, FISCAL YEAR 1979

	New budget authority					Conference compared with—			
	Enacted fiscal year 1978	Estimates fiscal year 1979	House, fiscal year 1979	Senate, fiscal year 1979	Conference fiscal year 1979	Fiscal year 1978 enacted	Fiscal year 1979 estimate	House bill	Senate bill

Mr. STENNIS. Mr. President, may we have order?

The PRESIDING OFFICER. May we have order in the Chamber?

Mr. STENNIS. Several Members have mentioned items to me that I tried to explain and I will try to explain further now, if there are any questions. I see the Senator from Montana. I am glad to yield to him, Mr. President, for a question.

Mr. MELCHER. I thank the distinguished Senator from Mississippi, the chairman of the Appropriations Subcommittee, for yielding to me.

The Senate in their appropriations, in working on the House bill, disagreed with the House language as it affected the Army and Air Force Veterinary Corps. The House, in their bill, reduced 63 man-years for veterinarians in the Army and 20 man-years for veterinarians in the Air Force. The House also directed the Defense Department to study the possibility of phasing out the Veterinary Corps in the Army and Air Force beginning in fiscal year 1980.

The Senate did not agree with that. It restored the House reduction. The Defense Department was notified by two Senators, myself and the Senator from Washington, the chairman of the Senate Appropriations Committee, that there was objection to the Defense Department implementing any reduction in the Veterinary Corps in the Air Force or in the Army, without some guidance from Congress and without a thorough discussion of what they were proposing.

The objections were independent. I did not know that Senator MAGNUSON was sending a letter to the Defense Department on this subject objecting, nor did he know that I was in contact with the Defense Department, objecting.

The outcome, at least from my part, was that some Assistant Secretary in the Defense Establishment told me that they would be glad to go over any program that they might envision for phasing out the Veterinary Corps in the Armed Forces.

I note that the conference report we have before us backed off on that as far as the Senate is concerned and has agreed to the House.

The fact is, and this is not a question—I thank the chairman for indulging me, but I am making statements rather than asking questions.

The fact is that we do not know here, in the Senate or in the House, who is going to perform the professional-type work in the field of food inspection in the Armed Forces or in public health aspects connected with the Armed Forces that veterinarians are now performing in the veterinary corps of the Army and the Air Force if they do not have the veterinarians do it.

There is no indication that anybody is going to do it who is capable of doing it, and furthermore, there is no indication that there is any cost saving except this figure that the House proposes, which I believe is around a $2-million saving.

To have a program that you are going to suddenly launch on our Armed Forces, that is going to jeopardize the quality of work that is done in a professional manner dealing with public health and food inspection, to save $2 million is an outlandish proposal.

I ask the distinguished Senator from Mississippi how we can be sure that, if this conference report passes, some ridiculous type of operation might not ensue, shifting the veterinarians out of there, putting other people in. If you put in people that are well enough trained in public health and food inspection, you are going to pay them just exactly as much as you are paying those veterinarians now. If that happens, the only result is that you have a mixed bag. You have the bulk of it done by veterinarians and a few others tagging along, somehow out of the veterinarian corps in the Air Force and the Army, and supposedly coordinating and correlating their work.

I ask the distinguished chairman how we can straighten out this mess.

Mr. STENNIS. Well, we want to get at this the best way we can. The Senator knows that in civilian life as elsewhere, the work of the veterinarian has shifted and changed to meet new conditions. These people have been very helpful and very valuable as they went over into their new assignments. There was no complaint about their service capability for anything for which they are trained. But the House's position was that the proof of need was not strong enough and did not cover the need for as many man-years, if I may use that term, as the Army and the Air Force had requested and had money in the bill for.

They directed also that the Defense Department study the possibility of phasing out the veterinary corps in the Army and Air Force, beginning in fiscal 1980. We contested the House position. We put the money back in the bill for the purpose originally requested by the Army and Air Force.

Now, the House conferees did not yield. They stood firm on the money issue and cited their hearings and their interpretation of the hearings. We also stood firm and finally settled on one point that I thought was quite important. We let the reduction stand for this year, but expressly state in the conference report that it was not related to any phaseout of the services of the veterinary corps.

I think that arrests greatly the inclination to go on and make reductions without Congress having more of a say in it.

We also propose to write the Department of Defense calling attention to the language of this report and suggesting that they proceed with caution in any plan that they are making. We want them to give us notice and give Congress time to express itself on this matter before any final decision is made.

This is as far as we could go at this time, I say to the Senator.

Mr. MELCHER. May I ask the distinguished Senator if there is any objection to the Department of Defense providing the Senator's subcommittee with information on the validity——

Mr. STENNIS. No, no objection. They cannot have any grounds for an objection to giving the information that the Senator refers to. It will have to be forthcoming. We do meet a changing situation, a changing condition.

The Senator from North Dakota is familiar with this matter. He is from a rural State, and I am, too.

I yield to him.

Mr. YOUNG. I would like to say to the Senator from Montana that the chairman of our committee and all the conferees fought as hard as we could with the House conferees to maintain the Senate position, which was the position of the Senator from Montana. The House, somehow, thinks there is not the requirement for veterinarians in the service that existed previously. I think we shall have to do a better job of persuading the conferees next year of the need of maintaining this type of service. But we could not have done more with the House conferees than we did. They were very obstinate on this issue.

Mr. MELCHER. May I inquire of both the distinguished Senators—the Senator from Mississippi and the Senator from North Dakota—whether they would be amenable to requesting a prompt explanation—in the form of a hearing, I would presume—say no later than February or March. And if the Defense Department did not bring up an adequate proposal on this, the distinguished chairman and the distinguished ranking minority member on the subcommittee would impress on the Department of Defense to correct this by asking in the first supplemental for the appropriate funds so they do not have to carry it out. I believe we are talking about $2,100,000.

Mr. STENNIS. That is right. I defer to the Senator and yield to the Senator from North Dakota.

Mr. YOUNG. If the Department of Defense can be persuaded to ask for the retention of veterinarians, they could reprogram the necessary funds. It would be a simple matter, as far as I am concerned, and I am sure the Senator from Mississippi would be agreeable to reprograming the money to take care of the Senator's desire.

Mr. MELCHER. Reprograming would be much simpler; however, it would involve the approval of the two distinguished Senators.

Mr. STENNIS. Oh, yes.

Mr. MELCHER. Now, can I be assured that the Senator from Mississippi and the Senator from North Dakota will ask the Defense Department for justification of whatever they propose along this line? I am entirely open myself to whatever they want to propose. Then, if the justification does not appear to be valid to the Senate, that they be encouraged to reprogram so as not to disrupt anything more than they might have done during the 3 or 4 months from now?

Mr. YOUNG. If the Defense Department cannot be persuaded, I think the supplemental approach that the Senator from Montana mentioned would probably be the best approach. We could have hearings and have witnesses knowledgeable on the need for veterinarians.

Mr. MELCHER. Is the Senator suggesting that hearings will be held and that if there were a justification made to the satisfaction of the subcommittee, the subcommitte would encourage the Department of Defense then to ask for it in a supplemental?

Mr. STENNIS. Yes, I am satisfied with the Senator's proposal.

Mr. MELCHER. I thank the two Senators.

Will the Senator yield to me for a short statement?

Mr. STENNIS. I yield without losing my right to the floor, Mr. President.

Mr. MELCHER. I thank the Senator.

I want to state emphatically that as far as I am concerned, if the Defense Department can come up with a better program to do the work that is done by veterinarians in the Armed Forces, it is fine with me. But we have not seen that program. We have not seen any justification for what they are proposing.

There lurks in the minds of some people in the Congress that veterinarians, trained for treating horses and other animals, are somewhat archaic in the modern Armed Forces.

We do not have a horse artillery any more. We do not have the cavalry riding horses any more. We have the cavalry, but they are not on horseback.

Well, that is not the point at all, that is not what I am contending.

The fact is that when the Armed Forces, as so many other groups throughout this country, were looking for the right type of people to perform professional work dealing with public health and dealing with food inspection, the logical profession up until now has been to look at the veterinarians because the training of veterinarians encompassed both fields.

So over the course of the years, as the horse cavalry was being phased out, veterinarians were retained, but retained under a different capacity, to work in the public health aspects of the military and to work in food inspection for the military.

They have performed that function, as far as I know, in a better, a more cost saving, manner than any other particular professional group could.

If the day has come now when it is no longer necessary to use veterinarians for the specific purposes in the Armed Forces, I am willing to look at it. But to buy a pig in a poke, to start the shift without knowing what is being advanced in lieu of that, I think is, indeed, foolish.

It is for that reason I asked the distinguished Senator from Mississippi to permit me to make these remarks. I am very grateful to both the chairman of the committee and the ranking member of the Appropriations Committee to have that assurance that the Defense Department will be asked to present the program promptly in the new year and that if they cannot make a case satisfactorily that they will be encouraged to ask for funds in a supplemental to make up the difference.

Mr. MAGNUSON. Will the Senator yield?

Mr. STENNIS. Let me commend the Senator from Montana for his very fine analysis of this problem and for his suggestions and observations.

I assure him again we are going to follow up on this matter.

I am glad to yield to the Senator from Washington, who is also interested in this matter.

Mr. MAGNUSON. Mr. President, I merely want to say that I join with the Senator from Mississippi and the Senator from North Dakota in doing what I can to help out in what the Senator from Montana is talking about.

Mr. STENNIS. I thank the Senator very much.

We are all impressed, I have been for years, with the quality of the professional veterinarians in the Department of Defense. They are of untold value even beyond their particular field.

Does the Senator from South Carolina wish me to yield?

Mr. THURMOND. Will the distinguished Senator yield?

Mr. STENNIS. Yes, I am glad to yield.

Mr. THURMOND. Mr. President, I want to associate myself with the remarks of the distinguished Senator from Montana. I think he has made a good point here. The veterinarians have served a very useful purpose in the services.

If the Defense Department can come forward and show where their work is no longer needed and convince the Armed Services Committee to that effect, and the Appropriations Committee, that is one thing. If they cannot, that is another thing.

I just want the distinguished Senator to know that there will be sentiment along the lines he has discussed and he has requested, and I think his request is reasonable.

Mr. President, while I am on my feet, I want to commend the distinguished Senator from Washington for his zeal in trying to get this bill acted on as soon as possible.

I have been disturbed for the last few days and I have received many calls about this matter.

I commend the distinguished Senator from Mississippi for all he has done, and the distinguished Senator from North Dakota for all he has done, to get this bill up quickly and get it acted upon.

I understand that if it can be acted on by 8 o'clock tonight, the checks can go out tomorrow on the regular schedule.

I just wanted to express my appreciation to the Senators.

Mr. STENNIS. I thank the Senator very much. I appreciate his support.

I would like the Chair to recognize the Senator from North Dakota.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. YOUNG. Mr. President, it is a difficult problem to exercise the utmost economy in a bill such as this and still maintain a strong national defense.

We are fortunate having as chairman of our Defense Subcommittee one of the most knowledgeable men in the Senate on military matters, the chairman of the Armed Services Committee. He has been strong for economy and he has been strong for national defense. He was able to sustain a reduction of $2 billion under the President s budget.

I think this bill provides sufficient funds for a strong national defense.

I also would like to give credit to the Defense Subcommittee staff members. They are Guy McConnell, Pete Bonner, Douglas Allen, David Lyles, Jerry Coleman, Jim Fellenbaum, Rick Pierce, Jane McMullan, and Judy Spahr.

There are very few, if any, in the Pentagon that have broader knowledge, better understanding, and better judgment of all phases of military matters than these staff members.

They have been a great help to all our committee members in consideration of this bill.

I also want to mention the input by many Members of the Senate. Sitting in front of me is Senator THURMOND who made a strong contribution, a very helpful contribution in making this a better bill.

Mr. STENNIS. Mr. President, I especially appreciate the remarks made by the Senator from North Dakota, who has given unlimited time all year to every phase and aspect of this bill, even to legislation that is attached to the bill. He is an invaluable man.

As he says, many Members of this body have contributed to the great number of questions and problems passed on in this massive bill.

We have 18 members on the Senate Armed Services Committee and they went through this issue twice. One bill was vetoed. Then floor work here on the authorization bill was done twice. Of course, many of the able and experienced Members of the House worked on this bill year around, and made a tremendous contribution to it.

This bill is the final product of the authorization bill also.

Now, most have come in a cooperative way and are helpful to us. Many have excellent judgment on many phases of this bill.

As I said the other day, Mr. President, I am told that this is the largest appropriation bill that has ever been passed by the Senate in the history of the Nation, in wartime or in peacetime. Of course, a lot of it is inflation. But everything has been considered.

There are over 3,500 line items, I am told, in this bill alone. I know in the conference, representing the difference between the House and the Senate, we had 29 large pages of conference notes.

We had 91 amendments to be considered and 342 line items that were in dispute with the other body. Every one of those was gone over. Some were considered not once but twice, even three, four, or five times during the 4 days of the conference.

Mr. President, this is not a complaint, but many of us who work on this appropriations bill have to consider too many amendments that are legislative in nature. These amendments are authorization issues more than appropriations issues. This is, after all, a money bill.

As the Senator from North Dakota said, we were able to reduce the budget request somewhat. We did not just take the budget and say, "Everything is all right. We want everybody to be happy." We go over these items and look for places to save. We look for places where there has been slippage and change in needs and a host of other things.

We are $2 billion under the President's original budget; $1 billion of that is represented largely by the Trident submarine, where there was a slippage in the contracts. It was decided to drop the production funds out for this year. It was not defeated, but merely deferred. It will be built just as quickly by coming in next year's bill as in this year's bill.

There are reductions and savings in other areas, but I do not think there is any appreciable amount of postponement of major programs in this bill. These reductions just represent savings we were able to find. This is nothing new. In other years, there have been similar reductions in this huge appropriation bill.

We would be glad to try to answer any further questions.

The House was satisfied with this conference report. There was some discussion, but I understand it was passed by a voice vote over there.

Everything in the bill has been considered thoroughly and explained and digested by the membership and covered by the press. I would be glad to have a yea-and-nay vote if anyone wants it. If no one desires it, I would be willing to waive it and let the bill go to the White House.

Mr. FORD. Mr. President, I would like to compliment the Senator from Mississippi, Chairman STENNIS, for his fine work on the fiscal year 1979 defense appropriation bill and to express my deepest appreciation for the help he gave me in my effort to save the Naval Reserve center in my hometown of Owensboro, Ky.

I heard way back in June that the center was scheduled to be closed, and I went around and around all summer with the Department of the Navy arguing that the center should remain open and trying to pin down specific reasons why the Navy was recommending closure. The only remotely concrete explanation ever offered regarded the material condition of the Owensboro facility and the cost necessary to upgrade it. This I cannot swallow, because the Navy sank a quarter of a million dollars into the center in 1975 and 1976, and gave a recent estimate that only $53,000 more is needed, a drop in the bucket compared to money previously spent.

Having gotten nowhere by letter or by phone, I turned to the fiscal year 1979 defense appropriation bill. Senator HUDDLESTON, a member of the Appropriations Committee, offered an amendment stating it is the committee's belief that the center should be kept in operation through fiscal year 1979 and directing the Naval Reserve to make available the required $53,000. The Senate took this to conference with the House this week but, although Senator STENNIS, chairman of the Senate conferees, fought long and hard for Owensboro, the House refused to accept our language.

It now seems that the Owensboro Naval Reserve center will be closed down forever.

I cannot believe that in this day of inflation and budgetary constraints the Navy feels it can go around spending money on projects and facilities and then abandoning them. I cannot believe that Navy planners have such a lack of foresight.

I also cannot understand their lack of perception when it comes to Naval Reserve strength levels. The closing of Owensboro will leave two-thirds of the State without a naval facility. What incentive is that for Kentuckians to join or stay in the Reserves?

The Navy has already closed similar facilities in Paducah, Danville, and Ashland, leaving only Lexington and Louisville. The Navy even terminated the Naval ROTC program at the University of Louisville.

Since I have been in the Senate there have been several votes on increasing the strength of the Naval Reserves. Every single time I have supported the amendment and sometimes the count was very close, with a margin of one or two votes. I think my votes made a difference.

But now I feel that if the Naval Reserve cannot support my State and my constituents, frankly I will not be able to support the Naval Reserve as enthusiastically as I once did.

I would like to compliment my senior colleague from Kentucky for the work he has done on this, the fine work on the fiscal year 1979 defense appropriation budget, and express my deep appreciation for the help he gave me personally and all the support in an effort to save the Naval Reserve Center in my hometown of Owensboro, Ky.

● Mr. PELL. Mr. President, military workers, including civilians will face a payless payday tomorrow unless the Congress passes the military spending bill tonight.

Such a payless payday would be bitterly ironic to all military workers, but specially to Navy workers in Rhode Island and throughout the country, because tomorrow is Navy Day—a celebration of the Navy's 203d birthday.

I deplore the needless delay which is causing thousands of defense workers and men and women in the services to suffer, because of the failure of Congress to act expeditiously.

Those men and women need to know they can rely upon their paychecks. They only get paid twice a month and they have bills to pay and families to feed. They are serving our country and we are serving them poorly.

In my own State, the Navy is our second largest employer and many of my constituents will celebrate Navy Day

without money. This is a very real hardship to families who depend upon the good faith of the Federal Government for economic survival.

I urge my colleagues on the House-Senate conference to resolve their differences quickly so that our men and women in uniform and our civilian workers can resume normal living.●

● Mr. HART. Mr. President, I would like to bring to the attention of my colleagues the severe problems that have resulted from the unconscionable delay in the enactment of the Defense appropriations bill. As many as 1,000 recently discharged service members have been stranded without travel pay or final separation pay. In addition, service members moving to new assignments have been forced to pay their own travel expenses. Paychecks are in jeopardy of being late.

Newspapers in my home State of Colorado have reported that the delay in the passage of this bill has forced some military personnel to become dependent on the charity of friends and organizations such as the Red Cross. One staff sergeant at Fort Carson has literally had her entire life disrupted as she is unable to receive her final separation pay from the Army. Her husband has quit his job and they have packed all their belongings in anticipation of moving to his new job in Alabama. Now they have been forced to live with friends until she receives the $800 in pay that is due her.

The inaction on this measure has caused much uncertainty in the lives of active duty members of our Armed Forces, and many have expressed to me their extreme dissatisfaction with their representatives in Congress. They tell me that their country has abandoned them, that those who represent them here have shown no sympathy for the financial problems they face when their pay is delayed, and I have heard them express a deep feeling of bitterness over their treatment by a Government they are sworn to defend.

Mr. President, it is unfortunate that the veto of the defense procurement bill has caused this delay and has caused such grief and anguish for the enlisted and officer members of our armed services. It has placed undue hardships on those Americans dependent on Federal funds for their livelihood.

It is an outrage to the men and women who are serving in our Nation's military service that not only have their paychecks and funds for travel been held up, but they have not even been told when they could expect them.

It is essential that the Senate take up this bill as expeditiously as we can to avoid any further delays. If we act on it tonight, we can ensure that most members of our armed services will be paid on time, with very few exceptions.

Following Senate passage, I hope President Carter will make signing this bill his most immediate priority. There can be no further delays in authorizing these funds.●

● Mr. INOUYE. Mr. President, I was unable to be present for the rollcall vote on the conference report on the Department of Defense appropriations bill for fiscal 1979 because I was involved in a conference on the foreign assistance appropriations bill. Had I been present I would have voted "aye".●

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. STENNIS. I yield.

Mr. MAGNUSON. We still have a little time, and this is a very big bill. I think the Senate should have a rollcall vote on a bill of this magnitude, if we do it right now, and I think we can.

Mr. STENNIS. That is all right.

Does anyone have remarks on the bill?

Mr. President, I move the adoption of the conference report on H.R. 13635, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

TIME LIMITATION AGREEMENT—LABOR-HEW CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I expect to make provision for calling up the Labor-HEW conference report immediately after the disposition of this conference report. Therefore, I ask unanimous consent—and this has been cleared with the minority—that on the Labor-HEW appropriations conference report there be 40 minutes overall, equally divided between Mr. MAGNUSON and Mr. BROOKE; that upon the disposition of the now pending Defense appropriation conference report, the Chair proceed to recognize Mr. MAGNUSON to call up that report.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME-LIMITATION AGREEMENT—H.R. 14279

Mr. ROBERT C. BYRD. Mr. President, this has been cleared. I ask unanimous consent that when the Senate proceeds to the consideration of H.R. 14279, debate be limited to 10 minutes on the bill, one-half hour on an amendment to be offered by Mr. PROXMIRE, 10 minutes on any other amendment, all time to be equally divided between and controlled by the majority and minority managers of the bill; that there be 10 minutes on any debatable motion, appeal, or point of order, if such is submitted to the Senate for its consideration; provided, further, that the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF DEFENSE APPROPRIATIONS, 1979—CONFERENCE REPORT

The Senate continued with the consideration of the conference report.

The PRESIDING OFFICER (Mr. SPARKMAN). The question is on agreeing to the conference report. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Iowa (Mr. CLARK), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HASKELL), the Senator from Maine (Mr. HATHAWAY), the Senator from Hawaii (Mr. INOUYE), the Senator from New Hamphire (Mr. MCINTYRE), the Senator from North Carolina (Mr. MORGAN), and the Senator from Connecticut (Mr. RIBICOFF) are necessarily absent.

I further announce that, if present and voting, the Senator from New Hampshire (Mr. MCINTYRE) and the Senator from North Carolina (Mr. MORGAN) would each vote "yea."

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Nevada (Mr. LAXALT), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. MCCLURE), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from New Mexico (Mr. DOMENICI), the Senator from Arizona (Mr. GOLDWATER), the Senator from Michigan (Mr. GRIFFIN), the Senator from Nevada (Mr. LAXALT), and the Senator from Texas (Mr. TOWER) would each vote "yea."

The PRESIDING OFFICER (Mr. CANNON). Is there any Senator in the Chamber who has not voted?

The result was announced—yeas 77, nays 3, as follows:

[Rollcall Vote No. 487 Leg.]

YEAS—77

Baker	Glenn	Nelson
Bartlett	Gravel	Nunn
Bayh	Hansen	Packwood
Bellmon	Hart	Pearson
Bentsen	Hatch	Pell
Biden	Hatfield, Paul G.	Percy
Brooke	Hayakawa	Randolph
Bumpers	Heinz	Riegle
Burdick	Helms	Roth
Byrd, Harry F., Jr.	Hodges	Sarbanes
Byrd, Robert C.	Hollings	Sasser
Cannon	Huddleston	Schmitt

Ford	Moynihan	Zorinsky
Garn	Muskie	

NAYS—3

Hatfield, Mark O.	McGovern
	Proxmire

NOT VOTING—20

Abourezk	Griffin	McIntyre
Allen	Haskell	Morgan
Anderson	Hathaway	Ribicoff
Clark	Inouye	Scott
Domenici	Laxalt	Tower
Eastland	Mathias	Weicker
Goldwater	McClure	

So the conference report was agreed to.

Mr. STENNIS. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. MAGNUSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 2 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $6,461,600,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 4 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $7,525,001,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 6 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $547,350,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 10 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $84,125,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 12 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $186,850,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 27 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $384,700,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 42 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment insert: $1,642,250,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 44 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $1,955,600,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 49 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: *for the T-AGOS SURTASS ship program*, $69,000,000;

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 51 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $3,759,600,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 58 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $273,800,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 60 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $4,468,871,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 65 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $892,887,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 74 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken and inserted, insert:

(f) reimbursement of any physician or other authorized individual provider of medical care in excess of the eightieth percentile of the customary charges made for similar services in the same locality where the medical care was furnished; or (g) any service or supply which is not medically or psychologically necessary to prevent, diagnose, or treat a mental or physical illness, injury, or bodily malfunction as assessed or diagnosed by a physician, dentist, clinical psychologist, or certified nurse-midwife, as appropriate, except as authorized by section 1079(a)(4) of title 10, United States Code.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 76 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert:

Sec. 853. None of the funds appropriated by this Act shall be obligated under the Competitive Rate Program of the Department of Defense for the transportation of household goods to or from Alaska or Hawaii.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 77 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken by said amendment, insert:

Sec. 854. (a) None of the funds appropriated by this Act or available in any working capital fund of the Department of Defense shall be available to pay the expenses attributable to lodging of any person on official business away from his designated post of duty, or in the case of an individual described under section 5703 of title 5, United States Code, his home or regular place of duty, when adequate government quarters are available, but are not occupied by such person.

(b) The limitation set forth in subsection (a) is not applicable to employees whose duties require official travel in excess of fifty percent of the total number of the basic administrative work weeks during the current fiscal year.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 84 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

Sec. 860. None of the funds appropriated by this Act may be used for the consolidation or realignment of advanced or undergraduate pilot training squadrons of the Navy as currently proposed by the Department of Defense.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 85 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken by said amendment, insert:

Sec. 861. All obligations incurred in anticipation of the appropriations and authority provided in this Act are hereby ratified and confirmed if otherwise in accordance with the provisions of this Act.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 89 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter stricken by said amendment, insert:

Sec. 863. None of the funds appropriated by this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term; or except for such medical procedures necessary for the victims of rape or incest, when such rape or incest has been reported promptly to a law enforcement agency or public health service; or except in those instances where severe and long-lasting physical health damage to the mother would result if the pregnancy were carried to term when so determined by two physicians. Nor are payments prohibited for drugs or devices to prevent implantation of the fertilized ovum, or for medical procedures necessary for the termination of an ectopic pregnancy.

Mr. STENNIS. Mr. President, this is important. May we have quiet?

Mr. President, I move that the Senate concur en bloc with the amendments of the House to the amendments of the Senate.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Mississippi.

The motion was agreed to.

Mr. STENNIS. Mr. President, one other matter. I have been asked about the amount of money that is in the bill. The bill carries with it $117.3 billion in new budget authority and $100 million of transfers for the coming fiscal year.

The PRESIDING OFFICER. Pursuant to the previous order, the Senator from Washington is recognized.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield to me?

Mr. MAGNUSON. I yield.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senator from South Carolina may proceed for 3 minutes on another matter.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

INTERNATIONAL MARITIME SATELLITE TELECOMMUNICATIONS SERVICES

Mr. HOLLINGS. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 11209.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 11209) to provide for the establishment, ownership, operation, and governmental oversight and regulation

of international maritime satellite telecommunications services, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. HOLLINGS. Mr. President, H.R. 11209 provides for the establishment, ownership, operation, and regulation of international maritime satellite telecommunications services. It designates COMSAT as the U.S. participant in the international maritime satellite organization (INMARSAT) which is likely to be created to develop and operate an international maritime satellite system.

H.R. 11209 as passed by the House and the Senate were different in several respects but both bodies have now reached a compromise agreement. The compromise agreement accomplishes the following objectives: First, declares the intent of Congress to be the U.S. participate through a private entity in INMARSAT to serve the maritime commercial and safety needs of the United States and foreign countries; second, designates the Communications Satellite Corporation (COMSAT) as the U.S. entity to provide maritime satellite communications as a participating carrier; third, authorizes COMSAT to be the sole owner and operator of any satellite Earth terminal stations in the United States unless the FCC decides that ownership by others as well proves to be in the public interest; fourth, requires COMSAT to serve as a participating common carrier subject to the Communications Act of 1934 and connect its facilities with other domestic and international carriers; fifth, requires COMSAT to connect its facilities with those of private communications systems unless the FCC finds that such interconnection will not serve the public interest; sixth, authorizes the President to issue instructions to COM SAT, with respect to its dealings with foreign entities and INMARSAT, or matters relating to foreign policy and the national interest; seventh, authorizes the Secretary of Commerce to undertake several responsibilities including coordination of the activities of Federal agencies with responsibilities in the field of telecommunications; and eighth, requires the Commission to initiate proceedings necessitated by the bill and to conduct certain studies. The navigation study is not intended to preclude consideration of any possible methods of providing navigation assistance, but rather to insure the most effective, coordinated, and efficient system.

This bill represents a bipartisan effort between the minority and majority Members, and between the House and the Senate, to reach an accommodation without need for a conference. It is a good effort to balance competition and monopoly in the public's interest. The bill is needed soon so that the United States can sign the operating agreement and assist in the formation of the INMARSAT organization.

Mr. STEVENS. Mr. President, will the Senator yield to me for just a moment?

Mr. HOLLINGS. I yield.

Mr. STEVENS. Mr. President, I strongly urge approval of the amendments to H.R. 11209, a bill to authorize U.S. participation through COMSAT in the International Maritime Satellite Organization. I have closely followed the progress of INMARSAT for years and participated in one of its preparatory conferences in London.

This legislation is vital to Alaska. Due to the remoteness of many areas of the State, all types of communications are critical to her. But maritime communications is particularly important. Alaska has more miles of coastline than the combined total of the continental United States. Thus, much of Alaska's industry is based on maritime activities. Better communications will greatly benefit such activities.

Mr. President, I am glad we could come to an agreement with the House on this bill. Two differences in particular were holding up agreement: first, whether private lines could be run from a user to an Earth station, and second, who is entitled to own an Earth station.

We agreed users could directly interconnect wtih Earth stations unless the FCC found such interconnection not to be in the public interest. In addition, we authorized anyone to petition the FCC for ownership of an Earth station. Since we necessarily gave COMSAT sole ownership of the space segment, its monopoly should not extend any further. Opening Earth station ownership to other parties succeeds in maintaining maximum competition in the provisions of maritime communications.

Mr. President, this bill will enable us to have a greater say in the early stages of INMARSAT's operational system and to represent to the world our commitment to sophisticated maritime communications.

INTERNATIONAL MARITIME SATELLITE ORGANIZATION

● Mr. SCHMITT. Mr. President, I am pleased to join with the distinguished chairman of the Communications Subcommittee in urging the Senate to pass H.R. 11209, which provides for the establishment, ownership, operation, and governmental oversight and regulation of international maritime satellite telecommunications services.

Enactment of this legislation will provide for U.S. participation in the International Maritime Satellite Organization (INMARSAT) through the Communications Satellite Corporation (COMSAT). Serving as the designated entity of the United States, COMSAT will operate as a participating common carrier subject to the Communications Act of 1934, connecting its facilities with other domestic and international common carriers and private communications systems as authorized by the Federal Communications Commission.

The purpose and procedures established by this bill are similar to those contained in H.R. 11209, as it passed the Senate on August 7, 1978.

I believe this legislation will provide a mechanism for vastly improving maritime telecommunications services and urge its immediate passage.●

Mr. HOLLINGS. I move that the Senate insist upon its amendment.

The motion was agreed to.

DEPARTMENTS OF LABOR, AND HEALTH, EDUCATION, AND WELFARE, AND RELATED AGENCIES APPROPRIATIONS, 1979—CONFERENCE REPORT

Mr. MAGNUSON. Mr. President, I submit a report of the committee of conference on H.R. 12929 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12929) making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending September 30, 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 6, 1978.)

The PRESIDING OFFICER. There is a 40-minute time limit on the conference report. Who yields time?

Mr. MAGNUSON. Mr. President, I yield myself such time as I may need.

Mr. President, we are now going to consider the conference report on H.R. 12929, the fiscal 1979 Labor-HEW appropriations bill.

I am proud to announce that we have a bill that is under the President's budget. The conference report states that this bill is $285 million below the budget. This does not even include the billion-dollar reduction for fraud and abuse.

We added money to some programs and cut money from others. We spent many hours in hearings, with over 600 witnesses; markup sessions lasted 33 hours. House and Senate floor action and conference took many days. The result is a bill that reflects the priorities of the Congress in the vital human service areas. We did all of this and kept the bill under the President's budget. When you look at this conference report, I believe you will join me in strongly recommending its adoption.

HEALTH

I would like to summarize a few major components in this bill. We were able to provide additional funds for the National Institutes of Health. These funds will be used to continue our efforts to conquer dread killers like cancer and heart disease. This bill will continue to provide assistance so that NIH can continue its highly successful research efforts. Special emphasis will be placed upon

research on how nutrition and diet affect people's health. NIH will also be expanding its basic research in the continuing effort to find cures for the many devastating diseases that afflict so many people—including genetic disorders.

EDUCATION

For education, the conferees are recommending that impact aid funding be cut $40 million below the President's budget request and the House level, while providing a modest increase over fiscal 1978. The conference report contains adequate funds to fully fund the so-called "A" students. An "A" student's parents live and work on Federal property, such as military bases. The impact aid program has been growing like topsy in recent years. It is time to control growth of the program and limit assistance to school districts where the presence of Federal activities truly affects their operations.

The major education initiative in this year's bill is the provision of funds to assist middle-income students with their postsecondary educations. Under the basic educational opportunity grants, or BOG's program, an additional 1.1 million students from middle-income families will receive grants. Other grant and loan programs in the Office of Education will add another $200 million for middle-income students. Due to the uncertain future of tuition tax credit legislation, the conferees were not able to fully fund the President's middle-income student assistance request under BOG's. The money provided for BOG's will allow for an orderly phase-in of middle-income student assistance, and will be a big step forward in helping these families to bear the rapidly-accelerating burden of college costs.

UNAUTHORIZED PROGRAMS

There are over $17 billion in programs which are not included in this bill. They are not in here because the authorizing legislation has not been adopted or has only recently been enacted. There is no money for CETA—the conference was finally completed this week, far too late for our consideration this year. Half of the health programs, the entire ACTION agency, all of the community services administration, and many other programs are also not included in this bill. These programs will be funded by a continuing resolution for the entire year or until we do a supplemental in 1979.

I hope that the authorizing committees will get their bills passed in a more timely fashion next year.

CONCLUSION

There are many, many other important items in this bill; each one provides assistance in a vital human service area. However, I will not take the time to explain each one in detail. The House and Senate reports accompanying the bill do an excellent job of explaining each program, and we have discussed many of them on the floor earlier this year.

Again, Mr. President, I emphasize that this is a big and complex bill—a bill requiring many, many hours of work. It is a bill which is under the President's budget. I hope that you will join me in supporting the adoption of the conference report on the 1979 Labor-HEW appropriations bill.

Mr. President, the Senator from Massachusetts and the rest of us think this is probably the most sensitive bill there is in Congress, dealing as it does with human needs. I think he did a yeoman job in helping get this total amount after a conference with the House.

I want to say to my friend from Oklahoma, who is a good budget watcher, that the bill is below the budget for one of the first times. We cut some and we added very little, but we spent many hours. We had 600 witnesses in sessions that lasted many, many hours, and then House and Senate floor action, and the conference took many days.

But I do not wish to burden the Senate with that further.

If the Senator from Massachusetts has anything to add, I am glad to yield to him.

Mr. BROOKE. Mr. President, I would agree with everything that has been said by my distinguished chairman.

I believe we have developed an acceptable conference report on the fiscal 1979 Labor-HEW appropriations bill and I am glad to recommend it to the Senate for adoption.

The bill that emerged from conference totals $56,054,029,000. This is $1.2 billion below the President's requests and almost $1 billion below the level provided by the House of Representatives.

That our bill is fiscally responsible should be readily apparent. I believe both the House and Senate were motivated to try to meet many of the Nation's social priorities within the lowest level of funding possible.

Our priorities are clear. We focus in particular on occupational health and mental health, on cancer and other biomedical research, on elementary, secondary, postsecondary and handicapped education, on bilingual education and on assistance to ease the path of those going through court-ordered or voluntary desegregation.

And for the first time we have begun a program to assist in the adoption of hard-to-place children.

Let me provide a few highlights from our bill.

LABOR

We provide $400,000 to continue the construction industry coordinating committees which are designed to lengthen the work year and reduce costs in the construction field.

We provide additional compliance staff and support personnel to deal with health and safety in the workplace.

We also accepted bill language that gives businessmen a chance to use consultation to avoid OSHA citations in certain circumstances.

HEALTH

The conferees agreed to a Senate increase of $20 million to continue the present level of operations at our Public Health Service hospitals which a recent HEW report said should be preserved and turned into community resources.

For the National Institutes of Health, we provide more for the fight against cancer, more for research into heart, lung and blood diseases, more for the battle against arthritis, diabetes, and other metabolic and digestive diseases, and more to strengthen the struggle against diseases of the eye.

With regard to the $31.3 million increase over the budget for the Neurological Institute, I urge HEW to provide sufficient funds to begin a significant implementation of the recommendations of the Commissions on Huntington's Disease and Epilepsy.

NIH is the finest biomedical research establishment on the face of the Earth and a first line of defense against the killing and crippling diseases which afflict mankind. We must maintain its operations at the most effective level possible, and I believe our bill does so.

In other areas of health, we provide additional funds for mental health research and training, two areas which the President's Commission on Mental Health said are in need of strengthening.

I was particularly pleased that the conferees restored most of the cut made in capitation grants for medical and other health professional schools. Present loan and grant programs still are not an adequate substitute for this special institutional assistance which must be continued.

I also was glad the conferees agreed to the Senate level of $7 million for traineeships to assist in the education of those who plan to work in the public health field.

The conferees also agreed to the Senate reduction of $265 million for medicaid to correct overestimating by the department. In addition, we cut the conference bill by a total of $1 billion to get control of fraud, abuse and waste in medicaid, public assistance, and other programs.

We did not intend this cut to be only a "goal" as some may contend. We wrote strong conference report language directing the Secretary of HEW to specify to Congress exactly how these savings will be achieved. If the administration fails to live up to this clear congressional directive, it will be held accountable for its failure. We mean business.

EDUCATION

We provide $3.4 billion for elementary and secondary education, most of it for title I compensatory education. This year the program of grants for disadvantaged schoolchildren will exceed $3 billion for the first time, enabling school districts to serve more than 5.8 million students. And we agreed to a level of $150 million for bilingual education, an increase of $15 million over last year. With the growth of Spanish-speaking and other bilingual groups, we need to develop bilingual programs and to train more bilingual instructors to meet their needs.

The bill provides $816 million for impact aid, a cut of $40 million from the

budget request. We restored the Senate's cut in payments for the so-called "A" children—mainly military dependents, whose presence impacts most heavily on local school districts—but retained the cut in payments for "B" children.

The conferees also provide increases in targeted aid and technical assistance to newly desegregating school districts, and increased by 20 percent the very effective magnet school program which has proven useful to districts undergoing both voluntary and court-ordered desegregation.

We provide increases for handicapped education preschool incentive grants to encourage more early identification of handicapped preschool children. We also strengthen manpower development to help reduce the shortage of trained handicapped education specialists.

The conferees agreed to a total of $3.9 for college student aid programs, two-thirds of which is for the basic opportunity grants (BOG's) program. BOG's was increased $460 million to a total of $2.6 billion. For the first time, the program is expanded to reach about 1 million needy middle-income students. Although there may be some overlap between BOG's and the pending tuition tax credit, BOG's will provide more significant assistance to the neediest middle-income families in 1979 than will the $150 tax credit. We also increased funding for the work study program to aid additional low income students.

I was pleased the conferees accepted the full Senate level of $14 million for educational research dissemination which serves to reduce waste and duplication in educational research.

The conferees also agreed to a Senate provision to fund a blue ribbon commission to study the social security system and recommend improvements. And I was pleased, too, that the conferees accepted the Senate's $5 million amendment to initiate a nationwide adoption information exchange system to assist in linking hard-to-place children with prospective adoptive parents.

As for the inevitable language amendments to the bill, the conferees:

Agreed to knock out proposed restrictions on affirmative action by the Departments of Labor and HEW.

Agreed with the Senate restriction against using Federal grant funds to pay the salaries of persons who lobby Congress.

Agreed to limit HEW's use of consultants.

And agreed not to interfere with implementation of the new standard for cotton dust.

The conferees drop language which would have restricted HEW from providing funds for the National Commission on the International Year of the Child, but require HEW to advise Congress how it plans to use any money it would spend.

However, the House and Senate remain in disagreement on the abortion amendment. The House, by a vote of 188 to 216, refused to substitute the 1978 compromise abortion language for the harsh amendment it has passed. This is most regrettable and could result in an impasse like last year's.

With respect to the conference report itself, I urge its adoption by the Senate.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. BROOKE. I yield.

Mr. MAGNUSON. I ask unanimous consent that a summary table of the action on the bill, a very complicated measure. the second largest appropriations bill, be printed in the RECORD in full.

There being no objection, the summary table was ordered to be printed in the RECORD, as follows:

The PRESIDING OFFICER. Is there further discussion?

Mr. BELLMON. Mr. President, will the Senator yield me 3 minutes?

Mr. MAGNUSON. Yes.

Mr. BELLMON. Mr. President, I congratulate the distinguished chairman of the Appropriations Committee, Senator MAGNUSON, and the distinguished ranking member of the subcommittee for the strong efforts which they made during work on the Labor/HEW appropriations bill to maintain budgetary discipline and help restrain inflationary pressures. I am well aware, and I think we are all aware, of the almost unbearable pressures and demands upon the chairman of the Appropriations Committee and upon Senator BROOKE by those who want increased appropriations for their favorite programs, and I think it is greatly to their credit that they have resisted those pressures. They brought back a bill that is adequate, but they have been able to stay inside the budget, and I congratulate them for this accomplishment.

There are two potential budgetary problems in this conference report, however, on which I feel the need to comment. First, this bill—and the budget—assume heroic savings, particularly in health programs. The budget assumes $0.7 billion in savings from hospital cost containment and $0.3 billion in savings from medicaid quality control. This bill, and the budget, assume an additional $1.0 billion in savings, to result from elimination of fraud and abuse in programs administered by the Departments of Labor and HEW.

I, for one, Mr. President, hope we can achieve these savings. We certainly must keep pressure on the administration to make every effort to achieve these savings. Bear in mind though, we have assumed the lion's share of these savings in entitlement programs. If we fall short of our expectations, Mr. President, we may find ourselves facing possible later requirements for additional appropriations, which would have to be provided, in amounts sufficient to satisfy these entitlements.

Second, I am disturbed Mr. President about the amounts involved in this conference agreement for basic education opportunity grants (BEOG's). In reports on both the first and second budget concurrent resolutions it was assumed that funds would be available for either an expanded BEOG's program or tuition tax credits, but not both. We had to include room for both because it is not technically possible to move an allowance, in the form of budget authority, from spending to the revenue side of the budget.

In the conference with the House on the second budget resolution, the Senate conferees secured the House's agreement to the following report language:

> The conferees believe enactment of both a tuition tax credit and a college tuition assistance spending program would be inefficient and duplicative. The Congress should choose between these two proposals.

It now seems certain, Mr. President, that we will have a tuition tax credit as the Senate has included it in the tax bill. Now this Labor-HEW conference agreement on Labor-HEW appropriations provides $500 million to extend the BEOG's program to families with incomes as high as $25,000. So, Mr. President, we are suddenly well on our way to providing middle income educational support through two new, fundamentally different approaches.

Indeed, Mr. President, we are actually adopting three approaches to aiding such families, because we are also taking the income ceiling off the guaranteed student loan program. I personally favor the loan approach to helping middle-income families pay their college costs. I am convinced that a carefully designed loan program is the only way we can realistically hope to provide help to the millions of students from middle-income families who will be in college in the years ahead.

I intend, therefore, to refine the student loan bank proposal, which I introduced as S. 3403 in August. I will introduce an improved version of that proposal when the Senate reconvenes in January.

I am aware, Mr. President that the distinguished chairman of the Appropriations Committee personally tried to get the conferees to delay the funding for the expanded BEOG's program until the spring supplemental. Having both an expanded BEOG's and a tuition tax credit bill this year is clearly inefficient—and inconsistent with our responsibility to make carefully considered choices among competing approaches to problems.

Mr. President, I do not intend to oppose this conference agreement because, on the whole, I feel that a responsible effort has been made to restrain Federal spending. However, because of optimistic assumptions regarding cost-savings from reductions in fraud and abuse and higher than expected expenditures for middle-income college assistance, it is essential that maximum efforts be made to maintain fiscal discipline and to resist pressures for nonessential increases in supplemental appropriations bills.

Mr. President, as one who is not a member of the subcommittee, but a member of the full committee, I believe I have some little knowledge of what the conferees went through, and I want to say, on behalf of the whole budget process, we think you have done an excellent job.

Mr. BROOKE. Mr. President, I thank the distinguished Senator from Oklahoma. As our chairman has said, the distinguished Senator from Oklahoma performs a great service for the Appropriations Committee. He also serves on the Budget Committee, where he is the ranking Republican member, and he is always there as the watchdog of the public Treasury. We have the greatest admiration and respect for him. He is very helpful to us in our deliberations, and we commend him for it, and

just wish to say we are happy to have him on our committee, as well as our chairman, who also is a member of the Senate Budget Committee as well. I believe the distinguished Senator from Florida (Mr. CHILES), who is now on the floor, also serves on the Budget Committee. We debate on many issues, but I have the greatest respect for LAWTON CHILES and the work that he performs on the Labor-HEW Appropriations Subcommittee and the full Appropriations Committee; and I say that with all the sincerity I can muster.

Mr. CHILES. I thank the distinguished Senator from Massachusetts.

Mr. BROOKE. Mr. President, I have some questions I would like to propound to the distinguished chairman, if he will permit.

Mr. President, we sent to the conference a bill, as the chairman has said, and the only matter of substance that was in disagreement was the substance of a matter pertaining——

Mr. MAGNUSON. Mr. President, will the Senator yield for a parliamentary matter?

Mr. BROOKE. Yes.

Mr. MAGNUSON. I think we ought to first move to put this matter before the Senate. I move that the Senate adopt the conference report. That will leave open the discussion.

Mr. BROOKE. All right.

Mr. MAGNUSON. Mr. President, I move the adoption of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. BROOKE. Mr. President, reserving the right to object, and I do not want to object, I wanted to propound these questions before I agreed, if the chairman will permit me.

Mr. MAGNUSON. But in the meantime there are certain technical matters.

Mr. BROOKE. Technical, yes. I agree to them.

The PRESIDING OFFICER The question is on agreeing to the conference report.

The amendments in disagreement will not be in order until the adoption of the conference report, to which the Senator from Massachusetts indicated he had some reservation.

Mr. MAGNUSON. Mr. President, I will move that the Senate approve the numbered amendments in disagreement en bloc at a later time if Senator BROOKE would like.

The PRESIDING OFFICER. Until the conference report has been acted on, the Chair is advised that that motion would not be in order.

Mr. MAGNUSON. I move the adoption of the conference report.

The PRESIDING OFFICER. All right. The question is on agreeing to the motion to adopt the conference report. Is there objection? Without objection, the conference report is——

Mr. BROOKE. Reserving the right to object, Mr. President——

Mr. GLENN. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Massachusetts reserves the right to object.

Mr. BROOKE. Mr. President, if the chairman will yield, I think we can resolve this matter and then accept the conference report.

Mr. MAGNUSON. All right.

Mr. BROOKE. It is my understanding that——

Mr. MAGNUSON. Just a minute. The Senator from Massachusetts wants to discuss, so the RECORD is clear, not any of the amendments in disagreement that I have talked about here, en bloc, but amendment No. 103, which deals with the problem of abortion.

Mr. BROOKE. That is correct, Mr. President, it is my understanding that it is the intention of our distinguished chairman to send back to the House of Representatives the language which ultimately the House and the Senate agreed upon in the 1978 Labor-HEW appropriations bill; is that correct? Is that the chairman's intention?

Mr. MAGNUSON. That is correct, yes.

Mr. BROOKE. It is your intention to substitute the language that was contained on abortion in the 1978 Labor-HEW appropriations bill for the language that is contained in the Senate version of the 1979 Labor-HEW appropriations bill?

Mr. MAGNUSON. Correct. And I would add further, the language that is in the Defense appropriation bill, which the House agreed to, which we passed just a few minutes ago, and also the language that the House sent over in the so-called continuing resolution. They have voted for that language now twice, but not for the language that we sent over in the HEW bill.

Mr. BROOKE. Mr. President, that is what is most disturbing to me: the inconsistency and the apparent hypocrisy of the House in sending to the Senate, in two instances, one on the Defense appropriations bill and the other on the Labor-HEW continuing resolution, the same abortion language which we agreed upon, we being the House and the Senate, in 1978, and at the same time sending to the Senate for approval the so-called hard language which the House and Senate could not agree upon in 1978.

Now, my question to my distinguished chairman is this: If we were to substitute the language that was contained in the Defense appropriations bill, which we have just agreed to and passed——

Mr. MAGNUSON. The present law.

Mr. BROOKE. And the language that is contained in the pending resolution, the Labor-HEW continuing resolution—if we substitute that language in the 1979 Labor-HEW appropriation bill and send it back to the House, what are the options of the House at that time?

Mr. MAGNUSON. The option of the House is they can accept the language, one, and I suppose that the House rules could allow someone to change the language. They have already acted upon the Senate language, and they probably would want to change that. Option three is to insist on the Hyde language, or some modification of it. They would not be very consistent if they did that.

I want to say to my colleague from Massachusetts that if they decide to change the language which we send over, and the Senator has explained it very fully, which is now law in the defense appropriations bill and in the continuing resolution, it is the law now, I would probably suggest that then we pass the continuing resolution on HEW which contains the language that they sent over, which is the law now. It will be the language we would send back to them. It seems to me that is logical, fair, and consistent.

Mr. BROOKE. Mr. President, I have very deep concerns.

Mr. MAGNUSON. I cannot speak for the Senate or for the House, but I am hopeful that they will accept the language that the Senator from Massachusetts and I have accepted, reluctantly, may I say, to get bills through in the defense appropriation and in the continuing resolution, which we have not passed yet but which we will pass.

Mr. BROOKE. Mr. President, again I want to voice my very serious concerns about following the course of action outlined by my distinguished chairman, Senator MAGNUSON, and substitute last year's abortion language in the Senate bill for the "medically necessary" language which has been adopted by the Senate by an overwhelming vote—I think 55 to 30—and by overwhelming votes last year as well. We all recall the long months of negotiation and compromise which resulted in the language which the House has sent over to us in continuing resolutions but will not send to us in the 1979 Labor-HEW bill; we obviously have the House taking the position that that 1978 language is all right so far as women in the defense establishment or the wives or daughters of defense personnel are concerned, but that another law should apply to poor women who are dependent upon medicaid.

I say, Mr. President, that is unconscionable. I am concerned, deeply concerned, by this economic test being applied by the House of Representatives as indicated by the action they have taken. We have tried to be as fair as we could be with the House.

If we send this back with the substitute language, Mr. President, I want to ask a parliamentary inquiry, and I do not know that our Parliamentarian can rule on what the House could do.

The PRESIDING OFFICER. The Senator will state it.

Mr. BROOKE. I would like to know what the status of the Senate bill will be as we send it back to the House to deliberate on substituted language which we would put into the Senate bill, as we send it back to the House for their consideration.

The PRESIDING OFFICER. The Senate amendment could be agreed to, disagreed to, amended and/or a conference request thereon.

Mr. BROOKE. I thank the Chair.

I was told today that the House could only vote up or down on the Senate bill

sent back with a substitute. I take it that the opinion of the Parliamentarian and the Chair is that that is not true, that the House has several options: They can either agree to the new language, they can reject the new language, or they can amend the new language and/or request a conference.

The PRESIDING OFFICER. The Parliamentarian advises that that would be the case in the Senate. The Parliamentarian is not in a position to advise as to what position the House itself might take on that issue. But if that issue were to arise in the Senate, the Senate would have at least those three options.

Mr. BROOKE. I thank the Chair and I thank the Parliamentarian.

That is the danger, Mr. President, as I see it.

That the House could reject it, I can understand. That the House could accept it, I can understand. But that the House can amend it and make it an even stronger provision than that which we agreed upon last year, and that which is contained in the continuing resolution for Labor-HEW this year, and that which was passed already in the Defense appropriations bill, is a matter of grave concern, not only to me, Mr. President, but to the Senate that has overwhelmingly voted for more humane language.

In other words, I am saying to the Senate that if we send this back with substitute language, which is the language of last year, we could have the House coming back with even stronger language, closer to the Hyde language, so-called. That is the clear danger.

Therefore, I ask my distinguished chairman again, if that happens what would my chairman do?

Mr. MAGNUSON. That is a danger that a lot of people do not consider a danger. It is up to them. If we send back our original Senate language, they can do the same thing.

Mr. BROOKE. That is right.

Mr. MAGNUSON. They can go back to the language of last year, they can make it stronger, they can adopt the Hyde language. That is up to them. Let us face that when we get to it. Let us make this attempt to ask the House to be reasonable and a little bit consistent in that they adopted the language they put in the Defense bill, they adopted the language that we have in the continuing resolution, and they adopted the language which is the law now and which is what we agreed upon last year. I hope they will accept that.

If they do not, the Senator for Massachusetts and I will have to have another conference on what we do. But we have to get moving some way.

Mr. BROOKE. Will the Senator yield?

Mr. MAGNUSON. Yes.

Mr. BROOKE. Why would it not be a better position for the Senate to send to the House the same language that the Senate had in its original bill which was so overwhelmingly supported by the Senate? In other words, why does the Senate not insist on its position and stand firm, send that back to the House, and let the House compromise with the Senate and come up with the abortion language they have included in the defense appropriation bill?

Mr. MAGNUSON. The only reason, I suppose, is a legislative tactical matter. I think we will just get the bill back again. I am hopeful we can finish this. I do not like continuing resolutions on HEW. The Senator from Massachusetts does not like them. I have seen too many continuing resolutions on HEW, even over this matter, where the department downtown interprets a continuing resolution just the way they want to interpret it. We have that same trouble on many, many other very important programs. This is not the only thing in HEW.

Mr. BROOKE. I quite agree with the chairman. But I believe the chairman understands the position of the Senator from Massachusetts.

Mr. MAGNUSON. I understand. Whatever we send back to the House they can change or accept and the Senator and I, and the rest of the Senate, will take a look at it.

I am hopeful that they will accept last year's language, because they have accepted it in the defense appropriation bill and in the continuing resolution.

If we had sent over from the Senate the same language as last year—we did not; it is a little different, not too much different but a little different—I am sure they would have accepted it. That is what I am trying to do, expedite things.

Mr. BROOKE. What assurance can the Senator——

Mr. MAGNUSON. I cannot give any assurance from the House.

Mr. BROOKE. No, not from the House. What assurance can the Senator give me as to what his position would be if the House sends back to the Senate the language that was contained in the House bill or any language that is stronger than the language contained in the continuing resolution?

Mr. MAGNUSON. I would have to take a look at it. I do not think they will do that.

My position now is that the better part of discretion in this whole matter is to try to get the House to accept this year's language in the law and if they come back with something entirely different, I am amenable to taking a look at it. I just do not want to go on here for another 8 or 9 months on this argument.

The Senator from Massachusetts knows how I feel about this personally. But once in a while—we cannot always have our own way all the time. Good legislation is a matter of compromise. People have some other opinions. I do not agree with them at all. The Senator from Massachusetts knows that I do not. But here we have quite a few thousand, thousands of HEW employees that will not get paid. I am trying to send over what I think is reasonable for them to accept.

If I were a Member of the House, I would not accept it.

Mr. BROOKE. Would accept it?

Mr. MAGNUSON. I might, but I would rather have stronger language than what we have in the Senate; that's why I would not support it. But I am not a Member of the House. They have their own opinions.

If the Senator from Massachusetts has a better plan than this, I shall be glad to listen to it.

I know the Senator and I can determine this. I do not know what other plan we can have. They rejected the Senate language. I am disappointed that they did. I do not like that. They put us in between the Hyde language, which I think—the Senator knows how strong I am against the Hyde language, but we did have some language last year that is the law now and they agreed to put that language in the Defense bill into the continuing resolution. To me, that is some indication that they probably would accept it on this bill.

Mr. BROOKE. If that indication were so clear, why did they not accept it on this bill, I ask, Mr. President? That is the point I am trying to make to the distinguished chairman, that they did not put it in this bill. They put it in the Defense bill but they would not put it in the HEW bill.

Mr. MAGNUSON. They actually did not vote on it because of a parliamentary point; it was on a motion to recede. No one discussed the language. The Senator and I know why some of them voted as some of them did. They are all running for reelection and they wanted to cast a vote, I guess, on this very controversial issue one way or another. But there comes a time when you have to quit arguing about these things and get something done, go someplace. Because HEW—to me, and the abortion problem is very important. But to me, after struggling with HEW, the health care of the country, all the things involved, education, they are a little bit more important. They have more priority.

I am merely suggesting—and if the Senator from Massachusetts does not want it, we can have the Senate express their opinion—that the better part is to get the bill done, and we live with this for a year.

They have agreed to it in the other two bills, and we send back to the House the language that I think—I hope—they will agree to. If they do not agree to it, the Senator and I have to sit down—not just he and I—and work with the Senate on what they will do about it. We have a fallback on the continuing resolution, which contains the language we are talking about.

Mr. BROOKE. Mr. President, I do not want to prolong this discussion.

Mr. MAGNUSON. The Senator and I have not that much time.

Mr. BROOKE. I shall ask unanimous consent for further time, then, on this, because I think it is that important.

Mr. BIDEN. Mr. President, what is that request again?

Mr. BROOKE. I have not made a request.

Mr. MAGNUSON. I shall yield to the Senator from Massachusetts whatever time I have.

Mr. BROOKE. All I want to say to the distinguished chairman is this: Everything the chairman said is correct. He knows as well as I do what we went through last year with some 20 votes and a conference which took 5½ months on this issue. Having gone through all that, it is not my intention, and I do not believe it is the chairman's intention, to let us retreat on this question of medicaid abortions.

We are not trying to move forward—which I would like to do and which I think the chairman would like to do. We were not satisfied with the language of last year's compromise. But certainly, we cannot afford to retreat any further than we did in 1978. We have not done it in the Defense appropriations bill and we have not done it in the continuing resolution. All I would like to get from the chairman is assurance that if the House sends back to us any language which, in anyway, represents a retreat from last year's position, we will then go back to the continuing resolution. That is what I put to the chairman most respectfully, because I think anything short of that, I just cannot agree with allowing this to be substituted.

Mr. MAGNUSON. The Senator from Massachusetts knows that that is what would be my intention. I think going back to last year's language is as far as I personally would like to go. But the Senator and I do not speak for the whole Senate.

Mr. BROOKE. But the Senate has spoken. The Senate wants to go the other way, by a vote of 55 to 30, to "medically necessary."

Mr. MAGNUSON. Now, wait a minute. The Senate might take another look at this because of the problem we have with the time element. Whether they want to continue to go that way, the Senator and I will have to ask them to vote again.

Mr. BROOKE. We are putting ourselves in a weaker position with the House.

Mr. MAGNUSON. I cannot guarantee just what we shall do. I think the Senate is now in a position where, first of all, they want to get out of here. Second, we have all kinds of things in this bill that are very important to me, very important.

Mr. BROOKE. To both of us, to all of us, to the country.

Mr. MAGNUSON. Legislation is a matter, sometimes, of compromise.

Mr. BROOKE. Can the chairman and I agree that so far as we are concerned, if the House retreats any farther——

Mr. MAGNUSON. How does the Senator define retreating? Retreating from his and my position?

Mr. BROOKE. No, retreating from the language which they put in the Defense bill and which they put in the continuing resolution and which is the law of the land today. That is what I mean by retreat.

Mr. MAGNUSON. If they retreat from that, I would surely stand up here and suggest that we pass a continuing resolution, which they have already approved, which includes the language we are talking about here tonight.

Mr. BROOKE. Then he and I would both stand firm on that. Is that correct?

Mr. MAGNUSON. Yes.

Mr. BROOKE. And hope the Senate would follow that leadership. With that assurance——

Mr. MAGNUSON. I do not think we should compromise any more on the language.

Mr. BROOKE. All right, that is what I want to be sure of.

Mr. MAGNUSON. I personally do not think that.

Mr. BROOKE. And I do not think that.

Mr. MAGNUSON. But in the last hours of the Senate, and I have been through a lot of them, it is a season where it is very hard to predict. People sometimes compromise some of their firm stands in an effort to get something done and close the session.

I will agree with the Senator that I would not go any further than last year's language.

Mr. BROOKE. That is the assurance I want from the Senator.

Mr. President, I am pleased——

Mr. MAGNUSON. I do not know if I will prevail or not.

Mr. BROOKE. Well, we will be here until January if we do not prevail, and beyond that.

But, anyway——

Mr. MAGNUSON. Well, I am not going to be here until January over this issue.

Mr. BROOKE. I hope the Senator will be home on Saturday afternoon, Mr. President.

Mr. MAGNUSON. I will stay a reasonable time, but I am not going to be around until January on this issue, I will say that.

Mr. BROOKE. The Senate may be around, Mr. President. But I think we all know what we are talking about.

Mr. MAGNUSON. We can have a continuing resolution.

Mr. BROOKE. That is right. Of course, we can.

Mr. MAGNUSON. But the only thing that bothers me on a continuing resolution, there are so many programs in HEW, education, health, all these things, labor, employment, we have them all. We are the repository of everything down there. When we pass a continuing resolution, we cannot quite spell out many things. So all the bureaucrats downtown interpret it just the way they want to.

But if we send them a bill, at least there is a report with some directions.

Mr. BROOKE. I quite agree.

Mr. MAGNUSON. And a continuing resolution has no report with it. No report at all. It does not tell them what to do.

Mr. BROOKE. We worked too hard all year.

Mr. MAGNUSON. Yes, on that, and we worked on unemployment, the disabled people. We worked on—name it, everything, health research, all these things. That is why I am holding out, trying to do the best I can that we should not have a continuing resolution.

Mr. BROOKE. All right.

Mr. MAGNUSON. But we may have to have one.

Mr. BROOKE. If the chairman will make his recommendation at this time, then I think there are several Senators who want to talk.

Mr. DURKIN. Will the Senator yield for just a moment?

Mr. BROOKE. The Senator from New Hampshire (Mr. DURKIN) wants to be heard.

Mr. MAGNUSON. May I do this first?

Mr. DURKIN. Yes.

● Mr. CRANSTON. Mr. President, I would like to clarify one aspect of the Labor-HEW Appropriations Act conference report with the distinguished chairman of the Committee on Appropriations (Mr. MAGNUSON) and the ranking minority member of the Labor-HEW Subcommittee (Mr. BROOKE).

The joint explanatory statement of the committee of conference on H.R. 12929 states:

The Conferees agree that the Office of Health Practices Assessment and the Office of Special Health Initiatives are to be phased out.

Mr. President, when the Senate was considering H.R. 12929, the Labor-HEW Appropriations Act for fiscal year 1979, both the distinguished Senator from Massachusetts (Mr. BROOKE) and I discussed the potential effect of the reduction in funds for the Office of Special Health Initiatives on the statutorily mandated positions of the Deputy Assistant Secretary for Population Affairs (DASPA) and staff of the Office of Population Affairs.

At that time Senator BROOKE stated:

Madam President, there is one very urgent matter and congressional directive which I must call to the attention of the Department of Health, Education, and Welfare, and I think it is best to do so at this time as we take up their appropriations bill.

The Family Planning Services and Population Research Act of 1970 established an Office of Population Affairs in HEW, to be headed by a Deputy Assistant Secretary for Population. This office was created to direct and coordinate all Government family planning research and service programs and related women's health and population issues and programs. No office, or program, established by Congress within HEW fills a more important need.

Yet the very clear and urgent congressional mandate establishing this office has been neglected, if not ignored, by HEW's failure to provide direction and staffing adequate to fulfill the functions defined by Congress.

Encouragingly, there is now a new Deputy Assistant Secretary of Population Affairs, Irvin Cushner, appointed last July 3. But HEW has demonstrated continued reluctance to adequately staff the office. The fiscal 1979 budget requested funds for eight positions, as part of a request for new health initiatives, to staff the office. However, these positions are not new, for they are already funded in the current year. Thus, the additional funds requested are not needed to support the eight positions and the Senate Appropriations Committee accordingly has not agreed to the request for the additional funds.

I wish to point out most emphatically, however, that the decision not to provide the additional funds does not signal any change in the congressional mandate establishing a strong Office of Population Affairs. For this office can and must be staffed with-

out additional funds. I would point out that the Assistant Secretary for Health alone has 200 positions presently available. The personnel needs of the Office of Population Affairs can easily be allocated from that large pool.

Clearly, funds adequate for staffing of the office have been provided in the fiscal 1979 bill, and clearly Congress intends that adequate staffing of the office be a top priority of the Department. I thus strongly urge departmental compliance with the congressional intent regarding the importance of this office.

Mr. President, at that time, I pointed out in my comments that—

The budget request always has included the funding for the position of the Deputy Assistant Secretary for Population Affairs and the staff of the Office of Population Affairs in the request for funding for the special initiatives program. To clarify that the Committee did not intend specifically to delete funding for these positions, the Committee pointed out, on page 82 of the Committee report, that "The Secretary shall draw from this large pool of positions (400 positions in the Office of the Assistant Secretary for Health) for any legislatively mandated positions as priorities permit."

I would like to clarify with the distinguished floor managers, my understanding, as the authorizing subcommittee chairman, that the statement made by Senator BROOKE and the language in the committee report to which I referred still is applicable.

Mr. MAGNUSON. The Senator from California is correct. The Senator from Massachusetts accurately described the intent of the committee, and that continues to be our intention.

Mr. BROOKE. I agree completely and thank my colleague from California for making this totally clear.

Mr. CRANSTON. I thank both my colleagues very much.●

● Mr. HATCH. Mr. President, those of us who oppose the Federal funding of abortions on demand for medicaid recipients, and I believe the majority of Senate Members feel this way, were greatly dismayed over how Secretary of HEW, Joseph Califano, interpreted this language, which undoubtedly will pass today. The potential for abuse is tremendous. I truly believe it is the intent of a majority of the Members of this body to have this language strictly interpreted and enforced and not have the language be an open door to allow any and all abortions. The best analysis I have seen respecting the inadequacies of the HEW regulations, was sent by 50 House Members to Secretary Califano on February 22, 1978. I would like this letter included in the record as part of the Senate's legislative history because it reflects the views of many of our Members as well:

FEBRUARY 22, 1978.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary of Health, Education, and Welfare, Washington, D.C.

DEAR MR. SECRETARY: As you know, on December 7, 1977, the U.S. Congress passed the following language on a Continuing Resolution, for the Department of Health, Education, and Welfare for the 1978 fiscal year. The purpose of this resolution is to limit HEW funding for abortions:

"None of the funds provided for in this paragraph shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term; or except for such medical procedures necessary for the victims of rape or incest, when such rape or incest has been reported promptly to a law enforcement agency or public health service; or except in those instances where severe and long-lasting physical health damage to the mother would result if the pregnancy were carried to term when so determined by two physicians.

"Nor are payments prohibited for drugs or devices to prevent the implantation of the fertilized ovum or for medical procedures necessary for the termination of an ectopic pregnancy.

"The Secretary shall promptly issue regulations and establish procedures to ensure that the provisions of this section are rigorously enforced. (Section 101 of Public Law 95-205)."

On January 26th, 1978, HEW issued regulations respecting the implementation of the above law.

In arriving at these regulations, your office had a series of basic policy regulations to decide. As Attorney General Bell correctly noted in his letter to you respecting the new regulations: ". . . for the most part, neither the language of the section nor its legislative history provides clear answers." The Attorney General further noted that you had broad discretion on deciding these basic policy issues.

In the opinion of the undersigned, you as Secretary of HEW used your broad discretion to resolve each of the basic questions of law in favor of the permissive position advocated by the Senate, as opposed to the far more restrictive position continually maintained in the House. But beyond this overly expansive rendering of the provisions of the new law, of equal or greater concern is the fact that the regulations do not provide for the enforcement of the provisions of the law (even liberally interpreted) in terms of: a) determining whether abortions are being performed for actual or fictitious serious physical health conditions, or b) for actual or fictitious incidents of rape or incest. Even assuming that HEW launches a major auditing effort to guarantee that federal funds are being expended only after signed certificates from physicians are received, there can be little hope that such an effort will reduce, by one, the number of fraudulent claims for reimbursement for abortions performed on healthy women; the same applies in cases of rape or incest reports. Finally, the regulations fail to provide for the needs of actual rape and incest victims after the abortion.

While, strictly speaking, the regulations do not in every instance fall outside the letter of the law, they most certainly violate the intent, purpose and spirit of the law; and in so doing they render meaningless the oft repeated commitment of the Carter administration to a strict limitation on the use of Federal funds for abortion.

Specific concerns with the regulations follow:

(A) The regulations are overly permissive in regard to each of the key provisions of the new law:

(1) "Medical procedures" are interpreted to include abortions. HEW could have interpreted medical procedures *not* to include abortion. To support such an interpretation, you could have cited the history of the use of the phrase "medical procedures" in a) last year's conference report, in b) this year's evolving floor language, and c) as the words were understood by the author of the final language that became law.

(2) Rape is interpreted as including statutory rape. The regulations could have limited rape to forced rape. To support such an interpretation HEW could have referred to Congressman George Mahon, Chairman of the House Appropriations Committee, when he said on the floor on December 7, that, "If I know anything about words, 'rape' means 'force,' . . ."

(3) Reporting requirements for rape and incest victims are lax and ineffective.

(a) Anyone can report the crime, even the secretary of an abortion clinic; and the report can be made after the abortion has been completed.

(b) The report can be made up to two months after the crime was allegedly committed. Here is a case where both the language in the law *and* the legislative history were *very* clear. Nevertheless, HEW adopted the weaker position. The law requires that incidents of rape and incest be "promptly reported." However, the regulations define the word "promptly" to mean a full 60 days. Inclusion of the word "promptly" was first proposed by Senator Helms who said that, "placing the word 'promptly' before the word 'reported' will eliminate the possibility that 2 or 3 months after the fact, a supposed victim could claim to have been raped when as a matter of fact she had not." The Senate initially defeated inclusion of the word because it was too strong, but later in an effort to come up with compromise language that the House would accept, they included it. But in including it, Senators Metzenbaum, Brooke and Magnuson said it did not mean what its original author, Helms, had said, but rather it meant months, even 90 days or more. When the House considered and debated the word 'promptly,' three leaders of the compromise forces, Chairman Mahon of the Appropriations Committee, Robert Michel, Minority Leader of the Labor/HEW Subcommittee and Representative Don Bonker all indicated that 'promptly' meant precisely that, promptly. Representative Michel referred to a 30-day range and Congressman Bonker said, "promptly does not mean it could be done 4 or 5 weeks later and reported and thus qualify for Medicaid abortion." In drating the regulations, HEW disregarded the common sense understanding of the word "promptly," disregarded the intent of the original author of the language, disregarded the intent of the compromise forces in the House who accepted and defined the language, and instead went along with the interpretation provided by by the pro-abortion leaders in the Senate.

(c) The report of the crime of rape or incest can even be made by mail, and need only include the victim's name, *not* address. Nowhere in the law or the legislative history is it indicated that the victim's address need *not* be reported. Inclusion of the victim's address was specifically referred to by Congressman Michel on the floor (12/6/77 *Cong. Rec.* 38395). Congressman Michel also said, "and then I would expect . . . some exchange or confirming of interrogation that would take place." (38394). Yet not even the *address* is required by HEW.

(B) The regulations fail to establish any procedures requiring accountability on the part of physicians who perform abortions on their patients. Thus, HEW will be unable to determine if the abortions that are allegedly performed for reasons of: a) danger to the life of the mother; b) physical health damage; or c) rape or incest, are actually being done for these reasons. (The potential for abuse in this area by physicians who perform abortions is not remote. Consider the following: In 1967 the state of California adopted an abortion statute that contained a mental health exception. In four years the number of legal abortions skyrocketed going from 700 a year to 116,749. Well over 90% of these abortions were done for reasons of mental health. The California General Assembly had attempted to avoid this abuse by defining mental health to mean "mental illness to the extent that the woman is dangerous to herself or to the person or property of others and is in need of supervision or restraint." In addition, the California statute

required three physicians certify that the abortion is necessary. Nevertheless, by 1971 well over 100,000 abortions were being performed, for this reason, annually in California. New York State didn't require the subterfuge of "mental health" in its statute. It reported only 2% done for this reason.) Consequently, rather than discouraging abuse in the area of abortion funding, the regulations invite abuse.

(1) It can reasonably be argued that the HEW regulations could have required that the health conditions that warrant an abortion must be a) pre-existing, or b) present when the abortion occurs. Then HEW could have indicated that its officials would randomly check medical records in order to:

(a) Ascertain if, in fact, doctors were abiding by the regulations; and if not,

(b) Take remedial action whenever abuse was detected.

Instead, HEW requires no medical documentation to support the need for an abortion and accepts as final the doctor's signature that the abortion was necessary. Furthermore, a high-ranking HEW official was quoted as saying, ". . . that checking up on 'fraud' would not include second guessing of doctors' medical decisions, by either state or federal officials". (*Washington Post* 1/27/78).

It is important to note here, that in an effort to justify this lack of accountability of physicians, the regulations misuse statements made by pro-life Congressmen. During the debate on the House floor, Congressmen Hyde of Illinois and Bauman of Maryland, expressed the concern that the exception of "severe and long-lasting physical health damage" would be abused. Congressman Hyde said, "The long and short of it is, whatever is serious, whatever is long-lasting, it is up to the doctor to decide. It can be a migraine headache or it could be varicose veins; it could be any condition that, in the doctor's medical judgement, is serious and would be long-lasting." (*Cong. Rec.* 12/6/77).

Congressman Bauman said: ". . . as to the mother's health exception it would be left to the doctor." (*Cong. Rec.* 12/7/77). HEW included these quotes in its regulations not in the context of accepting them as a warning, signaling the need to formulate regulations that would prevent abuse by holding physicians accountable, but rather as a justification for *not requiring* any concrete documentation of the need for the abortion at all.

(2) HEW could have required that the reporting of the crime of rape or incest include enough information so appropriate authorities could randomly investigate to see if the complaints of a crime were supported by any evidence. This would serve as a deterrent to anyone who would consider making a false complaint of being a victim of rape or incest. Instead, all that HEW requires is for the name of the individual to be sent by mail (by anyone) to a designated law enforcement agency or public health entity. What those institutions can do with only names is obvious, nothing.

(C) Finally, HEW showed an alarming lack of understanding in respect to the kinds of help the actual victims of rape and incest need; and what its responsibility to society in this area should be. In its exercise of tunnel vision to protect an individual from ever having to justify a claim of rape or incest in order to obtain a Medicaid abortion, HEW has effectively precluded the automatic involvement of responsible authorities, legal and social service, to intervene in an attempt to:

(1) Determine if, in fact, there has been the commission of a crime.

(2) If possible get the rapist off the street, so that other girls/women will not be victimized;

(3) Get the victim of an incestuous relationship out of the home; and

(4) Provide counseling where necessary for the victims of rape or incest.

HEW had the opportunity to come up with tight regulations that would have effectively limited federal funding to abortions that actually fit within the stipulations of the law as intended by Congress. By adopting stricter regulations HEW might have limited the number of federally funded abortions to 20,000 or less. In rejecting this possibility, HEW has opened the door to massive abuse.

Instead of implementing a compromise that would be observed and a statistical experience developed, the HEW regulations have nullified the House's efforts and fueled more controversy in the immediate future.

We respectfully urge you to re-draft these regulations more in keeping with the intent expressed by the amendment's author and the House.

Sincerely,

Tennyson Guyer, Larry McDonald, Frank Annunzio, Robert E. Badham, James A. Burke, Thomas N. Kindness, David C. Treen, Harold L. Volkmer, Robert A. Young, Delbert L. Latta, Joseph M. Gaydos, Trent Lott, Donald J. Mitchell, Romano L. Mazzoli, Tom Corcoran, Samuel L. Devine.

● Mr. ZORINSKY. Mr. President, my concern centers on one aspect of the Labor-HEW appropriation bill—the appropriation for school assistance in federally affected areas—commonly known as impact aid.

It is my understanding that the House allowance for payments under section 3 of Public Law 874 was the same as the administration's budget request—$711.3 million—and that request was intended to cover $337 million for children counted under section 3(a) of Public Law 874, the so-called "A" children, and $374.3 million for children counted under section 3(b) of Public Law 874, the "B" children. The Senate allowance reduced those amounts and the conference report compromises at $674 million—$317 million for "A" children and $357 million for "B" children.

I also understand the conferees intend that payments for "A" children be made fully to comply with the requirements of tier II of the payments schedule in section 5(c) of Public Law 874, and that the shortfall in funding the total of tier II is to be absorbed by ratably reducing payments for "B" children—including children of military personnel. Is my understanding of the situation correct?

Mr. MAGNUSON. Yes, that is correct.

Mr. ZORINSKY. I appreciate and support the chairman's effort to hold down spending—including unreasonable increases in impact aid. However, I am concerned that some heavily impacted school districts—like the Bellevue Public Schools in Nebraska—will be hurt unnecessarily and severely. These heavily impacted districts are so dependent upon impact aid that even what usually would be considered small reductions result in extreme difficulties for them—sometimes causing them to close for lack of funds. I had hoped that the conference report would permit full funding of the entitlements for heavily impacted districts, because of their unique problems in school finance. That apparently was not possible in this bill. My concerns about Bellevue are now heightened because if the allowance for payments for "A" and "B" children fall short of covering the level intended, then the Bellevue schools—and I am sure many other heavily impacted districts—will face budget reductions.

Reductions of greater than 5 percent are almost impossible to accomplish—especially when notice of the reductions is received well into the school year, as is the case now.

Could the chairman assure me that every effort will be made to determine as quickly as possible the actual amounts necessary to cover the payment levels intended and that if reductions of more than 5 percent of entitlements for heavily impacted school districts are then predictable, an effort to rectify the situation will be made in the first supplemental appropriation bill next year?

Mr. MAGNUSON. Yes, if such a serious situation develops. we could take another look at impact aid funding in the spring.

Mr. ZORINSKY. I would hope the distinguished chairman would give me his further assurance that it is his understanding of the committee intent that the Deparment of HEW grant the highest priority to funding of the "military B" entitlement, once "A" entitlements have been met.

Mr. MAGNUSON: The Office of Education must do everything possible to assure that school districts where there is a clear Federal impact will not be adversely affected. The committee will keep a close eye on this situation.

Mr. ZORINSKY. Mr. President, I thank the distinguished chairman of the Appropriations Committee for his assurances.

Mr. President, the Bellevue school district in Nebraska enrolls approximately 10,000 pupils; 60 percent are dependents of those employed at Offutt Air Force Base and Headquarters, Strategic Air Command. The 6,000 federally connected pupils are divided roughly equally between "A" pupils, whose parents live and work on base, and "B" pupils, whose parents either live or work on base. Of the "B" pupils, 85 percent are military "B" children.

Throughout all of Public Law 874 history, the Bellevue school district has been identified as one of a handful of severely impacted school districts.

Every major study of Public Law 874 has labeled the severely impacted districts such as Bellevue as prisoners of the Federal Government, and most such studies have recommended special funding provisions. Funding of such districts is so unique that attempting to provide

anything less than full entitlement has invariably resulted in a financial crisis for them.

Public Law 874 payments are based upon the premise that school districts obtain local tax revenue from two primary sources: First, the homes of the residents, and second, the commercial businesses and industry associated with those residents. Normally, a school district will obtain about one-half of its local tax funds from each of the two sources.

Military installations such as Offutt, however, are self-contained communities. These installations have their own restaurants, hospitals, banks, recreation facilities, and shops. The normal services associated with a large employer are simply not present in districts such as Bellevue. The payments for "A" students generally have been accepted by Congress as justified on the basis that no local tax base is available.

Obviously, the "B" military families pay taxes on their homes just as any other homeowner. Here the resemblance ceases. Few, if any, local taxes beyond those on the residence can be attributed to the military "B" family, which avails itself of the many tax exempt services provided on base.

Their place of employment is exempt from taxes. The Soldiers and Sailors Relief Act allows military families to maintain their legal residence in other States, so automobiles may be licensed as out-of-State. The latest figures indicate that one-third of the vehicles registered in Sarpy County, where the Bellevue district is located, are licensed as out-of-State. The annual county tax loss on out-of-State vehicle registrations is estimated at more than $1 million. State income taxes are paid to the State of legal residence for such families, and all sales and services on base are exempt from State and local sales taxes.

Offutt Air Force Base is one of the few Federal installations in the United States on which the Federal Government has exercised the principal of exclusive jurisdiction. Consequently, privately owned property located on base, such as utilities and leased equipment, is wholly exempt from local taxes.

Certainly, there is an intangible but very real benefit to the metropolitan area and to the State in having the Offutt military installation where it is. This intangible benefit, however, cannot be taxed by the school district. The local tax base per student, due to the Federal impaction, is next to the lowest of the 297 unified school districts in Nebraska; 19 percent of the district area is owned by the Federal Government, yet since the land was acquired prior to 1939, the district does not qualify for the special section 2 provisions of this law. The Bellevue district cannot be compensated for the continuing and substantial financial burdens imposed by Federal property ownership.

These unique circumstances justify funding the military "B" students at full entitlement. Indeed, the impact aid program was originally designed to meet the needs of districts like Bellevue. It is unfortunate and unfair that the Congress in continually expanding this program has strayed from both its original purpose and merits.●

● Mr. MATHIAS. Mr. President, I participated in the Joint House/Senate Conference Committee on Labor/HEW Appropriations for fiscal year 1979.

I have many interests in this bill. But recently the American people have become especially concerned about two major problems: The rapidly rising cost of health services and the depersonalization and dehumanization of the delivery of health services in our massive health care system. Solutions to these two major problems will rely on adequate funding levels for biomedical research and humanistic medicine.

One of the most seriously underfunded efforts of the National Institute of Health is in the vital field of digestive diseases. A recent report prepared by the Digestive Diseases Information Center describes the severity of the problem. According to the National Center of Health Statistics, digestive diseases are the leading cause of hospitalization in the general populace, the second major cause of disability and days lost from work, and the third leading cause of death. Digestive diseases rank second only to cardiovascular disease as a cause of visits to physicians.

It is for these reasons that I worked to help increase funding for the National Institute of Arthritis, Metabolism and Digestive Diseases. The Appropriations Conference report includes $287,869,000 for that Institute, an increase of $44 million over last year's appropriation.

Biomedical research not only pays for itself financially in a preventive medicine sense, but also in a social sense, in terms of lessened mortality among our people.

The problems of depersonalization and dehumanization permeate our health system. Humanistic medicine is designed to increase the quality of health care by increasing positive qualities of the relationships between and among health care providers and their clients.

The Institute for the Study of Humanistic Medicine and the Center for the Studies of the Person, under contract with the Bureau of Health Manpower, have during the past several years provided a firm conceptual basis upon which to achieve this goal.

Humanistic medicine is one of 21 separate categories funded under the interdisciplinary training program within the Health Resources Administration, which received a grand total of $7,140,500 for fiscal year 1979 from the Joint Conference Committee.

The national need for humanistic medicine training programs for health professional schools is clear. Health practitioners in this country receive the very best preparation in the science and technology of health, illness, and its treatment. This is as it should be. However, many practitioners graduate from our schools unable to use their scientific and technological knowledge and skills without offending, or in some cases violating, the sensibilities of their patients.

This is not as it should be, especially when training programs are available to assist practitioners in developing knowledge, appropriate attitudes, and specific skills to deliver health services in a way that respects the dignity of the patient. I am proud to acknowledge that the University of Maryland School of Medicine has already demonstrated leadership in developing such training programs.

The problem of depersonalization and dehumanization has received a great deal of attention in the media as well as from professionals. Congress has already recognized a need for such training and yet an appropriate funding mechanism has not been established. I will work to see that this approach to humanistic medicine not be neglected in the future.●

● Mr. PELL. Mr. President, the conference report now before us provides $2.6 billion in new moneys for the basic educational opportunity grant program. Under the family contribution schedule for that program, as amended by this legislation, there is a chance that there will not be sufficient funds to fully meet all entitlements under the basic grant program. I recognize the reasons behind agreeing to the $2.6 billion figure, since there is some uncertainty as to how much carryover funds remain in the program, and we do not yet know the fate of the higher education tax credit legislation. However, if the tax credits are not enacted, and if the carryover funds are not sufficient, with the additional funds included in this bill, to fully meet all basic grant entitlements, will the chairman consider the possibility of making a supplemental appropriation to fully meet these entitlements? And, if the chairman would entertain such a possibility, would he do so as early in the next session of Congress as possible?

Mr. MAGNUSON. We will be doing a supplemental early next year, probably in March or April. If all of these uncertainties have been cleared up, I think we could take another look at what would be needed to fund middle-income student assistance.

Mr. President, I understand that the parliamentary procedure is that I move that the Senate adopt the conference report.●

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Washington.

The conference report was agreed to.

Mr. MAGNUSON. And that is subject to discussion.

Then, Mr. President, because these other matters are not involved——

The PRESIDING OFFICER. The chairman put that motion before those amendments were in order.

The question is on agreeing to the conference report.

The conference report was agreed to.

The PRESIDING OFFICER. The clerk will state the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 9 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: including 9,258 full-time permanent positions,

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: including 2,062 full-time permanent positions.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 16 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , including 788 full-time permanent positions

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 23 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , including and not to exceed 649 full-time permanent positions

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 24 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $231,058,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 25 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , including 179 full-time permanent positions

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 29 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , including 258 full-time permanent positions

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 31 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , including 186 full-time permanent positions

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 32 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $73,512,000

Resolved, That the House recede from its disagreement to the amendment of the Seate numbered 33 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , including 405 full-time permanent positions

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 38 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , including 503 full-time permanent positions

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 39 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: including 4,780 full-time permanent positions and

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 42 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: , including 1,275 full-time permanent positions,

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 44 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $51,232,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 57 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *: Provided,* That the total amount paid with respect to entitlements under section 3(b) of that title shall not exceed the amount paid under that section in fiscal year 1978, and any reductions required thereby shall be derived by proportionately reducing the payments applied for by all local educational agencies under section 3(b).

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 72 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: That such funds may be expended notwithstanding the provisions of section 1208(a)(2) of the Higher Education Act: *Provided further,* That (1) Funds appropriated in this Act for Basic Educational Opportunity Grants under the Higher Education Act of 1965 shall be used to make basic grants consistent with the Schedule of Expected Family Contribution in effect as of October 1, 1978, except that (A) such schedule shall not have an assessment rate on parental discretionary income in excess of 10.5 per centum, (B) such schedule shall not reduce the maximum basic grant below $1,800, and (C) such schedule shall retain the provisions relating to independent students as were in effect for the academic year 1978–79.

(2) If funds contained in this Act available for basic educational opportunity grants are insufficient to satisfy fully all basic grant entitlements as determined by the Family Contribution Schedule as modified by paragraph (1), the amount paid wtih respect to each such entitlement shall be—

(A) the full amount in the case of any entitlement which exceeds $1,600;

(B) in the case of any entitlement which exceeds $1,200 but does not exceed $1,600, 90 per centum thereof;

(C) in the case of any entitlement which exceeds $1,000 but does not exceed $1,200, 75 per centum thereof;

(D) in the case of any entitlement which exceeds $800 but does not exceed $1,000, 70 per centum thereof;

(E) in the case of any entitlement which exceeds $600 but does not exceed $800, 65 per centum thereof; and

(F) in the case of any entitlement which does not exceed $600, 50 per centum thereof: *Provided further,*

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 80 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed by said amendment, insert: $134,472,000.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 92 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: *: Provided,* That $7,500,000 of the foregoing amount shall be apportioned for the purposes of the special projects authorized by section 2(c) of the Indochina Migration and Refugee Assistance Act of 1975, as amended, to be administered primarily by the private voluntary resettlement agencies

Resolved, That the House insist on its disagreement to the amendment of the Senate numbered 103 to the aforesaid bill.

The PRESIDING OFFICER. Now, the amendments the Senator——

Mr. MAGNUSON. Now, I ask unanimous consent that the Senate concur in several amendments, and I have them numbered here en bloc.

Mr. President, I ask unanimous consent that the Senate concur in the amendments of the House to the amendments of the Senate numbered 9, 15, 16, 23, 24, 25, 29, 31, 32, 33, 38, 39, 42, 44, 57, 72, 80, and 92, en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MAGNUSON. Now, Mr. President, I ask unanimous consent that it be in order to move that the Senate recede from its amendment No. 103 and agree to the House bill with a further amendment.

That is what we are talking about, another amendment, and I send that amendment to the desk, and that is the same language in the continuing resolution.

Mr. BROOKE. All right.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment.

Mr. MAGNUSON. Now, that is open for further discussion.

Several Senators addressed the Chair.

Mr. GLENN. Mr. President, I had a short colloquy to engage in with the distinguished manager of the bill, if he would care to do that at this time.

Mr. BROOKE. Yes.

Mr. MAGNUSON. Is the Senator asking about a statement on the national research and vocational education in Ohio? The Senator from Massachusetts and I think we know a great deal about it.

It is a pilot operation that has been doing a great job for the country. The House appropriated some figure and we agreed on another figure, $10 million.

It is in the second year of a 5-year contract.

We strongly urged the Senate proceed to the House figure, but we did not get any place with some of the other Members. But everybody was conscious of it.

We are going to keep it alive, if we can. Still, a supplemental is coming up.

I suggest to the Senator from Ohio who has quite a long colloquy here, that we put this in the RECORD and my answers about the 1978 level of spending.

Mr. GLENN. Mr. President, I would agree with the distinguished floor manager.

Mr. President, when the Labor-HEW appropriations bill was considered by the Senate, I expressed my strong support for full funding of the National Center for Research in Vocational Education. The Center is funded under the programs of national significance. The House had appropriated $29.5 million for this line item while the Senate had provided no funds. The Senate-House conferees agreed on a figure of $10 million.

The Center is in the second year of its 5-year contract and is supported by

$5.5 million in Federal money in 1978–79. It is designed to provide comprehensive planning, improved evaluation of vocational education programs, and leadership development. Information on policy and planning is also provided by the Center to the Office of Education at HEW. By providing these coordinated services at the national level it has helped to eliminate duplication of effort among the 50 States. If the funding is terminated the Office of Education estimates that over $10 million of previous investments of Federal money would be lost. The Center employs approximately 360 people.

During Senate consideration of the appropriations bill, I strongly urged that the Senate recede to the House figure. The distinguished chairman of the Appropriations Committee, WARREN MAGNUSON, agreed that the work of the Center was indeed very valuable and important. I understand the Center has a very high priority in the Office of Education. I intend to work with the Commissioner of Education to insure that $5.5 million of the money appropriated for the programs of national significance go to the support of the congressionally mandated National Center for Research in Vocational Education.

Mr. MAGNUSON. Mr. President. I commend the Senator from Ohio for his continued interest in the National Center. I would hope that the Commissioner of Education will make continuance for the National Center for Research in Vocational Education a high priority. It is also my hope that the Center's funding is maintained close to its 1978 level of $5.5 million.

Mr. PROXMIRE. Mr. President, what is the parliamentary situation? Is the HEW conference report pending or has it passed?

Mr. BROOKE. It is pending.

The PRESIDING OFFICER. The amendment in disagreement is pending and there is a time limit of 40 minutes that will expire in about 4 minutes.

Mr. PROXMIRE. I thank the Senator.

Mr. DURKIN. Will the Senator yield for 3 seconds?

Mr. MAGNUSON. Yes; but I wonder if my colleagues would let us finish this one amendment. Then the Senator from Massachusetts and I will be glad to answer all the questions.

The important thing is to agree to this particular amendment that I submitted.

Will the Chair put the motion to agree to the amendment?

Mr. BROOKE. They did.

Mr. MAGNUSON. Was it approved?

Mr. BROOKE. Yes.

Mr. MAGNUSON. All right.

Then I will be glad to yield to the Senator from Missouri.

The PRESIDING OFFICER. The Senate has not acted on the amendment. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BROOKE. Mr. President, I am going to ask unanimous consent that we have an additional 15 minutes for this conference report. We entered into a very short time agreement. The Senator from Missouri wants to be heard. The Senator from New Hampshire wants to be heard. I promised Senator HELMS 5 minutes, he wants to be heard.

Mr. BIDEN. Mr. President, reserving the right to object, I wonder if our colleagues know that a number of us made plans based on this expiring at 20 minutes of. I wonder if my colleagues would do what the rest of us have done, read the first line and put the rest in the RECORD.

I object. I will not wait for Senator HELMS.

The PRESIDING OFFICER. Objection is heard.

Mr. EAGLETON addressed the Chair.

Mr. BROOKE. I hope the Senator will reconsider. We have some time remaining. The Senator from New Hampshire——

Mr. EAGLETON. Mr. President, I would like to address a question, if I could, to the distinguished chairman.

I wish to inquire as to the intent of the conferees with respect to section 201 of the bill. Section 201 explicitly states that the reduction is to be achieved solely by the reduction of fraud, abuse, and waste, and that the amendment may not be construed to change any authorizing statute. The joint explanatory statement of the committee of conference states that "the conferees intend that reductions totaling $1 billion be made in the individual accounts covering the programs cited by the Inspector General * * * as containing waste, fraud, and abuse."

As I understand it, Mr. President, the conferees expect to see expenditures from the individual accounts reduced by $1 billion, but this is to be accomplished only by a reduction in the fraud, abuse, and waste, and in no way authorizes the Secretary of HEW to reduce amounts that he is legally obligated to pay to grantees and beneficiaries by statute. I would appreciate the chairman's clarification on this point.

Mr. MAGNUSON. The Senator from Missouri's interpretation is correct. The conferees have set a goal for HEW in this regard. The bill does not authorize the Secretary of HEW to reduce expenditures from those accounts below the amount of the appropriation. All amounts legally owing under the covered statutes must be paid to the limit of the full appropriation. This in no way should affect the legitimate payments, entitlements, and scores of things we have in HEW.

Mr. EAGLETON. I thank the distinguished chairman.

Mr. MAGNUSON. I think they will find more than $1 billion when they get through.

Mr. BROOKE. Mr. President, how much time remains?

The PRESIDING OFFICER (Mr. SASSER). All time has expired.

Mr. BROOKE. Mr. President, I ask unanimous consent that we may proceed for 5 additional minutes.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BROOKE. Mr. President, I yield to the Senator from North Carolina.

Mr. HELMS. I thank the distinguished Senator from Massachusetts.

Mr. President, the language that the Senate is adopting is the present language in the law. My position on this language is clear. But what is also clear is that this language represents an agreement between the Senate and the House that Federal funding of abortions should be strictly limited to only those circumstances specified and that no loopholes should exist.

Regarding the provision concerning the procedures necessary for the victims of rape and incest, some of my colleagues may remember that I initially offered language to that section requiring that such rape or incest be "promptly reported." That additional requirement ultimately became part of the compromise which both the House and Senate have determined to accept.

My intent in offering this provision, which the Senate has accepted, is to prevent fraud and abuse and encourage women who have been victimized to seek proper and effective treatment. In order to accomplish this purpose, the interpretation of this provision must rest on the purpose for obtaining medical treatment following an attack of rape. This purpose is threefold:

First, to obtain medical treatment to prevent venereal disease and to treat other physical injuries;

Second, to obtain evidence that the crime of rape has been committed; and

Third, to obtain treatment to prevent the occurrence of pregnancy.

Mr. President, for these three objectives to be met, and I repeat again that this is the purpose of the "prompt reporting" language, the crime must be reported and medical treatment obtained within 48 hours of the attack. If we are serious about preventing fraud and abuse, if we are serious about preventing loopholes, then the term "prompt reporting" must be interpreted as meaning a matter of hours and not a matter of months. However, this does not preclude a different interpretation of what prompt reporting means in cases of incest. But, in the matter of an attack of rape, we must encourage this early treatment not just to prevent fraud and abuse, but in the best medical interests of the women involved.

Mr. President, I would suggest that to meet our goal that fraud and abuse of Federal funds be prevented under this language, abortions for which Federal reimbursement are sought must be identified as abortions and not camouflaged with other language. For example, one common method of abortion is a dilitation and curettage which is often referred to as a "D & C." Under this procedure the surgeon inserts an instrument, a curette, up into the uterus and then cuts the placenta and baby into pieces and scrapes them into a basin. However a dilitation and curettage is sometimes performed on a woman who is not pregnant. The administration of the language we are adopting today must have adequate oversight provisions to assure that no abortions are listed as a dilitation and curettage done for purposes other than to terminate a woman's pregnancy.

Mr. BROOKE. Mr. President, I yield to the Senator from Indiana.

Mr. BAYH. Mr. President, I listened to the comments of the chairman and the distinguished ranking minority member in discussing this bill, and I must say that they adequately have touched the critical point of it.

I would just like to say how much I think Congress owes to Senator MAGNUSON and Senator BROOKE for the persistence and the leadership they have provided in this very important piece of legislation.

In my judgment, the Health, Education, and Welfare appropriation bill, more than any other piece of legislation, symbolizes what the soul of America is all about. We can talk a good game, but when it comes to showing the country and the world how we spend our money, that is what we really feel is important.

This is an important bill, and to our chairman I say that we are deeply indebted to him for the tireless effort he has expended on this bill.

Mr. MAGNUSON. I thank the Senator.

Mr. BAYH. It is my understanding that the conferees did not agree to any specific level for the Huntington's and Epilepsy Commissions.

A great deal of interest was expressed in this during the conference, and I am wondering if the chairman agrees with my impression that $4 to $6 million can be used for this purpose in the Neurology Institute.

Mr. MAGNUSON. $4 to $6 million should be used for this. The Senate increase and the conference-agreed-to figure is well over the House allowance.

In allocating these funds, the Neurology Institute should very closely follow the strong Senate report language supporting the work of these two fine Commissions.

Mr. BAYH. Mr. President, during the conference on this bill, I, as a conferee, was part of an agreement to move $2.4 million from the Center for Disease Control appropriations and $4.6 million from Assistant Secretary of Health appropriation, which were in the Senate-passed bill for smoking and health activities, to the National Institute of Environmental Health Sciences and General Medical Sciences. Half of these funds went to NIGMS and the other half went to NIEHS.

The National Institute of Environmental Health Sciences has a continuing responsibility for investigating the interaction of cigarette smoke and other environmental and occupational hazards. It is now studying the toxicity of carbon monoxide, including the effects of this gas on the heart. An understanding of these relationships is essential to the further development of avenues which are less hazardous and in gaining a better understanding of the effects of cigarette smoke on the nonsmoker.

The National Institute of General Medical Sciences conducts a program of research into the effects on the body of drugs and poisons. An expansion of this program, with emphasis on the interaction between cigarette smoking and these agents, is important to gain a better understanding of the effects of cigarette smoking in connection with these agents.

Since the funds I have referred to were included in the Senate bill for smoking and health education programs, it is my understanding that it is the intent of the conferees that these additional amounts provided to NIEHS and NIGMS should be used for expanded activities concerned with cigarette smoking.

Mr. BROOKE. Mr. President, if no one else wishes to speak, I am ready to yield back the remainder of my time.

ORDER FOR CONSIDERATION OF H.R. 14279

Mr. ROBERT C. BYRD. Mr. President, there is a time agreement on H.R. 14279, which has been cleared on both sides. It is a bill to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions.

I ask unanimous consent that upon the disposition of the pending conference report, the Senate proceed to the House message on H.R. 14279, that it be considered as having been read twice, and that the Senate proceed to its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

LABOR-HEW CONFERENCE REPORT

The Senate continued with the consideration of the conference report.

Mr. MAGNUSON. Mr. President, I hope we can get this matter over to the House as quickly as possible, because a lot of people are thinking about their pay.

Mr. President, I ask unanimous consent that the desk be authorized to make technical and clerical corrections in the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BROOKE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FLEXIBLE REGULATION OF INTEREST RATES

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of H.R. 14279, which will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 14279) to extend the authority for the flexible regulation of interest rates on deposits and accounts in depository institutions.

The Senate proceeded to consider the bill, which had been reported from the Committee on Banking, Housing, and Urban Affairs.

UP AMENDMENT NO. 2076

Mr. PROXMIRE. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an unprinted amendment numbered 2076.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following: That this Act may be cited as the "Financial Institutions Supervisory Act Amendments of 1977".

TITLE I—SUPERVISORY AUTHORITY OVER DEPOSITARY INSTITUTIONS

SEC. 101. The Federal Reserve Act is amended redesignating sections 29 and 30 as sections 30 and 31, respectively, and by inserting after section 28 a new section as follows:

"SEC. 29. (a) Any member bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such member bank who violates any provision of section 22 or 23A of this Act, or any regulation issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Comptroller of the Currency in the case of a national bank, or the Board in the case of a State member bank, by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or other) for or toward causing, bringing about, participating in, counseling, aiding or abetting a violation.

"(b) In determining the amount of the penalty the comptroller of the Currency or the Board, as the case may be, shall take into account the appropriateness of the penalty with respect to the size of the financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(c) The member bank or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subsection (d). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(d) Any member bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Comptroller of the Currency or the Board, as the case may be. The Comptroller of the Currency or the Board, as the case may be, shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Comptroller of the Currency or the Board, as the case may be, shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(e) If any member bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Comptroller of the Currency or the Board, as the case may be, shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United

States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(f) The Comptroller of the Currency and the Board shall promulgate regulations establishing procedures necessary to implement this section.

"(g) All penalties collected under authority of this section shall be covered into the Treasury of the United States.".

SEC. 102. Section 19 of the Federal Reserve Act is amended by adding at the end thereof the following new subsection:

"(i)(1) Any member bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such member bank who violates any provision of this section, or any regulation or order issued by the Board pursuant thereto, shall forfeit and pay a civil money penalty of not more than $100 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(2) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(3) The member bank or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in paragraph (4). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(4) Any member bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Board. The Board shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Board shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(5) If any member bank or person fails to pay an assessment after it has become a final and unappealable order or after the court of appeals has entered final judgment in favor of the agency, the Board shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(6) The Board shall promulgate regulations establishing procedures necessary to implement this subsection.

"(7) All penalties collected under authority of this subsection shall be covered into the Treasury of the United States.".

SEC. 103. Section 22 of the Federal Reserve Act is amended by adding at the end thereof the following new subsection:

"(h)(1) No member bank shall make any loan or extension of credit in any manner to any of its own officers, or to any person who directly or indirectly or acting through or in concert with one or more person owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such an officer or person, where the amount of such loan or extension of credit, when aggregated with the amount of all other loans or extensions of credit then outstanding by such bank to such officer or person and to all companies controlled by such officer or person, would exceed the limits on loans to a single borrower established by section 5200 of the Revised Statutes, as amended, in the case of a national banking association, or by the applicable State law in the case of a State member bank.

"(2) No member bank shall make any loan or extension of credit in any manner to any of its own officers or directors, or to any person who directly or indirectly or acting through or in concert with one or more persons owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such an officer, director, or person, where the amount of such loan or extension of credit, when aggregated with the amount of all other loans or extensions of credit then outstanding by such bank to such officer, director, or person and to all companies controlled by such officer, director, or person, would exceed $25,000, unless such loan or extension of credit is approved in advance by two-thirds of the entire board of directors with the interested party abstaining from participating directly or indirectly in the voting.

"(3) No member bank shall make any loan or extension of credit in any manner to any of its own officers or directors, or to any person who directly or acting through or in concert with one or more persons, owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such officer, director, or person, unless such loan or extension of credit is made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and does not involve more than the normal risk of repayment or present other unfavorable features.

"(4) For purposes of this subsection, an officer, director, or person shall be considered to have control of a company if said officer, director, or person, directly or indirectly or acting through or in concert with one or more other persons—

"(A) owns, controls, or has power to vote 25 per centum or more of any class of voting securities of the company;

"(B) controls in any manner the election of a majority of the directors of the company; or

"(C) has the power to exercise a controlling influence over the management or policies of such company.

"(5) For the purposes of this subsection—

"(A) the term 'person' means an individual or company;

"(B) the term 'company' means any corporation, partnership, business trust, association, joint venture, pool syndicate, sole proprietorship, unincorporated organization, any other form of business entity not specifically listed herein, or any other trust, but shall not include any insured bank or any corporation the majority of shares of which is owned by the United States or by any State;

"(C) the term 'extension of credit' has the same meaning assigned such term in the fourth paragraph of section 23A of this Act;

"(D) a person shall be deemed to be a 'director' of a member bank or a 'person who directly or indirectly or acting through or in concert with one or more persons owns, controls or has power to vote more than 10 per centum of any class of voting securities of a member bank' if such person has such relationship with any bank holding company of which such member is a subsidiary, as defined by the Bank Holding Company Act (12 U.S.C. 1841), or with any other subsidiary of such bank holding company; and

"(E) a person shall be deemed to be an 'officer' of a member bank if such person is an officer of any bank holding company of which such member bank is a subsidiary, as defined by the Bank Holding Company Act (12 U.S.C. 1841), or with any other subsidiary of such bank holding company.

"(6) The Board of Governors of the Federal Reserve System may prescribe such rules and regulations, including definitions of terms, as it deems necessary to effectuate the purposes and to prevent evasions of this subsection. The Board may further prescribe rules providing a reasonable period of time after the date of enactment of this subsection within which the amount of outstanding loans or extensions of credit made prior to such date of enactment shall be reduced so as to conform to the limitations of this subsection.".

SEC. 104. (a) Section 5 of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844), is amended by adding at the end thereof the following new subsection:

"(e)(1) Notwithstanding any other provision of this Act, the Board may, whenever it has reasonable cause to believe that the continuation by a bank holding company of any activity or of ownership or control of any of its nonbank subsidiaries, other than a nonbank subsidiary of a bank, constitutes a serious risk to the financial safety, soundness, or stability of a bank holding company subsidiary bank and is inconsistent with sound banking principles or with the purposes of this Act or with the Financial Institutions Supervisory Act of 1966, order the bank holding company or any such nonbank subsidiaries, after due notice and opportunity for hearing, and after considering the views of the bank's primary supervisor, which shall be the Comptroller of the Currency in the case of a national bank or the Federal Deposit Insurance Corporation and the appropriate State supervisory authority in the case of an insured nonmember bank, to terminate such activities or to terminate (within one hundred and twenty days or such longer period as the Board may direct in unusual circumstances) its ownership or control of any such subsidiary either by sale or by distribution of the shares of the subsidiary to the shareholders of the bank holding company. Such distribution shall be pro rata with respect to all of the shareholders of the distributing bank holding company, and the holding company shall not make any charge to its shareholders arising out of such a distribution.

"(2) The Board may in its discretion apply to the United States district court within the jurisdiction of which the principal office of the holding company is located, for the enforcement of any effective and outstanding order issued under this section, and such court shall have jurisdiction and power to order and require compliance therewith, but except as provided in section 9 of this Act, no court shall have jurisdiction to affect by injunction or otherwise the issuance or enforcement of any notice or order under this section, or to review, modify, suspend, terminate, or set aside any such notice or order.".

(b)(1) Section 408(h) of the National Housing Act (12 U.S.C. 1730a(h)) is amended by adding immediately after "under subsection (a)(2)(D)" in paragraphs (3)(A) and

(3)(B) of subsection (h) the phrase "or under subsection (h)(5)" and is amended by redesignating paragraph (h)(5) as (h)(6) and by adding a new paragraph (h)(5) to read as follows:

"(5)(A) Notwithstanding any other provision of this section, the Corporation may, whenever it has reasonable cause to believe that the continuation by a savings and loan holding company of any activity or of ownership or control of any of its noninsured subsidiaries constitutes a serious risk to the financial safety, soundness, or stability of a savings and loan holding company's subsidiary insured institution and is inconsistent with the sound operation of an insured savings and loan institution or with the purposes of this section or with the Financial Institutions Supervisory Act, order the savings and loan holding company or any of its subsidiaries, after due notice and opportunity for hearing, to terminate such activities or to terminate (within one hundred and twenty days or such longer period as the Corporation directs in unusual circumstances) its ownership or control of any such noninsured subsidiary either by sale or by distribution of the shares of the subsidiary to the shareholders of the savings and loan holding company. Such distribution shall be pro rata with respect to all of the shareholders of the distributing savings and loan holding company, and the holding company shall not make any charge to its shareholders arising out of such a distribution.".

"(B) The Corporation may in its discretion apply to the United States district court within the jurisdiction of which the principal office of the company is located, for the enforcement of any effective and outstanding order issued under this section, and such court shall have jurisdiction and power to order and require compliance therewith, but except as provided in subsection (k), no court shall have jurisdiction to affect by injunction or otherwise the issuance or enforcement of any notice or order under this section to review, modify, suspend, terminate, or set aside any such notice or order.".

(2) Section 406(f) of the National Housing Act (12 U.S.C. 1729(f)) is amended to read as follows:

"(f)(1) In order to prevent a default in an insured institution or in order to restore an insured institution in default to normal operation, the Corporation is authorized, in its discretion and upon such terms and conditions as it may determine, to make loans to, to purchase the assets of, or to make a contribution to, an insured institution or an insured institution in default.

"(2) Whenever an insured institution is in default or, in the judgment of the Corporation, is in danger of default, the Corporation may, in order to facilitate a merger or consolidation of such insured institution with another insured institution or the sale of the assets of such insured institution and the assumption of its liabilities by another insured institution and upon such terms and conditions as the Corporation may determine, purchase any such assets or assume any such liabilities or make loans to such other insured institution, or guarantee such other insured institution against loss by reason of its merging or consolidating with or assuming the liabilities and purchasing the assets of such insured institution in or in danger of default.

"(3) No contribution or guarantee shall be made pursuant to paragraphs (1) or (2) of this subsection (f) in an amount in excess of that which the Corporation finds to be reasonably necessary to save the cost of liquidating such insured institution in or in danger of default, but if the Corporation determines that the continued operation of such institution is essential to provide adequate savings or home financing services in its community, such limitation upon the amount of a contribution or guarantee shall not apply.".

SEC. 105. (a) Section 8 of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1847), is amended by redesignating "SEC. 8." as "SEC. 8. (a)" and by adding a new subsection (b) to read as follows:

"(b)(1) Any company which violates or any individual who participates in a violation of any provision of this Act, or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board by written notice. As used in the section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(2) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the company or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(3) The company or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in section 9. If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(4) If any company or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the Board, the Board shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(5) The Board shall promulgate regulations establishing procedures necessary to implement this subsection.

"(6) All penalties collected under authority of this subsection shall be covered into the Treasury of the United States.".

(b) Section 5 of the Bank Holding Company Act is amended by adding the following new paragraph:

"(e) In the course of or in connection with an application, examination, investigation or other proceeding under this Act, the Board, or any member or designated representative thereof, including any person designated to conduct any hearing under this Act, shall have the power to administer oaths and affirmations, to take or cause to be taken depositions, and to issue, revoke, quash, or modify subpenas and subpenas duces tecum; and the Board is empowered to make rules and regulations to effectuate the purposes of this subsection. The attendance of witnesses and the production of documents provided for in this subsection may be required from any place in any State or in any territory or other place subject to the jurisdiction of the United States at any designated place where such proceeding is being conducted. Any party to proceedings under this Act may apply to the United States District Court for the District of Columbia, or the United States district court for the judicial district or the United States court in any territory in which such proceeding is being conducted or where the witness resides or carries on business, for the enforcement of any subpena or subpena duces tecum issued pursuant to this subsection, and such courts shall have jurisdiction and power to order and require compliance therewith. Witnesses subpenaed under this subsection shall be paid the same fees and mileage that are paid witnesses in the district courts of the United States. Any service required under this subsection may be made by registered mail, or in such other manner reasonably calculated to give actual notice as the Board may by regulation or otherwise provide. Any court having jurisdiction of any proceeding instituted under this subsection may allow to any such party such reasonable expenses and attorneys' fees as it deems just and proper. Any person who willfully shall fail or refuse to attend and testify or to answer any lawful inquiry or to produce books, papers, correspondence, memoranda, contracts, agreements, or other records, if in such person's power so to do, in obedience to the subpena of the Board, shall be guilty of a misdemeanor and, upon conviction, shall be subject to a fine of not more than $1,000 or to imprisonment for a term of not more than one year or both.".

(c) Section 408(j) of the National Housing Act (12 U.S.C. 1730a(j)), is amended by adding thereto a new paragraph (j)(4) to read as follows:

"(4)(A) Any company which violates or any individual who participates in a violation of any provision of this section, or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in the section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the company or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The company or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any company or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the company is located, or in the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within thirty days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Corporation shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any company or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In

such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 106. (a)(1) Section 8(b) of the Federal Deposit Insurance Act (12 U.S.C. 1818(b)) is amended to read as follows:

"(b)(1) If, in the opinion of the appropriate Federal banking agency, any insured bank, bank which has insured deposits, or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such a bank is engaging or has engaged, or the agency has reasonable cause to believe that the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank is about to engage, in an unsafe or unsound practice in conducting the business of such bank, or is violating or has violated, or the agency has reasonable cause to believe that the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank is about to violate, a law, rule, or regulation, or any condition imposed in writing by the agency in connection with the granting of any application or other request by the bank or any written agreement entered into with the agency, the agency may issue and serve upon the bank or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the bank or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the agency at the request of any party so served. Unless the party or parties so served shall appear at the hearing personally or by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the agency shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the agency may issue and serve upon the bank or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the bank or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such bank to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after the service of such order upon the bank or other person concerned (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable as provided therein, except to such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court.".

(2) Section 407(e) of the National Housing Act (12 U.S.C. 1730(e)) is amended to read as follows:

"(e)(1) If, in the opinion of the Corporation, any insured institution, institution which has insured accounts or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is engaging or has engaged, or the Corporation has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to engage, in an unsafe or unsound practice in conducting the business of such institution, or is violating or has violated, or the Corporation has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to violate, a law, rule, or regulation, or any condition imposed in writing by the Corporation in connection with the granting of any application or other request by the institution or any written agreement entered into with the Corporation, including any agreement entered into under section 403 of this title, the Corporation may issue and serve upon the institution or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Corporation at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Corporation shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Corporation may issue and serve upon the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the institution or directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such institution to cease and desist from the same, and, further to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the institution or the party or parties so served (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Corporation or a reviewing court.

"(3) This subsection and subsections (f), (g), (h), (j), (k), (m)(3), (n), (o), (p), and (q) of this section shall apply to any savings and loan holding company, and to any subsidiary (other than an insured institution) of a savings and loan holding company, as those terms are defined in section 408 of this title, and to any affiliate service corporate of an insured institution in the same manner as they apply to insured institutions.".

(3) Section 5(d)(2) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(2)), is amended to read as follows:

"(2)(A) If, in the opinion of the Board, any association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is engaging or has engaged, or the Board has reasonable cause to believe that the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is about to engage, in an unsafe or unsound practice in conducting the business of such association, or is violating or has violated or the Board has reasonable cause to believe that the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is about to violate, a law, rule, or regulation, or charter, or any condition imposed in writing by the Board in connection with the granting of any application or other request by the association or any written agreement entered into with the Board, the Board may issue and serve upon the association or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the association or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such association. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Board at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Board shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Board may issue and serve upon the association or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such association an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the association or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such association to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(B) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the association or the party or parties so served (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable, except to such extent as it is stayed, modified, terminated, or set aside by action of the Board or a reviewing court.

"(C) This paragraph and paragraphs (3), (4), (5), (7), (8), (9), (10), (12) (A) and (B), (13), and (14) of this subsection (d) shall apply to any savings and loan holding company or to any subsidiary (other than an association) of a savings and loan holding company, as those terms are defined in section 408 of the National Housing Act (12 U.S.C. 1730a), as amended, and to any affiliate service corporation of an association in the same manner as they apply to an association.".

(4) Section 206(e) of the Federal Credit Union Act (12 U.S.C. 1786(e)(1)) is amended to read as follows:

"(e)(1) If, in the opinion of the Adminis-

trator, any insured credit union, credit union which has insured accounts, or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such a credit union is engaging or has engaged, or the Administrator has reasonable cause to believe that the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union is about to engage, in an unsafe or unsound practice in conducting the business of such credit union, or is violating or has violated, or the Administrator has reasonable cause to believe that the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union is about to violate, a law, rule, or regulation, or any condition imposed in writing by the Administrator in connection with the granting of any application or other request by the credit union or any written agreement entered into with the Administrator, the Administrator may issue and serve upon the credit union or such director, officer, committee member, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the credit union or the director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Administrator at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Administrator shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Administrator may issue and serve upon the credit union or the director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the credit union or its directors, officers, committee members, employees, agents, and other persons participating in the conduct of the affairs of such credit union to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after the service of such order upon the credit union or other person concerned (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable as provided therein, except to such extent as it is stayed, modified, terminated, or set aside by action of the Administrator or a reviewing court.".

(b) Section 8(b)(3) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818(b)(3)), is amended: (1) by inserting after "Bank Holding Company Act of 1956" a comma and the following: "and to any organization organized and operated under section 25A of the Federal Reserve Act or operating under section 25 of the Federal Reserve Act,"; and (2) by adding at the end thereof the following new sentence: "Nothing in this subsection or in subsection (c) of this section shall authorize any Federal banking agency, other than the Board of Governors of the Federal Reserve System, to issue a notice of charges or cease-and-desist order against a bank holding company or any subsidiary thereof (other than a bank or subsidiary of that bank).".

(c)(1) Sections 8(c) (1) and (2) of the Federal Deposit Insurance Act (12 U.S.C. 1818(c) (1) and (2)) are amended to read as follows:

"(c)(1) Whenever the appropriate Federal banking agency shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank pursuant to paragraph (1) of subsection (b) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the bank, or is likely to seriously weaken the condition of the bank or otherwise seriously prejudice the interests of its depositors prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (b) of this section, the agency may issue a temporary order requiring the bank or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition, or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the bank or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the agency shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the bank or such director, officer, employee, agent, or other person, until the effective date of such order.

"(2) Within ten days after the bank concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank has been served with a temporary cease-and-desist order, the bank or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the bank is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the bank or such director, officer, employee, agent, or other person under paragraph (1) of subsection (b) of this section, and such court shall have jurisdiction to issue such injunction.".

(2) Section 407(f) (1) and (2) of the National Housing Act (12 U.S.C. 1730(f) (1) and (2)) is amended to read as follows:

"(f)(1) Whenever the Corporation shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution or any institution any of the accounts of which are insured pursuant to paragraph (1) of subsection (e) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the institution, or is likely to seriously weaken the condition of the institution or otherwise seriously prejudice the interests of its insured members prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (c) of this section, the Corporation may issue a temporary order requiring the institution or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the institution and/or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Corporation shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the institution or such director, officer, employee, agent, or other person, until the effective date of any such order.

"(2) Within ten days after the institution concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution has been served with a temporary cease-and-desist order, the institution or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the principal office of the institution is located, or the United State District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the institution or such director, officer, employee, agent, or other person under paragraph (1) of subsection (e) of this section, and such court shall have jurisdiction to issue such injunction.".

(3) Section 5(d)(3) (A) and (B) of the Home Owners Loan Act, as amended (12 U.S.C. 1464(d)(3) (A) and (B)), is amended to read as follows:

"(3)(A) Whenever the Board shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association pursuant to paragraph (2) (A) of this subsection, or the continuation thereof, is likely to cause insolvency (as defined in paragraph (6)(A)(i) of this subsection) or substantial dissipation of assets or earnings of the association, or is likely to seriously weaken the condition of the association or otherwise seriously prejudice the interests of its savings account holders prior to the completion of the proceedings conducted pursuant to paragraph (2)(A) of this subsection the Board may issue a temporary order requiring the association or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the association or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution and, unless set aside, limited, or suspended by a court in proceedings authorized by subparagraph (B) of this paragraph, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Board shall dismiss the charges specified in such notice or if a cease-and-desist

order is issued against the association or such director, officer, employee, agent, or other person, until the effective date of such order.

"(B) Within ten days after the association concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association has been served with a temporary cease-and-desist order, the association or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the association is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the bank or such director, officer, employee, agent, or other person under paragraph (2)(A) of this subsection, and such court shall have jurisdiction to issue such injunction.".

(4) Sections 206(f) (1) and (2) of the Federal Credit Union Act (12 U.S.C. 1786(f) (1) and (2)) are amended to read as follows:

"(f)(1) Whenever the Administrator shall determine that the violation or threatened violation or the unsafe or unusual practice or practices, specified in the notice of charges served upon the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union pursuant to paragraph (1) of subsection (e) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the credit union, or is likely to seriously weaken the condition of the credit union or otherwise seriously prejudice the interests of its insured members prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (e) of this section, the Administrator may issue a temporary order requiring the credit union of such director, officer, committee member, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition, or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the credit union or such director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Administration shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the credit union or such director, officer, committee member, employee, agent, or other person, until the effective date of such order.

"(2) Within ten days after the credit union concerned or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union has been served with a temporary cease-and-desist order, the credit union or such director, officer, committee member, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the credit union is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the credit union or such director, officer, committee member, employee, agent, or other person under paragraph (1) of subsection (e) of this section, and such court shall have jurisdiction to issue such injunction.".

(d)(1) Section 8(e) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818 (e)), is amended to read as follows:

"(e)(1) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the bank, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the agency determines that the bank has suffered or will probably suffer substantial financial loss or other damage or that the interests of its depositors could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the bank, the agency may serve upon such director or officer a written notice of its intention to remove him from office.

"(2) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank, by conduct or practice with respect to another insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the appropriate Federal banking agency, any other person participating in the conduct of the affairs of an insured bank, by conduct or practice with respect to such bank or other insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to participate in the conduct of the affairs of such insured bank, the agency may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the bank.

"(3) In respect to any director or officer of an insured bank or any other person referred to in paragraph (1) or (2) of this subsection, the appropriate Federal banking agency may, if it deems it necessary for the protection of the bank or the interests of its depositors, by written notice to such effect served upon such director, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the bank. Such suspension or prohibition shall become effective upon service of such notice and, unless stayed by a court in proceedings authorized by subsection (f) of this section, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the agency shall dismiss the charges specified in such notice, or, if an order of removal or prohibition is issued against the director or officer or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the bank of which he is a director or officer or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, officer, or other person from office or to prohibit his participation in the conduct of the affairs of an insured bank, shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after the date of service of such notice, unless an earlier or a later date is set by the agency at the request of (A) such director or officer or other person, and for good cause shown, or (B) the Attorney General of the United States. Unless such director, officer, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal or prohibition. In the event of such consent, or if upon the record made at any such hearing the agency shall find that any of the grounds specified in such notice have been established, the agency may issue such orders of suspension or removal from office, or prohibition from participation in the conduct of the affairs of the bank, as it may deem appropriate. In any action brought under this section by the Comptroller of the Currency in respect to any director, officer or other person with respect to a national banking association or a District bank, the findings and conclusions of the Administrative Law Judge shall be certified to the Board of Governors of the Federal Reserve System for the determination of whether any order shall issue. Any such order shall become effective at the expiration of thirty days after service upon such bank and the director, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court.".

(2) Section 407(g) (1) and (2) of the National Housing Act (12 U.S.C. 1730(g) (1) and (2)) is amended to read as follows:

"(g)(1) Whenever, in the opinion of the Corporation, any director or officer of an insured institution has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the institution or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Corporation determines that the institution has suffered or will probably suffer substantial financial loss or other damage or that the interests of its insured members could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the institution, the Corporation may serve upon such director or officer a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the institution.

"(2) Whenever, in the opinion of the Corporation, any director or officer of an insured institution, by conduct or practice with respect to another insured institution or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Corporation, any other person participating in the conduct of the affairs of an insured institution, by conduct or practice with re-

spect to such institution or other insure institution or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and in addition, has evidenced his unfitness to participate in the conduct of affairs of such insured institution, the Corporation may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the institution.".

(3) Section 5(d)(4) (A) and (B) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(4) (A) and (B)) is amended to read as follows:

"(4)(A) Whenever, in the opinion of the Board, any director or officer of an association has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the association, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Board determines that the association has suffered or will probably suffer substantial financial loss or other damage or that the interests of its savings account holders could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the association, the Board may serve upon such director or officer a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the association.

"(B) Whenever, in the opinion of the Board, any director or officer of an association, by conduct or practice with respect to another savings and loan association or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Board, any other person participating in the conduct of the affairs of an association, by conduct or practice with respect to such association or other savings and loan association or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to participate in the conduct of the affairs of such association, the Board may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the association.".

(4) Section 206(g) (3) and (4) of the Federal Credit Union Act, as amended (12 U.S.C. 1786(g) (3) and (4)), is amended to read as follows:

"(3) In respect to any director, committee member, or officer of an insured credit union or any other person referred to in paragraph (1) or (2) of this subsection, the Administrator may, if he deems it necessary for the protection of the credit union or the interests of its members, by written notice to such effect served upon such director, committee member, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the credit union. Such suspension or prohibition shall become effective upon service of such notice and, unless stayed by a court in proceedings authorized by subsection (i) of this section, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the Administrator shall dismiss the charges specified in such notice, or, if an order of removal and prohibition is issued against the director committee member, or office or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the credit union of which he is a director, committee member, or officer or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, committee member, officer, or other person from office or to prohibit his participation in the conduct of the affairs of an insured credit union, shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearings pursuant to the notice served under thirty days nor later than sixty days after the date of service of such notice, unless an earlier or a later date is set by the Administrator at the request of (A) such director, committee member, or officer, or other person, and for good cause shown, or (B) the Attorney General of the United States. Unless such director, committee member, officer, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal or prohibition. In the event of such consent, or if upon the record made at any such hearing the Administrator shall find that any of the grounds specified in such notice have been established, the Administrator may issue such orders of suspension or removal from office, or prohibition from participation in the conduct of the affairs of the credit union, as it may deem appropriate. Any such order shall become effective at the expiration of thirty days after service upon such cridit union and the director, committee member, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is staved, modified, terminated, or set aside by action of the Admipistrator or a reviewing court.".

(e)(1) Section 8(i) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818 (i)), is amended by redesignating section 8(i) as 8(i)(1) and by adding at the end thereof a new paragraph as follows:

"(2)(A) Any insured bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such a bank who violates the terms of any order which has become final and was issued pursuant to subsection (b) or (c) of this section, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the appropriate Federal banking agency by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty the appropriate Federal banking agency shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The insured bank or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (iv). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any insured bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the insured bank is located, or the United States Court of Appeals for the District of Columbia Circuit by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the appropriate Federal banking agency. The agency shall promptly certify and file in such Court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any insured bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the agency shall refer the matter in the Attorney General, who shall recover the amount assured by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to below.

"(F) Each Federal banking agency shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this section shall be covered into the Treasury of the United States.".

(2) Section 407(k) of the National Housing Act (12 U.S.C. 1730(k)) is amended by adding a new paragraph so as to read as follows:

"(3)(A) Any insured institution or any institution any of the accounts of which are insured which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such an institution who violates the terms of any order which has become final and was issued pursuant to subsection (e) or (f) of this section shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting violation.

"(B) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resource and good faith of the insured institution or person charges the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The insured institution or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to sec-

tion 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any insured institution or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the insured institution is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706 (2)(E) of title 5, United States Code.

"(E) If any insured institution or person fails to pay an assessment after it has become a final and unappealable order or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

(3) Section 5(d)(8) of the Home Owners' Loan Act as amended (12 U.S.C. 1464(5)(d)(8)), is amended by redesignating "section 5(d)(8)" as "5(d)(8)(A)" and by adding the following new paragraph:

"(B)(i) Any association which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such an association who violate the terms of any order which has become final and was issued pursuant to paragraph (2) or (3) of this subsection, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board on written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or adding or abetting a violation.

"(ii) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the association bank or person charged, the gravity of the violation, the history of previous violations and such other matters as justice may require.

"(iii) The association or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (iv). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(iv) Any association or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the association is located, or the United States Court of Appeals for the District of Columbia Circuit by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Board. The agency shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(v) If any association or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Board shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(vi) The Board shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(vii) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

(4) Section 206(j) of the Federal Credit Union Act, as amended (12 U.S.C. 1786(j)), is amended by redesignating section 206(j) as 206(j)(1) and by adding a new paragraph as follows:

"(2)(A) Any insured credit union which violates or any officer, director, committee member, employee, agent, or other person participating in the conduct of the affairs of such a credit union who violates the terms of any order which has become final and was issued pursuant to subsection (e) or (f) of this section, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Administrator by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty, the Administrator shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured credit union or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The insured credit union or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The Administrator's determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any insured credit union or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the insured credit union is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Administrator. The Administrator shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Administrator shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any insured credit union or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the Administrator, the Administrator shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Administrator shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 107. Section 18(j) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1828(j)), is amended by redesignating section 18(j) as "18(j)(1)" and by adding at the end thereof the following:

"(2) The provisions of section 22(h) of the Federal Reserve Act, as amended, relating to limits on loans and extensions of credit by a member bank to its officers or directors or to any individual who directly or indirectly owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank or to companies controlled by such an officer, director, or individual, and relating to board of directors' approval of and terms of such loan, shall be applicable to every nonmember insured bank in the same manner and to the same extent as if such nonmember insured bank were a State member bank.

"(3)(i) Any nonmember insured bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such nonmember insured bank who violates any provision of section 23A or 22(h) of the Federal Reserve Act, as amended, or any lawful regulation issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(ii) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(iii) The nonmember insured bank or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (iv). If no hearing is requested as herein provided the assess-

ment shall constitute a final and unappealable order.

"(iv) Any nonmember insured bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Corporation shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(v) If any nonmember insured bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be open to review.

"(vi) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(vii) All penalties collected under the authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 108. Any amendment made by this title which provides for the imposition of civil penalties shall apply only to violations occurring or continuing after the date of its enactment.

SEC. 109. Section 22(g) of the Federal Reserve Act, as amended (12 U.S.C. 375a), is amended by inserting the figure "$60,000" in lieu of the figure "$30,000" in paragraph (2), and by inserting the figure "$20,000" in lieu of the figure "$10,000" in paragraph (3); and by inserting the figure "$10,000" in lieu of the figure "$5,000" in paragraph (4).

SEC. 110. (a)(1) Section 8(g) of the Federal Deposit Insurance Act (12 U.S.C. 1818(g)) is amended to read as follows:

"(g)(1) Whenever any director or officer of an insured bank, or other person participating in the conduct of the affairs of such bank, is charged in any information, indictment, or complaint authorized by a United States attorney with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the appropriate Federal banking agency may, if continued service or participation by the individual may pose a threat to the interests of the bank's depositors or may threaten to impair public confidence in the bank, by written notice served upon such director, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the bank. A copy of such notice shall also be served upon the bank. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the agency. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the agency may, if continued service or participation by the individual may pose a threat to the interests of the bank's depositors or may * * * to impair public confidence in the bank, issue and * * * such director, officer, or other person an order * * * him from office or prohibiting him from further * * * in any manner in the conduct of the affairs of * * * except with the consent of the appropriate agency. A copy of such order shall also be served upon such bank, whereupon such director of officer shall cease to be a director or officer of such bank. A finding of not guilty or other disposition of the charge shall not preclude the agency from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in bank affairs, pursuant to paragraph (1), (2), or (3) of subsection (e) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the agency.

"(2) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a national bank less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of the national bank are suspended pursuant to this section, the Comptroller of the Currency shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended, cease to be directors of the bank and their respective successors take office.

"(3) Within thirty days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, officer, or other person concerned may request in writing an opportunity to appear before the agency to show that the continued service to or participation in the conduct of the affairs of the bank by such individual does not, or is not likely to, pose a threat to the interests of the bank's depositors or threaten to impair public confidence in the bank. Upon receipt of any such request, the appropriate Federal banking agency shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the agency or designated employees of the agency to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the agency shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the bank will be continued, terminated, or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the bank will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the agency's decision if adverse to the director, officer or other person. The Federal banking agencies are authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 8(h)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1818(h)(1)) is amended by inserting after "Any hearing provided for in this section" the following "(other than the hearing provided for in subsection (g)(3) of this section)".

(3) Section 8(j) of the Federal Deposit Insurance Act (12 U.S.C. 1818(j)) is amended by striking out "(e)(5), (e)(7), (e)(8)" and inserting in lieu thereof "(e)(3), (e)(4)".

(4) Section 8(k) of the Federal Deposit Insurance Act (12 U.S.C. 1818(k)) is amended by striking out "paragraph (1) of subsection (g)" and inserting in lieu thereof "paragraph (1) or (3) of subsection (g)".

(5) Section 8(n) of the Federal Deposit Insurance Act (12 U.S.C. 1818(n)) is amended by adding at the end thereof the following new sentence: "Any person who willfully shall fail or refuse to attend and testify or to answer any lawful inquiry or to produce books, papers, correspondence, memoranda, contracts, agreements or other records in such person's power so to do, in obedience to the subpoena of the appropriate Federal banking agency, shall be guilty of a misdemeanor and, upon conviction, shall be subject to a fine of not more than $1,000 or to imprisonment for a term of not more than one year or both.".

(b)(1) Section 407(h) of the National Housing Act (12 U.S.C. 1730(h)) is amended to read as follows:

"(h)(1) Whenever any director or officer of an insured institution, or other persons participating in the conduct of the affairs of such institution, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Corporation may, if continued service or participation by the individual may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the institution, by written notice served upon such director, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the institution. A copy of such notice shall also be served upon the institution. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Corporation. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the Corporation may, if continued service or participation by the individual may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the institution, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in an manner in the conduct of the affairs of the institution except with the consent of the Corporation. A copy of such order shall also be served upon such institution, whereupon such director or officer shall cease to be a director or officer of such institution. A finding of not guilty or other disposition of the charge shall not preclude the Corporation from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in institution affairs pursuant to paragraph (1), (2), or (3) of subsection (g) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the Corporation.

"(2) Within thirty days from service of any notice, suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, officer, or other person concerned may request in writing an opportunity to appear before the Corporation to show that the continued service to or participation in the conduct of the affairs of the institution by such individual does

not, or is not likely to, pose a threat to the interests of the institution's depositors or threaten to impair public confidence in the institution. Upon receipt of any such request, the Corporation shall fix a time (not more than thirty days after receipt of such requests, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the Corporation or designated employees of the Corporation to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the Corporation shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the institution will be continued, terminated or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the institution will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Corporation's decision, if adverse to the director, officer, or other person. The Corporation is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 407(j)(1) of such Act (12 U.S.C. 1730(j)(1)) is amended by inserting after "any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (h)(3) of this section)".

(3) Section 407(j)(2) of such Act (12 U.S.C. 1730(j)(2)) is amended by inserting "(1)" after "subsection (h)".

(c)(1) Section 5(d)(5) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(5)) is amended to read as follows:

"(5)(A) Whenever any director or officer of an association, or other person participating in the conduct of the affairs of such association, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Board may, if continued service or participation by the individual may pose a threat to the interests of the association's depositors or may threaten to impair public confidence in the association, by written notice served upon such director, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the association. A copy of such notice shall also be served upon the association. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Board. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the Board may, if continued service or participation by the individual may pose a threat to the interests of the association's depositors or may threaten to impair public confidence in the association, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the association except with the consent of the Board. A copy of such order shall also be served upon such association, whereupon such director or officer shall cease to be a director or officer of such association. A finding of not guilty or other disposition of the charge shall not preclude the Board from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in association affairs, pursuant to subparagraph (A), (B), or (C) of paragraph (4). Any notice of suspension or order of removal issued under this subparagraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under subparagraph (C) hereof unless terminated by the Board.

(B) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of an association less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of an association are suspended pursuant to this section, the Board shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended, cease to be directors of the association and their respective successors take office.

"(C) Within thirty days from service of any notice of suspension or order of removal issued pursuant to subparagraph (A), the director, officer, or other person concerned may request in writing an opportunity to appear before the Board to show that the continued service to or participation in the conduct of the affairs of the association by such individual does not, or is not likely to, pose a threat to the interests of the association's depositors or threaten to impair public confidence in the association. Upon receipt of any such request, the Board shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the agency or designated employees of the Board to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the Board shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the association will be continued, terminated or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the association will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Board's decision, if adverse to the director, officer, or other person. The Board is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 5(d)(7)(A) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(7)(A)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in paragraph (5)(C) of this section)".

(3) Section 5(d)(13)(A)(1) of such Act (12 U.S.C. 1464(d)(13)(A)(1)) is amended by inserting after "paragraph (5)(A)" the following: "or (C)".

(d)(1) Section 206(h) of the Federal Credit Union Act (12 U.S.C. 1786(h)) is amended to read as follows:

"(h)(1) Whenever any director, committee member, or officer of an insured credit union, or other person participating in the conduct of the affairs of such credit union, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Administrator may, if continued service or participation by the individual may pose a threat to the interests of the credit union's depositors or may threaten to impair public confidence in the credit union, by written notice served upon such director, committee member, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the credit union. A copy of such notice shall also be served upon the credit union. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Administrator. In the event that a judgment of conviction with respect to such crime is entered against such director, committee member, officer or other person, and at such time as such judgment is not subject to further appellate review, the Administrator may, if continued service or participation by the individual may pose a threat to the interests of the credit union's depositors or may threaten to impair public confidence in the credit union, issue and serve upon such director, committee member, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the credit union except with the consent of the Administrator. A copy of such order shall also be served upon such credit union, whereupon such director or officer shall cease to be a director, committee member, or officer of such credit union. A finding of not guilty or other disposition of the charge shall not preclude the Administrator from thereafter instituting proceedings to remove such director, committee member, officer, or other person from office or to prohibit further participation in the affairs of the credit union, pursuant to subsection (g) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the Administrator.

"(2) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a Federal credit union less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of a Federal credit union are suspended pursuant to this section, the Administrator shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended cease to be directors of the credit union and their respective successors have been elected by the members at an annual or special meeting and have taken office. Directors appointed temporarily by the Administrator shall, within thirty days following their appointment, call a special meeting for the election of new directors, unless during the thirty-day period (A) the regular annual meeting is scheduled, or (B) the suspensions giving rise to the appointment of temporary directors are terminated.

"(3) Within thirty days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, committee member, officer, or other person concerned may request in writing an opportunity to appear before the Administrator to show that the continued service to or participation in the conduct of the affairs of the credit union by such

individual does not, or is not likely to, pose a threat to the interests of the credit union's depositors or threaten to impair public confidence in the credit union. Upon receipt of any such request, the Administrator shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, committee member, officer, or other person) and place at which the director, committee-member, officer, or other person may appear, personally or through counsel, before the Administrator or his designee to submit written materials (or, at the discretion of the Administrator, oral testimony) and oral argument. Within sixty days of such hearing, the Administrator shall notify the director, committee member, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the credit union will be continued, terminated or otherwise modified, or whether the order removing said director, committee member, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the credit union will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Administrator's decision, if adverse to the director, committee member, officer, or other person. The Administrator is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 206(i)(1) of the Federal Credit Union Act (12 U.S.C. 1786(i)(1)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (h)(3) of this section)".

(3) Section 206(i)(2) of such Act (12 U.S.C. 1786(i)(2)) is amended by inserting "(1)" after "subsection (h)".

SEC. 111. (a) Section 3(a) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)) is amended by inserting after the second sentence the following new sentence: "The Board is authorized upon application by a bank to extend, from time to time for not more than one year at a time, the two-year period referred to above for disposing of any shares acquired by a bank in the regular course of securing or collecting a debt previously contracted in good faith, if, in the Board's judgment, such an extension would not be detrimental to the public interest, but no such extensions shall in the aggregate exceed three years.".

(b) Section 2(a)(5)(D) of such Act (12 U.S.C. 1841(a)(5)(D)) is amended by adding at the end thereof the following new sentence: "The Board is authorized upon application by a company to extend, from time to time for not more than one year at a time, the two-year period referred to herein for disposing of any shares acquired by a company in the regular course of securing or collecting a debt previously contracted in good faith, if, in the Board's judgment, such an extension would not be detrimental to the public interest, but no such extension shall in the aggregate exceed three years.".

(c) Section 4(c)(2) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1843(c)(2)), is amended by striking out "shares acquired by a bank in satisfaction of a debt previously contracted in good faith, but such bank shall dispose of such shares within a period of two years" and inserting in lieu thereof the following: "shares acquired by a bank holding company or any of its subsidiaries in satisfaction of a debt previously contracted in good faith, but such shares shall be disposed of within a period of two years".

TITLE II—INTERLOCKING DIRECTORS

SEC. 201. This title may be cited as the "Depositary Institution Management Interlocks Act".

SEC. 202. As used in this title—

(1) the term "depositary institution" means a commercial bank, a savings bank, a trust company, a savings and loan association, a building and loan association, a homestead association, a cooperative bank, an industrial bank, or a credit union;

(2) the term "depositary holding company" means a bank holding company as defined in section 2(a) of the Bank Holding Company Act of 1956, a company which would be a bank holding company as defined in section (2)(a) of the Bank Holding Company Act of 1956 but for the exemption contained in section 2(a)(5)(F) thereof, or a savings and loan holding company as defined in section 408(a)(1)(D) of the National Housing Act;

(3) the characterization of any corporation (including depositary institutions and depositary holding companies), as an "affiliate of," or as "affiliated" with any other corporation means that—

(A) one of the corporations is a depositary holding company and the other is a subsidiary then of, or both corporations are subsidiaries of the same depositary holding company, as the term "subsidiary" is defined in either section 2(d) of the Bank Holding Company Act of 1956 in the case of a bank holding company or section 408(a)(1)(H) of the National Housing Act in the case of a savings and loan holding company;

(B) more than 50 per centum of the voting stock of one corporation is beneficially owned in the aggregate by one or more persons who also beneficially own in the aggregate more than 50 per centum of the voting stock of the other corporation; or

(C) one of the corporations is a trust company all of the stock of which, except for directors qualifying shares, was owned by one or more mutual savings banks on the date of enactment of this Act, and the other corporation is a mutual savings bank;

(4) the term "management official" means an employee or officer with management functions, a director (including an advisory or honorary director), a trustee of a business organization under the control of trustees, or any person who has a representative or nominee serving in any such capacity: *Provided*, That if a corporator, trustee, director, or other officer of a State-chartered savings bank or cooperative bank is specifically authorized under the laws of the State in which said institution is located to serve as a trustee, director, or other officer of a State-chartered trust company which does not make real estate mortgage loans and does not accept savings deposits from natural persons, then, for the purposes of this title, such corporator, trustee, director, or other officer shall not be deemed to be a management official of such trust company: *And provided further*, That if a management official of a State-chartered trust company which does not make real estate mortgage loans and does not accept savings deposits from natural persons is specifically authorized under the laws of the State in which said institution is located to serve as a corporator, trustee, director, or other officer of a State-chartered savings bank or cooperative bank, then, for the purposes of this title, such management official shall not be deemed to be a management official of any such savings bank or cooperative bank; and

(5) the term "office" used with reference to a depositary institution means either a principal office or a branch.

SEC. 203. A management official of a depositary institution or a depositary holding company may not serve as a management official of any other depositary institution or depositary holding company not affiliated therewith if an office of one of the institutions or any depositary institution that is an affiliate of such institutions is located within either—

(1) the same standard metropolitan statistical area as defined by the Office of Management and Budget, or

(2) the same city, town, or village as that in which an office of the other institution or any depositary institution that is an affiliate of such other institution is located, or in any city, town, or village contiguous or adjacent thereto.

SEC. 204. If a depositary institution or a depositary holding company has total assets exceeding $1,000,000,000, a management official of such institution or any affiliate thereof may not serve as a management official of any other nonaffiliated depositary institution or depositary holding company having total assets exceeding $500,000,000 or as a management official of any affiliate of such other institution.

SEC. 205. The prohibitions contained in sections 202, 203, and 204 shall not apply in the case of any one or more of the following or any branch or subsidiary thereof:

(1) A depositary institution or depositary holding company which has been placed formally in liquidation, or which is in the hands of a receiver, conservator, or other official exercising a similar function.

(2) A corporation operating under section 25 or 25A of the Federal Reserve Act.

(3) A credit union being served by a management official of another credit union or a credit union being served by a management official of another depositary institution.

(4) A depositary institution or depositary holding company which does not do business within any State of the United States, the District of Columbia, any territory of the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands except as an incident to its activities outside the United States.

SEC. 206. A person whose service in any given position as a management official was not prohibited by this title at the time of the beginning of such service is not prohibited by this title from continuing to serve in that position for a period of ten years after the date of enactment of this title. The Board of Governors of the Federal Reserve System may provide a reasonable period of time for compliance with this title, not exceeding fifteen months, after any change in circumstances, other than the coming into effect of this title which makes such service prohibited by this title.

SEC. 207. This title shall be administered and enforced by—

(1) the Comptroller of the Currency with respect to national banks and banks located in the District of Columbia,

(2) the Board of Governors of the Federal Reserve System with respect to State banks which are members of the Federal Reserve System, and bank holding companies,

(3) the Board of Directors of the Federal Deposit Insurance Corporation with respect to State banks which are not members of the Federal Reserve System but the deposits of which are insured by the Federal Deposit Insurance Corporation,

(4) the Federal Home Loan Bank Board with respect to Federal savings and loan associations and institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation, and savings and loan holding companies,

(5) the National Credit Union Administration with respect to Federal credit unions and institutions the accounts of which are insured by the National Credit Union Administration, and

(6) the Attorney General for all other institutions.

SEC. 208. The following provisions of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (Clayton Act, 38 Stat. 732, as amended), are repealed:

(a) The first three paragraphs of section 8 (15 U.S.C. 19).

(b) The words "bank or other" in the last paragraph of section 8 each time they appear.

SEC. 209. (a) Section 8(e) of the Federal Deposit Insurance Act (12 U.S.C. 1818(e)) is amended by adding at the end thereof the following new paragraph:

"(5) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of a bank under the control of trustees, or any person who has representative or nominee serving in any such capacity.".

(b) Section 5(d) of the Homeowners' Loan Act (12 U.S.C. 1464(d)) is amended by adding at the end thereof the following new paragraph:

"(15) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of an association under the control of trustees, or any person who has a representative or nominee serving in any such capacity.".

(c) Section 407(q) of the National Housing Act is amended by adding at the end thereof the following:

"(4) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term "director' includes an advisory or honorary director, a trustee of an association under the control of trustees, or any person who has a representative or nominee serving in any such capacity.".

SEC. 210. The Board of Governors of the Federal Reserve System may prescribe such rules and regulations, including authorization for a management official of a depositary institution, as are consistent with the purposes of this title and necessary to effectuate such purposes or to prevent evasion of this title.

TITLE III—FOREIGN BRANCHING

SEC. 301. (a) Section 3(o) of the Federal Deposit Insurance Act (12 U.S.C. 1813(o)) is amended—

(1) by inserting "domestic" immediately before "branch" the first place it appears; and

(2) by inserting before the period at the end thereof a semicolon and the following: "and the term 'foreign branch' means any office, place of business, or similar establishment located outside the United States, its territories, Puerto Rico, Guam, American Samoa, and the Virgin Islands".

(b) Section 18(d) of the Federal Deposit Insurance Act (12 U.S.C. 1828(d) is amended—

(1) by inserting "(1)" after "(d)";

(2) by inserting "domestic" between "new" and "branch";

(3) by inserting "such" between "any" and "branch"; and

(4) by adding at the end thereof the following new paragraph:

"(2) No State nonmember insured bank shall establish or operate any foreign branch, except with the prior written consent of the Corporation and upon such conditions and pursuant to such regulations as the Corporation may prescribe from time to time.".

(c) Section 18 of the Federal Deposit Insurance Act (12 U.S.C. 1828) is amended by adding at the end thereof the following new subsection:

"(l) When authorized by State law, a State nonmember insured bank may, but only with the prior written consent of the Corporation and upon such conditions and under such regulations as the Corporation may prescribe from time to time, acquire and hold, directly or indirectly, stock or other evidences of ownership in one or more banks or other entities organized under the law of a foreign country or a dependency or insular possession of the United States and not engaged, directly or indirectly, in any activity in the United States except as, in the judgment of the Board of Directors, shall be incidental to the international or foreign business of such foreign bank or entity; and, notwithstanding the provisions of subsection (j) of this section, such State nonmember insured bank may, as to such foreign bank or entity, engage in transactions that would otherwise be covered thereby, but only in the manner and within the limits prescribed by the Corporation by general or specific regulation or ruling.".

SEC. 302. The sixth sentence of section 7(a)(3) of the Federal Deposit Insurance Act (12 U.S.C. 1817(a)(3)) is amended to read as follows: "The correctness of said report of conditions shall be attested by the signatures of at least two directors or trustees of the reporting bank other than the officer making such declaration, with a declaration that the report has been examined by them and to the best of their knowledge and belief is true and correct.".

SEC. 303. Section 8(n) of the Federal Deposit Insurance Act (12 U.S.C. 1818(n)) is amended—

(1) by inserting in the first sentence after "this section," the first place it appears therein the following: "or in connection with any claim for insured deposits or any examination or investigation under section 10(c),";

(2) by inserting "examination, or investigation or considering the claim for insured deposits," in the first sentence after "proceeding," the second place it appears therein;

(3) by striking out "proceedings" at the end of the first sentence thereof and inserting in lieu thereof "proceedings, claims, examinations, or investigations";

(4) by inserting "such agency or any" after "Any" at the beginning of the third sentence thereof; and

(5) by striking out "section" and inserting in lieu thereof "subsection" in the fourth sentence thereof.

SEC. 304. Section (8)(q) of the Federal Deposit Insurance Act (12 U.S.C. 1818(q)) is amended to read as follows:

"(q) Whenever the liabilities of an insured bank for deposits shall have been assumed by another insured bank or banks, whether by way of merger, consolidation, or other statutory assumption, or pursuant to contract (1) the insured status of the bank whose liabilities are so assumed shall terminate on the date of receipt by the Corporation of satisfactory evidence of such assumption; (2) the separate insurance of all deposits so assumed shall terminate at the end of six months from the date such assumption takes effect or, in the case of any time deposit, the earliet maturity date after the six-month period; and (3) the assuming or resulting bank shall give notice of such assumption to each of the depositors of the bank whose liabilities are so assumed within thirty days after such assumption takes effect. Where the deposits of an insured bank are assumed by a newly insured bank, the bank whose deposits are assumed shall not be required to pay any assessment upon the deposits which have been so assumed after the semiannual period in which the assumption takes effect.".

SEC. 305. (a) Section 10(b) of the Federal Deposit Insurance Act (12 U.S.C. 1820(b)) is amended by inserting "or other institution" in the first sentence after the words "any State nonmember bank" and by striking out the last two sentences of that subsection.

(b) Section 10 (c) and (d) of the Federal Deposit Insurance Act (12 U.S.C. 1820 (c) and (d) are amended to read as follows:

"(c) In connection with examinations of insured banks, State nonmember banks or other institutions making application to become insured banks, and affiliates thereof, or with other types of investigations to determine compliance with applicable law and regulations, the appropriate Federal banking agency, or its designated representatives, are authorized to administer oaths and affirmations, and to examine and to take and preserve testimony under oath as to any matter in respect to the affairs or ownership of any such bank or institution or affiliate thereof, and to exercise such other powers as are set forth in section 8(n) of this Act.

"(d) For purposes of this section, the term 'affiliate' shall have the same meaning as in section 23A of the Federal Reserve Act, except that the term 'member bank' in such section 23A and in section 2(b) of the Banking Act of 1933 shall be deemed to refer to an insured bank.".

SEC. 306. Section 18(c)(1)(B) of the Federal Deposit Insurance Act (12 U.S.C. 1828(c)(1)(B)) is amended by inserting after the word "deposits" the following: "(including liabilities which would be 'deposits' except for the proviso in section 3(l)(5) of this Act)".

SEC. 307. Section 1114 of title 18, United States Code, is amended by inserting before "shall be punished" the following: "or any attorney, liquidator, examiner, claim agent, or other employee of the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the Comptroller of the Currency, the Federal Home Loan Bank Board, the Board of Governors of the Federal Reserve System, any Federal Reserve bank, or the National Credit Union Administrator engaged in or on account of the performance of his official duties.".

SEC. 308. Section 5 of the Bank Service Corporation Act (12 U.S.C. 1865) is amended to read as follows:

"SEC. 5. Whenever any bank which is regularly examined by a Federal supervisory agency, or any subsidiary or affiliate of such bank which is subject to examination by that agency, causes to be performed, by contract or otherwise, any bank services for itself, whether on or off its premises—

"(1) such performance shall be subject to regulation and examination by such agency to the same extent as if the services were being performed by the bank itself on its own premises, and

"(2) the bank shall notify such agency of the existence of a service relationship within 30 days after the making of such service contract or the performance of the service, whichever occurs first.".

TITLE IV—CONFLICTS OF INTEREST

SEC. 401. This title may be cited as the "Depository Institutions Conflict of Interest Act".

SEC. 402. Section 2 of the Federal Deposit Insurance Act (12 U.S.C. 1812) is amended by striking out the sixth sentence and inserting in lieu thereof the following: "The members of the Board of Directors shall be ineligible, during the time they are in office and for a period of two years thereafter, to hold any office, position, or employment in an insured bank, in a holding company of

an insured bank, or in an affiliate of a holding company of an insured bank, and may not, during such two-year period, voluntarily acquire any interest in such a bank, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such a bank, company, or affiliate, except that this restriction shall not apply to any individual who has served the full term for which he was appointed.".

SEC. 403. The first sentence of the second paragraph of section 10 of the Federal Reserve Act (12 U.S.C. 242) is amended by adding at the end thereof the following: "The members of the Board of Governors shall be ineligible, during the time they are in office and for a period of two years thereafter, to hold any office, position, or employment in a member bank, in a bank holding company or in an affiliate of a bank holding company, and may not, during such two-year period, voluntarily acquire any interest in such a bank, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such a bank, company, or affiliate, except that this restriction shall not apply to any individual who has served the full term for which he was appointed.".

SEC. 404. Section 17 of the Federal Home Loan Bank Act (12 U.S.C. 1437) is amended by adding at the end thereof the following:

"(c) The members of the board shall be ineligible during the time they are in office and for a period of two years thereafter to hold any office, position, or employment in an insured institution, in a holding company of an insured institution, or in an affiliate of a holding company of an insured institution, and may not, during such two-year period, voluntarily acquire any interest in such an institutition, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such an institution, company, or affiliate, except that this resolution shall not apply to any individual who has served the full term for which he was appointed. As used in this subsection, the term 'insured institution' has the same meaning as in section 401 of the National Housing Act.".

SEC. 405. (a) Section 5312 of title 5, United States Code is amended by adding at the end thereof the following:

"(14) Chairman, Board of Governors of the Federal Reserve System.".

(b) Section 5313(10) of such title is amended by striking out "Chairman" and inserting in lieu thereof "Members".

(c) Section 5313 of such title is amended by adding at the end thereof the following:

"(24) Chairman Board of Directors, Federal Deposit Insurance Corportaion.

"(25) Chairman of the Federal Home Loan Bank Board.

"(26) Comptroller of the Currency.".

(d) Section 5314 of title 5, United States Code, is amended by striking out items 19, 20, 30, and 43.

TITLE V—CREDIT UNION RESTRUCTURING

SEC. 501. Section 102 of the Federal Credit Union Act (12 U.S.C. 1752a) is amended to read as follows:

"CREATION OF ADMINISTRATION

"SEC. 102. (a) There is hereby established in the executive branch of the Government an independent agency to be known as the National Credit Union Administration. The Administration shall be under the management of a National Credit Union Administration Board.

"(b) The Board shall consist of three members, who are broadly representative of the public interest, appointed by the President, by and with the advice and consent of the Senate. In appointing the members of the Board, the President shall designate the Chairman. Not more than two members of the Board shall be members of the same political party.

"(c) The term of office of each member of the Board shall be six years, except that the terms of the two members, other than the chairman, initially appointed shall expire one upon the expiration of two years after the date of appointment, and the other upon the expiration of four years after the date of appointment. Board members shall not be appointed to succeed themselves except the initial members appointed for less than a six-year term may be reappointed for a full six-year term and future members appointed to fill unexpired terms may be reappointed for a full six-year term. Any Board member may continue to serve as such after the expiration of said member's until a successor has qualified.

"(d) The management of the Administration shall be vested in the Board. The Board shall adopt such rules as it sees fit for the transaction of its business and shall keep permanent and complete records and minutes of its acts and proceedings. A majority of the Board shall constitute a quorum. Not later than April 1 of each calendar year, and at such other times as the Congress shall determine, the Board shall make a report to the President and to the Congress. Such a report shall summarize the operations of the Administration and set forth such information as is necessary for the Congress to review the financial program approved by the Board.

"(e) The Chairman of the Board shall be the spokesman for Board and shall represent the Board and the National Credit Union Administration in its official relations with other branches of the Government. The Chairman shall determine each Board member's area of responsibility and shall review such assignments biennially. It shall be the Chairman's responsibility to direct the implementation of the adopted policies and regulations of the Board.

"(f) The members of the Board shall be ineligible during the time they are in office or for two years thereafter to hold any office, position, or employment in any credit union or in any financial institution in which a credit union owns stock, except that this restriction shall not apply to any member who has served the full term for which he was appointed.

"(g) The financial transactions of the Administration shall be subject to audit on a calendar year basis by the General Accounting Office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the Comptroller General of the United States. The audit shall be conducted at the place or places where the accounts of the Administration are kept.".

SEC. 502. (a) Section 101 of the Federal Credit Union Act is amended—

(1) by striking out clause (2) and inserting in lieu thereof the following:

"(2) the term 'Chairman' means the Chairman of the National Credit Union Administration Board;";

(2) by inserting "Administration" after "Union" in clause (4).

(b) The Federal Credit Union Act is amended by striking out "Administrator" each place it appears and inserting in lieu thereof "Board", and by striking out the personal pronouns "he", "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "them", and "its" as appropriate wherever such words appear therein.

(c) Section 209 of the Federal Credit Union Act (12 U.S.C. 1789) is amended—

(1) by inserting in subsection (b)(1) the language "on a calendar year basis" immediately following "prepare annually";

(2) by inserting in subsection (b)(2) the language "on a calendar year basis" immediately following "set of accounts".

(d) Section 5108 of title 5, United States Code, is amended by adding the following new paragraph:

"(h) In addition to the number of positions authorized by subsection (a), the National Credit Union Administration is authorized without regard to any other provision to this section, to place two positions in the Administration at GS–18 and a total of fourteen positions in the Administration at GS–16 or GS–17.".

(e) Section 5313 of title 5, United States Code, is amended by adding the following new paragraph:

"(28) Chairman, National Credit Union Administration Board.".

(f) Section 5314 (92) of title 5, United States Code, is amended by striking out "Administrator of the National Credit Union Administration" and inserting in lieu thereof "Members, National Credit Union Administration Board (2)".

SEC. 503. (a) The Federal Credit Union Act (12 U.S.C. 1751–1790) is further amended by striking out "Administrator" and inserting in lieu thereof "Board" in the following sections:

(1) section 103 (12 U.S.C. 1753);
(2) section 104 (12 U.S.C. 1754);
(3) section 105 (12 U.S.C. 1755);
(4) section 106 (12 U.S.C. 1756);
(5) paragraphs (5), (8), (9), (10), (13), and (14) of section 107 (12 U.S.C. 1757);
(6) section 108 (12 U.S.C. 1758);
(7) section 109 (12 U.S.C. 1759);
(8) section 111 (12 U.S.C. 1761);
(9) section 112 (12 U.S.C. 1761a);
(10) section 113 (12 U.S.C. 1761b);
(11) section 115 (12 U.S.C. 1761d);
(12) paragraph (b)(2) of section 116 (12 U.S.C. 1762);
(13) the title of section 120 (12 U.S.C. 1766);
(14) section 120(a) (12 U.S.C. 1766);
(15) section 120(b)(1) (12 U.S.C. 1766);
(16) section 120(b)(2) (12 U.S.C. 1766);
(17) section 120(b)(3) (12 U.S.C. 1766);
(18) section 120(b)(4) (12 U.S.C. 1766);
(19) section 120(b)(5) (12 U.S.C. 1766);
(20) section 120(c) (12 U.S.C. 1766);
(21) section 120(d) (12 U.S.C. 1766);
(22) section 120(c) (12 U.S.C. 1766);
(23) section 120(f)(1) (12 U.S.C. 1766);
(24) section 120(f)(2)(A) (12 U.S.C. 1766);
(25) section 120(f)(2)(B) (12 U.S.C. 1766);
(26) section 120(g) (12 U.S.C. 1766);
(27) section 120(h) (12 U.S.C. 1766);
(28) section 120(i) (12 U.S.C. 1766);
(29) section 120(i)(3) (12 U.S.C. 1766);
(30) section 121 (12 U.S.C. 1767);
(31) section 125(b)(1) (12 U.S.C. 1771);
(32) section 125(b)(2) (12 U.S.C. 1771);
(33) section 127 (12 U.S.C. 1722a); and
(34) sections 201 to 210 (12 U.S.C. 1773–1775). (b) Such Act is further amended by striking out the personal pronouns "he", "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "they", and "its" as appropriate wherever such words appear therein.

SEC. 504. (a) Paragraph (4) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752) which begins with "The terms 'member account'" is redesignated paragraph "(5)" and the succeeding paragraphs numbered (5) through (8) are redesignated as paragraphs (6) through (9), respectively.

(b) Paragraph (5) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by subsection (a) of this section, is amended—

(1) by striking "(when referring to the account of a member of credit union)";

(2) by striking "share, share certificate, or share deposit" each time it appears therein and inserting "share or share certificate" in lieu thereof;

(3) by striking "those" and inserting "share or share certificate" in lieu thereof; and

(4) by striking all language after "political subdivisions thereof" and inserting "enumerated in section 207 of this Act: *Provided*, That for purposes of insured State credit unions, reference in this paragraph to 'share' or 'share certificate' accounts includes, as determined by the Board, the equivalent of such accounts under State law;" in lieu thereof.

(c) Paragraph (9) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by (a) of this section, is amended by—

(1) inserting ", including the trust territories," after "several territories"; and

(2) adding the following new sentence: "The term 'branch' also includes a suboffice, operated by a Federal credit union or by a credit union authorized by the Department of Defense, located on an American military installation in a foreign country or in the trust territories of the United States.".

SEC. 505. (a) Subsection (a) of section 201 of the Federal Credit Union Act (12 U.S.C. 1781) is amended by inserting ", including the trust territories," after "several territories".

(b) Paragraph (b)(7) of such section is amended by inserting "except for accounts authorized by State law for State credit unions" before the semicolon.

(c) Such section is further amended by striking all of subsection (d) and redesignating subsection (e) as (d).

SEC. 506. (a) Section 202 of the Federal Credit Union Act (12 U.S.C. 1782) is amended by striking out "his" in the fifth sentence of paragraph (a)(1) and inserting "such officer's" in lieu thereof.

(b) Subsection (h)(3) of such section is amended to read as follows:

"(3) The term 'member account' when applied to the premium charge for insurance of accounts shall not include amounts received from other federally insured credit unions in excess of the insured account limit set forth in section 207(c)(1).".

SEC. 507. Section 208 of the Federal Credit Union Act (12 U.S.C. 1788) is amended by striking out "SPECIAL ASSISTANCE TO AVOID LIQUIDATION" and inserting "SPECIAL ASSISTANCE FOR FEDERALLY INSURED CREDIT UNIONS" in lieu thereof.

SEC. 508. Section 105 of the Federal Credit Union Act (12 U.S.C. 1755) is amended to read as follows:

"FEES

"SEC. 105. (a) In accordance with rules prescribed by the Board, each Federal credit union shall pay to the Administration an annual operating fee which may be composed of one or more charges identified as to the function or functions for which assessed.

"(b) The fee assessed under this section shall be determined according to a schedule, or schedules, or other method determined by the Board to be appropriate, which gives due consideration to the expenses of the Administration in carrying out its responsibilities under this Act and to the ability of Federal credit unions to pay the fee. The Board shall, among other things, determine the periods for which the fee shall be assessed and the date or dates for the payment of the fee or increments thereof.

"(c) If the annual operating fee is composed of separate charges, no supervision charge shall be payable by a Federal credit union, and the Board may waive payment of any or all other charges comprising the fee, with respect to the year in which its charter is issued, or in which final distribution is made in its liquidation or the charter is canceled.

"(d) All operating fees shall be deposited with the Treasurer of the United States for the account of the Administration and may be expended by the Board to defray the expenses incurred in carrying out the provisions of this Act including the examination and supervision of Federal credit unions.".

SEC. 509. Section 106 of the Federal Credit Union Act (12 U.S.C. 1756) is amended to read as follows:

"REPORTS AND EXAMINATIONS

"SEC. 106. Federal credit unions shall be under the supervision of the Board, and shall make financial reports to it as and when it may require, but at least annually. Each Federal credit union shall be subject to examination by, and for this purpose shall make its books and records accessible to, any person designated by the Board.".

SEC. 510. The amendments made by this title take effect upon enactment, except that the functions of the Administrator of the National Credit Union Administration under the provisions of the Federal Credit Union Act, as in effect on the date preceding the date of enactment of this title, shall continue to be performed by him in accordance with such provisions until such time as all the members of the National Credit Union Administration Board, established under the amendments made by this title, take office. All rules, regulations, policies and procedures of the Administrator in effect on the date of enactment of this title shall remain in effect until amended, superseded, or repealed.

TITLE VI—FINANCIAL INSTITUTIONS

SEC. 601. Section 7 of the Act of September 21, 1966 (Public Law 89–597), is amended by striking out "December 15, 1978" and inserting in lieu thereof "December 15, 1980".

SEC. 602. Section 102 of Public Law 94–200 (12 U.S.C. 461 note) is amended by adding at the end thereof the following new subsection:

"(c) In any State where any provision of State or Federal law authorizes any savings and loan, building and loan, or homestead association (including any cooperative bank) the deposits or accounts of which are insured by the Federal Savings and Loan Insurance Corporation or any mutual savings banks, as defined in section 3(f) of the Federal Deposit Insurance Act (12 U.S.C. 1813(f)), to offer any third-party payment account, there shall be no differential in the maximum interest rate payable between (1) banks (other than savings banks) the deposits of which are insured by the Federal Deposit Insurance Corporation, and (2) savings and loan, building and loan, or homestead associations (including cooperative banks) the deposits or accounts of which are insured by the Federal Savings and Loan Insurance Corporation or mutual savings banks, as defined in section 3(f) of the Federal Deposit Insurance Act (12 U.S.C. 1813(f)), with respect to savings deposits or accounts from which automatic transfers to the institution itself or to a demand or other deposit account of the same depositor or accountholder at such institution may be made as a normal practice, pursuant to a prearranged agreement with the depositor or accountholder to make such transfers to cover checks, drafts, or similar instruments drawn by the depositor or accountholder on such institution. Notwithstanding any of the provisions of subsection (b) of this section, the maximum rate of interest payable on a savings deposit or account described in the preceding sentence shall be the rate which banks (other than mutual savings banks) the deposits of which are insured by the Federal Deposit Insurance Corporation may pay on such accounts.".

SEC. 603. Section 2(a) of Public Law 93–100 is amended by inserting "New York," after "Vermont,".

TITLE VII—CHARTERS FOR THRIFT INSTITUTIONS

SEC. 701. Section 2(d) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1462(d)) is amended to read as follows:

"(d) The term 'association' means a Federal savings and loan association or a Federal mutual savings bank chartered by the Board under section 5, and any reference in any other law to a Federal savings and loan association shall be deemed to be also a reference to a Federal mutual savings bank, unless the context indicates otherwise.".

SEC. 702. Section 5(a) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(a)) is amended to read as follows:

"SEC. 5. (a) In order to provide local mutual thrift institutions in which people may invest their funds and in order to provide for the financing of homes, the Board is authorized, under such rules and regulations as it may prescribe, to provide for the organization, incorporation, examination, operation, and regulation of associations to be known as 'Federal Savings and Loan Associations', or 'Federal mutual savings banks' (but only in the case of institutions which, prior to conversion, were State mutual savings banks located in States which authorize the chartering of State mutual savings banks provided such conversion is not in contravention of State law), and to issue charters therefor, giving primary consideration to the best practices of local mutual thrift and home-financing institutions in the United States. An association which was formerly organized as a savings bank under State law may, to the extent authorized by the Board, continue to carry on any activities it was engaged in on December 31, 1977, and to retain or make any investments of a type it held on that date, except that its equity, corporate bond, and consumer loan investments may not exceed the average ratio of such investments to total assets for the five-year period immediately preceding the filing of an application for conversion and such an association shall only be permitted to establish branch offices and other facilities in accordance with the limitations imposed by State law controlling applications of a savings bank organized under such State law, except that such an association (1) shall be exempt from any numerical limitations of State law on the establishment of branch offices and other facilities, and (2) may, in any case, subject to the approval of the Board, establish branch offices and other facilities in its own Standard Metropolitan Statistical Area, its own county, or within thirty-five miles of its home office, but only in its State of domicile. An association which was formerly organized as a savings bank under State law shall be subject to the requirements of State law (including any regulations promulgated thereunder and any sanction for the violation of any such law or regulation) in effect at the time of conversion, in the State of its original charter—

"(A) pertaining to discrimination in the extension of home mortgage loans or adjustment in the terms of mortgage instruments based on neighborhood or geographical area, or

"(B) pertaining to requirements imposed under the Consumer Credit Protection Act, if the Board determines that State law and regulations impose more stringent requirements than Federal law and regulations.".

SEC. 703. Section 403(a) of the National Housing Act (12 U.S.C. 1726(a)) is amended by inserting after "Federal savings and loan associations" the following: "and Federal mutual savings banks".

SEC. 704. The first paragraph of section 5(i) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(i)) is amended by inserting "(including a savings bank)" after "member of a Federal Home Loan Bank".

SEC. 705. The Federal Deposit Insurance Act is amended by adding at the end thereof the following new section:

"CONVERSION OF MUTUAL SAVINGS BANKS

"SEC. 26. With respect to any state-chartered insured mutual savings bank which converts into a Federal savings bank or merges or consolidates into a Federal sav-

ings bank or a savings bank which is (or within sixty days after the merger or consolidation becomes) an insured institution within the meaning of section 401 of the National Housing Act, the Corporation shall indemnify the Federal Savings and Loan Insurance Corporation against any losses incurred by it which arise out of losses incurred by the converting bank prior to conversion as follows: 100 per centum of such losses incurred by the Federal Savings and Loan Insurance Corporation during the first two years after conversion, 75 per centum during the third year, 50 per centum during the fourth year, and 25 per centum during the fifth year. The Corporation and the Federal Savings and Loan Insurance Corporation shall, within six months after enactment hereof, mutually agree on what shall be treated as 'losses incurred by it which arise out of losses incurred by the converting bank prior to conversion' for purposes hereof and, failing such agreement, the General Accounting Office shall prescribe the meaning of those terms. Any conversion, merger, or consolidation covered by this section shall not be deemed a termination of insured status under section 8(a) of this Act.".

EFFECTIVE DATE

SEC. 706. This title takes effect upon the expiration of 6 months after the date of enactment of this Act.

TITLE VII— NSURANCE OF IRA AND KEOGH ACCOUNTS

SEC. 801. (a) Section 11(a) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1821(a)), is amended by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any limitation in this Act or in any other provision of law relating to the amount of deposit insurance available for the account of any one depositor, time and savings deposits in an insured bank made pursuant to a pension or profit-sharing plan described in section 401(d) of the Internal Revenue Code of 1954, as amended, or made in the form of individual retirement accounts as described in section 408(a) of the Internal Revenue Code of 1954, as amended, shall be insured in the amount of $100,000 per account. As to any plan qualifying under section 401(d) or section 408(a) of the Internal Revenue Code of 1954, the term 'per account' means the present vested and ascertainable interest of each beneficiary under the plan, excluding any remainder interest created by, or as a result of, the plan.".

(b) Section 405(d) of the National Housing Act, as amended (12 U.S.C. 1728(d)), is amended by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any limitation in this title or in any other provision of law relating to the amount of deposit insurance available for any one account, funds invested in an insured institution pursuant to a pension or profit-sharing plan described in section 401(d) of the Internal Revenue Code of 1954, as amended, and funds invested in an insured institution in the form of individual retirement accounts as described in section 408(a) of the Internal Revenue Code of 1954, as amended, shall be insured in the amount of $100,000 per account. As to any plan qualifying under section 401(d) or section 408(a) of the Internal Revenue Code of 1954, the term 'per account' means the present vested and ascertainable interest of each beneficiary under the plan, excluding any remainder interest created by, or as a result of, the plan.".

(c) Section 207(c) of the Federal Credit Union Act, as amended (12 U.S.C. 1787(c)), is amended by adding at the end thereof the following paragraph:

"(3) Notwithstanding any limitation in this title or in any other provision of law relating to the amount of insurance available for the account of any one depositor or member, funds invested in a credit union insured in accordance with this title pursuant to a pension or profit-sharing plan described in section 401(d) of the Internal Revenue Code of 1954, as amended, and funds invested in such an insured credit union in the form of individual retirement accounts as described in section 408(a) of the Internal Revenue Code of 1954 as amended, shall be insured in the amount of $100,000 per account. As to any plan qualifying under section 401(d) or section 408(a) of the Internal Revenue Code of 1954, the term 'per account' means the present vested and ascertainable interest of each beneficiary under the plan, excluding any remainder interest created by, or as a result of, the plan.".

TITLE IX—CENTRAL LIQUIDITY FACILITY

SEC. 901. This title may be cited as the "National Credit Union Central Liquidity Facility Act".

SEC. 902. The Federal Credit Union Act (12 U.S.C. 1751 et seq.) is amended by adding at the end thereof the following new title:

"TITLE III—CENTRAL LIQUIDITY FACILITY

"SEC. 301. The Congress finds that the establishment of a National Credit Union Central Liquidity Facility is needed to improve general financial stability by meeting the liquidity needs of credit unions and thereby encourage savings, support consumer and mortgage lending, and provide basic financial resources to all segments of the economy.

"DEFINITIONS

"SEC. 302. As used in this title, the term—

"(1) 'liquidity needs' means the needs of credit unions primarily serving natural persons for—

"(A) short-term adjustment credit available to assist in meeting temporary requirements for funds or to cushion more persistent outflows of funds pending on orderly adjustment of credit union assets and liabilities;

"(B) seasonal credit available for longer periods to assist in meeting seasonal needs for funds arising from a combination of expected patterns of movement in share and deposit accounts and loans; and

"(C) protracted adjustment credit available in the event of unusual or emergency circumstances of a longer term nature resulting from national, regional, or local difficulties;

"(2) 'Central Liquidity Facility' or 'Facility' means the National Credit Union Central Liquidity Facility;

"(3) 'paid-in and unimpaired capital and surplus' means the balance of the paid-in share accounts and deposits as of a given date, less any loss that may have been incurred for which there is no reserve or which has not been charged against undivided earnings, plus the credit balance (or less the debit balance) of the undivided earnings account as of a given date, after all losses have been provided for and net earnings or net losses have been added thereto or deducted therefrom, but for the purpose of this paragraph, reserves shall not be considered as part of surplus; and

"(4) 'member' means a Regular or an Agent member of the Facility.

"ESTABLISHMENT OF THE NATIONAL CREDIT UNION ADMINISTRATION CENTRAL LIQUIDITY FACILITY

"SEC. 303. There is hereby created the National Credit Union Administration Central Liquidity Facility. The Central Liquidity Facility shall exist within the National Credit Union Administraton and be managed by the Administrator. The United States district courts shall have original jurisdiction over any case to which the Administrator on behalf of the Facility is a party, without regard to the amount in controversy.

"MEMBERSHIP

"SEC. 304. (a) A credit union primarily serving natural persons may be a Regular member of the Facility by subscribing to the capital stock of the Facility in an amount not less than one-half of 1 per centum of the credit union's paid-in and unimpaired capital and surplus.

"(b) A credit union or group of credit unions, primarily serving other credit unions, may be an Agent member of the Facility by—

"(1) obtaining the approval of the Administrator;

"(2) subscribing to the capital stock of the Facility in an amount not less than one-half of 1 per centum of the paid-in and unimpaired capital and surplus of all those credit unions which primarily serve natural persons and which are members of such credit union or of any credit union comprising such credit union group;

"(3) agreeing to comply with rules and regulations the Administrator shall prescribe with respect to, but not limited to, management quality, asset and liability safety and soundness, internal operating and control practices and procedures, and participation by natural persons in the affairs of such credit union or credit union group; and

"(4) agreeing to submit to the supervision of the Administrator which shall include, but not be limited to, reporting requirements and periodic unrestricted examinations.

"(c) Stock subscriptions provided for in subsections (a) and (b)(2) of this section shall be—

"(1) based on an arithmetic average of paid-in capital and surplus over the six months preceding application for membership; and

"(2) adjusted at the close of each calendar year in accordance with an arithmetic average of paid-in capital and surplus over a period determined by the Administrator.

"(d) An Agent member of the Facility shall perform for its member credit unions those functions required by the Administrator to carry out this title.

"(e)(1) A member of the Facility whose capital stock subscription constitutes less than 5 per centum of such stock outstanding, may withdraw from membership in the Facility six months after notifying the Administrator of its intention to do so.

"(2) A member of the Facility whose capital stock subscription constitutes 5 per centum or more of such stock outstanding, may withdraw from membership in the Facility twenty-four months after notifying the Administrator of its intention to do so.

"(3) The Administrator may terminate membership in the Facility if, after opportunity for a hearing the Administrator determines a member has failed to comply with any provision of this title or regulation issued pursuant thereto.

"CAPITAL STOCK

"SEC. 305. (a) As soon as practicable, the Administrator shall open books for subscriptions to the capital stock of the Facility. The minimum subscription shall be $50.

"(b) The capital stock of the Facility—

"(1) shall be divided into shares having a par value of $50 each;

"(2) shall be paid for with cash or with securities of the United States or any agency thereof in accordance with requirements the Administrator may impose;

"(3) shall share in dividend distributions without preference and at rates to be determined by the Administrator; and

"(4) shall not be transferred or hypothecated except as provided for herein.

"(c) When circumstances require that all or a portion of a member's stock be redeemed by the Facility, the Administrator shall pay an amount equal to what the member originally paid for the stock less any amount owed by the member to the Facility.

"(d) At least one-half of the payment for the subscription amount required for membership under section 304 of this title shall be transferred to the Facility. The remainder may be held by the member on call of

the Administrator and shall be invested in assets designated by the Administrator.

"(e) A credit union or credit union group that becomes a member of the Facility later than six months after the date the Administrator opens books for capital stock subscriptions, may not borrow or receive advances from the Facility without approval by the Administrator for a period of six months after becoming a member.

"EXTENSIONS OF CREDIT

"SEC. 306. (a)(1) A member may apply for an extension of credit from the Facility to meet its liquidity needs. The Administrator shall approve or deny any such application within five working days after receiving it.

"(2) The Administrator may advance funds to a member on terms and conditions prescribed by the Administrator.

"(b) The Secretary of the Treasury is authorized to lend to the Facility up to $500,000,000, in the event the Administrator certifies to the Secretary that the Facility does not have sufficient funds to meet liquidity needs of credit unions. Any such loan shall bear an interest rate not greater than one-eighth of 1 per centum above the current average market yield on outstanding obligations of the United States with remaining time to maturity comparable to the maturity of such loan. The authority of the Secretary to lend under this subsection shall be limited to such extent or in such amounts as are provided in advance in appropriation Acts.

"POWERS OF THE ADMINISTRATOR

"SEC. 307. The Administrator on behalf of the Facility shall have the authority to—

"(1) prescribe the manner in which the general business of the Facility shall be conducted;

"(2) prescribe rules and regulations to carry out this title;

"(3) determine the expenditures incurred by the Administration to carry out this title, and the expenditures incurred by the Facility to carry out titles I and II of this Act, and annually assess the Facility and the Administration accordingly;

"(4) borrow from—

"(A) any source with or without the guarantee of the United States as to principal and interest. The total face value of those obligations guaranteed by the United States shall not exceed twenty times the subscribed capital stock and surplus of the Facility;

"(B) the National Credit Union Share Insurance Fund up to $500,000 to defray initial organizational and operating expenses of the Facility at such rates and terms consistent with prevailing market conditions;

"(5) guarantee performance of the terms of any financial obligation of a member but only when such obligation bears a clear and conspicuous notice on its face that only the resources of the Facility underlie such guarantee;

"(6) purchase any asset from a member with the member's endorsement;

"(7) invest in obligations of the United States or any agency thereof;

"(8) make deposits in federally insured financial institutions and make investments in shares or deposits of credit unions;

"(9) sue and be sued, complain, and defend, in any State or Federal court;

"(10) adopt a seal;

"(11) pursue to final disposition by way of compromise or otherwise claims both for and against the United States (other than tort claims, claims involving administrative expenses, and claims in excess of $5,000 arising out of contracts for construction, repairs, and the purchase of supplies and materials) which are not in litigation and have not been referred to the Attorney General;

"(12) appoint officers and employees to assist in carrying out this title, who shall be appointed subject to the provisions of title 5, United States Code;

"(13) conduct business, carry on operations, have offices, and exercise the powers granted by this title in any State or territory;

"(14) lease, purchase, or otherwise acquire and own, hold, improve, use, or otherwise deal in and with property, real, personal, or mixed, or any interest therein, wherever situated; and

"(15) enter into contracts with any public or private organization, partnership, corporation, or individual, to the extent or in such amounts as are provided in advance in appropriation Acts.

"AUDIT OF FINANCIAL TRANSACTIONS

"SEC. 308. The Comptroller General of the United States shall audit the Central Liquidity Facility under such rules and regulations as the Comptroller General may prescribe.

"ANNUAL REPORT

"SEC. 309. The annual report required by section 102(e) shall include a full report of the activities of the Facility.".

SEC. 903. (a) Paragraph (6) of section 107 of the Federal Credit Union Act (12 U.S.C. 1757) is amended by inserting "from the Central Liquidity Facility," after "prescribed,".

(b) Paragraph (7) of such section is amended by striking the word "and" preceding "(H)", and adding at the end thereof the following: "and (J) in the capital stock of the National Credit Union Central Liquidity Facility;".

(c) Paragraph (9) of such section is amended by inserting ", except as authorized by the Administrator in carrying out the provisions of title III," after "exceeding".

SEC. 904. Section 709 of title 18 United States Code, is amended by striking the fourth paragraph and inserting in lieu thereof the following new paragraph:

"Whoever, other than a bona fide organization or association of Federal or State credit unions or except as permitted by the laws of the United States, uses a firm or business name or transacts business using the words 'National Credit Union', 'National Credit Union Administration', 'National Credit Union Board', 'National Credit Union Share Insurance Fund', 'Share Insurance', or 'Central Liquidity Facility', or the letters 'NCUA', 'NCUSIF', or 'CLF', or any other combination or variation of those words or letters alone or with other words or letters, or any device or symbol or other means, reasonably calculated to convey the false impression that such name or business has some connection with, or authorization from, the National Credit Union Administration, the Government of the United States, or any agency thereof, which does not in fact exist, or falsely advertises or otherwise represents by any device whatsover that his or its business, product or service has been in any way endorsed, authorized, or approved by the National Credit Union Administration, the Government of the United States, or any agency thereof, or falsely advertises or otherwise represents by any device whatsoever that his or its deposit liabilities, obligations, certificates, shares, or accounts are insured under the Federal Credit Union Act or by the United States or any instrumentality thereof, or being an insured credit union as defined in that Act falsely advertises or otherwise represents by any device whatsoever the extent to which or the manner in which share holdings in such credit union are insured under such Act; or".

SEC. 905. Section 201 of the Government Corporation Control Act is amended—

(1) by striking out "and" before "(8)"; and

(2) by inserting before the period at the end thereof a comma and the following: "and (9) the National Credit Union Administration Central Liquidity Facility".

SEC. 906. This title shall take effect on October 1, 1979.

TITLE X—FEDERAL BANK EXAMINATION COUNCIL

SHORT TITLE

SEC. 1001. This title my be cited as the "Federal Bank Examination Council Act of 1978".

SEC. 1002. It is the purpose of this title to establish a Bank Examination Council which shall prescribe uniform principles and standards for the Federal examination of banks by the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Board of Governors of the Federal Reserve System and make recommendations to promote uniformity in the supervision of these banks. The Council's actions shall be designed to promote consistency in such examinations and to insure progressive and vigilant supervision.

DEFINITIONS

SEC. 1003. As used in this title—

(1) the term "Federal bank regulatory agencies" means the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation; and

(2) the term "Council" means the Bank Examination Council.

ESTABLISHMENT OF THE COUNCIL

SEC. 1004. (a) There is established the Bank Examination Council which shall consist of—

(1) the Comptroller of the Currency,

(2) the Chairman of the Board of Directors of the Federal Deposit Insurance Corporation, and

(3) the Chairman of the Board of Governors of the Federal Reserve System.

The Chairman of the Federal Home Loan Bank Board and the Chairman of the National Credit Union Administration Board shall serve as advisory members.

(b) The members of the Council shall select the first chairman of the Council. Thereafter the chairmanship shall rotate among the members of the Council.

(c) The term of the Chairman of the Council shall be two years.

(d) The members and advisory members of the Council may, from time to time, designate other officers or employees of their respective agencies to carry out their duties on the Council.

(e) Each member and advisory member of the Council shall serve without additional compensation but shall be entitled to reasonable expenses incurred in carrying out his official duties as such a member or advisory member.

EXPENSES OF THE COUNCIL

SEC. 1005. One-third of the costs and expenses of the Council, including the salaries of its employees, shall be paid by each of the Federal bank regulatory agencies. Annual assessments for such shares shall be levied by the Council based upon its projected budget for the year, and additional assessments may be made during the year if necessary.

FUNCTIONS OF THE COUNCIL

SEC. 1006. (a) The Council shall establish uniform principles and standards and report forms for the examination of banks which shall be applied by the Federal bank regulatory agencies.

(b)(1) The Council shall make recommendations for uniformity in other supervisory matters, such as, but not limited to, classifying loans subject to country risk, identifying banks in need of special supervisory attention, and evaluating the soundness of large loans that are shared by two or more banks. In addition, the Council shall make recommendations regarding the adequacy of

supervisory tools for determining the impact of holding company operations on the banks within the holding company and shall consider the ability of supervisory agencies to discover possible fraud or questionable and illegal payments and practices which might occur in the operation of banks or their holding companies.

(2) When a recommendation of the Council is found unacceptable by one or more of the applicable Federal bank regulatory agencies, the agency or agencies shall submit to the Council, within a time period specified by the Council, a written statement of the reasons the recommendation is unacceptable.

(c) The Council shall develop uniform reporting systems for federally supervised banks, their holding companies, and nonbank subsidiaries of such institutions or holding companies. Such reporting systems shall be consistent with the requirements of section 12(i) of the Securities Exchange Act of 1934.

(d) The Council shall conduct schools for examiners and assistant examiners employed by the Federal banking regulatory agencies. Such schools shall be open to enrollment by employees of the Federal Home Loan Bank Board and the National Credit Union Administration Board and employees of State bank supervisory agencies under conditions specified by the Council.

(e) Nothing in this title shall be construed to limit or discourage Federal bank regulatory agency research and development of new bank supervisory methods and tools, nor to preclude the field testing of any innovation devised by any Federal bank regulatory agency.

(f) Not later than April 1 of each year, the Council shall prepare an annual report covering its activities during the preceding year.

STATE LIAISON

SEC. 1007. To encourage the application of uniform examination principles and standards by State and Federal supervisory agencies, the Council shall establish a liaison committee composed of five representatives of State agencies which supervise financial institutions which shall meet at least twice a year with the Council. Members of the liaison committee shall receive a reasonable allowance for necessary expenses incurred in attending meetings.

ADMINISTRATION

SEC. 1008. (a) The Chairman of the Council is authorized to carry out and to delegate the authority to carry out the internal administration of the Council, including the appointment and supervision of employees and the distribution of business among members, employees, and administrative units.

(b) In addition to any other authority conferred upon it by this title, in carrying out its functions under this title, the Council may utilize, with their consent and to the extent practical, the personnel, services, and facilities of the Federal bank regulatory and supervisory agencies and Federal Reserve banks, with or without reimbursement therefor.

(c) In addition, the Council may—

(1) subject to the provisions of title 5, United States Code, relating to the competitive service, classification, and General Schedule pay rates, appoint and fix the compensation of such officers and employees as are necessary to carry out the provisions of this title, and to prescribe the authority and duties of such officers and employees; and

(2) obtain the services of such experts and consultants as are necessary to carry out the provisions of this title.

ACCESS TO INFORMATION BY THE COUNCIL

SEC. 1009. For the purpose of carrying out this title, the Council shall have access to all books, accounts, records, reports, files, memorandums, papers, things, and property belonging to or in use by Federal bank regulatory agencies, including reports of examination of banks or their holding companies from whatever source, together with workpapers and correspondence files related to such reports, whether or not a part of the report, and all without any deletions.

TITLE XI—ELECTRONIC FUND TRANSFERS

SEC. 1101. The Consumer Credit Protection Act (15 U.S.C. 1601 et seq.) is amended by adding at the end thereof the following new title:

"TITLE IX—ELECTRONIC FUND TRANSFERS

"§ 901. Short title

"This title may be cited as the 'Fair Fund Transfer Act'.

"§ 902. Findings and purpose

"(a) The Congress finds that the use of electronic systems to transfer funds provides the potential for substantial benefits to consumers. However, due to the unique characteristics of such systems, the application of existing consumer protection legislation is unclear, leaving the rights and liabilities of consumers, financial institutions, and intermediaries in electronic fund transfers undefined.

"(b) It is the purpose of this title to provide a basic framework establishing the rights, liabilities, and responsibilities of participants in electronic fund transfer systems. The primary objective of this title, however, is the provision of individual consumer rights.

"§ 903. Definitions

"As used in this title—

"(1) the term 'accepted card or other means of access' means a card, code, or other means of access to a consumer's account for the purpose of initiating electronic fund transfers when the person to whom such card or other means of access was issued has requested and received or has signed or has used, or authorized another to use, such card or other means of access for the purpose of transferring money between accounts or obtaining money, property, labor, or services;

"(2) the term 'account' means a demand deposit, savings deposit, or other asset account (other than an occasional or incidental credit balance in an open end credit plan as defined in section 103(i) of this Act), as described in regulations of the Board, established primarily for personal, family, or household purposes, but such term does not include an account held by a financial institution pursuant to a bona fide trust agreement;

"(3) the term 'Board' means the Board of Governors of the Federal Reserve System;

"(4) the term 'business day' means any day on which the office of the consumer's financial institution involved in an electronic fund transfer are open to the public for carrying on substantially all of its business functions;

"(5) the term 'consumer' means a natural person;

"(6) the term 'electronic fund transfer' means any transfer of funds, other than a transaction originated by check, draft, or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument, or computer or magnetic tape so as to order, instruct, or authorize a financial institution to debit or credit an account. Such term includes, but is not limited to, point-of-sale transfers, automated teller machine transactions, direct deposits or withdrawals of funds, and transfers initiated by telephone. Such term does not include—

"(A) any check guarantee or authorization service which does not directly result in a debit or credit to a consumer's account:

"(B) any transfer of funds other than those processed by automated clearinghouse, made by a financial institution on behalf of a consumer by means of a service that transfers funds held at either Federal Reserve banks or other depository institutions and which is not designed primarily to transfer funds on behalf of a consumer;

"(C) any transaction the primary purpose of which is the purchase or sale of securities or commodities through a broker-dealer registered with or regulated by the Securities and Exchange Commission;

"(D) any automatic transfer from a savings account to a demand deposit account pursuant to an agreement between a consumer and a financial institution for the purpose of covering an overdraft or maintaining an agreed upon minimum balance in the consumer's demand deposit account; or

"(E) any transfer of funds which is initiated by a telephone conversation between a consumer and an officer or employee of a financial institution which is not pursuant to a prearranged plan and under which periodic or recurring transfers are not contemplated,

as determined under regulations of the Board;

"(7) the term 'electronic terminal' means an electronic device, other than a telephone operated by a consumer, through which a consumer may initiate an electronic fund transfer. Such term includes, but is not limited to, point-of-sale terminals, automated teller machines, and cash dispensing machines;

"(8) the term 'financial institution' means a State or National bank, a State or Federal savings and loan association, a mutual savings bank, a State or Federal credit union, or any other person who, directly or indirectly, holds an account belonging to a consumer;

"(9) the term 'preauthorized electronic fund transfer' means an electronic fund transfer authorized in advance to recur at substantially regular intervals;

"(10) the term 'State' means any State, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision of any of the foregoing; and

"(11) the term 'unauthorized electronic fund transfer' means an electronic fund transfer from a consumer's account initiated by a person other than the consumer without actual authority to initiate such transfer and from which the consumer receives no benefit, but the term does not include any electronic fund transfer (A) initiated by a person other than the consumer who was furnished with the card, code, or other means of access to such consumer's account by such consumer, unless the consumer has notified the financial institution involved that transfers by such other person are no longer authorized, (B) initiated with fraudulent intent by the consumer or any person acting in concert with the consumer, or (C) which constitutes an error committed by a financial institution.

"§ 904. Regulations

"(a) The Board shall prescribe regulations to carry out the purposes of this title. In prescribing such regulations, the Board shall—

"(1) consult with the other agencies referred to in section 917 and take into account, and allow for, the continuing evolution of electronic banking services and the technology utilized in such services;

"(2) prepare an analysis of economic impact which considers the costs and benefits to financial institutions, consumers, and other users of electronic fund transfers, including the extent to which additional documentation, reports, records, or other paper work would be required, and the effects upon competition in the provision of electronic banking services among large and

small financial institutions and the availability of such services.

"(b) The Board shall issue model clauses for optional use by financial institutions to facilitate compliance with the disclosure requirements of section 905 and to aid consumers in understanding the rights and responsibilities of participants in electronic fund transfers by utilizing readily understandable language. Such model clauses shall be adopted after notice duly given in the Federal Register and opportunity for public comment in accordance with section 553 of title 5, United States Code. With respect to the disclosures required by section 905(a)(3) and (4), the Board shall take account of variations in the services and charges under different electronic fund transfer systems and, as appropriate, shall issue alternative model clauses for disclosure of these differing account terms.

"(c) Regulations prescribed hereunder may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of electronic fund transfers, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumvention or evasion thereof, or to facilitate compliance therewith.

"(d) In the event that electronic fund transfer services are made available to consumers by a person other than a financial institution holding a consumer's account, the Board shall by regulation assure that the disclosures, protections, responsibilities, and remedies created by this title are made applicable to such persons and services.

"§ 905. Terms and conditions of transfers

"(a) The terms and conditions of electronic fund transfers involving a consumer's account shall be disclosed at the time the consumer contracts for an electronic fund transfer service, in accordance with regulations of the Board. Such disclosures shall be in readily understandable language and shall include, to the extent applicable—

"(1) the consumer's liability for unauthorized electronic fund transfers and, at the financial institution's option, notice of the advisability of prompt reporting of any loss, theft, or unauthorized use of a card, code, or other means of access;

"(2) the telephone number and address of the person or office to be notified in the event the consumer believes that an unauthorized electronic fund transfer has been or may be effected;

"(3) the type and nature of electronic fund transfers which the consumer may initiate, including any limitations on the frequency or dollar amount of such transfers, except that the details of such limitations need not be disclosed if their confidentiality is necessary to maintain the security of an electronic fund transfer system, as determined by the Board;

"(4) any charges for electronic fund transfers or for the right to make such transfers;

"(5) the consumer's right to stop payment of a preauthorized electronic fund transfer and the procedure to initiate such a stop payment order;

"(6) the consumer's right to receive documentation of electronic fund transfers under section 906;

"(7) a summary, in a form prescribed by regulations of the Board, of the error resolution provisions of section 908 and the consumer's rights thereunder. The financial institution shall thereafter transmit such summary at least once per calendar year;

"(8) the financial institution's liability to the consumer under section 910; and

"(9) under what circumstances the financial institution will in the ordinary course of business disclose information concerning the consumer's account to third persons.

"(b) A financial institution shall notify a consumer in writing at least twenty-one days prior to the effective date of any change in any term or condition of the consumer's account required to be disclosed under subsection (a) if such change would result in greater cost or liability for such consumer or decreased access to the consumer's account. A financial institution may, however, implement a change in the terms or conditions of an account without prior notice when such change is immediately necessary to maintain or restore the security of an electronic fund transfer system or a consumer's account. Subject to subsection (a)(3), the Board shall require subsequent notification if such a change is made permanent.

"(c) For any account of a consumer made accessible to electronic fund transfers prior to the effective date of this title, the information required to be disclosed to the consumer under subsection (a) shall be disclosed not later than the earlier of—

"(1) the first periodic statement required by section 906(c) after the effective date of this title; or

"(2) thirty days after the effective date of this title.

"§ 906. Documentation of transfers; periodic statements

"(a) For each electronic fund transfer initiated by a consumer from an electronic terminal, the financial institution holding such consumer's account shall, directly or indirectly, at the time the transfer is initiated, make available to the consumer written documentation of such transfer. The documentation shall clearly set forth to the extent applicable—

"(1) the amount involved and date the transfer is initiated;

"(2) the type of transfer;

"(3) the identity of the consumer's account with the financial institution from which or to which funds are transferred;

"(4) the identity of any third party to whom or from whom funds are transferred; and

"(5) the location or identification of the electronic terminal involved.

"(b) For a consumer's account which is scheduled to be credited by a preauthorized electronic fund transfer from the same payor at least once in each successive sixty-day period, except where the payor provides positive notice of the transfer to the consumer, the financial institution shall elect to provide promptly either positive notice to the consumer when the credit is made as scheduled, or negative notice to the consumer when the credit is not made as scheduled, in accordance with regulations of the Board. The means of notice elected shall be disclosed to the consumer in accordance with section 905.

"(c) A financial institution shall provide each consumer with a periodic statement for each account of such consumer that may be accessed by means of an electronic fund transfer. Except as provided in subsection (d) and (e), such statement shall be provided at least monthly for each monthly or shorter cycle in which an electronic fund transfer affecting the account has occurred, or every three months, whichever is more frequent. The statement, which may include information regarding transactions other than electronic fund transfers, shall clearly set forth—

"(1) with regard to each electronic fund transfer during the period, the information described in subsection (a), which may be provided on an accompanying document;

"(2) the amount of any fee or charge assessed by the financial institution during the period for electronic fund transfers or for account maintenance;

"(3) the balances in the consumer's account at the beginning of the period and at the close of the period; and

"(4) the address and telephone number to be used by the financial institution for the purpose of receiving any statement inquiry or notice of account error from the consumer. Such address and telephone number shall be preceded by the caption 'Direct Inquiries To:' or other similar language indicating that the address and number are to be used for such inquiries or notices.

"(d) In the case of a consumer's passbook account which may not be assessed by electronic fund transfers other than preauthorized electronic fund transfers crediting the account,

• • • • •

"§ Preauthorized transfers

"(a) A preauthorized electronic fund transfer from a consumer's account may be authorized by the consumer only in writing, and a copy of such authorization shall be provided to the consumer when made. A consumer may stop payment of a preauthorized electronic fund transfer by notifying the financial institution orally or in writing at any time up to three business days preceding the scheduled date of such transfer. The financial institution may require written confirmation to be provided to it within fourteen days of an oral notification if, when the oral notification is made, the consumer is advised of such requirement and the address to which such confirmation should be sent.

"(b) In the case of preauthorized transfers from a consumer's account t the same person which may vary in amount, the financial institution or designated payee shall, prior to each transfer, provide reasonable advance notice to the consumer, in accordance with regulations of the Board, of the amount to be transferred and the scheduled date of the transfer.

"§ 908. Error resolution

"(a) If a financial institution, within sixty days after having transmitted to a consumer documentation pursuant to section 906 (a), (c), or (d) or notification pursuant to section 906(b), receives oral or written notice in which the consumer—

"(1) sets forth or otherwise enables the financial institution to identify the name and account number of the consumer;

"(2) indicates the consumer's belief that the documentation, or, in the case of notification pursuant to section 906(b), the consumer's account, contains an error and the amount of such error; and

"(3) sets forth the reasons for the consumer's belief (where applicable) that an error has occurred, the financial institution shall investigate the alleged error, determine whether an error has occurred, and report or mail the results of such investigation and determination to the consumer within ten business days. The financial institution may require written confirmation to be provided to it within ten business days after such determination, correct the error, subject to section 909, including the crediting of interest where applicable.

"(c) If a financial institution receives notice of an error in the manner and within the time period specified in subsection (a), it may, in lieu of the requirements of subsections (a) and (b), within ten business days after receiving such notice provisionally recredit the consumer's account for the amount alleged to be in error, subject to section 909, including interest where applicable, pending the conclusion of its investigation and its determination of whether an error has occurred. Such investigation shall be concluded not later than forty-five days after receipt of notice of the error. During the pendency of the investigation, the consumer shall have full use of the funds provisionally recredited.

"(d) If the financial institution determines after its investigation pursuant to subsection (a) or (c) that an error did not occur, it shall deliver or mail to the consumer an explanation of its findings within 3 business days after the conclusion of its investigation, and upon request of the consumer promptly deliver or mail to the consumer reproductions of all documents which

the financial institution relied on to conclude that such error did not occur. The financial institution shall include notice of the right to request reproductions with the explanation of its findings.

"(e) If in any action under section 915, the court finds that—

"(1) the financial institution did not provisionally recredit a consumer's account within the ten-day period specified in subsection (c), and the financial institution (A) did not make a good faith investigation of the alleged error, or (B) did not have a reasonable basis for believing that the consumer's account was not in error; or

"(2) the financial institution knowingly and willfully concluded that the consumer's account was not in error when such conclusion could not reasonably have been drawn from the evidence available to the financial institution at the time of its investigation,

then the consumer shall be entitled to treble damages determined under section 915 (a)(1).

"(f) For the purpose of this section, an error consists of—

"(1) an unauthorized electronic fund transfer;

"(2) an incorrect electronic funds transfer from or to the consumer's account;

"(3) the omission from a periodic statement of an electronic fund transfer affecting the consumer's account which should have been included;

"(4) a computational error by the financial institution;

"(5) the consumer's receipt of an incorrect amount of money from an electronic terminal;

"(6) a consumer's request for additional information or clarification concerning an electronic fund transfer or any documentation required by this title; or

"(7) any other error described in regulations of the Board.

"§ 909. Consumer liability for unauthorized transfers

"(a) A consumer shall be liable for any unauthorized electronic fund transfer involving the account of such consumer only if the card or other means of access utilized for such transfer was an accepted card or other means of access and if the issuer of such card, code, or other means of access has provided a means whereby the user of such card, code, or other means of access can be identified as the person authorized to use it, such as by signature, photograph, or fingerprint or by electronic or mechanical confirmation. In no event, however, shall a consumer's liability for an unauthorized transfer exceed the lesser of—

"(1) $50; or

"(2) the amount of money or value of property or services obtained in such unauthorized electronic fund transfer prior to the time the financial institution is notified of, or otherwise becomes aware of, circumstances which lead to the reasonable belief that an unauthorized electronic fund transfer involving the consumer's account has been or may be effected. Notice under this paragraph is sufficient when such steps have been taken as may be reasonably required in the ordinary course of business to provide the financial institution with the pertinent information, whether or not any particular officer, employee, or agent of the financial institution does in fact receive such information.

Notwithstanding the foregoing, reimbursement need not be made to the consumer for losses the financial institution establishes would not have occurred but for the failure of the consumer to report within sixty days of transmittal of the statement (or in extenuating circumstances such as extended travel or hospitalization, within a reasonable time under the circumstances) any unauthorized electronic fund transfer or account error which appears on the periodic statement provided to the consumer under section 906.

"(b) In any action which involves a consumer's liability for an unauthorized electronic fund transfer, the burden of proof is upon the financial institution to show that the electronic fund transfer was authorized or, if the electronic fund transfer was unauthorized, then the burden of proof is upon the financial institution to establish that the conditions of liability set forth in subsection (a) have been met, and, if the transfer was initiated after the effective date of section 905, that the disclosures required to be made to the consumer under section 905(a) (1) and (2) were in fact made in accordance with such section.

"(c) In the event of a transaction which involves both an unauthorized electronic fund transfer and an extension of credit as defined in section 103(e) of this Act pursuant to an agreement between the consumer and the financial institution to extend such credit to the consumer in the event the consumer's account is overdrawn, the limitation on the consumer's liability for such transaction shall be determined solely in accordance with this section.

"(d) Nothing in this section imposes liability upon a consumer for an unauthorized electronic fund transfer in excess of his liability for such a transfer under other applicable law or under any agreement with the consumer's financial institution.

"(e) Except as provided in this section, a consumer incurs no liability from an unauthorized electronic fund transfer.

"§ 910. Liability of financial institutions

"(a) Subject to subsections (b) and (c), a finincial institution shall be liable to a consumer for all damages proximately caused by—

"(1) the financial institution's failure to make an electronic fund transfer, in accordance with the terms and conditions of an account, in the correct amount or in a timely manner when properly instructed to do so by the consumer, except where—

"(A) the consumer's account has insufficient funds;

"(B) the funds are subject to legal process or other encumbrance restricting such transfer;

"(C) such transfer would exceed an established credit limit;

"(D) an electronic terminal has insufficient cash to complete the transaction; or

"(E) as otherwise provided in regulations of the Board;

"(2) the financial institution's failure to make an electronic fund transfer due to insufficient funds when the financial institution failed to credit, in accordance with the terms and conditions of an account, a deposit of funds to the consumer's account which would have provided sufficient funds to make the transfer; and

"(3) the financial institution's failure to stop payment of a preauthorized transfer from a consumer's account when instructed to do so in accordance with the terms and conditions of the account.

"(b) A financial institution shall not be liable under subsection (a)(1) or (2) if the financial institution shows by a preponderance of the evidence that its action or failure to act resulted from—

"(1) an act of God or other circumstance beyond its control, that it exercised reasonable care to prevent such an occurrence, and that it exercised such diligence as the circumstances required; or

"(2) a technical malfunction which was known to the consumer at the time he attempted to initiate an electronic fund transfer or, in the case of a preauthorized transfer, at the time such transfer should have occurred.

"(c) In the case of a failure described in subsection (a) which was not intentional and which resulted from a bona fide error, notwithstanding the maintenance of procedures reasonably adapted to avoid any such error, the financial institution shall be liable for actual damages proved.

"§ 911. Issuance of cards or other means of access

"(a) No person may issue to a consumer any card, code, or other means of access to such consumer's account for the purpose of initiating an electronic fund transfer other than—

"(1) in response to a request or application therefor; or

"(2) as a renewal of, or in substitution for, an accepted card, code, or other means of access, whether issued by the initial issuer or a successor.

"(b) Notwithstanding the provisions of subsection (a), a person may distribute to a consumer on an unsolicited basis a card, code, or other means of access for use in initiating an electronic fund transfer from such consumer's account, if—

"(1) such card, code, or other means of access is not validated;

"(2) such distribution is accompanied by a complete disclosure, in accordance with section 905, of the consumer's rights and liabilities which will apply if such card, code, or other means of access is validated;

"(3) such distribution is accompanied by a clear explanation, in accordance with regulations of the Board, that such card, code, or other means of access is not validated and how the consumer may dispose of such code, card, or other means of access if validation is not desired; and

"(4) such card, code, or other means of access is validated only in response to a request or application from the consumer, upon verification of the consumer's identity.

"(c) For the purpose of subsection (b), a card, code, or other means of access is validated when it may be used to initiate an electronic fund transfer.

"§ 912. Suspension of obligations

"If a system malfunction prevents the effectuation of an electronic funds transfer initiated by a consumer to another person, and such other person has agreed to accept payment by such means, the consumer's obligation to the other person shall be suspended until the malfunction is corrected and the electronic fund transfer may be completed, unless such other person has subsequently, by written request, demanded payment by means other than an electronic fund transfer.

"§ 913. Compulsory use of electronic fund transfers

"No person may—

"(1) condition the extension of credit to a consumer on such consumer's repayment by means of preauthorized electronic fund transfers; or

"(2) require a consumer to establish an account for receipt of electronic fund transfers with a particular financial institution as a condition of employment or receipt of a government benefit.

"§ 914. Waiver of rights

"No writing or other agreement between a consumer and any other person may contain any provision which constitutes a waiver of any right conferred or cause of action created by this title. Nothing in this section prohibits, however, any writing or other agreement which grants to a consumer a more extensive right or remedy or greater protection than contained in this title or a waiver given in settlement of a dispute or action.

"§ 915. Civil liability

"(a) Except as otherwise provided by this section and section 910, any person who fails to comply with any provision of this title

with respect to any consumer, except for an error resolved in accordance with section 908, is liable to such consumer in an amount equal to the sum of—

"(1) any actual damage sustained by such consumer as a result of such failure;

"(2) (A) in the case of an individual action, an amount not less than $100 nor greater than $1,000; or

"(B) in the case of a class action, such amount as the court may allow, except that (i) as to each member of the class no minimum recovery shall be applicable, and (ii) the total recovery under this subparagraph in any class action or series of class actions arising out of the same failure to comply by the same person shall not be more than the lesser of $500,000 or 1 per centum of the net worth of the defendant; and

"(3) in the case of any successful action to enforce the foregoing liability, the costs of the action, together with a reasonable attorney's fees as determined by the court.

"(b) In determining the amount of liability in any action under subsection (a), the court shall consider, among other relevant factors—

"(1) in any individual action under subsection (a)(2)(A), the frequency and persistence of noncompliance, the nature of such noncompliance, and the extent to which the noncompliance was intentional; or

"(2) in any class action under subsection (a)(2)(B), the frequency and persistence of noncompliance, the nature of such noncompliance, the resources of the defendant, the number of persons adversely affected, and the extent to which the noncompliance was intentional.

"(c) Except as provided in section 910, a person may not be held liable in any action brought under this section for a violation of this title if the person shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adapted to avoid any such error.

"(d) No provision of this section or section 916 imposing any liability shall apply to—

"(1) any act done or omitted in good faith in conformity with any rule, regulation, or interpretation thereof by the Board or in conformity with any interpretation or approval by an official or employee of the Federal Reserve System duly authorized by the Board to issue such interpretations or approvals under such procedures as the Board may prescribe therefor; or

"(2) any failure to make disclosure in proper form if a financial institution utilized an appropriate model clause issue by the Board,

notwithstanding that after such act, omission, or failure has occurred, such rule, regulation, approval, or model clause is amended, rescinded, or determined by judicial or other authority to be invalid for any reason.

"(e) A person has no liability under this section for any failure to comply with any requirement under this title if, prior to the institution of an action under this section, the person notifies the consumer concerned of the failure, complies with the requirements of this title, and makes an appropriate adjustment to the consumer's account and pays actual damages or, where applicable, damages in accordance with section 910.

"(f) On a finding by the court that an unsuccessful action under this section was brought in bad faith or for purposes of harassment, the court shall award to the defendant attorney's fees reasonable in relation to the work expended and costs.

"(g) Without regard to the amount in controversy, any action under this section may be brought in any United States district court, or in any other court of competent jurisdiction, within one year from the date of the occurrence of the violation.

"§ 916. Criminal liability

"(a) Whoever knowingly and willfully—

"(1) gives false or inaccurate information or fails to provide information which he is required to disclose by this title or any regulation issued thereunder; or

"(2) otherwise fails to comply with any provision of this title;

shall be fined not more than $5,000 or imprisoned not more than one year, or both.

"(b) Whoever—

"(1) knowingly, in a transaction affecting interstate or foreign commerce, uses or attempts or conspires to use any counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument to obtain money, goods, services, or anything else of value which within any one-year period has a value aggregating $1,000 or more;

"(2) with unlawful or fraudulent intent, transports or attempts or conspires to transport in interstate or foreign commerce a counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained; or

"(3) with unlawful or fraudulent intent, uses any instrumentality of interstate or foreign commerce to sell or transport a counterfeit, fictitious, altered, forged, lost, stolen, or fradulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained; or

"(4) knowingly receives, conceals, uses, or transports money, goods, services, or anything else of value (except tickets for interstate or foreign transportation) which (A) within any one-year period has a value aggregating $1,000 or more, (B) has moved in or is part of, or which constitutes interstate or foreign commerce, and (C) has been obtained with a counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument; or

"(5) knowingly receives, conceals, uses, sells, or transports in interstate or foreign commerce one or more tickets for interstate or foreign transportation, which (A) within any one-year period have a value aggregating $500 or more, and (B) have been purchased or obtained with one or more counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument; or

"(6) in a transaction affecting interstate or foreign commerce, furnishes money, property, services, or anything else of value, which within any one-year period has a value aggregating $1,000 or more, through the use of any counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained—

shall be fined not more than $10,000 or imprisoned not more than ten years, or both.

"(c) As used in this section, the term 'debit instrument' means a card, code, or other device, other than a check, draft, or similar paper instrument, by the use of which a person may initiate an electronic fund transfer.

"§ 917. Administrative enforcement

"(a) Compliance with the requirements imposed under this title shall be enforced under—

"(1) section 8 of the Federal Deposit Insurance Act, in the case of—

"(A) national banks, by the Comptroller of the Currency;

"(B) member banks of the Federal Reserve System (other than national banks), by the Board;

"(C) banks insured by the Federal Deposit Insurance Corporation (other than members of the Federal Reserve System), by the Board of Directors of the Federal Deposit Insurance Corporation;

"(2) section 5(d) of the Home Owners' Loan Act of 1933, section 407 of the National Housing Act, and sections 6(i) and 17 of the Federal Home Loan Bank Act, by the Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Insurance Corporation), in the case of any institution subject to any of those provisions;

* * * * *

imposed under this title shall be deemed to be a violation of a requirement imposed under that Act. In addition to its powers under any provision of law specifically referred to in subsection (a), each of the agencies referred to in that subsection may exercise, for the purpose of enforcing compliance with any requirement imposed under this title, any other authority conferred on it by law.

"(c) Except to the extent that enforcement of the requirements imposed under this Act is specifically committed to some other Government agency under subsection (a), the Federal Trade Commission shall enforce such requirements. For the purpose of the exercise by the Federal Trade Commission of its functions and powers under the Federal Trade Commission Act, a violation of any requirement imposed under this Act shall be deemed a violation of a requirement imposed under that Act. All of the functions and powers of the Federal Trade Commission under the Federal Trade Commission Act are available to the Commission to enforce compliance by any person subject to the jurisdiction of the Commission with the requirements imposed under this Act, irrespective of whether that person is engaged in commerce or meets any other jurisdictional tests in the Federal Trade Commission Act.".

§ 918. Reports to Congress

"(a) Not later than twelve months after the effective date of this title and at one-year intervals thereafter, the Board and the Attorney General shall, respectively, make reports to the Congress concerning the administration of their functions under this title, including such recommendations as the Board and the Attorney General, respectively, deem necessary or appropriate. In addition, each report of the Board shall include its assessment of the extent to which compliance with this title is being achieved, and a summary of the enforcement actions taken under section 917 of this title. In such report, the Board shall particularly address the effects of this title on the costs and benefits to financial institutions and consumers, on competition, on the introduction of new technology, on the operations of financial institutions, and on the adequacy of consumer protection. The report of the Attorney General shall also contain an analysis of the impact of this title on the operation, workload, and efficiency of the Federal courts.

"(b) In the exercise of its functions under this title, the Board may obtain upon request the views of any other Federal agency which, in the judgment of the Board, exercises regulatory or supervisory functions with respect to any class of persons subject to this title.

§ 919. Relation to State laws

"This title does not annul, alter, or affect the laws of any State relating to electronic fund transfers, except to the extent that those laws are inconsistent with the provisions of this title, and then only to the extent of the inconsistency. A State law is not inconsistent with this title if the protection such law affords any consumer is greater than the protection afforded by this title. The Board shall, upon its own motion or upon the request of any financial institution, State, or other interested party, submitted in accordance with procedures prescribed in regulations of the Board, determine whether

a State requirement is inconsistent or affords greater protection. If the Board determines that a State requirement is inconsistent, financial institutions shall incur no liability under the law of that State for a good faith failure to comply with that law, notwithstanding that such determination is subsequently amended, rescinded, or determined by judicial or other authority to be invalid for any reason. This title does not extend the applicability of any such law to any class of persons or transactions to which it would not otherwise apply.

§ 920. Exemption for State regulation

"The Board shall by regulation exempt from the requirements of this title any class of electronic fund transfers within any State if the Board determines that under the law of that State that class of electronic fund transfers is subject to requirements substantially similar to those imposed by this title, and that there is adequate provision for enforcement.

"§ 921. Effective date

"This title takes effect upon the expiration of eighteen months from the date of its enactment, except that sections 909 and 911 take effect upon the expiration of ninety days after the date of enactment.".

TITLE XII—TRUTH IN LENDING SIMPLIFICATION

SHORT TITLE

SEC. 1201. This title may be cited as the "Truth in Lending Simplification and Reform Act".

DEFINITIONS

SEC. 1202. (a) Section 103(f) of the Truth in Lending Act is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following: "The term 'creditor' refers only to a person who both (1) regularly extends, whether in connection with loans, sales of property or services, or otherwise, consumer credit which is payable by agreement in more than four installments or for which the payment of a finance charge is or may be required; and (2) is the person to whom the debt arising from the consumer credit transaction is initially payable on the face of the evidence of indebtedness or, if there is no such evidence of indebtedness, by agreement. Notwithstanding the foregoing, a person who regularly arranges for the extension of consumer credit, which is payable in more than four installments or for which the payment of a finance charge is or may be required, from persons who are not creditors is a creditor, and in the case of an open end credit plan involving a credit card the card issuer and any person who honors the credit card and offers a discount which is a finance charge are creditors."; and

(2) by redesignating the references to sections 127(a)(6), 127(a)(7), 127(a)(8), 127(b)(9), and 127(b)(11) in the next succeeding sentence as references to sections 127(a)(5), 127(a)(6), 127(a)(7), 127(b)(8), and 127(b)(10), respectively.

(b) The first sentence of section 103(g) of the Truth in Lending Act is amended to read as follows: "The term 'credit sale' refers to any sale in which the seller is a creditor.".

EXEMPTED TRANSACTIONS

SEC. 1203. (a) Section 103(h) of the Truth in Lending Act is amended by striking out "household, or agricultural" and inserting in lieu thereof "or household".

(b) Section 103 of the Truth in Lending Act is amended by redesignating subsection (s) as subsection (x), and by inserting a new subsection (s) as follows:

"(s) The term 'agricultural purposes' includes the production, harvest, exhibition, marketing, transportation, processing, or manufacture of agricultural products by a natural person who cultivates, plants, propagates, or nurtures those agricultural products, including but not limited to the acquisition of farmland, real property with a farm residence, and personal property and services used primarily in farming, and the term 'agricultural products' includes agricultural, horticultural, viticultural, and dairy products, livestock, wildlife, poultry, bees, forest products, fish and shellfish, and any products thereof, including processed and manufactured products, and any and all products raised or produced on farms and any processed or manufactured products thereof.".

(c) Section 104 of the Truth in Lending Act is amended—

(1) by amending paragraph (1) to read as follows:

"(1) Credit transactions involving extensions of credit primarily for business, commercial, or agricultural purposes, or to government or governmental agencies or instrumentalities, or to organizations.";

(2) by amending paragraph (3) to read as follows:

"(3) Credit transactions, other than those in which a security interest is or will be acquired in real property, or in personal property used or expected to be used as the principal dwelling of the consumer, in which the total amount financed exceeds $25,000."; and

(3) by striking out paragraph (5).

OPEN END CREDIT PLAN

SEC. 1204. Section 103(i) of the Truth in Lending Act is amended to read as follows:

"(i) The term 'open end credit plan' means a plan under which the creditor reasonably contemplates repeated transactions, which prescribes the terms of such transactions, and which provides for a finance charge which may be computed from time to time on the outstanding unpaid balance. A credit plan which is an open end credit plan within the meaning of the preceding sentence is an open end credit plan even if credit information is verified from time to time.".

MODEL FORMS

SEC. 1205. (a) Section 105 of the Truth in Lending Act is amended by inserting "(a)" before "The", and by adding at the end thereof the following:

"(b) The Board shall publish model disclosure forms and clauses for common transactions to facilitate compliance with the disclosure requirements of this title and to aid the borrower in understanding the transaction by utilizing readily understandable language to simplify the technical nature of the disclosures. In devising such forms, the Board shall consider the use by creditors of data processing or similar automated equipment. Nothing in this title may be construed to require a creditor to use any such model form or clause prescribed by the Board under this section. A creditor shall be deemed to be in compliance with the disclosure provisions of this title with respect to other than numerical disclosures if the creditor (1) uses any appropriate model form or clause as published by the Board, or (2) uses any such model form or clause and changes it by (A) deleting any information which is not required by this title, or (B) rearranging the format, if in making such deletion or rearranging the format, the creditor does not affect the substance, clarity, or meaningful sequence of the disclosure.

"(c) Model disclosure forms and clauses shall be adopted by the Board after notice duly given in the Federal Register and an opportunity for public comment in accordance with section 553 of title 5, United States Code.

"(d) Any regulation of the Board, or any amendment or interpretation thereof, requiring any disclosure different from that previously required by this chapter, chapter 4, or chapter 5, or regulation of the Board promulgated thereunder shall have an effective date of that October 1 which follows by at least six months the date of promulgation, except that the Board may at its discretion take interim action by regulation, amendment, or interpretation to lengthen the period of time permitted for creditors to adjust their forms to accommodate new requirements or shorten the length of time for creditors to make such adjustments when it makes a specific finding that such action is necessary to comply with the findings of a court or to prevent unfair or deceptive disclosure practices. Notwithstanding the foregoing, any creditor may comply with any such newly promulgated disclosure requirements prior to the effective date of the requirements.".

COMPONENTS OF FINANCE CHARGE

SEC. 1206. (a) Section 106(a) of the Truth in Lending Act is amended by striking out ", including any of the following types of charges which are applicable" and inserting in lieu thereof the following: ". The finance charge does not include charges of a type payable in a comparable cash transaction. Examples of charges which are included in the finance charge include any of the following types of charges which are applicable".

(b) Section 106(d) of the Truth in Lending Act is amended by striking out paragraphs (3) and (4).

ACCURACY OF ANNUAL PERCENTAGE RATE

SEC. 1207. (a) Subsection (c) of section 107 of the Truth in Lending Act is amended to read as follows:

"(c) The disclosure of an annual percentage rate is accurate for the purpose of this title if the rate disclosed is within a tolerance not greater than one-eighth of 1 per centum more or less than the actual rate or rounded to the nearest one-fourth of 1 per centum. The Board may allow a greater tolerance to simplify compliance where irregular payments are involved.".

(b) Subsection (e) of section 107 of the Truth in Lending Act is amended by striking out "(c) or".

(c) Subsection (f) of section 107 of the Truth in Lending Act is repealed.

ADMINISTRATIVE ENFORCEMENT; RESTITUTION

SEC. 1208.

(a) Section 108 of the Truth in Lending Act is amended by adding at the end thereof the following:

"(e)(1) In carrying out its enforcement activities under this section, each agency referred to in subsection (a) or (c), in cases where an annual percentage rate or finance charge was inaccurately disclosed, shall notify the creditor of such disclosure error and is authorized in accordance with the provisions of this subsection to require the creditor to make an adjustment to the account of the person to whom credit was extended, to assure that such person will not be required to pay a finance charge in excess of the finance charge actually disclosed or the dollar equivalent of the annual percentage rate actually disclosed, whichever is lower.

"(2) Each agency shall require such an adjustment when it determines that such disclosure error resulted from (A) a clear and consistent pattern or practice of violations, (B) gross negligence, or (C) a willful violation which was intended to mislead the person to whom the credit was extended. In the case of other such disclosure errors, each agency may require such an adjustment.

"(3) Notwithstanding the above paragraph (2), no adjustment shall be ordered (A) if it would have a significantly adverse impact upon the safety or soundness of the creditor, but in any such case, the agency may require a partial adjustment in an amount which does not have such an impact, (B) if the amount of the adjustment would be less than $1, except that if more than one year has elapsed since the date of the violation, the agency may require that such amount be

paid into the Treasury of the United States, or (C) except where such disclosure error resulted from a willful violation which was intended to mislead the person to whom credit was extended, in the case of an open-end credit plan, more than two years after the violation, or in the case of any other extension of credit, after the later of (i) the expiration of the life of the credit extension, or (ii) two years after the agreement to extend credit was consummated.

"(4)(A) Notwithstanding any other provision of this section, an adjustment under this subsection may be required by an agency referred to in subsection (a) or (c) only by an order issued in accordance with cease-and-desist procedures provided by the provision of law referred to in such subsections.

"(B) In the case of an agency which is not authorized to conduct cease-and-desist proceedings, such an order may be issued after an agency hearing on the record conducted at least thirty but not more than sixty days after notice of the alleged violation is served on the creditor. Such a hearing shall be deemed to be a hearing which is subject to the provisions of section 8(h) of the Federal Deposit Insurance Act and shall be subject to judicial review as provided therein.

"(5) Except as otherwise specifically provided in this subsection and notwithstanding any provision of law referred to in subsection (a) or (c), no agency referred to in subsection (a) or (c) may require a creditor to make dollar adjustments under this title, except with regard to the requirements of section 165.

"(6) A creditor shall not be subject to an order to make an adjustment, if within sixty days after discovering a disclosure error, whether pursuant to a final written examination report or through the creditor's own procedures, the creditor notifies the person concerned of the error and adjusts the account so as to assure that such person will not be required to pay a finance charge in excess of the finance charge actually disclosed or the dollar equivalent of the annual percentage rate actually disclosed, whichever is lower.

"(7) The provisions of this subsection do not apply to any loan or extension of credit consummated prior to October 28, 1974.".

EFFECT ON OTHER LAWS

SEC. 1209. Section 111(a) of the Truth in Lending Act is amended to read as follows:

"(a)(1) This title does not annul, alter, or affect the laws of any State relating to the disclosure of information in connection with credit transactions, except to the extent that those laws are inconsistent with the provisions of this title, and then only to the extent of the inconsistency. The Board shall, upon its own motion or upon the request of any creditor, State, or other interested party, submitted in accordance with procedures prescribed in regulations of the Board, determine whether such inconsistencies exist. If the Board determines that a State-required disclosure is inconsistent, creditors located in that State may not make disclosures using the inconsistent term or form, and shall incur no liability under the law of that State for a good faith failure to use such term or form, notwithstanding that such determination is subsequently amended, rescinded, or determined by judicial or other authority to be invalid for any reason.

"(2) The Board shall, upon its own motion or upon the request of any creditor, State, or other interested party, submitted in accordance with procedures prescribed in regulations of the Board, determine whether any disclosure required under the law of any State is substantially the same in meaning as a disclosure required under this title. If the Board determines that a State-required disclosure in substantially the same in meaning as a disclosure required by this title, then creditors located in that State may make such disclosure in compliance with such State law in lieu of the disclosure required by this title, except that the annual percentage rate and finance charge must always be disclosed as required by section 122.".

SEC. 1210. (a) Section 114 of the Truth in Lending Act is amended by striking out "not later than January 3 of each year after 1969" and inserting in lieu thereof "Each year".

(b) Section 18(f)(5) of the Federal Trade Commission Act (15 U.S.C. 58a(f)(5)) is amended by striking out "not later than March 15".

(c) Section 707 of the Equal Credit Opportunity Act is amended by striking out "Not later than February 1 of each year after 1976" and inserting in lieu thereof "Each year".

GENERAL DISCLOSURE REQUIREMENTS

SEC. 1211. Sections 121 and 122 of the Truth in Lending Act are amended to read as follows:

"§ 121. General requirement of disclosure

"(a) Subject to subsection (b), a creditor or lessor shall disclose to the person who is obligated on a consumer lease or a consumer credit transaction the information required under this title. In a transaction involving more than one obligor, a creditor or lessor, except in a transaction under section 125, need not disclose to more than one of them if the one given disclosure is a primary obligor.

"(b) If a transaction involves one creditor as defined in section 103(f), or one lessor as defined in section 181(3), that creditor or lessor shall make the disclosures. If a transaction involves more than one creditor or lessor, only one creditor or lessor shall be required to make the disclosures. The Board shall by regulation specify which creditor or lessor must make the disclosures.

"(c) The Board may provide by regulation that any portion of the information required to be disclosed by this title may be given in the form of estimates where the provider of such information is not in a position to know exact information.

"(d) The Board shall determine whether tolerances for numerical disclosures other than the annual percentage rate are necessary to facilitate compliance with this title, and if it determines that such tolerances are necessary to facilitate compliance, it shall by regulation permit disclosures within such tolerances.

"§ 122. Form of disclosure; additional information

"(a) Information required by this title shall be disclosed clearly and conspicuously, in accordance with regulations of the Board. The terms 'annual percentage rate' and 'finance charge' shall be disclosed more conspicuously than other terms, data, or information provided in connection with a transaction, except information relating to the identity of the creditor. Regulations of the Board need not require that disclosures pursuant to this title be made in the order set forth in this title and, except as otherwise provided, may permit the use of terminology different from that employed in this title if it conveys substantially the same meaning.

"(b) Any creditor may supply additional information or explanation with any disclosures required under chapter 4 and, except as provided in section 128(b)(1), under this chapter.".

RESCISSION

SEC. 1212. (a)(1) Subsection (a) of section 125 of the Truth in Lending Act is amended to read as follows:

"(a) Except as otherwise provided in this section, in the case of any consumer credit transaction (including opening or increasing the credit limit for an open end credit plan) in which a security interest, including any such interest arising by operation of law, is or will be retained or acquired in any property which is used as the principal dwelling of the person to whom credit is extended, the obligor shall have the right to rescind the transaction until midnight of the third business day following the consummation of the transaction or the delivery of the information and rescission forms required under this section together with a statement containing the material disclosures required under this title, whichever is later, by notifying the creditor, in accordance with regulations of the Board, of his intention to do so. The creditor shall clearly and conspicuously disclose, in accordance with regulations of the Board, to any obligor in a transaction subject to this section the rights of the obligor under this section. The creditor shall also provide, in accordance with regulations of the Board, appropriate forms for the obligor to exercise his right to rescind any transaction subject to this section.".

(2) Section 103 of such Act, as amended by section 203(b), is amended by adding at the end thereof the following:

"(v) The term 'material disclosures' means the disclosure, as required by this title, of the annual percentage rate, the method of determining the finance charge and the balance upon which a finance charge will be imposed, the amount of the finance charge, the amount to be financed, the total of payments, the number and amounts of payments, and the due dates or periods of payments scheduled to repay the indebtedness.".

(3) Subsection (b) of section 125 of the Truth in Lending Act is amended by striking out "ten" in the second and final sentences thereof, and inserting in lieu thereof "20".

(4) Subsection (b) of section 125 of the Truth in Lending Act is amended by adding at the end thereof the following new sentence: "The procedures prescribed by this subsection shall apply except when otherwise ordered by a court.".

(5) Subsection (c) of section 125 of the Truth in Lending Act is amended by inserting "information, forms, and" after "whom".

(6) Section 125 of the Truth in Lending Act is amended by striking out subsections (e) and (f) and inserting in lieu thereof the following:

"(e) This section does not apply to (1) a residential mortgage transaction as defined in section 103(u); (2) a transaction which constitutes a refinancing or consolidation (with no new advances) of the principal balance then due and any accrued and unpaid finance charges of an existing extension of credit by the same creditor secured by an interest in the same property; (3) a transaction in which an agency of a State is the creditor; or (4) advances under a preexisting open end credit plan if a security interest has already been retained or acquired and such advances are in accordance with a previously established credit limit for that plan.

"(f) An obligor's right of rescission shall expire three years after the date of consummation of the transaction or upon the sale of the property, whichever occurs earlier, notwithstanding the fact that the information and forms required under this section or any other disclosures required under this chapter have not been delivered to the obligor, except that if (1) any agency empowered to enforce the provisions of this title institutes a proceeding to enforce the provisions of this section within three years after the date of consummation of the transaction, (2) such agency finds a violation of section 125, and (3) the obligor's right to rescind is based in whole or in part on any matter involved in such proceeding, then the obligor's right of rescission shall expire three years after the date of consummation of the transaction or upon the earlier sale of the property, or upon the expiration of one year following the conclusion of the proceeding, or any judicial review or period for judicial review thereof, whichever is later.

"(g) In any action in which it is determined that a creditor has violated this section, in addition to rescission the court may award relief under section 130 for violations of this title not relating to the right to rescind.".

(b) Section 103 of the Truth in Lending Act is amended—

(1) redesignating subsection (t) as subsection (w); and

(2) by inserting after subsection (s) the following:

"(t) The term 'dwelling' means a residential structure or mobile home which contains one to four family housing units, or individual units of condominiums or cooperatives.

"(u) The term 'residential mortgage transaction' is one in which a mortgage, deed of trust, purchase money security interest arising under an installment sales contract, or equivalent consensual security interest is created or retained against the consumer's dwelling to finance the acquisition or initial construction of that dwelling.".

OPEN END DISCLOSURES

SEC. 1213. (a) Section 127(a) of the Truth in Lending Act is amended—

(1) by adding at the end of paragraph (1) thereof the following new sentence: "If no such time period is provided, the creditor shall disclose that fact.";

(2) by striking out paragraph (5), and redesignating paragraphs (6), (7), and (8) as paragraphs (5), (6), and (7), respectively; and

(3) by amending redesignated paragraphs (5) and (6) to read as follows:

"(5) Identification of other charges which may be imposed as part of the plan, and their method of computation, in accordance with regulations of the Board.

"(6) In cases where the credit is or will be secured, a statement that a security interest has been or will be taken in (A) the property purchased as part of the credit transaction, or (B) property not purchased as part of the credit transaction identified by item or type.".

(b) Section 127(b)(2) of such Act is amended to read as follows:

"(2) The amount and date of each extension of credit during the period, and a brief identification, on or accompanying the statement of each extension of credit in a form prescribed by the Board sufficient to enable the obligor either to identify the transaction or to relate it to copies of sales vouchers or similar instruments previously furnished, except that a creditor's failure to disclose such information in accordance with this paragraph shall not be deemed a failure to comply with this chapter or this title if (A) the creditor maintains procedures reasonably adapted to procure and provide such information, and (B) the creditor responds to and treats any inquiry for clarification or documentation as a billing error and an erroneously billed amount under section 161. In lieu of complying with the foregoing requirements, in the case of any transaction in which the creditor and seller are the same person, as defined by the Board, and that person's open end plan has fewer than 15,000 accounts, the creditor may elect to provide only the amount and date of each extension of credit during the period and the seller's name and location where the transaction took place if (A) a brief identification of the transaction has been previously furnished, and (B) the creditor responds to and treats any inquiry for clarification or documentation as a billing error and an erroneously billed amount under section 161.".

(c) Section 127(b) of the Truth in Lending Act is amended by striking out paragraph (7) and by redesignating paragraphs (8), (9), (10), and (11) as paragraphs (7), (8), (9), and (10), respectively.

(d) Redesignated paragraph (7) of section 127(a) of the Truth in Lending Act is amended by striking out "each of two billing cycles per year, at semiannual intervals" and inserting in lieu thereof "one billing cycle per calendar year, at intervals of not less than six months or more than eighteen months".

(e) Subsection (c) of section 127 of the Truth in Lending Act is repealed.

(f) Section 143 of the Truth in Lending Act is amended by striking out "or the appropriate rate determined under section 127(a)(5)".

(g) Section 161(a) of the Truth in Lending Act is amended by redesignating the references to sections 127(b)(11) and 127(a)(8) as references to sections 127(b)(10) and 127(a)(7), respectively.

OTHER THAN OPEN END DISCLOSURES

SEC. 1214. (a) Subsection (a) of section 128 of the Truth in Lending Act is amended to read as follows:

"(a) For each consumer credit transaction other than under an open end consumer credit plan, the creditor shall disclose each of the following items, to the extent applicable:

"(1) The identity of the creditor required to make disclosure.

"(2) The 'amount financed', using that term, which shall be the amount of credit of which the consumer has actual use. This amount shall be computed as follows, but the computations need not be disclosed and shall not be disclosed with the disclosures conspicuously segregated in accordance with subsection (b)(1):

"(A) take the principal amount of the loan or the cash price less downpayment and trade-in;

"(B) add any charges which are not part of the finance charge or of the principal amount of the loan and which are financed by the consumer, including the cost of any items excluded from the finance charge pursuant to section 106;

"(C) subtract any charges which are part of the finance charge but which will be paid by the consumer at the time of the consummation of the transaction, or have been withheld from the proceeds of the credit; and

"(D) subtract any required deposit balance, in accordance with regulations of the Board.

"(3) The 'finance charge', not itemized, using that term.

"(4) The finance charge expressed as an 'annual percentage rate', using that term. This shall not be required if the amount financed does not exceed $75 and the finance charge does not exceed $5, or if the amount financed exceeds $75 and the finance charge does not exceed $7.50.

"(5) The sum of the amount financed, any required deposit balance, and the finance charge, which shall be termed the 'total of payments'.

"(6) The number, amount, and due dates or period of payments scheduled to repay the total of payments.

"(7) In a sale of property or services in which the seller is the creditor required to disclose pursuant to section 121(b), the 'total sale price', using that term, which shall be the total of the cash price of the property or services, additional charges, and the finance charge.

"(8) Descriptive explanations of the terms 'amount financed', 'finance charge', 'annual percentage rate', 'total of payments', and 'total sale price' as specified by the Board. The descriptive explanation of 'total sale price' shall include reference to the amount of the downpayment.

"(9) Where the credit is secured, a statement that a security interest has been taken in (A) the property which is purchased as part of the credit transaction, or (B) property not purchased as part of the credit transaction identified by item or type.

"(10) Any dollar charge or percentage amount which may be imposed by a creditor solely on account of a late payment, other than a deferral or extension charge.

"(11) A statement indicating whether or not the consumer is entitled to rebate or credit, or is subject to a penalty, if the obligation is refinanced or prepaid in full pursuant to acceleration or otherwise.

"(12) A statement that the consumer should refer to the appropriate contract document for any information it provides about nonpayment, default, the right to accelerate the maturity of the debt, and prepayment rebates and penalties.

"(13) In any residential mortgage transaction, a statement whether a subsequent purchaser or assignee of the consumer may assume the debt obligation on its original terms and conditions.".

(b) Section 128(b) of such Act is amended to read as follows:

"(b)(1) Except as otherwise provided in this chapter, the disclosures required under subsection (a) shall be made before the credit is extended. Except for the disclosures required by subsection (a)(1) of this section, all disclosures required under subsection (a) and any disclosure provided for in subsection (b), (c), or (d) of section 106 shall be conspicuously segregated from all other terms, data, or information provided in connection with a transaction, including any computations or itemization.

"(2) In the case of a residential mortgage transaction, as defined in section 103(u), which is also subject to the Real Estate Settlement Procedures Act, good faith estimates of the disclosures required under subsection (a) shall be made in accordance with regulations of the Board under section 121(c) before the credit is extended, or shall be delivered or placed in the mail not later than three business days after the creditor receives the consumer's written application, whichever is earlier. If the disclosure statement furnished within three days of the written application contains an annual percentage rate which is subsequently rendered inaccurate within the meaning of section 107(c), the creditor shall furnish another statement at the time of settlement or consummation.".

(c) Section 128(c) of the Truth in Lending Act is amended—

(1) by inserting "(1)" after "(c)";

(2) by striking out "deferred payment price" and inserting in lieu thereof "total sale price"; and

(3) by adding at the end thereof the following new paragraph;

"(2) If a creditor receives a request for a loan by mail or telephone without personal solicitation and the terms of financing, including the annual percentage rate for representative amounts of credit, are set forth in the creditor's printed material distributed to the public, or in the contract of loan or other printed material delivered to the obligor, then the disclosures required under subsection (a) may be made at any time not later than the date the first payment is due.".

(d)(1) Section 129 of the Truth in Lending Act is repealed.

(2) The table of sections of chapter 2 of the Truth in Lending Act is amended by striking out item 129 and inserting in lieu thereof:

"129. [Repealed]".

(c)(1) Section 126 of the Truth in Lending Act is repealed.

(2) The table of sections of chapter 2 of the Truth in Lending Act is amended by striking out item 126 and inserting in lieu thereof:

"126. [Repealed].".

(f)(1) The table of sections of chapter 2 of the Truth in Lending Act is amended by striking out item 128 and inserting in lieu thereof:

"128. Consumer credit not under open end credit plans.".

(2) The caption of section 128 of such Act is amended by striking out "Sales" and inserting in lieu thereof "Consumer credit".

CIVIL LIABILITY

SEC. 215. (a) Section 130 of the Truth in Lending Act is amended—

(1) by striking out "in such action" in subsection (a)(2)(B) and inserting in lieu thereof "under this subparagraph in any class action or series of class actions arising out of the same failure to comply by the same creditor";

(2) in subsection (a)(3), by inserting "or in any action in which a person is determined to have a right of rescission under section 125" after "liability";

(3) by amending subsections (b), (c), and (d) to read as follows:

"(b) A creditor or assignee has no liability under this section or section 108 or section 112 for any failure to comply with any requirement imposed under this chapter or chapter 5, if within sixty days after discovering an error, whether pursuant to a final written examination report or notice issued under section 108(e)(1) or through the creditor's or assignee's own procedures, and prior to the institution of an action under this section or the receipt of written notice of the error from the obligor, the creditor or assignee notifies the person concerned of the error and makes whatever adjustments in the appropriate account are necessary to assure that the person will not be required to pay an amount in excess of the charge actually disclosed, or the dollar equivalent of the annual percentage rate actually disclosed, whichever is lower.

"(c) A creditor or assignee may not be held liable in any action brought under this section or section 125 for a violation of this title if the creditor or assignee shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adapted to avoid any such error. Examples of bona fide error include, but are not limited to, clerical, calculation, computer malfunction and programing and printing errors, but an error of legal judgment with respect to a person's obligations under this title is not a bona fide error.

"(d) When there are multiple obligors in a consumer credit transaction or consumer lease, there shall be no more than one recovery of damages under subsection (a)(2) for a violation of this title.";

(4) by adding at the end of subsection (e) the following new sentence: "This subsection does not bar a person from asserting a violation of this title in an action to collect the debt which was brought more than one year from the date of the occurrence of the violation as a matter of defense by recoupment or set-off in such action, except as otherwise provided by State law.";

(5) by inserting ", section 108(b), section 108(c), section 108(e)," after "this section" in subsection (f);

(6) by adding the following new sentence at the end of subsection (g): "This subsection does not bar any remedy permitted by section 125."; and

(7) by amending subsection (h) to read as follows:

"(h) A person may not take any action to offset any amount for which a creditor or assignee is potentially liable to such person under subsection (a)(2) against any amount owing by such person, unless the amount of the creditor's or assignee's liability under this title has been determined by judgment of a court of competent jurisdiction in an action of which such person was a party. This subsection does not bar a consumer then in default on the obligation from asserting a violation of this title as an original action, or as a defense or counterclaim to an action to collect amounts owed by the consumer brought by a person liable under this title.".

(b) Section 130(a) of the Truth in Lending Act is amended—

(1) by inserting ", including any requirement under section 125," immediately after "this chapter"; and

(2) by adding at the end thereof the following: "In connection with the disclosures referred to in section 127, a creditor shall have a liability determined under paragraph (2) only for failing to comply with the requirements of section 125 or of section 127(a) or of paragraph (4), (5), (6), (7), (8), (9), or (10) of section 127(b) or for failing to comply with disclosure requirements under State law for any term which the Board has determined to be substantially the same in meaning under section 111(a)(2) as any of the terms referred to in section 127(a) or any of those paragraphs of section 127(b). In connection with the disclosures referred to in section 128, a creditor shall have a liability determined under paragraph (2) only for failing to comply with the requirements of section 125 or of paragraph (2), (3), (4), (5), (6), or (9) of section 128(a), or for failing to comply with disclosure requirements under State law for any term which the Board has determined to be substantially the same in meaning under section 111(a)(2) as any of the terms referred to in any of those paragraphs of section 128(a). With respect to any failure to make disclosures required under this chapter or chapter 4 or 5 of this title, liability shall be imposed only upon the creditor required to make disclosure, except as provided in section 131.".

LIABILITY OF ASSIGNEES

SEC. 1216. (a) Section 131 of the Truth in Lending Act is amended to read as follows:

"§ 131. Liability of assignees

"(a) Except as otherwise specifically provided in this title, any civil action for a violation of this title or proceeding under section 108 which may be brought against a creditor may be maintained against any assignee of that creditor only if the violation for which such action or proceeding is brought is apparent on the face of the disclosure statement, except where the assignment was involuntary. For the purpose of this section, violations apparent on the face of the disclosure statement include, but are not limited to (1) disclosure which can be determined to be incomplete or inaccurate from the face of the disclosure statement or other documents assigned, or (2) disclosures not made in the terminology required by this title.

"(b) Except as provided in section 125(c), in any action or proceeding by or against any subsequent assignee of the original creditor without knowledge to the contrary by the assignee when he acquires the obligation, written acknowledgement of receipt by a person to whom a statement is required to be given pursuant to this title shall be conclusive proof of the delivery thereof and, except as provided in subsection (a), of compliance with this chapter. This section does not affect the rights of the obligor in any action against the original creditor.

"(c) Any consumer who has the right to rescind a transaction under section 125 may rescind the transaction as against any assignee of the obligation, regardless of whether such assignee is a creditor under this title.".

(b) Section 115 of the Truth in Lending Act is repealed.

(c)(1) The table of sections of chapter 1 of the Truth in Lending Act is amended by striking out item 115 and inserting in lieu thereof:

"115. [Repealed].".

(2) The table of sections of chapter 2 of the Truth in Lending Act is amended by striking out item 131 and inserting in lieu thereof:

"131. Liability of assignees.".

LIABILITY OF CREDIT CARDHOLDER

SEC. 1217. Section 133(a) of the Truth in Lending Act is amended to read as follows:

"(a) A cardholder shall be liable for the unauthorized use of a credit card only if the card is an accepted credit card, the liability is not in excess of $50, the card issuer gives adequate notice to the cardholder of the potential liability, the card issuer has provided the cardholder with a description of a means by which the card issuer may be notified of loss or theft of the card, which description may be provided on the face or reverse side of the statement required by section 127(b) or on a separate notice accompanying such statement, the unauthorized use occurs before the card issuer has been notified that an unauthorized use of the credit card has occurred or may occur as the result of loss, theft, or otherwise, and the card issuer has provided a method whereby the user of such card can be identified as the person authorized to use it. For the purpose of this section, a card issuer has been notified when such steps as may be reasonably required in the ordinary course of business to provide the card issuer with the pertinent information have been taken, whether or not any particular officer, employee, or agent of the card issuer does in fact receive such information.".

DISSEMINATION OF ANNUAL PERCENTAGE RATES

SEC. 1218. (a) Chapter 2 of the Truth in Lending Act is amended by adding at the end thereof the following new section:

"§ 136. Dissemination of annual percentage rates

"(a) The Board shall collect, publish, and disseminate to the public, on a demonstration basis in a number of standard metropolitan statistical areas to be determined by the Board, the annual percentage rates charged for representative types of nonsale credit by creditors in such areas. For the purpose of this section, the Board is authorized to require creditors in such areas to furnish information necessary for the Board to collect, publish, and disseminate such information.

"(b) The Board is authorized to enter into contracts or other arrangements with appropriate persons, organizations, or State agencies to carry out its functions under subsection (a) and to furnish financial assistance in support thereof.".

(b) The analysis of such chapter is amended by adding at the end thereof the following new item:

"136. Dissemination of annual percentage rates.".

CREDIT ADVERTISING

SEC. 1219. (a) Section 143 of the Truth in Lending Act is amended to read as follows:

"§ 143. ADVERTISING OF OPEN END CREDIT PLANS

"No advertisement to aid, promote, or assist directly or indirectly the extension of consumer credit under an open end credit plan may set forth any of the specific terms of that plan unless it also clearly and conspicuously sets forth all of the following items:

"(1) Any minimum or fixed amount which could be imposed.

"(2) Where periodic rates may be used to compute the finance charge, the periodic rates expressed as annual percentage rates.

"(3) Any other term that the Board may by regulation require to be disclosed.".

(b) Section 144 of the Truth in Lending Act is amended by striking out paragraphs (1) through (4) of subsection (d) thereof, and inserting in lieu thereof the following:

"(1) the downpayment, if any,

"(2) the terms of repayment,

"(3) the rate of the finance charge expressed as an annual percentage rate.".

CORRECTION OF BILLING ERRORS

SEC. 1220. (a) Section 161(b) of the Truth in Lending Act is amended—

(1) by redesignating paragraph (6) as paragraph (7); and

(2) by inserting after paragraph (5) the following:

"(6) Failure to transmit the statement required under section 127(b) of this Act to the last address of the obligor which has been disclosed to the creditor, unless that address was furnished less than twenty days before the end of the billing cycle for which the statement is required.".

(b) Section 161(c) of such Act is amended by inserting after "account" the first time it is used a comma and the following: "which may include finance charges on amounts in dispute,".

CREDIT BALANCES

SEC. 1221. (a) Section 165 of the Truth in Lending Act is amended to read as follows:

"§ 165. Treatment of credit balances

"Whenever a credit balance in excess of $1 is created in connection with a consumer credit transaction through (1) transmittal of funds to a creditor in excess of the total balance due on an account; (2) rebates of unearned finance charges or insurance premiums; or (3) amounts otherwise owed to or held for the benefit of an obligator, the creditor shall—

"(A) credit the amount of the credit balance to the consumer's account;

"(B) refund any part of the amount of the remaining credit balance, upon request of the consumer; and

"(C) make a good faith effort to refund to the consumer by cash, check, or money order any part of the amount of the credit balance remaining in the account for more than six months, but no further action is required in any case where the consumer's current location is not known by the creditor and cannot be traced through the consumer's last known address or telephone number.".

(b) The table of sections of chapter 4 of the Truth in Lending Act is amended by striking out item 165 and inserting in lieu thereof:

"165. Treatment of credit balances.".

GOVERNMENT EXEMPTION

SEC. 1222. (a) Section 113 of the Truth in Lending Act is amended to read as follows:

"§ 113. Effect on governmental agencies

"(a) Any department or agency of the United States which administers a credit program in which it extends, insures, or guarantees consumer credit and in which it provides instruments to a creditor which contain any disclosures required by this title shall, prior to the issuance or continued use of such instruments, consult with the Board to assure that such instruments comply with this title

"(b) No civil or criminal penalty provided under this title for any violation thereof may be imposed upon the United States or any agency thereof, or upon any State or political subdivision thereof, or any agency of any State or political subdivision.

"(c) A creditor participating in a credit program administered, insured, or guaranteed by any department or agency of the United States shall not be held liable for a civil or criminal penalty under this title where the violation results from the use of an instrument required by any such department or agency.

"(d) A creditor participating in a credit program administered, insured, or guaranteed by any department or agency of the United States shall not be held liable for a civil or criminal penalty under the laws of any State (other than laws determined under section 111 to be inconsistent with this title) for any technical or procedural failure, such as a failure to use a specific form, to make information available at a specific place on an instrument, or to use a specific typeface, as required by State law, which is caused by the use of an instrument required to be used by such department or agency.".

(b) The table of sections of chapter 1 of the Truth in Lending Act is amended by striking out item 113 and inserting in lieu thereof:

"§ 146. Use of annual percentage rate in oral disclosures

SEC. 1223. (a) Section 146 of the Truth in Lending Act is amended to read as follows:

"§ 146. USE OF ANNUAL PERCENTAGE RATE IN ORAL DISCLOSURES

"In responding orally to any inquiry about the cost of credit, a creditor, regardless of the method used to compute finance charges, shall state rates only in terms of the annual percentage rate, except that in the case of an open end credit plan, the periodic rate also may be stated and, in the case of an other than open end credit plan where a major component of the finance charge consists of interest computed at a simple annual rate, the simple annual rate also may be stated. The Board may, by regulation, modify the requirements of this section or provide an exception from this section for a transaction or class of transactions for which the creditor cannot determine in advance the applicable annual percentage rate.".

(b) The table of sections of chapter 3 of the Truth in Lending Act is amended by striking out item 146 and inserting in lieu thereof:

"146. Use of annual percentage rate in oral disclosures.".

EFFECTIVE DATE

SEC. 1224. The amendments made by this title shall take effect upon the expiration of two years after the date of enactment of this title. All regulations, forms, and clauses required to be prescribed under the amendments made by this title shall be promulgated at least one year prior to such effective date. Notwithstanding the foregoing, any creditor may comply with the amendments made by this title, in accordance with the regulations, forms, and clauses prescribed by the Board, prior to such effective date.

TITLE XIII—MISCELLANEOUS

SEC. 1301. Section 302(h) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1451(h)) is amended by adding at the end thereof the following: "The term 'residential mortgage' also includes a secured loan or advance of credit the proceeds of which are intended to finance the rehabilitation, renovation, modernization, refurbishment, or improvement of properties securing mortgages which the Corporation may purchase as 'residential mortgages' under the first sentence of this subsection. The maximum principal obligation of loans purchased by virtue of the preceding sentence shall not exceed the dollar limits prescribed by the Federal Home Loan Bank Board with respect to similar types of loans made by Federal savings and loan associations. A 'secured loan or advance of credit' is one in which a security interest is taken in the rehabilitated, renovated, modernized, refurbished, or improved property.".

SEC. 1302. In the first fiscal year after enactment of this Act in which the Secretary of the Treasury authorizes the sale of gold to the public, not less than ten percent by weight of the gold offered for sale in such fiscal year shall be offered in units containing not more than one troy ounce of gold. Notwithstanding any other provision of this Act, the number units of one ounce or less to be produced and sold in any fiscal year after the first fiscal year in which such units are offered for sale shall be adjusted to meet anticipated demand.

SEC. 1303. Paragraph (2) of section 3(c) of Public Law 94-222 (15 U.S.C. 1666f note) is amended to read as follows:

"(2) The amendment made by paragraph (1) shall cease to be effective on February 27, 1981.".

SEC. 1304. The last sentence of section 245 of the National Housing Act is amended—

(1) by inserting "(1)" before "limiting the amount of interest"; and

(2) by inserting before the period at the end thereof a comma and the following: "or (2) requiring a minimum amortization of principle or otherwise relating to the amortization of principle under the mortgage or loan".

SEC. 1305. Public Law 95-229 (92 Stat. 26) is amended:

(1) by striking out in the title "during 1777";

(2) by striking out in the first sentence of the first section the number "104,000" and inserting in lieu thereof "208,000"; and

(3) by striking out in the second sentence of the first section "December 31, 1978" and inserting in lieu thereof "December 31, 1979".

SEC. 1306. Public Law 95-128, Title VIII (12 U.S.C. Section 2902) is amended by adding a new subsection (4) to Section 803 as follows:

"(4) A financial institution whose business predominately consists of serving the needs of military personnel who are not located within a defined geographic area may define its "entire community" to include its entire deposit customer base without regard to geographic proximity."

TITLE XIV—STANDBY LETTERS OF CREDIT

SEC. 1401. The Federal Deposit Insurance Act is amended (1) by redesignating sections 22 and 23 as 23 and 24 respectively, and (2) by inserting immediately after section 21 the following new section 22:

"SEC. 22. (a) The purpose of this section is to regulate standby letters of credit, guarantees, surety agreements and certain acceptances issued by commercial banks.

"(b) This section shall apply to any insured bank, to any bank holding company as defined in the Bank Holding Company Act of 1956, as amended, and to any agency, branch, Federal agency, Federal branch, foreign bank, commercial lending company, State agency, or State branch as those terms are defined in section 1(b) of the International Banking Act of 1978.

"(c) Beginning July 1, 1979, no entity enumerated in (b) above shall (1) incur any liability arising from any irrevocable undertaking directly or indirectly to make or arrange a payment on a domestic borrowing in the event another entity or person fails to do so, or (2) incur any liability arising from the acceptance of a time draft (other than liabilities arising from the acceptance of time drafts of the kinds described in section 13 of the Federal Reserve Act) where the transaction is functionally equivalent to a domestic borrowing. The term 'domestic borrowing' means any borrowing of 270 days or less the proceeds of which are used to finance directly or indirectly the sale or lease of any personal property located or to be located within the United States, any territory of the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands.

"(d) None of the prohibitions in this section shall apply to any liabilities (1) which

grow out of transactions involving the importation or exportation of goods, wares, merchandise, commodities, or services, (2) which may be incidental to or for the purpose of carrying out transactions in foreign countries or any territory of the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands, or (3) which may be usual in connection with the transaction of the business of banking or other financial operations in the countries, colonies, dependencies, or possessions in which the entity enumerated in (b) above shall transact business and not inconsistent with other provisions of law."

TITLE XV—EXPORT-IMPORT BANK ACT AMENDMENTS OF 1978

SHORT TITLE

SEC. 1501. That this title may be cited as the "Export-Import Bank Act Amendments of 1978".

PRENOTIFICATION

SEC. 1502. Section 2(b)(3) of the Export-Import Bank Act of 1945 is amended—

(1) by striking out "No" in the first sentence and inserting in lieu thereof "Except as provided by the fourth sentence of this paragraph, no";

(2) by striking out "$60,000,000" in the first sentence and inserting in lieu thereof "$100,000,000"; and

(3) by adding at the end thereof the following: "If the Bank submits a statement to the Congress under this paragraph and either House of Congress is in an adjournment for a period which continues for at least 10 days after the date of submission of the statement, then any such loan or guarantee or combination thereof may, subject to the second sentence of this paragraph, be finally approved by the Board of Directors upon the termination of the 25-day period referred to in the first sentence of this paragraph or upon the termination of a 35-calendar-day period (which commences upon the date of submission of the statement), whichever occurs sooner".

FRACTIONAL CHARGES

SEC. 1503. Section 2(c)(1) of the Export-Import Bank Act of 1945 is amended by striking out "$20,000,000,000" and inserting in lieu thereof "$25,000,000,000".

DENIAL OF EXPORT APPLICATIONS

SEC. 1504. Section 2(b)(1)(B) of the Export-Import Bank Act of 1945 is amended by striking out the remainder of the paragraph after "and employment in the United States," and inserting in lieu thereof "and shall give particular emphasis to the objective of strengthening the competitive position of United States exporters and thereby of expanding total United States exports. Only in cases where the President determines that such action would be in the national interest and where such action would clearly and importantly advance United States policy in such areas as international terrorism, nuclear proliferation, environmental protection and human rights, should the Export-Import Bank deny applications for credit for non-financial or non-commercial considerations".

AUTHORIZATION

SEC. 1505. Section 7(a) of the Export-Import Bank Act of 1945 is amended by striking out "$25,000,000 000" and inserting in lieu thereof "$40,000,000,000".

EXTENSION OF AUTHORITY

SEC. 1506. Section 8 of the Export-Import Bank Act of 1945 is amended by striking out "December 31, 1978" and inserting in lieu thereof "September 30, 1983".

ENERGY POLICY

SEC. 1507. (a) Section 2(b)(1) of the Export-Import Bank Act of 1945 is amended by adding at the end thereof the following:

"(C) Consistent with the policy of section 501 of the Nuclear Non-Proliferation Act of 1978 and section 119 of the Foreign Assistance Act of 1961, the Board of Directors shall name an officer of the Bank whose duties shall include advising the President of the Bank on ways of promoting the export of goods and services to be used in the development, production, and distribution of non-nuclear renewable energy resources, disseminating information concerning export opportunities and the availability of Bank support for such activities, and acting as a liaison between the Bank and the Department of Commerce and other appropriate departments and agencies.".

(b) Section 9(b) of such Act is amended by adding at the end thereof the following: "In addition, the Bank shall include in the report a description of specific activities and programs undertaken by it to achieve the policy of section 501 of the Nuclear Non-Proliferation Act of 1978, and section 119 of the Foreign Assistance Act of 1961, as required by section 2(b)(1)(C) of this Act.".

EXPORT CREDIT COMPETITION

SEC. 1508. (a) The President is authorized and requested to begin negotiations at the ministerial level with other major exporting countries to end predatory export financing programs and other forms of export subsidies, including mixed credits, in third country markets as well as within the United States. The President shall report to the Congress prior to January 15, 1979, on progress toward meeting the goals of this section.

(b) The Export-Import Bank of the United States is authorized to provide guarantees, insurance, and extensions of credit at rates and terms and other conditions which are, in the opinion of the Board of Directors of the Bank, competitive with those provided by the government-supported export credit instrumentalities of other nations.

SEC. 1509. Section 2(b) of the Export-Import Bank Act of 1945 is amended by inserting at the end thereof the following new paragraph:

"(7) The Bank shall supplement but not compete with private capital and the programs of the Commodity Credit Corporation to insure that adequate financing will be made available to assist the export of agricultural commodities, except that, consistent with Section 2(b)(1)(A) of this Act, the Bank in assisting any such export transactions shall, in cooperation with the export financing instrumentalities of other governments, seek to minimize competition in government-supported export financing, and shall, in cooperation with other appropriate United States Government agencies, seek to reach international agreements to reduce government subsidized export financing. In order to carry out the purposes of this subsection, the Bank shall consult with the Secretary of Agriculture and where the Secretary of Agriculture has recommended against Bank financing of the export of a particular agricultural commodity, shall take such recommendation into consideration in determining whether to provide credit or other assistance for any export sale of such commodity, and shall consider the importance of agricultural commodity exports to the United States export market and the nation's balance of trade in deciding whether or not to provide assistance under this subsection. The Bank shall include in the report to Congress under Section 9(a) of this Act a description of the measures undertaken by it pursuant to this subsection.".

SEC. 1510. Section 2(b)(1)(A) of the Export-Import Bank Act of 1945 is amended by striking the words "goods and related services" in the first sentence and inserting in lieu thereof "manufactured goods, agricultural products, and other goods and services".

SEC. 1511. The Bank shall implement such regulations and procedures as may be appropriate to insure that full consideration is given to the extent to which any guarantee, insurance, credit, or participation in any extension of credit is likely to have an adverse effect on industries, including agriculture, and employment in the United States, either by reducing demand for goods produced in the United States or by increasing imports to the United States. To carry out the purposes of this subsection, the Bank shall request, and the United States International Trade Commission shall furnish, a report assessing the impact of the Bank's activities on industries and employment in the United States. Such report shall include an assessment of previous guarantees, insurance, loans, or extensions of credit or participations therein and shall provide recommendations concerning general areas which may adversely affect domestic industries, including agriculture, and employment. A copy of such report shall be included in the Bank's report under section 9.".

SEC. 12(a)(1) Upon receipt of information that foreign sales to the U.S. are being offered involving foreign official export credits which exceed limits under existing standstills, minutes, or practices to which the U.S. and other major exporting countries have agreed, the Secretary of the Treasury shall immediately conduct an inquiry to determine whether "non-competitive financing" is being offered.

(2) If the Secretary determines that such foreign "non-competitive" financing is being offered, he shall request the immediate withdrawal of such financing by the foreign official export credit agency involved.

(3) If the offer is not withdrawn or if there is no immediate response to the withdrawal request, the Secretary of the Treasury shall notify the country offering such financing and all parties to the proposed transaction that the Eximbank may be authorized to provide competing U.S. sellers with financing to match that available through the foreign official export financing entity.

(b) The Secretary of the Treasury shall only issue such authorization to the Bank to provide guarantees, insurance and credits to competing U.S. sellers, if he determines that:

(1) The availability of foreign official non-competitive financing is likely to be a determining factor in the sale, and

(2) the foreign non-competitive financing has not been withdrawn on the date the Bank is authorized to provide competitive financing.

Mr. PROXMIRE. Mr. President, it will not take me long to explain the amendment.

I ask unanimous consent that the name of the Senator from Pennsylvania (Mr. HEINZ) be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that certain staff members of the Committee on Banking, Housing, and Urban Affairs have the privilege of the floor during the consideration of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. This amendment contains 15 titles. Many of these titles have previously passed the Senate. All of the titles represent consensus legislation in the Senate.

Title I gives the Federal financial institutions regulatory agencies strengthened supervisory authority over depository institutions. This title was recommended by Chairman Burns jointly on behalf of the three bank regulators as a means of preventing problem bank situations from arising and for arriving at more timely solutions once such situa-

tions did arise. This was passed by the Senate overwhelmingly, without opposition.

Mr. President, the Banking Committee has done a lot of work in the past 3 years relating to the matter of regulation of the financial system and its condition. There are proposals which the committee is considering to streamline and simplify the existing structure in various ways by merging regulatory agencies. Title I may not be the complete answer to correcting the deficiencies in the regulatory process but it is an extremely important step in the right direction.

By authorizing cease-and-desist orders to be instituted against individuals and civil money penalties for violations of such orders, enforcement action can be tailored to the needs of particular cases and the orders should be self-enforcing. Title I will also tighten the restrictions on insider lending which have been the principal cause of bank failures over the course of the past 15 years.

While title I of this bill gives the agencies the power they need to assure a safe and sound banking system, title II will provide a healthier banking climate by prohibiting interlocking management and director relationships among competing financial institutions. That also has been passed by the Senate.

Interlocking relationships are prohibited among these institutions in standard metropolitan statistical areas (SMSA's) or in the same or adjacent city, town, or village. And, regardless of geographic area, all such interlocks between an institution with $1 billion in assets are prohibited with institutions whose assets exceed $500 million. Since title II is intended to proscribe anticompetitive interlocking relationship there are exceptions—for credit unions, for example—and the Federal Reserve is authorized to grant exceptions and to prevent evasions of the law by rule.

Title III of the legislation was recommended by the FDIC as "housekeeping" legislation. The Senate has passed that. There is one provision in this title which I should mention specifically because it is more than a housekeeping provision. The Federal Reserve must give its prior approval to the establishment of foreign banking operations by national banks and State member banks of the Federal Reserve. Title III would subject banks under the jurisdiction of the FDIC—that is, State nonmember banks—to such regulatory jurisdiction. This is needed because State nonmember banks have increased in size and because their overseas operations can affect the safety and soundness of their domestic operations.

Title IV of the legislation will prohibit revolving door employment practices by the heads of financial institutions regulatory agencies who take jobs with institutions they regulate before their terms of office are completed. This provision of the legislation seeks to encourage the heads of these regulatory bodies to complete their terms of office. We have passed that.

The salary levels of the Chairman of the Federal Reserve and the members of the Federal Reserve are elevated respectively to level I and level II. At the same time the salary levels of the chairman of the other bank regulatory agencies—the FDIC, the FHLBB, the Comptroller and the Administrator of the NCUA are increased to level II to maintain parity with the members of the Federal Reserve. These salary increases should encourage these officials to complete their terms of office.

Title V of the legislation will restructure the National Credit Union Administration by replacing the single Administrator with a three-person agency. That has been passed. Credit unions have experienced significant growth and importance. A three-man board will enable the regulatory structure to keep pace with the complexity of the industry, particularly in the light of the establishment in this legislation of a credit union liquidity facility for credit unions.

Title VI extends for 2 years the so-called regulation Q authority by which various financial regulatory agencies currently set interest rate ceilings on deposits and institutions under their respective jurisdictions. A 1-year extension of regulation Q is warranted at the present time in order to permit the Congress to assess the conclusions of the administration's interagency task force to study the impact of deposit rate ceilings on financial intermediaries, the individual saver and the mortgage market.

Title VI also provides that there shall be no differential in the maximum interest rate payable between commercial banks and thrifts on accounts from which a customer preauthorizes transfers from savings to checking or similar accounts pursuant to regulations of the Federal Reserve Board and the Federal Deposit Insurance Corporation effective November 1. This action is warranted due to the fact that the use of such preauthorized transfers by thrift institutions, coupled with their interest rate differential on savings accounts raises serious competitive problems between commercial banks and thrift institutions. However, as spelled out in the committee report accompanying S. 3499, the committee specifically intends that this provision applies solely to transfer accounts newly authorized by the Federal Reserve Board and FDIC regulations effective November 1, 1978, and not to any other accounts or services.

Title VI also repeals prohibition against NOW accounts in the State of New York. This action addresses the competitive concerns of Federal S. & L.'s where State-chartered thrift institutions have checking account powers. With the prospect of preauthorized transfers between savings and checking for all institutions in New York other than Federal S. & L.'s, competitive implications of NOW accounts in this State has been substantially reduced. Moreover, NOW accounts will provide an option to these institutions otherwise able to offer preauthorized transfers with the attendant administrative cost reductions associated with account consolidation.

Title VII provides authority for State-chartered mutual savings banks to convert and operate under a Federal charter. Currently, mutual savings banks operate as State-chartered financial institutions in 17 States without the option of being chartered and regulated by the Federal Government. In contrast, commercial banks, savings and loan associations, and credit unions have long had the choice of being chartered by either the Federal Government or by the State in which they are located. In effect, therefore, this title extends the dual banking system to all of the Nation's four major types of depository institutions. This title provides, however, that a savings bank may not convert its charter in contravention of State law. Converting savings banks would have to comply with State antidiscrimination and consumer protection laws in force at the time of conversion if they provide greater consumer protection.

Under the provisions of this title, converting savings banks would be required to continue to comply with the same geographical restrictions regarding branching that apply to State-chartered mutual savings banks but exempt from any numerical limitations of State law on the establishment of branch offices and other facilities and such banks may, in any case, subject to Federal Home Loan Bank Board approval, establish branch offices and other facilities in its own standard metropolitan statistical area, its own county, or within 35 miles of its home office, but only in the State of domicile.

Title VIII increases the deposit insurance limitation for IRA and Keogh accounts in federally insured institutions from $40,000 to $100,000. These accounts are designed to encourage a long-term accumulation of funds which will likely exceed the $40,000 limitation. This is particularly true of Keogh accounts, because the ceiling contribution a year is currently $7,500. An individual should not have to fear for the safety of funds being saved for retirement purposes.

Title IX establishes within the National Credit Union Administration a National Credit Union Central Liquidity Facility as a mixed ownership Government corporation. The facility will enable the Credit Union Administration to provide funds to meet the temporary liquidity needs of credit unions. Other financial institutions serving the economy can look to their Federal regulators when a liquidity crisis strikes. Commercial banks have the Federal Reserve and its discount window to tide them over short-term difficulties. Savings and loan associations have the Federal Home Loan Bank Board. Only the credit unions have no Federal liquidity backup.

Specific standards are set forth in the legislation governing the use of facility funds by credit unions. The facility is modest. The National Credit Union Administration estimates the size of the facility to be in the neighborhood of $300 million. Credit unions themselves will provide the capital for the facility which is given the authority to borrow based upon these capital contributions. The facility is backed up by a $500 million line of credit from the Treasury which must be appropriated in advance. Therefore, the facility is not designed to provide countercyclical funding such as that provided to savings and loan associ-

ations through the Federal Home Loan Bank Board. Rather, the facility is envisaged as a stabilizing factor for credit union portfolios which should enable credit unions to better serve their public interest purposes by keeping their loan commitments. An inordinate expansion of loan portfolios from the creation of the facility is not expected. Moreover, the facility will be subject to regulations of the National Credit Union Administration which will consider the particular needs of credit unions while insuring they operate in a safe and sound manner and that funds are not used to bail out failing, unsafe, or unsound institutions.

Title X. This title establishes a Bank Examinations Council requiring closer coordination by the bank regulatory agencies.

Title XI would add a new title to the Consumer Credit Protection Act called the "Fair Fund Transfer Act." This legislation would establish a consumer "bill of rights" for electronic banking services.

This title would provide important consumer safeguards which existing consumer protection laws do not provide. For example, consumers would be protected from a catastrophic loss if their EFT card is lost or stolen; account errors would have to be corrected promptly; and consumers would receive receipts and monthly statements for EFT transactions.

This legislation strikes a careful balance between providing essential customer safeguards and assuring that EFT services are not encumbered with unnecessary restrictions. The Banking Committee has spent a great deal of time on this title and many compromises have been made. This is a balanced, reasonable bill which will not only protect consumers but will also provide a boost to the development of EFT.

Title XII is the Truth in Lending Simplification and Reform Act which has already been passed by the Senate this session. This was a matter that the distinguished senior Senator from North Carolina (Mr. HELMS) strongly supported.

This is a consensus measure which is intended to simplify the growing complexity of truth in lending for the benefit of consumers and creditors alike.

For the creditor's benefit, the bill requires the Federal Reserve Board to issue model forms, the use of which would assure compliance with the act. In addition, the creditor's civil liability would be limited to only important disclosures which relate to the cost of credit.

The consumer would benefit from the act as well. In addition to getting simpler, clearer credit disclosures, consumers would in most cases get refunds for excess interest charges. In summary, this bill would reduce unnecessary paperwork and make the Truth in Lending Act an even more effective consumer protection law.

Title XIII amends the Federal Home Loan Mortgage Corporation Act to enable the Corporation to purchase loans in which the lender has an interest secured by the real property to be improved. Creation of a secondary market for such improvement loans will contribute significantly to maintenance of the Nation's housing stock, to neighborhood revitalization and to energy conservation efforts. Title XIII also provides that the Secretary of the Treasury shall be required whenever he offers gold sales to the public to offer not less than 10 percent of the gold offered for sale in that fiscal year in the form of units containing not more than one troy ounce of gold. This provision will give the public an opportunity to buy Treasury gold in small quantities but will not require issuance of medallions which could be mistaken for coins for legal tender and create an erroneous impression that the United States Government believes gold should have a monetary role. Title XIII extends for 2 years, until February 27, 1981, a provision in the Truth in Lending Act which provides that a merchant may offer a discount of up to 5 percent for cash purchases but may not impose a surcharge for credit card purchases. This extension will give the Congress additional time to study the practical effects of this provision.

Title XIII also amends section 245 of the National Housing Act which authorizes FHA to insure graduated payment mortgages. The amendment would simply provide that provisions of State law regarding minimum amortization of principal on a mortgage loan would not apply to FHA insured, graduated payment mortgages authorized pursuant to section 245. This provision, like the provision waiving State interest rate limitations which is currently in section 245, is necessary to permit financial institutions in certain States to offer FHA insured, graduated payment mortgages.

Title XIV controls the use of domestic standby letters of credit.

Finally title XV provides extension authority for the Export-Import Bank.

Mr. BROOKE. Mr. President, I would like to clarify, under this amendment, the right of a financial institution to pay the legal expenses of its officers and directors should it so choose. As the floor manager of the bill knows, there has been some controversy both in the Senate and in the House associated with the new supervisory authority which would be created in this legislation. Federal regulatory agencies will now have the authority to institute proceedings directly against major stockholders or officers of a financial institution. As a consequence, the personal liability of an institution's officers and directors is potentially expanded to a substantial degree.

As a consequence, an issue arises pertaining to the liability of these officers and directors to sustain the personal burden of legal fees which could result from defending their actions in an administrative or review proceeding. In this regard, concern has been expressed that the management of financial institutions have adequate safeguards to protect their legal rights in circumstances which may lead to penalties or cease and desist orders or even removal from office. Respondents should have a fair opportunity under normal circumstances to defend their decisions or actions when they find them at issue in supervisory disagreements.

It is my understanding that officers and directors who become involved in a disciplinary action could receive assistance from the financial institution involved for payment of their legal fees. An institution would not be required to come to the defense of officers or directors but would have the opportunity to do so if it feels they have acted in good faith in the affairs of the institution.

Therefore, I would like to know from the chairman of the Senate Banking Committee if this statement accurately characterizes congressional intent on the matter of legal fees contained in this amendment?

Mr. PROXMIRE. I assure the Senator from Massachusetts that, yes, it does.

COLLOQUY ON FEDERAL CHARTERS FOR MUTUAL SAVINGS BANKS

Mr. BROOKE. Mr. President, I would like to obtain some clarification concerning title II which would provide a Federal chartering alternative for the Nation's existing mutual savings banks. I would like clarification in three areas. First of all, I would like to know whether Federal mutual savings banks will be required by their chartering agency, the Federal Home Loan Bank Board, to maintain an investment orientation toward housing. My other two concerns involve interpretations of language already contained in the title. As I understand it, the limitation with respect to branching applications of Federal mutual savings banks would in no way apply to Federal savings and loan associations and I want to make certain that my impression is correct. Finally, I understand that the Board would determine whether or not State antidiscrimination and consumer protection laws are more strict than applicable Federal laws and regulations in these two areas and whether the State law would continue to apply to a converting mutual savings bank, and I want to make certain that this includes the responsibility for enforcement of such State laws. In other words, is it true that the Board would continue to have sole enforcement authority even though a State law might be stricter?

Mr. PROXMIRE. I appreciate the fact that my colleague has raised these questions, and I think we can provide very simple answers to all three of them.

With respect to the investment orientation of Federal mutual savings banks, title II itself provides a very clear intention that Federal savings banks must be oriented primarily toward home finance. In the first place, the amendment that is made by title II to section 5(a) of the Home Owners' Loan Act makes clear that savings bank charters would be made available "in order to provide local mutual thrift institutions in which people may invest their funds and in order to provide for the financing of homes." Moreover, title II while permitting converting savings banks to retain their nonmortgage investment powers and services places a substantial limitation on Federal mutual savings banks inasmuch as nonmortgage investments must generally be limited to what they were as a percentage of total assets at the time of conversion.

Now turning to the second matter

raised by my distinguished colleague on the branching question, the language of title II is absolutely clear that the restriction regarding branching by converted mutual savings banks that to some extent makes them subject to State branching law applies to converted mutual savings banks only and in no way to Federal savings and loan associations. We do not intend to interfere with the longstanding all-inclusive power of the Bank Board over the activities of Federal S. & L.'s including branching authority. The amendment just does not apply directly or indirectly to savings and loan associations.

Mr. BROOKE. I appreciate the clarification for that was my understanding as well.

Mr. PROXMIRE. With respect to the requirement involving application of requirements of State law in the area of discrimination, there should be no confusion that the Bank Board has sole authority to enforce such requirements. Of course, it is our intention that if the Board does enforce the requirements of State law, that the enforcement should be in accordance with the intention of that State law, but it would be wasteful and confusing to have a multiplicity of regulators.

Mr. BROOKE. One final point, I gather that it is only our intention to provide that State law in these areas could apply to State mutual savings banks wishing to convert to Federal charter, and that we do not intend to interfere with the Bank Board's plenary authority over Federal savings and loan associations, and in this area, Federal law alone would continue to govern.

Mr. PROXMIRE. The gentleman is absolutely correct. Federal law will continue to govern Federal savings and loan associations in all of these areas including branching, antidiscrimination and lending authority. I can assure the Senate that the amendments made by title II of the bill apply solely and exclusively to mutual savings banks that convert to Federal charter and should not in any way be interpreted as even suggesting that any of these provisions should be applied to any type of institutions which the Board now charters, insures or regulates. These amendments were adopted as a result of a compromise and they were necessary to assure that savings banks which desire to avail themselves of the right to Federal charter cannot escape compliance with State laws in any of these areas.

REGULATION Q EXTENSION LEGISLATION

● Mr. LUGAR. Mr. President. I support the Banking Committee legislation pending before us. I am pleased that the Senate is taking action to extend the authorization period for regulation Q, which is now scheduled to expire on December 15 of this year.

In particular, I want to comment on the Truth-in-Lending Simplification and electronic fund transfer provisions of the legislation before us. As my colleagues know, the Senate has already taken action on S. 2802, the Truth-in-Lending Simplification and Reform Act. As a member of the Senate Banking, Housing and Urban Affairs Committee, I was privileged to have had the opportunity to participate actively in the development of this legislation, and I support it strongly.

This important piece of legislation passed the Senate by voice vote on May 10, 1978. During the course of its discussion, the bill was strongly supported by my distinguished colleagues from Wisconsin (Mr. PROXMIRE), New Mexico (Mr. SCHMITT), Michigan (Mr. RIEGLE), Texas (Mr. TOWER) and Massachusetts (Mr. BROOKE), and was described by the distinguished majority leader as "a milestone in the efforts of the Congress to foster honest and full disclosure of credit terms in language which can be understood by the average American."

As detailed in the floor debates when it was passed, S. 2802 would provide significant changes in existing truth in lending requirements. As evidenced by the broad range of support for this measure, the bill removes needless technicalities while carefully preserving and even expanding the rights of consumers to complete and meaningful disclosure of consumer credit costs.

In general, the bill simplifies disclosure requirements; exempts agricultural credit; requires the Board of Governors of the Federal Reserve system to prepare model forms and clauses; expands the authority of administering agencies to enforce compliance with truth in lending; requires the use of simple, explanatory phrases which describe somewhat complex credit terms; and clarifies numerous technical questions which have arisen since truth in lending was enacted in 1968.

Mr. President, this legislation resulted from more than a year of study, examination and effort by members of the Senate Banking Committee and their staffs. On July 11, 12, and 13 of last year, wide-ranging hearings were held by the Subcommittee on Consumer Affairs of the Senate Banking Committee which produced a hearing record of almost 1,000 pages. Following those hearings, the Banking Committee met in a near-record six markup sessions and meticulously examined every aspect and implication of each section of this legislation. Literally hundreds of hours have been invested in producing a bill which reduces regulatory burdens while retaining consumer rights. Because of the rightful importance given to this issue by the distinguished chairman and ranking minority members of the committee and the leadership and commitment of the subcommittee's chairman and ranking minority member, few issues have received the detailed and painstaking analysis that gave rise to S. 2802.

It is because of the nature of that effort and the great need for legislation in this area, that I rise to support the pending bill which would attach in its entirety the verbatim provisions of S. 2802.

I recognize that our distinguished colleagues in the House have not produced comparable legislation. This failure to act is rooted in the fear by some that under the guise of "simplification" many of the hard-won protections afforded consumers under the Truth in Lending Act will be eroded. I can assure our colleagues in the House that this is a concern that we all share. But legislation does not provide protection by sheer complexity, and those who see virtue in the present mass of figures and calculations that shriek at the helpless consumer seeking to secure a simple loan seem to me to have missed the essential message of truth in lending: The consumer should understand the essential aspects of a credit transaction to be able to compare available credit terms. There can be no comparison when there is only confusion.

Mr. President, S. 2802 has been criticized on the floor of the House for threatening consumer rights in several respects. Because I believe these charges to be based upon fundamental misunderstandings as to the nature and effect of the final version of the bill passed by the Senate, I would like to respond specifically to these criticisms.

The omission of certain credit terms, regardless of how obscure or incomprehensible, has been decried as an infringement of the consumer's rights. S. 2802 simply does not deprive the consumer of even conceivably important information; rather, it is an attempt to distill the information presently provided into a far more useable form. Key credit terms must still be provided and now must be explained in terms the consumer can understand. Only the complex, internal calculations used to arrive at final credit figures are prudently no longer required to be presented. Disclosure must also still be made of the creation of certain devices for the protection of creditors—for example, security interests—but, rather than attempting to provide an incomplete and possible misleading truncated disclosure statement, the consumer must be alerted of this term and referred to the contract. As is now the case, the details of the nature and extent of these devices are revealed in the contract. The net effects of these changes are to improve the clarity of the information presented and to encourage the consumer to shop for credit by increasing his confidence in his own comprehension of credit terms.

S. 2802 has been attacked because of the belief that consumers would suffer from what has been perceived to be an easing of creditors' liabilities for noncompliance with the law. This again is untrue. What we have attempted to do is ease the burden on our courts that have been clogged with Truth-in-Lending suits filed at a rate of more than 2,000 per year. Many of these suits are for hypertechnical violations of the act, brought by attorneys who find a guaranteed minimum recovery and an attorney fees provision irresistable.

Our bill retains no fewer than 16 required disclosures; and, if any one is not provided, civil liability will result. What will no longer result in automatic liability is placing a comma in the wrong place or the failure of the creditor to dot his "i"s and cross his "t"s. Mr. President, I submit this is no erosion of present consumer protection, only the denial of one source of livelihood to those who for purely pecuniary reasons litigate these hypertechnical violations, and a step for

which our overworked courts will thank us.

It has been alleged that under S. 2802 restitution for truth in lending overcharges would not be required at all if the amount of restitution would be so great that the financial institution might be forced to close its doors. This is simply untrue. Although earlier versions of the bill might have been susceptible to this charge, under section 8 of the final version of the bill, partial restitution may be ordered in any amount that will not threaten the safety or soundness of the creditor.

Finally, S. 2802 has been criticized for eliminating the 3-day right of recission consumers presently enjoy with respect to second mortgages of their homes. Mr. President, I am at a loss as to how I should respond to this charge. I do not understand it. Nothing in our bill would achieve this result; indeed, we have expanded existing protection to include mortgages on mobile homes. I can only conclude that there has been a misunderstanding as to the impact of S. 2802 in this very important consumer right.

I am confident that once this proposal is placed before the House and the Members study its provisions, they will conclude that S. 2802 provides carefully considered and greatly needed relief while cautiously safeguarding important credit disclosure rights now enjoyed by consumers.

Similarly, I express my support for the provisions of this legislation which for the first time provides consumer protection for individuals engaging in electronic fund transfers. The Banking Committee has devoted considerable time and effort to drafting legislation in this important area. The purpose of the EFT provisions is to provide a basic framework establishing rights, remedies, and obligations of all parties to electronic fund transfers. The principal purposes, however, are to limit consumer liability, to provide consumers with full and meaningful disclosures and to introduce certainty into this developing area.

Arriving at an acceptable compromise bill on EFTS has proven to be a difficult endeavor. I am pleased that our good-faith efforts have resulted in a bill acceptable to all members of the Banking Committee.

I believe that the legislation we are presenting to the Senate today will provide not only a necessary framework of consumer protections, but also sufficient encouragement for the further development of advanced electronic funds transfer systems.

I commend to my colleagues the provisions in this bill on truth-in-lending reform and EFT. When taken together, these two important consumer measures will provide significant protections to consumers without imposing undue costs on those same consumers.

Mr. President, I am delighted that the legislation before us also contains a modified version of S. 2843, the Gold Medallion Act which I offered as an amendment during the committee markup.

S. 2843 provides that, if the Treasury Department makes sales from U.S. gold stocks, a portion to be sold in the form of one ounce and one-half ounce gold medallions. The bill is not intended to encourage the sale of U.S. gold. Rather, its purpose is to insure that, if such sales take place, American citizens will be able to purchase gold.

Currently, the Treasury sells gold in 400 ounce bars that cost over $80,000. Clearly, most Americans are unable to purchase this gold, and 90 percent of sales since 1975 have gone to foreign buyers. At the same time, Americans want to buy gold in affordable quantities, and are importing $500 million of gold coins—South African krugerrands, Mexican pesos, and Austrian gold kronin—each year.

The modified version of the Gold Medallion Act included in the legislation before the Senate provides that the Secretary of the Treasury would be required in the first fiscal year after the date of enactment in which he authorizes gold sales to the public, to offer not less than 10 percent of the gold offered for sale in that fiscal year in the form of units containing not more than one troy ounce of gold. The committee did not expressly require or prohibit the Treasury from issuing medallions under the provision.

This action by the committee recognizes the sizable market for gold pieces in the United States and anticipates that the items produced pursuant to this section would be manufactured to compete in the market. In addition, the flexibility of the language adopted recognizes that demand for such items may change and therefore grants the Secretary the authority to expand or reduce the number of such units produced to meet demand, but would not be reduced below 10 percent of total gold sales.

I urge my colleagues to support this important legislation.●

Mr. PROXMIRE. Mr. President, we have here a whole series of bills that the Senate has acted on, has passed unanimously in most cases. There are two other matters which have not passed the Senate but unanimously passed the committee, and there is no objection, so far as we can tell, anywhere in this Senate. We have two other strictly technical titles.

We are doing this because approximately half the work done by the Banking Committee has not been able to pass the House, for various reasons. We have good reason to feel that if we send it over in this form, under these circumstances, the House will give it very careful consideration and may enact it. It is our last chance to do so.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. PROXMIRE. I am happy to yield to my friend from Massachusetts.

Mr. BROOKE. Mr. President, as the chairman knows, we have worked long and hard on this banking legislation which contains an extension of regulation Q along with other important matters.

Does our distinguished chairman agree with me that the legislation represents a package and that if the package is not acted upon by the House of Representatives, we shall not extend regulation Q as a separate matter, and this will mean that regulation Q will expire in December and Congress will have to address regulation Q next year?

This is an important question and I wanted to propound it to the distinguished chairman so that the Senate's position will be perfectly clear to the House of Representatives.

Mr. PROXMIRE. I very much appreciate the question by the ranking minority member of the Banking Committee, and I wholeheartedly agree with him. He is absolutely right. There will be no extension of regulation Q unless they act on this package. It is the one opportunity to do so. There is no reason in the world why they should not. And I affirm what the distinguished Senator has stated.

Mr. BROOKE. I thank my distinguished chairman, and I thank the Chair.

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time.

Mr. HELMS. Mr. President, will the Senator withhold that?

Mr. PROXMIRE. I certainly do.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from North Carolina.

Mr. HELMS. Did the Senator discuss title XIII?

Mr. PROXMIRE. Yes, I discussed title XIII and pointed out that it included a provision that the distinguished Senator from North Carolina is the author of and responsible for.

It provides that the Secretary of the Treasury shall be required whenever he offers gold sales to the public to offer not less than 10 percent of the gold offered for sale in that fiscal year in the form of units containing not more than one troy ounce of gold.

The Senator from North Carolina has pleaded to make gold available to the American people not just the wealthy who can buy large sums, but the typical American who can buy maybe $100 worth or $200 worth.

The Senator has been the leader in this and he is dead right. I wholeheartedly agree with him.

Reluctantly, although the Treasury opposed it. They agreed that this was workable and they had no really substantial reason in my view to oppose it.

Mr. HELMS. Mr. President, I simply want to pay my highest respects to the distinguished chairman of the Banking Committee, Mr. PROXMIRE. and to thank him for the help he has given me in this matter.

Mr. President, I congratulate the efforts of the chairman, the members of the Banking Committee and others who have worked out this compromise which resulted in moving certain Banking Committee legislation this year.

As a result, the "regulation Q" bill to which the Senate Banking Committee added a version of my bill, the "Gold Medallion Act of 1978" will be acted upon.

On August 28, hearings were held on the Gold Medallion Act, S. 2843, which seemed to have cleared the way for further action. The General Services Administration has now fulfilled the promise made at the hearing that a marketing plan will be submitted. That plan along with the testimony and statements submitted for the record will be printed in the record of the hearing.

Just 2 weeks ago, the Senate Banking Committee approved a version of my bill as an amendment to the regulation "Q" bill.

At the hearing, Treasury officials reiterated the arguments outlined in a letter I received from Secretary Blumenthal. I respect the sincerity and integrity of the officials involved, though it appears that many members of the Senate found their arguments to be of less than adequate substance.

When I proposed the Gold Medallion Act of 1978, my purpose was to make U.S. gold available to those Americans who cannot afford to spend $90,000 for what is now the Treasury Department's smallest unit of sale, a 400-ounce gold bar. By stipulating that a certain amount of the gold that the Treasury auctions off each year be sold in the form of nonmonetary one-ounce and one-half ounce gold medallions, this bill would insure that the small American investor—someone with $100 or $200 in his pocket—can, if he so wishes, buy a small piece of gold without having to resort to purchasing a foreign piece, such as the South African krugerrand.

There is a growing demand for these items. More than 1.6 million ounces of gold in the form of bullion coins were imported last year. This same amount has been imported in the first 6 months of this year; that is to say, in one year the U.S. market for these pieces has doubled.

The bullion coins purchased by our citizens are used in many ways—as hedges against inflation, as jewelry, as numismatic items—but whatever their purpose of the buyers, the fact remains: Americans want the items. The Gold Medallion Act, then, would seem very reasonable. As Senator HAYAKAWA, testifying before the Senate Banking Committee, pointed out:

> The Treasury wants to sell gold (note its recently stepped-up gold sales), Americans want to buy gold, and the Gold Medallion Act would ensure that this mutually advantageous transaction could be made.

Unfortunately, the Treasury has been reluctant to sell its gold to Americans, preferring instead to dispose of it in bulk to large foreign interests. In his statement before the Senate Banking Committee, the Assistant Secretary of the Treasury, Mr. C. Fred Bergsten, listed the principal purchasers of gold from the U.S. auctions this year as being the Dresden Bank, the Swiss Bank Corp., the Union Bank of Switzerland, and the Bank of Oman, all foreign firms. In fact, approximately 90 percent of the U.S. gold since 1975 has been sold abroad.

The Treasury has objected to selling U.S. gold to Americans because, as a letter from Secretary of the Treasury Blumenthal to myself stated:

> The U.S. Government should not take any action to encourage U.S. citizens to invest in gold, nor to suggest that gold is a sound way for U.S. citizens to invest their earnings. Gold is a speculative commodity, subject to highly volatile swings in price. Those who might purchase the medallions could sustain substantial financial losses.

Thus the Treasury Department would rather U.S. gold fall into the hands of foreign interests—out of sight, out of mind—than those of Americans who have already demonstrated their desire to own gold.

This paternalistic attitude of "protecting U.S. citizens from making a bad investment," by preventing them from buying U.S. gold, does not befit the Government of a country supposedly dedicated to the ideals of individuality and freedom of choice. The Treasury, by selling gold in a form that only large foreign interests can buy, is subtly deriding the American taxpayer, implying that he or she has not the intelligence to make his or her own choices.

I strongly object to the Treasury's inference that American citizens are unable to determine what is best for them. The revised Gold Medallion Act is not meant to "encourage" anyone to invest in American gold; it would merely create that option. And there is reason to believe that that option would be much appreciated.

The Banking Committee adopted a measure which gives power to regulate the size and design to the Treasury with few restrictions.

But, it is important to reiterate those restrictions tonight. The distinguished Senator from Indiana (Mr. LUGAR) offered my bill in committee, as an amendment to the "regulation Q" legislation. The distinguished chairman then offered a substitute amendment which had been worked out with the cooperation of officials of the Treasury Department. Senator LUGAR then read language into the committee record which was then approved by the committee which said:

> In approving this section, the Committee recognizes the sizeable market for gold pieces in the United States and anticipates that the items produced pursuant to this section would be manufactured to compete in this market and would bear appropriate design, and weight and fineness markings so as to enhance their marketability. The Committee further recognizes that demand for such items may change and anticipates that production and sales in any year such units are produced, would be expanded or reduced to meet such demand, but in the first year, would not be reduced below 10 percent of total gold sales.

Subsequently, the committee drafted an additional paragraph for inclusion in the report. It said:

> The Secretary of Treasury would be required, in the first fiscal year after date of enactment of this Act in which he authorizes gold sales to the public, to offer not less than ten percent of the gold offered for sale in that fiscal year in the form of units containing not more than one troy ounce of gold. The provision would give the public an opportunity to buy Treasury gold in small quantities, but would not require issuance of "medallions" which could be mistaken for coins or legal tender and create an erroneous impression that the United States Government believes gold should have a monetary role.

I contend that the monetization fear is trivial. The dollar has no connection with gold, for if it did there would not be vast numbers of people in the world trying to get into gold and out of dollars. Let me make it clear that I do not advocate investment in gold or any other inflation hedge. I advocate getting rid of inflation.

No "hedge" can provide real protection from a depreciating and corrupting monetary system that no longer serves some of the prime functions of money: the dollar is no longer a store of value or a standard of value. It serves almost exclusively as a medium of exchange.

Well, if the Treasury wants to call a gold piece a "unit" or a "wafer" or a "thingamabob," who cares? The important thing is that it be designed, produced, and marketed in the manner that the American people want. The Banking Committee has in effect acted to give the Treasury authority to make that determination. I know that many in the Congress and in the public sector will watch carefully to see that the intent of Congress is carried out if, in fact, this is the language finally enacted.

I support the committee's action. Although I would have liked to see the bill contain more specific language as to the design, the specific weight and fineness, and other details included in the law, I am satisfied that those decisions will not be made in a vacuum. Obviously, if the Treasury Department puzzles over a gold piece that would be most "un-money like," it could offer for sale, say, a gold toothpick. If Treasury officials ask any person in this country who either sells or buys one of the 3 million ounces of gold being sold in this country this year in small units what he wants, I think they will come up with something better.

As the chairman pointed out in his remarks, the bill would require the production of gold pieces equal to at least 10 percent by weight of the gold sold in any year beginning October 1, 1979. Specifically, the language reads:

> Sec. X. "(a) Whenever the Secretary of the Treasury authorizes the sale of gold to the public, not less than ten percent by weight of the gold offered for sale each fiscal year pursuant to such authorization shall be offered in units containing not more than one troy ounce of gold.
>
> (b) Notwithstanding any other provision of this Act the number of units to be produced and sold in units of one ounce or less in fiscal years after fiscal year 1979 shall be adjusted to meet anticipated demand."

I hope now the House will agree speedily with the Senate language and this bill can be enacted. I certainly will be glad to work with the Treasury Department and the Bureau of the Mint and any other proper agency to see to it that the gold piece to be sold beginning October 1, 1979, will be marketable, and will compete with the other gold pieces now being sold in such record numbers.

I thank the Senator from Wisconsin and I thank the Chair.

Mr. PROXMIRE. I thank the Senator from North Carolina.

Mr. SCHMITT. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from New Mexico who also is a very able member of our committee.

Mr. SCHMITT. Mr. President, this measure which includes a number of items, as I understand it now, not only the regulation Q extension which is extremely important to savings and loan institutions, but also amendments to the Truth-in-Lending Act which I supported and we, as a matter of fact, have already passed once in the Chamber and it includes the question of EFT regulations.

I will support, although somewhat reluctantly in some ways, the passage of this particular legislation, not because I think I have changed my mind on whether this fledgling technology of electronics funds transfer needs regulation at this time. I do not think that ever was documented by proof. However, I also, in fairness, cannot deny that there cannot be a need some day in the future.

Mr. President, I rise to support somewhat reluctantly the Fair Fund Transfer Act with the adoption of the committee amendments.

The title would add a new provision to the Consumer Credit Protection Act intended to provide for consumer rights and obligations in electronic fund transfer systems and define more clearly the responsibilities of all participants in electronic fund transfers.

The Consumer Affairs Subcommittee on which I served as ranking minority member held hearings on the electronic fund transfer proposals introduced by Senator RIEGLE and by Senator TOWER and myself in February of this year. Because there was considerable disagreement in the committee on the final shape of this legislation, extensive markup sessions were held at the full Banking Committee level in March, April, and May of this year.

Although a number of our provisions were incorporated into the bill reported by the committee, we were not satisfied that the regulatory burden would not have an adverse effect on small institutions and their customers. Therefore, we filed additional views pointing out that in too hastily enacting EFT legislation, Congress will deny many Americans the convenience of modern payments services at a reasonable cost instead of protecting the consumer against future EFT problems.

I now feel that many of the problems we saw in the committee bill will be ameliorated by the committee amendments. These amendments would:

Permit quarterly statements for accounts whose only activity is EFT direct deposit.

Exclude from the definition of "EFT" automatic transfers from savings to checking and occasional telephone transfers.

Change from 14 days to 10 business days the time in which a consumer may be required to confirm in writing alleged account errors.

Establish consumer liability for failure to report the loss or theft of an EFT card.

Require the Federal Reserve Board to make modifications in its regulations to ease the compliance burden of small financial institutions.

Limit civil penalties to the amount which may be imposed on financial institutions under the Federal Deposit Insurance Act.

Of particular importance is the amendment which requires the Federal Reserve Board by regulation to modify the requirements imposed by the act on small financial institutions if the Board determines that such modifications are necessary to alleviate any undue compliance burden on those institutions and such modifications are consistent with the purpose and objectives of this title.

Accordingly, with these changes, I support the Senate passage of this legislation, with reservations.

My principal concern is that committees are reporting regulatory legislation similar to the Fair Fund Transfer Act without a meaningful study to determine the cost of compliance and the parties who will bear these costs. Economists are beginning to recognize and quantify costs generated by Government regulatory activities. They point out that the regulation of business activity generates a variety of impacts, direct and indirect, intended and unintended, desirable and undesirable.

Until recently the stress on governmental intervention was on benefits that are expected to flow or the social problems to be solved. More recently, techniques have been developed to determine the costs in terms of reduction in efficiency, paperwork, delays, and inflation. The Senate Banking Committee, as well as the other committees of Congress, should adhere more closely to the spirit of the Standing Rules of the Senate requiring evaluation of regulatory impact.

It is my hope that the Senate Banking Committee will exercise its oversight authority if this legislation should become law to bring it back for review if it should develop that it has an adverse impact upon the cost and availability of more convenient payment services for the American public.

What types of telephone conversation transfers would be excluded from coverage under the amendment?

Mr. PROXMIRE. The amendment excludes from coverage any transfer of funds which is initiated by a telephone conversation between a consumer and an officer or employee of a financial institution which is not pursuant to a prearranged plan and under which periodic or recurring transfers are not contemplated. The exclusion has two elements: that the transfer is not pursuant to a prearranged plan and that it is not contemplated that there be reoccurring transfers.

One example of a transaction excluded would be a situation where a customer discovers that he is running short of funds in his checking account and he calls the cashier of his bank to transfer funds to the checking account from his savings account.

Another example may be seen in the situation where the customer calls an employee in the bank to transfer funds out of town to a family member in an emergency situation.

The above situations would be precluded only if they are not pursuant to a formal prearranged agreement or plan under which the customer and the financial institution contemplates there will be future transfers.

There are a variety of telephone bill paying services which are intended to be covered by the provisions of the legislation and not to be excluded by this amendment.

This includes a prearranged bill payment service in a simple system where the customer calls a special number, gives identifying information and instructs a clerk to pay a designated bill. The Clerk transcribes the information and the bill is paid by check or draft.

Also included under the coverage of the bill would be a semi-automated system where the clerk sits in front of a computer terminal into which the customer's payment instructions may be entered.

Another type of semi-automated system might involve the customer leaving the information with a recorder. The information is later transcribed by a clerk.

In a fully automated system, customers with key touchtone telephones can directly contact the computer and feed the information into the system through the touchtone keys on the telephone.

It is intended that the above described bill paying systems be covered irrespective of the formality of the agreement entered into between the customer and the institution.

Mr. SCHMITT. I ask unanimous consent that the statement of Mr. TOWER on the Fair Funds Transfer Act be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR TOWER

I am pleased to support the Fair Funds Transfer Act with the adoption of the Committee Amendments.

These amendments address many of the problems we raised in our Additional Views to the Committee Report on S. 3499. The Committee Amendments would:

Permit quarterly statements for accounts whose only activity is EFT direct deposit.

Exclude from the definition of "EFT" automatic transfers from savings to checking and occasional telephone transfers.

Change from 14 days to 10 business days the time in which a consumer may be required to confirm in writing alleged account errors.

Establish consumer liability for failure to report the loss or theft of an EFT card.

Require the Federal Reserve Board to make modifications in its regulations to ease the compliance burden of small financial institutions.

Limit civil penalties to the amount which may be imposed on financial institutions under the Federal Deposit Insurance Act.

Of particular importance is the amendment which requires the Federal Reserve Board by regulation to modify the requirements imposed by the Act on small financial institutions if the Board determines that such modifications are necessary to alleviate any undue compliance burden on those institutions and such modifications are consistent with the purpose and objectives of this title.

Many small institutions do not have the volume to justify investment in sophisticated computer systems that interface with the automatic clearing houses. These small

institutions receive direct deposits from the automatic clearing houses in paper form and must manually post them. Most of them have not ventured into the field of automatic teller machines or customer-bank communication terminals. Their only involvement in the EFT area is through the receipt of direct deposits.

Many of the bill's disclosure and procedural requirements were designed with the automatic teller machines and customer terminals in mind. The purpose of this small business amendment is to require the Federal Reserve Board to make adjustments in keeping with the consumer protection objectives which will relieve small businesses and financial institutions of a regulatory burden which never was intended to be placed upon their operations. This should result in savings both to the consumers and the institutions. It should also provide sufficient flexibility for the Federal Reserve Board to accommodate unanticipated problems which would otherwise have to be adjusted by Congress in legislation.

As the author of S. 2470, the Fair Funds Transfer Act, which is one of the two bills introduced in this Congress to provide consumer protection in this area, I am pleased that we are now close to having legislation which should be of benefit to the consumer without placing an undue burden on the suppliers of electronic fund transfer services.

I appreciate very much the courtesy and generosity of the able Chairman of the Senate Banking Committee (Mr. PROXMIRE) and the distinguished Chairman of the Consumer Affairs Subcommittee (Mr. RIEGLE) in giving the opportunity to my staff to work with their staff in arriving at a perfected bill. I would also like to take this opportunity to recognize the efforts of the distinguished ranking minority member of the Consumer Affairs Subcommittee (Mr. SCHMITT) and his staff in bringing forth this legislation.

I recommend that this body support passage of the Fair Funds Transfer Act with the Committee Amendments.

● Mr. STEVENSON. Mr. President, this bill will amend and extend the Export-Import Bank Act of 1945. Title XV includes necessary provisions extending the Bank's authority, increasing its resources to offer adequate financing for U.S. exports, and modifying the congressional prenotification procedures to obviate unnecessary delays. All of these provisions were previously approved by the Banking Committee in connection with its consideration of S. 3077.

The title also includes provisions concerning export credit competition and solar energy that were approved by the Banking Committee in S. 3077. The title includes all amendments germane to the Bank which were adopted on the Senate floor last week; namely, those introduced by Senator CHAFEE, Senator HELMS, Senator HEINZ, and myself. It does not include controversial, nongermane amendments.

Finally, the title contains two provisions clarifying and strengthening the Bank's role in support of agricultural exports, which I developed with the distinguished Senator from Texas (Mr. TOWER).

The absent nongermane amendments tacked on to S. 3077 last week are: The amendment by Senator HOLLINGS on textiles, the amendment by Senator INOUYE on Foreign Service officers, the amendment by Senator ABOUREZK on the Select Committee on Indian Affairs, the amendment by Senator HEINZ expressing the sense of the Senate on the enforcement of wage and price guidelines, and my own amendment on locks and dam 26. The title also includes the Environment and Public Works Committee amendment to delete section 5 of S. 3077, which would have exempted the Bank from the requirements of the National Environmental Policy Act. The question of NEPA applicability is, therefore, left in abeyance. Section 4 of S. 3077, regarding country eligibility, has also been deleted and replaced by the amendment offered by the Senator from Rhode Island (Mr. CHAFEE).

Mr. President, this is the only way I know of, at this point in the session, to extend the Bank's charter. It gives the Bank the tools it needs to lead this Nation's export effort. It protects the interests of all Senators who had germane amendments adopted on the floor in connection with S. 3077, and, in the case of the Senator from Texas (Mr. TOWER), provides a compromise acceptable to all sides. It leaves untouched for the time being the debate over whether NEPA does or should apply to the Bank's activities which only have impacts outside the United States. And, it contains no provisions irrelevant to the Bank's operations.

Mr. President, I would have liked to resolve the environment issue this year. We will have that chance next year after the President issues his proposed Executive order on NEPA and the environment outside the United States. We will have time to study it closely, analyze its legal authority, and experience its impact.

Mr. President, I do not agree with all the amendments adopted on the Senate floor last week and I suspect our colleagues in the House may also have some differences. But, they are all well-intentioned and thoughtful amendments and I believe they should be in this amendment, because they express the will of the Senate.

Mr. President, the distinguished Senator from Texas (Mr. TOWER) introduced earlier this year an amendment to require the Bank to devote a certain ratio of its financing activities to the support of agricultural products. While I could not share the Senator from Texas' (Mr. TOWER) enthusiasm for a ratio, I do share his enthusiasm for promoting agricultural exports. Thus, I joined with him in working out a provision in this title which makes clear that primary responsibility for financing agricultural exports rests with the Commodity Credit Corporation. That is where it is now and where it should be. However, all commodities are not always eligible for the CCC program, and the CCC itself operates under more restrictive charter powers than the Bank as to length of repayment and insurance against political and credit risks of loss. In situations where CCC assistance is not available, and some form of Government assistance is needed to make the sale, it thus seems possible that without Eximbank support a sale of agricultural exports may be lost—most probably to competitors—in contravention of the national interest.

In such situations the Bank should provide the financing or other assistance needed, consistent with its general charter. The Secretary of Agriculture, however, should be consulted before any such transaction is approved, and the Bank should seriously consider any recommendations by the Secretary not to make the sale—for example, because the commodity is in short supply domestically. Because we do not want to wage a credit war, the Bank should participate in such transactions consistent with its general mandate of seeking to minimize, by international agreement, Government-subsidized export financing. It also should specifically report on its activities in this area to the Congress. That is what section 9 of this title provides.

Section 10 of this title is also new and and was suggested by the Senator from Texas (Mr. TOWER). It amends the Bank's charter to make clear that one of its functions is the promotion of the export of agricultural, as well as manufactured, products. Again, this is part of the Senator from Texas' desire to strengthen the Bank's role in agricultural exports, and I am pleased to include this provision in the clean title, although I personally believe it is not necessary.

Mr. President, with a trade deficit over $30 billion on an annual basis and an unstable dollar contributing to inflation, we need to pass the Eximbank bill this year. We need to act now to let the world know that we are serious about dealing with our trade deficit. I urge my colleagues to support this bill.●

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment was agreed to.

The PRESIDING OFFICER. Are there further amendments?

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time on the bill.

The PRESIDING OFFICER. The question is on the engrossment of the Senate amendments and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. STEVENS. Is there any time to be yielded back on this side?

The PRESIDING OFFICER. Five minutes are yet to be yielded back.

Mr. STEVENS. I yield back the remainder of the time on this side.

The PRESIDING OFFICER. The question is, Shall the bill pass?

The bill, as amended, was passed.

(Later the following occurred:)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the text of H.R. 14279 as passed by the Senate be printed at the appropriate place in the RECORD.

The PRESIDING OFFICER. Without objections, it is so ordered.

That this Act may be cited as the "Financial Institutions Supervisory Act Amendments of 1977".

TITLE I—SUPERVISORY AUTHORITY OVER DEPOSITARY INSTITUTIONS

SEC. 101. The Federal Reserve Act is amended by redesignating sections 29 and 30

as sections 30 and 31, respectively, and by inserting after section 28 a new section as follows:

"SEC. 29. (a) Any member bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such member bank who violates any provision of section 22 or 23A of this Act, or any regulation issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Comptroller of the Currency in the case of a national bank, or the Board in the case of a State member bank, by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(b) In determining the amount of the penalty the Comptroller of the Currency or the Board, as the case may be, shall take into account the appropriateness of the penalty with respect to the size of the financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(c) The member bank or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be received only as provided in subsection (d). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(d) Any member bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Comptroller of the Currency or the Board, as the case may be. The Comptroller of the Currency or the Board, as the case may be, shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Comptroller of the Currency or the Board, as the case may be, shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(e) If any member bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Comptroller of the Currency or the Board, as the case may be, shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(f) The Comptroller of the Currency and the Board shall promulgate regulations establishing procedures necessary to implement this section.

"(g) All penalties collected under authority of this section shall be covered into the Treasury of the United States.".

SEC. 102. Section 19 of the Federal Reserve Act is amended by adding at the end thereof the following new subsection:

"(i)(1) Any member bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such member bank who violates any provision of this section, or any regulation or order issued by the Board pursuant thereto, shall forfeit and pay a civil money penalty of not more than $100 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(2) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(3) The member bank or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing, all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in paragraph (4). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(4) Any member bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Board. The Board shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Board shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(5) If any member bank or person fails to pay an assessment after it has become a final and unappealable order or after the court of appeals has entered final judgment in favor of the agency, the Board shall refer the matter to the Attorney Genaral, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(6) The Board shall promulgate regulations establishing procedures necessary to implement this subsection.

"(7) All penalties collected under authority of this subsection shall be covered into the Treasury of the United States.".

SEC. 103. Section 22 of the Federal Reserve Act is amended by adding at the end thereof the following new subsection:

"(h)(1) No member bank shall make any loan or extension of credit in any manner to any of its own officers, or to any person who directly or indirectly or acting through or in concert with one or more persons owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such an officer or person, where the amount of such loan or extension of credit, when aggregated with the amount of all other loans or extensions of credit then outstanding by such bank to such officer or person and to all companies controlled by such officer or person, would exceed the limits on loans to a single borrower established by section 5200 of the Revised Statutes, as amended, in the case of a national banking association, or by the applicable State law in the case of a State member bank.

"(2) No member bank shall make any loan or extension of credit in any manner to any of its own officers or directors, or to any person who directly or indirectly or acting through or in concert with one or more persons owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such an officer, director, or person, where the amount of such loan or extension of credit, when aggregated with the amount of all other loans or extensions of credit then outstanding by such bank to such officer, director, or person and to all companies controlled by such officer, director, or person, would exceed $25,000, unless such loan or extension of credit is approved in advance by two-thirds of the entire board of directors with the interested party abstaining from participating directly or indirectly in the voting.

"(3) No member bank shall make any loan or extension of credit in any manner to any of its own officers or directors, or to any person who directly or acting through or in concert with one or more persons, owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank, or to any company controlled by such officer, director, or person, unless such loan or extension of credit is made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other persons and does not involve more than the normal risk of repayment or present other unfavorable features.

"(4) For purposes of this subsection, an officer, director, or person shall be considered to have control of a company if said officer, director, or person, directly or indirectly or acting through or in concert with one or more other persons—

"(A) owns, controls, or has power to vote 25 per centum or more of any class of voting securities of the company;

"(B) controls in any manner the election of a majority of the directors of the company; or

"(C) has the power to exercise a controlling influence over the management or policies of such company.

"(5) For the purposes of this subsection—

"(A) the term 'person' means an individual or company;

"(B) the term 'company' means any corporation, partnership, business trust, association, joint venture, pool syndicate, sole proprietorship, unincorporated organization, any other form of business entity not specifically listed herein, or any other trust, but shall not include any insured bank or any corporation the majority of shares of which is owned by the United States or by any State;

"(C) the term 'extension of credit' has the same meaning assigned such term in the fourth paragraph of section 23A of this Act;

"(D) a person shall be deemed to be a 'director' of a member bank or a 'person who directly or indirectly or acting through or in concert with one or more persons owns, controls or has power to vote more than 10 per centum of any class of voting securities of a member bank' if such person has such relationship with any bank holding company of which such member is a subsidiary, as defined by the Bank Holding Company Act (12 U.S.C. 1841), or with any other subsidiary of such bank holding company; and

"(E) a person shall be deemed to be an 'officer' of a member bank if such person is an officer of any bank holding company of which such member bank is a subsidiary, as defined by the Bank Holding Company Act

(12 U.S.C. 1841), or with any other subsidiary of such bank holding company.

"(6) The Board of Governors of the Federal Reserve System may prescribe such rules and regulations, including definitions of terms, as it deems necessary to effectuate the purposes and to prevent evasions of this subsection. The Board may further prescribe rules providing a reasonable period of time after the date of enactment of this subsection within which the amount of outstanding loans or extensions of credit made prior to such date of enactment shall be reduced so as to conform to the limitations of this subsection.".

SEC. 104. (a) Section 5 of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1844), is amended by adding at the end thereof the following new subsection:

"(e)(1) Notwithstanding any other provision of this Act, the Board may, whenever it has reasonable cause to believe that the continuation by a bank holding company of any activity or of ownership or control of any of its nonbank subsidies, other than a nonbank subsidiary of a bank, constitutes a serious risk to the financial safety, soundness, or stability of a bank holding company subsidiary bank and is inconsistent with sound banking principles or with the purposes of this Act or with the Financial Institutions Supervisory Act of 1966, order the bank holding company or any such nonbank subsidiaries, after due notice and opportunity for hearing, and after considering the views of the bank's primary supervisor, which shall be the Comptroller of the Currency in the case of a national bank or the Federal Deposit Insurance Corporation and the appropriate State supervisory authority in the case of an insured nonmember bank, to terminate such activities or to terminate (within one hundred and twenty days or such longer period as the Board may direct in unusual circumstances) its ownership or control of any such subsidiary either by sale or by distribution of the shares of the subsidiary to the shareholders of the bank holding company. Such distribution shall be pro rata with respect to all of the shareholders of the distributing bank holding company, and the holding company shall not make any charge to its shareholders arising out of such a distribution.

"(2) The Board may in its discretion apply to the United States district court within the jurisdiction of which the principal office of the holding company is located, for the enforcement of any effective and outstanding order issued under this section, and such court shall have jurisdiction and power to order and require compliance therewith, but except as provided in section 9 of this Act, no court shall have jurisdiction to affect by injunction or otherwise the issuance or enforcement of any notice or order under this section, or to review, modify, suspend, terminate, or set aside any such notice or order.".

(b)(1) Section 408(h) of the National Housing Act (12 U.S.C. 1730a(h)) is amended by adding immediately after "under subsection (a)(2)(D)" in paragraphs (3) (A) and (3)(B) of subsection (h) the phrase "or under subsection (h)(5)" and is amended by redesignating paragraph (h)(5) as (h)(6) and by adding a new paragraph (h)(5) to read as follows:

"(5)(A) Notwithstanding any other provision of this section, the Corporation may, whenever it has reasonable case to believe that the continuation by a savings and loan holding company of any activity or of ownership or control of any of its noninsured subsidiaries constitutes a serious risk to the financial safety, soundness, or stability of a savings and loan holding company's subsidiary insured institution and is inconsistent with the sound operation of an insured savings and loan institution or with the purposes of this section or with the Financial Institutions Supervisory Act, order the savings and loan holding company or any of its subsidiaries, after due notice and opporutnity for hearing, to terminate such activities or to terminate (within one hundred and twenty days or such longer period as the Corporation directs in unusual circumstances) its ownership or control of any such noninsured subsidiary either by sale or by distribution of the shares of the subsidiary to the shareholders of the savings and loan holding company. Such distribution shall be pro rata with respect to all of the shareholders of the distributing savings and loan holding company, and the holding company shall not make any change to its shareholders arising out of such a distribution.".

"(B) The Corporation may in its discretion apply to the United States district court within the jurisdiction of which the principal office of the company is located, for the enforcement of any effective and outstanding order issued under this section, and such court shall have jurisdiction and power to order and require compliance therewith, but except as provided in subsection (k), no court shall have jurisdiction to affect by injunction or otherwise the issuance or enforcement of any notice or order under this section, or to review, modify, suspend, terminate, or set aside any such notice or order.".

(2) Section 406(f) of the National Housing Act (12 U.S.C. 1729)(f)) is amended to read as follows:

"(f)(1) In order to prevent a default in an insured institution or in order to restore an insured institution in default to normal operation, the Corporation is authorized, in its discretion and upon such terms and conditions as it may determine, to make loans to, to purchase the assets of, or to make a contribution to, an insured institution or an insured institution in default.

"(2) Whenever an insured institution is in default or, in the judgment of the Corporation, is in danger of default, the Corporation may, in order to facilitate a merger or consolidation of such insured institution with another insured institution or the sale of the assets of such insured institution and the assumption of its liabilities by another insured institution and upon such terms and conditions as the Corporation may determine, purchase any such assets or assume any such liabilities, or make loans to such insured institution, or guarantee such other insured institution against loss by reason of its merging or consolidating with or assuming the liabilities and purchasing the assets of such insured institution in or in danger of default.

"(3) No contribution or guarantee shall be made pursuant to paragraphs (1) or (2) of this subsection (f) in an amount in excess of that which the Corporation finds to be reasonably necessary to save the cost of liquidating such insured institution in or in danger of default, but if the Corporation determines that the continued operation of such institution is essential to provide adequate savings or home financing services in its community, such limitation upon the amount of a contribution or guarantee shall not apply.".

SEC. 105. (a) Section 8 of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1847), is amended by redesignating "SEC. 8." as "SEC. 8. (a)" and by adding a new subsection (b) to read as follows:

"(b)(1) Any company which violates or any individual who participates in a violation of any provision of this Act, or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board by written notice. As used in the section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(2) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the company or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(3) The company or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in section 9. If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(4) If any company or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the Board, the Board shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(5) The Board shall promulgate regulations establishing procedures necessary to implement this subsection.

"(6) All penalties collected under authority of this subsection shall be covered into the Treasury of the United States.".

(b) Section 5 of the Bank Holding Company Act is amended by adding the following new paragraph:

"(e) In the course of or in connection with an application, examination, investigation or other proceeding under this Act, the Board, or any member or designated representative thereof, including any person designated to conduct any hearing under this Act, shall have the power to administer oaths and affirmations, to take or cause to be taken depositions, and to issue, revoke, quash, or modify subpenas and subpenas duces tecum; and the Board is empowered to make rules and regulations to effectuate the purposes of this subsection. The attendance of witnesses and the production of documents provided for in this subsection may be required from any place in any State or in any territory or other place subject to the jurisdiction of the United States at any designated place where such proceeding is being conducted. Any party to proceedings under this Act may apply to the United States District Court for the District of Columbia, or the United States district court for the judicial district or the United States court in any territory in which such proceeding is being conducted or where the witness resides or carries on business, for the enforcement of any subpena or subpena duces tecum issued pursuant to this subsection, and such courts shall have jurisdiction and power to order and require compliance therewith. Witnesses subpenaed under this subsection shall be paid the same fees and mileage that are paid witnesses in the district courts of the United States. Any service required under this subsection may be made by registered mail, or in such other manner reasonably calculated to give actual notice as the Board may by regulation or otherwise provide. Any court having jurisdiction of any proceeding instituted under this subsection may allow to any such party such reasonable expenses and attorneys' fees as it deems just and proper. Any person who willfully shall fail or refuse to attend and testify or to answer any lawful inquiry or to produce books, papers, correspondence, memoranda, contracts, agreements, or other records, if in such person's

power so to do, in obedience to the subpena of the Board, shall be guilty of a misdemeanor and, upon conviction, shall be subject to a fine of not more than $1,000 or to imprisonment for a term of not more than one year or both.".

(c) Section 408(j) of the National Housing Act (12 U.S.C. 1730a(j)), is amended by adding thereto a new paragraph (j)(4) to read as follows:

"(4)(A) Any company which violates or any individual who participates in a violation of any provision of this section, or any regulation or order issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in the section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the company or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The company or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any company or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the company is located, or in the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within thirty days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Corporation shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any company or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 106. (a)(1) Section 8(b) of the Federal Deposit Insurance Act (12 U.S.C. 1818(b)) is amended to read as follows:

"(b)(1) If, in the opinion of the appropriate Federal banking agency, any insured bank, bank which has insured deposits, or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such a bank is engaging or has engaged, or the agency has reasonable cause to believe that the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank is about to engage, in an unsafe or unsound practice in conducting the business of such bank, or is violating or has violated, or the agency has reasonable cause to believe that the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank is about to violate, a law, rule, or regulation, or any condition imposed in writing by the agency in connection with the granting of any application or other request by the bank or any written agreement entered into with the agency, the agency may issue and serve upon the bank or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the bank or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the agency at the request of any party so served. Unless the party or parties so served shall appear at the hearing personally or by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the agency shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the agency may issue and serve upon the bank or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the bank or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such bank to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after the service of such order upon the bank or other person concerned (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable as provided therein, except to such extent as it is stayed, modified, terminated, or set aside by action of the agency or a reviewing court.".

(2) Section 407(e) of the National Housing Act (12 U.S.C. 1730(e)) is amended to read as follows:

"(e)(1) If, in the opinion of the Corporation, any insured institution, institution which has insured accounts or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is engaging or has engaged, or the Corporation has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to engage, in an unsafe or unsound practice in conducting the business of such institution, or is violating or has violated, or the Corporation has reasonable cause to believe that the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution is about to violate, a law, rule, or regulation, or any condition imposed in writing by the Corporation in connection with the granting of any application or other request by the institution or any written agreement entered into with the Corporation, including any agreement entered into under section 403 of this title, the Corporation may issue and serve upon the institution or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Corporation at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Corporation shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Corporation may issue and serve upon the institution or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the institution or directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such institution to cease and desist from the same, and, further to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the institution or the party or parties so served (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Corporation or a reviewing court.

"(3) This subsection and subsections (f), (g), (h), (j), (k), (m)(3), (n), (o), (p), and (q) of this section shall apply to any savings and loan holding company, and to any subsidiary (other than an insured institution) of a savings and loan holding company, as those terms are defined in section 408 of this title, and to any affiliate service corporation of an insured institution in the same manner as they apply to insured institutions.".

(3) Section 5(d)(2) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(2)), is amended to read as follows:

"(2)(A) If, in the opinion of the Board, any association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is engaging or has engaged, or the Board has reasonable cause to believe that the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is about to engage, in an unsafe or unsound practice in conducting the business of such association, or is violating or has violated or the Board has reasonable cause to believe that the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association is about to violate, a law, rule, or regulation, or charter, or any condition imposed in writing by the Board in con-

nection with the granting of any application or other request by the association or any written agreement entered into with the Board, the Board may issue and serve upon the association or such director, officer, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the association or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such association. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Board at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Board shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Board may issue and serve upon the association or the director, officer, employee, agent, or other person participating in the conduct of the affairs of such association an order to cease and desist from any such violation or practice. Such order may, by provisions which may be mandatory or otherwise, require the association or its directors, officers, employees, agents, and other persons participating in the conduct of the affairs of such association to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(B) A cease-and-desist order shall become effective at the expiration of thirty days after service of such order upon the association or the party or parties so served (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable, except to such extent as it is stayed, modified, terminated, or set aside by action of the Board or a reviewing court.

"(C) This paragraph and paragraphs (3), (4), (5), (7), (8), (9), (10), (12) (A) and (B), (13), and (14) of this subsection (d) shall apply to any savings and loan holding company or to any subsidiary (other than an association) of a savings and loan holding company, as those terms are defined in section 408 of the National Housing Act (12 U.S.C. 1730a), as amended, and to any affiliate service corporation of an association in the same manner as they apply to an association.".

(4) Section 206(e) of the Federal Credit Union Act (12 U.S.C. 1786(e)(1)) is amended to read as follows:

"(e)(1) If, in the opinion of the Administrator, any insured credit union, credit union which has insured accounts, or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such a credit union is engaging or has engaged, or the Administrator has reasonable cause to believe that the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union is about to engage, in an unsafe or unsound practice in conducting the business of such credit union, or is violating or has violated, or the Administrator has reasonable cause to believe that the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union is about to violate, a law, rule, or regulation, or any condition imposed in writing by the Administrator in connection with the granting of any application or other request by the credit union or any written agreement entered into with the Administrator, the Administrator may issue and serve upon the credit union or such director, officer, committee member, employee, agent, or other person a notice of charges in respect thereof. The notice shall contain a statement of the facts constituting the alleged violation or violations or the unsafe or unsound practice or practices, and shall fix a time and place at which a hearing will be held to determine whether an order to cease and desist therefrom should issue against the credit union or the director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after service of such notice unless an earlier or a later date is set by the Administrator at the request of any party so served. Unless the party or parties so served shall appear at the hearing by a duly authorized representative, they shall be deemed to have consented to the issuance of the cease-and-desist order. In the event of such consent, or if upon the record made at any such hearing, the Administrator shall find that any violation or unsafe or unsound practice specified in the notice of charges has been established, the Administrator may issue and serve upon the credit union or the director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union an order to cease and desist from any such volation or practice. Such order may, by provisions which may be mandatory or otherwise, require the credit union or its directors, officers, committee members, employees, agents, and other persons participating in the conduct of the affairs of such credit union to cease and desist from the same, and, further, to take affirmative action to correct the conditions resulting from any such violation or practice.

"(2) A cease-and-desist order shall become effective at the expiration of thirty days after the service of such order upon the credit union or other person concerned (except in the case of a cease-and-desist order issued upon consent, which shall become effective at the time specified therein), and shall remain effective and enforceable as provided therein, except to such extent as it is stayed, modified, terminated, or set aside by action of the Administrator or a reviewing court.".

(b) Section 8(b)(3) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818(b)(3)), is amended: (1) by inserting after "Bank Holding Company Act of 1956" a comma and the following: "and to any organization organized and operated under section 25A of the Federal Reserve Act or operating under section 25 of the Federal Reserve Act,"; and (2) by adding at the end thereof the following new sentence: "Nothing in this subsection or in subsection (c) of this section shall authorize any Federal banking agency, other than the Board of Governors of the Federal Reserve System, to issue a notice of charges or cease-and-desist order against a bank holding company or any subsidiary thereof (other than a bank or subsidiary of that bank).".

(c)(1) Sections 8(c)(1) and (2) of the Federal Deposit Insurance Act (12 U.S.C. 1818(c) (1) and (2)) are amended to read as follows:

"(c)(1) Whenever the appropriate Federal banking agency shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the bank or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank pursuant to paragraph (1) of subsection (b) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the bank, or is likely to seriously weaken the condition of the bank or otherwise seriously prejudice the interests of its depositors prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (b) of this section, the agency may issue a temporary order requiring the bank or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition, or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the bank or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the agency shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the bank or such director, officer, employee, agent, or other person, until the effective date of such order.

"(2) Within ten days after the bank concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such bank has been served with a temporary cease-and-desist order, the bank or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the bank is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the bank or such director, officer, employee, agent, or other person under paragraph (1) of subsection (b) of this section, and such court shall have jurisdiction to issue such injunction.".

(2) Section 407(f) (1) and (2)) is amended to read as follows:

"(f)(1) Whenever the Corporation shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the institution or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution or any institution any of the accounts of which are insured pursuant to paragraph (1) of subsection (e) of this section of assets or earnings of the institution, or is likely to seriously weaken the condition of the institution or otherwise seriously prejudice the interests of its insured members prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (c) of this section, the Corporation may issue a temporary order requiring the institution or such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the institution and/or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and

enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Corporation shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the institution or such director, officer, employee, agent, or other person, until the effective date of any such order.

"(2) Within ten days after the institution concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution has been served with a temporary cease-and-desist order, the institution or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the principal office of the institution is located, or the United States Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the institution or such director, officer, employee, agent, or other person under paragraph (1) of subsection (e) of this section, and such court shall have jurisdiction to issue such injunction.".

(3) Section 5(d)(3) (A) and (B) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(3) (A) and (B)), is amended to read as follows:

"(3)(A) Whenever the Board shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the association or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association pursuant to paragraph (2)(A) of this subsection, or the continuation thereof, is likely to cause insolvency (as defined in paragraph (6)(A)(i) of this subsection) or substantial dissipation of assets or earnings of the association, or is likely to seriously weaken the condition of the association or otherwise seriously prejudice the interests of its savings account holders prior to the completion of the proceedings conducted pursuant to paragraph (2)(A) of this subsection the Board may issue a temporary order requiring the association of such director, officer, employee, agent, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the association or such director, officer, employee, agent, or other person participating in the conduct of the affairs of such institution and, unless set aside, limited, or suspended by a court in proceedings authorized by subparagraph (B) of this paragraph, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Board shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the association or such director, officer, employee, agent, or other person, until the effective date of such order.

"(B) Within ten days after the association concerned or any director, officer, employee, agent, or other person participating in the conduct of the affairs of such association has been served with a temporary cease-and-desist order, the association or such director, officer, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the association is located or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the bank or such director, officer, employee, agent, or other person under paragraph (2)(A) of this subsection, and such court shall have jurisdiction to issue such injunction.".

(4) Sections 206(f) (1) and (2) of the Federal Credit Union Act (12 U.S.C. 1786(f) (1) and (2)) are amended to read as follows:

"(f)(1) Whenever the Administrator shall determine that the violation or threatened violation or the unsafe or unsound practice or practices, specified in the notice of charges served upon the credit union or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union pursuant to paragraph (1) of subsection (e) of this section, or the continuation thereof, is likely to cause insolvency or substantial dissipation of assets or earnings of the credit union, or is likely to seriously weaken the condition of the credit union or otherwise seriously prejudice the interests of its insured members prior to the completion of the proceedings conducted pursuant to paragraph (1) of subsection (e) of this section, the Administrator may issue a temporary order requiring the credit union or such director, officer, committee member, employee, agents, or other person to cease and desist from any such violation or practice and to take affirmative action to prevent such insolvency, dissipation, condition, or prejudice pending completion of such proceedings. Such order shall become effective upon service upon the credit union or such director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union and, unless set aside, limited, or suspended by a court in proceedings authorized by paragraph (2) of this subsection, shall remain effective and enforceable pending the completion of the administrative proceedings pursuant to such notice and until such time as the Administration shall dismiss the charges specified in such notice, or if a cease-and-desist order is issued against the credit union or such director, officer, committee member, employee, agent, or other person, until the effective date of such order.

"(2) Within ten days after the credit union concerned or any director, officer, committee member, employee, agent, or other person participating in the conduct of the affairs of such credit union has been served with a temporary cease-and-desist order, the credit union or such director, officer, committee member, employee, agent, or other person may apply to the United States district court for the judicial district in which the home office of the credit union is located, or the United States District Court for the District of Columbia, for an injunction setting aside, limiting, or suspending the enforcement, operation, or effectiveness of such order pending the completion of the administrative proceedings pursuant to the notice of charges served upon the credit union or such director, officer, committee member, employee, agent, or other person under paragraph (1) of subsection (c) of this section, and such court shall have jurisdiction to issue such injunction.".

(d)(1) Section 8(e) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1818 (e)), is amended to read as follows:

"(e)(1) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the bank, or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the agency determines that the bank has suffered or will probably suffer substantial financial loss or other damage or that the interests of its depositors could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the bank, the agency may serve upon such director or officer a written notice of its intention to remove him from office.

"(2) Whenever, in the opinion of the appropriate Federal banking agency, any director or officer of an insured bank, by conduct or practice with respect to another insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the appropriate Federal banking agency, any other person participating in the conduct of the affairs of an insured bank, by conduct or practice with respect to such bank or other insured bank or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to participate in the conduct of the affairs of such insured bank, the agency may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the bank.

"(3) In respect to any director or officer of an insured bank or any other person referred to in paragraph (1) or (2) of this subsection, the appropriate Federal banking agency may, if it deems it necessary for the protection of the bank or the interests of its depositors, by written notice to such effect served upon such director, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the bank. Such suspension or prohibition shall become effective upon service of such notice and, unless stayed by a court in proceedings authorized by subsection (f) of this section, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the agency shall dismiss the charges specified in such notice, or, if an order of removal or prohibition is issued against the director or officer or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the bank of which he is a director or officer or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, officer, or other person from office or to prohibit his participation in the conduct of the affairs of an insured bank, shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days no later than sixty days after the date of service of such notice, unless an earlier or a later date is set by the agency at the request of (A) such director or officer or other person, and for good cause shown, or (B) the Attorney General of the United States. Unless such director, officer, or other person shall appear at the hearing in person or by a duly authorized repre-

sentative, he shall be deemed to have consented to the issuance of an order of such removal or prohibition. In the event of such consent or if upon the record made at any such hearing the agency shall find that any of the grounds specified in such notice have been established, the agency may issue such orders of suspension or removal from office, or prohibition from participation in the conduct of the affairs of the bank, as it may deem appropriate. In any action brought under this section by the Comptroller of the Currency in respect to any director, officer or other person with respect to a national banking association or a District bank, the findings and conclusions of the Administrative Law Judge shall be certified to the Board of Governors of the Federal Reserve System for the determination of whether any order shall issue. Any such order shall become effective at the expiration of thirty days after service upon such bank and the director, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated or set aside by action of the agency or a reviewing court.".

(2) Section 407(g) (1) and (2) of the National Housing Act (12 (U.S.C. 1730(g) (1) and (2)) is amended to read as follows:

"(g)(1) Whenever, in the opinion of the Corporation, any director or officer of an insured institution has committed any violation of law, rule, or regulations or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the institution or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Corporation determines that the institution has suffered or will probably suffer substantial financial loss or other damage or that the interests of its insured members could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the institution, the Corporation may serve upon such director or officer a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the institution.

"(2) Whenever, in the opinion of the Corporation, any director or officer of an insured institution, by conduct or practice with respect to another insured institution or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Corporation, any other person participating in the conduct of the affairs of an insured institution, by conduct or practice with respect to such institution or other insured institution or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and in addition, has evidenced his unfitness to participate in the conduct of affairs of such insured institution, the Corporation may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the institution.".

(3) Section 5(d)(4) (A) and (B) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(d)(4) (A) and (B)) is amended to read as follows:

"(4)(A) Whenever, in the opinion of the Board, any director or officer of an association has committed any violation of law, rule, or regulation or of a cease-and-desist order which has become final, or has engaged or participated in any unsafe or unsound practice in connection with the association or has committed or engaged in any act, omission, or practice which constitutes a breach of his fiduciary duty as such director or officer, and the Board determines that the association has suffered or will probably suffer substantial financial loss or other damage or that the interests of its savings account holders could be seriously prejudiced by reason of such violation or practice or breach of fiduciary duty, or that the director or officer has received financial gain by reason of such violation or practice or breach of fiduciary duty, and that such violation or practice or breach of fiduciary duty is either one involving personal dishonesty on the part of such director or officer, or one which demonstrates a willful disregard for the safety or soundness of the association, the Board may serve upon such director or officer a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the association.

"(B) Whenever, in the opinion of the Board, any director or officer of an association, by conduct or practice with respect to another savings and loan association or other business institution which resulted in substantial financial loss or other damage, has evidenced either his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to continue as a director or officer and, whenever, in the opinion of the Board, any other person participating in the conduct of the affairs of an association, by conduct or practice with respect to such association or other savings and loan association or other business institution which resulted in substantial financial loss or other damage, has evidenced his personal dishonesty or a willful disregard for its safety and soundness, and, in addition, has evidenced his unfitness to participate in the conduct of the affairs of such association, the Board may serve upon such director, officer, or other person a written notice of its intention to remove him from office or to prohibit his further participation in any manner in the conduct of the affairs of the association.".

(4) Section 206(g) (3) and (4) of the Federal Credit Union Act, as amended (12 U.S.C. 1786(g) (3) and (4)), is amended to read as follows:

"(3) In respect to any director, committee member, or officer of an insured credit union or any other person referred to in paragraph (1) or (2) of this subsection, the Administrator may, if he deems it necessary for the protection of the credit union or the interests of its members, by written notice to such effect served upon such director, committee member, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the credit union. Such suspension or prohibition shall become effective upon service of such notice and, unless stayed by a court in proceedings authorized by subsection (1) of this section, shall remain in effect pending the completion of the administrative proceedings pursuant to the notice served under paragraph (1) or (2) of this subsection and until such time as the Administrator shall dismiss the charges specified in such notice, or, if an order of removal and prohibition is issued against the director, committee member, or officer or other person, until the effective date of any such order. Copies of any such notice shall also be served upon the credit union of which he is a director, committee member, or officer or in the conduct of whose affairs he has participated.

"(4) A notice of intention to remove a director, committee member, officer, or other person from office or to prohibit his participation in the conduct of the affairs of an insured credit union shall contain a statement of the facts constituting grounds therefor, and shall fix a time and place at which a hearing will be held thereon. Such hearing shall be fixed for a date not earlier than thirty days nor later than sixty days after the date of service of such notice, unless an earlier or a later date is set by the Administrator at the request of (A) such director, committee member, or officer or other person, and for good cause shown, or (B) the Attorney General of the United States. Unless such director, committee member, officer, or other person shall appear at the hearing in person or by a duly authorized representative, he shall be deemed to have consented to the issuance of an order of such removal or prohibition. In the event of such consent, or if upon the record made at any such hearing the Administrator shall find that any of the grounds specified in such notice have been established, the Administrator may issue such orders of suspension or removal from office, or prohibition from participation in the conduct of the affairs of the credit union, as it may deem appropriate. Any such order shall become effective at the expiration of thirty days after service upon such credit union and the director, committee member, officer, or other person concerned (except in the case of an order issued upon consent, which shall become effective at the time specified therein). Such order shall remain effective and enforceable except to such extent as it is stayed, modified, terminated, or set aside by action of the Administrator or a reviewing court.".

(e)(1) Section 8(i) of the Federal Deposit Insurance Act, as amended(12 U.S.C. 1818(i)), is amended by redesignating section 8(i) as 8(i)(1) and by adding at the end thereof a new paragraph as follows:

"(2)(A) Any insured bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such a bank who violates the terms of any order which has become final and was issued pursuant to subsection (b) or (c) of this section, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the appropriate Federal banking agency by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bring about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty the appropriate Federal banking agency shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The insured bank or person assessed shall be afforded an opportunity for agency hearing, upon requests made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph

(iv). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any insured bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the insured bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the appropriate Federal banking agency. The agency shall promptly certify and file in such Court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(v) If any insured bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the agency shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(vi) Each Federal banking agency shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(vii) All penalties collected under authority of this section shall be covered into the Treasury of the United States.".

(2) Section 407(k) of the National Housing Act (12 U.S.C. 1730(k)) is amended by adding a new paragraph (k)(3) to read as follows:

"(3)(A) Any insured institution or any institution any of the accounts of which are insured which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such an institution who violates the terms of any order which has become final and was issued pursuant to subsection (e) or (f) of this section shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured institution or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The insured institution or person assessed shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any insured institution or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the insured institution is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any insured institution or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

(3) Section 5(d)(8) of the Home Owners' Loan Act, as amended (12 U.S.C. 1464(5)(d)(8)), is amended by redesignating "section 5(d)(8)" as "5(d)(8)(A)" and by adding the following new paragraph:

"(B)(i) Any association which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such an association who violates the terms of any order which has become final and was issued pursuant to paragraph (2) or (3) of this subsection, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Board by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or adding or abetting a violation.

"(ii) In determining the amount of the penalty the Board shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the association bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(iii) The association or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (iv). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(iv) Any association or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the association is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Board. The agency shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the agency shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(v) If any association or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Board shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(vi) The Board shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(vii) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

(4) Section 206(j) of the Federal Credit Union Act, as amended (12 U.S.C. 1786(j)), is amended by redesignating section 206(j) as 206(j)(1) and by adding a new paragraph as follows:

"(2)(A) Any insured credit union which violates or any officer, director, committee member, employee, agent, or other person participating in the conduct of the affairs of such a credit union who violates the terms of any order which has become final and was issued pursuant to subsection (e) or (f) of this section, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Administrator by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, counseling, or aiding or abetting a violation.

"(B) In determining the amount of the penalty, the Administrator shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the insured credit union or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice may require.

"(C) The insured credit union or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The Administrator's determination shall be made by final order which may be reviewed only as provided in subparagraph (D). If no hearing is requested as herein provided, the assessment shall constitute a final and unappealable order.

"(D) Any insured credit union or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the insured credit union is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Administrator. The Administrator shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The finding of the Administrator shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(E) If any insured credit union or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the Administrator, the Ad-

ministrator shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action, the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(F) The Administrator shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(G) All penalties collected under authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 107. Section 18(j) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1828(j)), is amended by redesignating section 18(j) as "18(j)(1)" and by adding at the end thereof the following:

"(2) The provisions of section 22(h) of the Federal Reserve Act, as amended, relating to limits on loans and extensions of credit by a member bank to its officers or directors or to any individual who directly or indirectly owns, controls, or has the power to vote more than 10 per centum of any class of voting securities of such member bank or to companies controlled by such an officer, director, or individual, and relating to board of directors' approval of and terms of such loan, shall be applicable to every nonmember insured bank in the same manner and to the same extent as if such nonmember insured bank were a State member bank.

"(3)(i) Any nonmember insured bank which violates or any officer, director, employee, agent, or other person participating in the conduct of the affairs of such nonmember insured bank who violates any provision of section 23A or 22(h) of the Federal Reserve Act, as amended, or any lawful regulation issued pursuant thereto, shall forfeit and pay a civil penalty of not more than $1,000 per day for each day during which such violation continues. The penalty shall be assessed and collected by the Corporation by written notice. As used in this section, the term 'violates' includes without any limitation any action (alone or with another or others) for or toward causing, bringing about, participating in, couseling, or aiding or abetting a violation.

"(ii) In determining the amount of the penalty the Corporation shall take into account the appropriateness of the penalty with respect to the size of financial resources and good faith of the member bank or person charged, the gravity of the violation, the history of previous violations, and such other matters as justice require.

"(iii) The nonmember insured bank or person charged shall be afforded an opportunity for agency hearing, upon request made within ten days after issuance of the notice of assessment. In such hearing all issues shall be determined on the record pursuant to section 554 of title 5, United States Code. The agency determination shall be made by final order which may be reviewed only as provided in subparagraph (iv). If no hearing is requested as herein provided the assessment shall constitute a final and unappealable order.

"(iv) Any nonmember insured bank or person against whom an order imposing a civil money penalty has been entered after agency hearing under this section may obtain review by the United States court of appeals for the circuit in which the home office of the member bank is located, or the United States Court of Appeals for the District of Columbia Circuit, by filing a notice of appeal in such court within ten days from the date of such order, and simultaneously sending a copy of such notice by registered or certified mail to the Corporation. The Corporation shall promptly certify and file in such court the record upon which the penalty was imposed, as provided in section 2112 of title 28, United States Code. The findings of the Corporation shall be set aside if found to be unsupported by substantial evidence as provided by section 706(2)(E) of title 5, United States Code.

"(v) If any nonmember insured bank or person fails to pay an assessment after it has become a final and unappealable order, or after the court of appeals has entered final judgment in favor of the agency, the Corporation shall refer the matter to the Attorney General, who shall recover the amount assessed by action in the appropriate United States district court. In such action the validity and appropriateness of the final order imposing the penalty shall not be subject to review.

"(vi) The Corporation shall promulgate regulations establishing procedures necessary to implement this paragraph.

"(vii) All penalties collected under the authority of this paragraph shall be covered into the Treasury of the United States.".

SEC. 108. Any amendment made by this title which provides for the imposition of civil penalties shall apply only to violations occurring or continuing after the date of its enactment.

SEC. 109. Section 22(g) of the Federal Reserve Act, as amended (12 U.S.C. 375a), is amended by inserting the figure "$60,000" in lieu of the figure "$30,000" in paragraph (2), and by inserting the figure "$20,000" in lieu of the figure "$10,000" in paragraph (3); and by inserting the figure "$10,000" in lieu of the figure "$5,000" in paragraph (4).

SEC. 110. (a)(1) Section 8(g) of the Federal Deposit Insurance Act (12 U.S.C. 1818(g)) is amended to read as follows:

"(g)(1) Whenever any director or officer of an insured bank, or other person participating in the conduct of the affairs of such bank, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the appropriate Federal banking agency may, if continued service or participation by the individual may pose a threat to the interests of the bank's depositors or may threaten to impair public confidence in the bank, by written notice served upon such director, officer, or other person, suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the bank. A copy of such notice shall also be served upon the bank. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the agency. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the agency may, if continued service or participation by the individual may pose a threat to the interests of the bank's depositors or may threaten to impair public confidence in the bank, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the bank except with the consent of the appropriate agency. A copy of such order shall also be served upon such bank, whereupon such director or officer shall cease to be a director or officer of such bank. A finding of not guilty or other disposition of the charge shall not preclude the agency from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in bank affairs, pursuant to paragraph (1), (2), or (3) of subsection (e) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the agency.

"(2) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a national bank less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of a national bank are suspended pursuant to this section, the Comptroller of the Currency shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended, cease to be directors of the bank and their respective successors take office.

"(3) Within thirty days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, officer, or other person concerned may request in writing an opportunity to appear before the agency to show that the continued service to or participation in the conduct of the affairs of the bank by such individual does not, or is not likely to, pose a threat to the interests of the bank's depositors or threaten to impair public confidence in the bank. Upon receipt of any such request, the appropriate Federal banking agency shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the agency or designated employees of the agency to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the agency shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the bank will be continued, terminated, or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the bank will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the agency's decision, if adverse to the director, officer or other person. The Federal banking agencies are authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 8(h)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1818(h)(1)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (g)(3) of this section)".

(3) Section 8(j) of the Federal Deposit Insurance Act (12 U.S.C. 1818(j)) is amended by striking out "(e)(5), (e)(7), (e)(8)" and inserting in lieu thereof "(e)(3), (e)(4)".

(4) Section 8(k) of the Federal Deposit Insurance Act (12 U.S.C. 1818(k)) is amended by striking out "paragraph (1) of subsection (g)" and inserting in lieu thereof "paragraph (1) or (3) of subsection (g)".

(5) Section 8(n) of the Federal Deposit Insurance Act (12 U.S.C. 1818(n)) is amended by adding at the end thereof the following new sentence: "Any person who willfully shall fail or refuse to attend and testify or to answer any lawful inquiry or to produce books, papers, correspondence, memoranda, contracts, agreements, or other records, if in such person's power so to do, in obedience to the subpoena of the appropriate Federal banking agency, shall be guilty of a mis-

demeanor and, upon conviction, shall be subject to a fine of not more than $1,000 or to imprisonment for a term of not more than one year or both.".

(b)(1) Section 407(h) of the National Housing Act (12 U.S.C. 1730(h)) is amended to read as follows:

"(h)(1) Whenever any director or officer of an insured institution, or other persons participating in the conduct of the affairs of such institution, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Corporation may, if continued service or participation by the individual may pose a threat to the interests of the institutions' depositors or may threaten to impair public confidence in the institution, by written notice served upon such director, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the institution. A copy of such notice shall also be served upon the institution. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Corporation. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the Corporation may, if continued service or participation by the individual may pose a threat to the interests of the institution's depositors or may threaten to impair public confidence in the institution, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the institution except with the consent of the Corporation. A copy of such order shall also be served upon such institution, whereupon such director or officer shall cease to be a director or officer of such institution. A finding of not guilty or other disposition of the charge shall not preclude the Corporation from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in institution affairs, pursuant to paragraph (1), (2), or (3) of subsection (g) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the Corporation.

"(2) Within thirty days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, officer, or other person concerned may request in writing an opportunity to appear before the Corporation to show that the continued service to or participation in the conduct of the affairs of the institution by such individual does not, or is not likely to, pose a threat to the interests of the institution's depositors or threaten to impair public confidence in the institution. Upon receipt of any such request, the Corporation shall fix a time (not more than thirty days after receipt of such requests, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the Corporation or designated employees of the Corporation to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the Corporation shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the institution will be continued, terminated or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the institution will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Corporation's decision, if adverse to the director, officer, or other person. The Corporation is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 407(j)(1) of such Act (12 U.S.C. 1730(j)(1)) is amended by inserting after "any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (h)(3) of this section)".

(3) Section 407(j)(2) of such Act (12 U.S.C. 1730(j)(2)) is amended by inserting "(1)" after "subsection (h)".

(c)(1) Section 5(d)(5) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(5)) is amended to read as follows:

"(5)(A) Whenever any director or officer of an association, or other person participating in the conduct of the affairs of such association, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Board, may, if continued service or participation by the individual may pose a threat to the interests of the association's depositors or may threaten to impair public confidence in the association, by written notice served upon such director, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the association. A copy of such notice shall also be served upon the association. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the Board. In the event that a judgment of conviction with respect to such crime is entered against such director, officer, or other person, and at such time as such judgment is not subject to further appellate review, the Board may, if continued service or participation by the individual may pose a threat to the interests of the association's depositors or may threaten to impair public confidence in the association, issue and serve upon such director, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the association except with the consent of the Board. A copy of such order shall also be served upon such association, whereupon such director or officer shall cease to be a director or officer of such association. A finding of not guilty or other disposition of the charge shall not preclude the Board from thereafter instituting proceedings to remove such director, officer, or other person from office or to prohibit further participation in association affairs, pursuant to subparagraph (A), (B), or (C) of paragraph (4). Any notice of suspension or order of removal issued under this subparagraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under subparagraph (C) hereof unless terminated by the Board.

"(B) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of an association less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of an association are suspended pursuant to this section, the Board shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended cease to be directors of the association and their respective successors take office.

"(C) Within thirty days from service of any notice of suspension or order of removal issued pursuant to subparagraph (A), the director, officer, or other person concerned may request in writing an opportunity to appear before the Board to show that the continued service to or participation in the conduct of the affairs of the association by such individual does not, or is not likely to, pose a threat to the interests of the association's depositors or threaten to impair public confidence in the association. Upon receipt of any such request, the Board shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, officer, or other person) and place at which the director, officer, or other person may appear, personally or through counsel, before one or more members of the agency or designated employees of the Board to submit written materials (or, at the discretion of the agency, oral testimony) and oral argument. Within sixty days of such hearing, the Board shall notify the director, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the association will be continued, terminated or otherwise modified, or whether the order removing said director, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the association will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Board's decision, if adverse to the director, officer, or other person. The Board is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 5(d)(7)(A) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(7)(A)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in paragraph (5)(C) of this section)".

(3) Section 5(d)(13)(A)(1) of such Act (12 U.S.C. 1464(d)(13)(A)(1)) is amended by inserting after "paragraph (5)(A)" the following: "or (C)".

(d)(1) Section 206(h) of the Federal Credit Union Act (12 U.S.C. 1786(h)) is amended to read as follows:

"(h)(1) Whenever any director, committee member, or officer of an insured credit union, or other person participating in the conduct of the affairs of such credit union, is charged in any information, indictment, or complaint authorized by a United States attorney, with the commission of or participation in a crime involving dishonesty or breach of trust which is punishable by imprisonment for a term exceeding one year under State or Federal law, the Administrator may, if continued service or participation by the individual may pose a threat to the interests of the credit union's depositors or may threaten to impair public confidence in the credit union, by written notice served upon such director, committee member, officer, or other person suspend him from office or prohibit him from further participation in any manner in the conduct of the affairs of the credit union. A copy of such notice shall also be served upon the credit union. Such suspension or prohibition shall remain in effect until such information, indictment, or complaint is finally disposed of or until terminated by the

Administrator. In the event that a judgment of conviction with respect to such crime is entered against such director, committee member, officer or other person, and at such time as such judgment is not subject to further appellate review, the Administrator may, if continued service or participation by the individual may pose a threat to the interests of the credit union's depositors or may threaten to impair public confidence in the credit union, issue and serve upon such director, committee member, officer, or other person an order removing him from office or prohibiting him from further participation in any manner in the conduct of the affairs of the credit union except with the consent of the Administrator. A copy of such order shall also be served upon such credit union, whereupon such director or officer shall cease to be a director, committee member, or officer of such credit union. A finding of not guilty or other disposition of the charge shall not preclude the Administrator from thereafter instituting proceedings to remove such director, committee member, officer, or other person from office or to prohibit further participation in the affairs of the credit union, pursuant to subsection (g) of this section. Any notice of suspension or order of removal issued under this paragraph shall remain effective and outstanding until the completion of any hearing or appeal authorized under paragraph (3) hereof unless terminated by the Administrator.

"(2) If at any time, because of the suspension of one or more directors pursuant to this section, there shall be on the board of directors of a Federal credit union less than a quorum of directors not so suspended, all powers and functions vested in or exercisable by such board shall vest in and be exercisable by the director or directors on the board not so suspended, until such time as there shall be a quorum of the board of directors. In the event all of the directors of a Federal credit union are suspended pursuant to this section, the Administrator shall appoint persons to serve temporarily as directors in their place and stead pending the termination of such suspensions, or until such time as those who have been suspended cease to be directors of the credit union and their respective successors have been elected by the members at an annual or special meeting and have taken office. Directors appointed temporarily by the Administrator shall, within thirty days following their appointment, call a special meeting for the election of new directors, unless during the thirty-day period (A) the regular annual meeting is scheduled, or (B) the suspensions giving rise to the appointment of temporary directors are terminated.

"(3) Within thirty days from service of any notice of suspension or order of removal issued pursuant to paragraph (1) of this subsection, the director, committee member, officer, or other person concerned may request in writing an opportunity to appear before the Administrator to show that the continued service to or participation in the conduct of the affairs of the credit union by such individual does not, or is not likely to, pose a threat to the interests of the credit union's depositors or threaten to impair public confidence in the credit union. Upon receipt of any such request, the Administrator shall fix a time (not more than thirty days after receipt of such request, unless extended at the request of the concerned director, committee member, officer, or other person) and place at which the director, committee-member, officer, or other person may appear, personally or through counsel, before the Administrator or his designee to submit written materials (or, at the discretion of the Administrator, oral testimony) and oral argument. Within sixty days of such hearing, the Administrator shall notify the director, committee member, officer, or other person whether the suspension or prohibition from participation in any manner in the conduct of the affairs of the credit union will be continued, terminated or otherwise modified, or whether the order removing said director, committee member, officer, or other person from office or prohibiting such individual from further participation in any manner in the conduct of the affairs of the credit union will be rescinded or otherwise modified. Such notification shall contain a statement of the basis for the Administrator's decision, if adverse to the director, committee member, officer, or other person. The Administrator is authorized to prescribe such rules as may be necessary to effectuate the purposes of this subsection.".

(2) Section 206(1)(1) of the Federal Credit Union Act (12 U.S.C. 1786(1)(1)) is amended by inserting after "Any hearing provided for in this section" the following: "(other than the hearing provided for in subsection (h)(3) of this section)".

(3) Section 206(1)(2) of such Act (12 U.S.C. 1786(1)(2)) is amended by inserting "(1)" after "subsection (h)".

SEC. 111. (a) Section 3(a) of the Bank Holding Company Act of 1956 (12 U.S.C. 1842(a)) is amended by inserting after the second sentence the following new sentence: "The Board is authorized upon application by a bank to extend, from time to time for not more than one year at a time, the two-year period referred to above for disposing of any shares acquired by a bank in the regular course of securing or collecting a debt previously contracted in good faith, if, in the Board's judgment, such an extension would not be detrimental to the public interest, but no such extensions shall in the aggregate exceed three years.".

(b) Section 2(a)(5)(D) of such Act (12 U.S.C. 1841(a)(5)(D)) is amended by adding at the end thereof the following new sentence: "The Board is authorized upon application by a company to extend, from time to time for not more than one year at a time, the two-year period referred to herein for disposing of any shares acquired by a company in the regular course of securing or collecting a debt previously contracted in good faith, if, in the Board's judgment, such an extension would not be detrimental to the public interest, but no such extension shall in the aggregate exceed three years.".

(c) Section 4(c)(2) of the Bank Holding Company Act of 1956, as amended (12 U.S.C. 1843(c)(2)), is amended by striking out "shares acquired by a bank in satisfaction of a debt previously contracted in good faith, but such bank shall dispose of such shares within a period of two years" and inserting in lieu thereof the following: "shares acquired by a bank holding company or any of its subsidiaries in satisfaction of a debt previously contracted in good faith, but such shares shall be disposed of within a period of two years".

TITLE II—INTERLOCKING DIRECTORS

SEC. 201. This title may be cited as the "Depositary Institution Management Interlocks Act".

SEC. 202. As used in this title—

(1) the term "depositary institution" means a commercial bank, a savings bank, a trust company, a savings and loan association, a building and loan association, a homestead association, a cooperative bank, an industrial bank, or a credit union;

(2) the term "depositary holding company" means a bank holding company as defined in section 2(a) of the Bank Holding Company Act of 1956, a company which would be a bank holding company as defined in section 2(a) of the Bank Holding Company Act of 1956 but for the exemption contained in section 2(a)(5)(F) thereof, or a savings and loan holding company as defined in section 408(a)(1)(D) of the National Housing Act;

(3) the characterization of any corporation (including depositary institutions and depositary holding companies), as an "affiliate of," or as "affiliated" with any other corporation means that—

(A) one of the corporations is a depositary holding company and the other is a subsidiary thereof, or both corporations are subsidiaries of the same depositary holding company, as the term "subsidiary" is defined in either section 2(d) of the Bank Holding Company Act of 1956 in the case of a bank holding company or section 408(a)(1)(II) of the National Housing Act in the case of a savings and loan holding company;

(B) more than 50 per centum of the voting stock of one corporation is beneficially owned in the aggregate by one or more persons who also beneficially own in the aggregate more than 50 per centum of the voting stock of the other corporation; or

(C) one of the corporations is a trust company all of the stock of which, except for directors qualifying shares, was owned by one or more mutual savings banks on the date of enactment of this Act, and the other corporation is a mutual savings bank;

(4) the term "management official" means an employee or officer with management functions, a director (including an advisory or honorary director), a trustee of a business organization under the control of trustees, or any person who has a representative or nominee serving in any such capacity: *Provided*, That if a corporator, trustee, director, or other officer of a State-chartered savings bank or cooperative bank is specifically authorized under the laws of the State in which said institution is located to serve as a trustee, director, or other officer of a State-chartered trust company which does not make real estate mortgage loans and does not accept savings deposits from natural persons, then, for the purposes of this title, such corporator, trustee, director, or other officer shall not be deemed to be a management official of such trust company: *And provided further*, That if a management official of a State-chartered trust company which does not make real estate mortgage loans and does not accept savings deposits from natural persons is specifically authorized under the laws of the State in which said institution is located to serve as a corporator, trustee, director, or other officer of a State-chartered savings bank or cooperative bank, then, for the purposes of this title, such management official shall not be deemed to be a management official of any such savings bank or cooperative bank; and

(5) the term "office" used with reference to a depository institution means either a principal office or a branch.

SEC. 203. A management official of a depositary institution or a depositary holding company may not serve as a management official of any other depositary institution or depositary holding company not affiliated therewith if an office of one of the institutions or any depositary institution that is an affiliate of such institutions is located within either—

(1) the same standard metropolitan statistical area as defined by the Office of Management and Budget, or

(2) the same city, town, or village as that in which an office of the other institution or any depositary institution that is an affiliate of such other institution is located, or in any city, town, or village contiguous or adjacent thereto.

SEC. 204. If a depositary institution or a depositary holding company has total assets exceeding $1,000,000,000, a management official of such institution or any affiliate thereof may not serve as a management of-

ficial of any other nonaffiliated depositary institution or depositary holding company having total assets exceeding $500,000,000 or as a management official of any affiliate of such other institution.

SEC. 205. The prohibitions contained in sections 202, 203, and 204 shall not apply in the case of any one or more of the following or any branch or subsidiary thereof:

(1) A depositary institution or depositary holding company which has been placed formally in liquidation, or which is in the hands of a receiver, conservator, or other official exercising a similar function.

(2) A corporation operating under section 25 or 25A of the Federal Reserve Act.

(3) A credit union being served by a management official of another credit union or a credit union being served by a management official of another depositary institution.

(4) A depositary institution or depositary holding company which does not do business within any State of the United States, the District of Columbia, any territory of the United States, Puerto Rico, Guam, American Samoa, or the Virgin Islands except as an incident to its activities outside the United States.

SEC. 206. A person whose service in any given position as a management official was not prohibited by this title at the time of the beginning of such service is not prohibited by this title from continuing to serve in that position for a period of ten years after the date of enactment of this title. The Board of Governors of the Federal Reserve System may provide a reasonable period of time for compliance with this title, not exceeding fifteen months, after any change in circumstances, other than the coming into effect of this title which makes such service prohibited by this title.

SEC. 207. This title shall be administered and enforced by—

(1) the Comptroller of the Currency with respect to national banks and banks located in the District of Columbia,

(2) the Board of Governors of the Federal Reserve System with respect to State banks which are members of the Federal Reserve System, and bank holding companies,

(3) the Board of Directors of the Federal Deposit Insurance Corporation with respect to State banks which are not members of the Federal Reserve System but the deposits of which are insured by the Federal Deposit Insurance Corporation,

(4) the Federal Home Loan Bank Board with respect to Federal savings and loan associations and institutions the accounts of which are insured by the Federal Savings and Loan Insurance Corporation, and savings and loan holding companies,

(5) the National Credit Union Administration with respect to Federal credit unions and institutions the accounts of which reinsured by the National Credit Union Administration, and

(6) the Attorney General for all other institutions.

SEC. 208. The following provisions of the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (Clayton Act, 38 Stat. 732, as amended), are repealed:

(a) The first three paragraphs of section 8 (15 U.S.C. 19).

(b) The words "bank or other" in the last paragraph of section 8 each time they appear.

SEC. 209. (a) Section 8(c) of the Federal Deposit Insurance Act (12 U.S.C. 1818(c)) is amended by adding at the end thereof the following new paragraph:

"(5) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of a bank under the control of trustees, or any person who has a representative or nominee serving in any such capacity.".

(b) Section 5(d) of the Homeowners' Loan Act (12 U.S.C. 1464(d)) is amended by adding at the end thereof the following new paragraph:

"(15) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of an association under the control of trustees, or any person who has a representative or nominee serving in any such capacity.".

(c) Section 407(q) of the National Housing Act is amended by adding at the end thereof the following:

"(4) For the purpose of enforcing any law, rule, regulation, or cease-and-desist order in connection with an interlocking relationship, the term 'officer' as used in this subsection means an employee or officer with management functions, and the term 'director' includes an advisory or honorary director, a trustee of an association under the control of trustees, or any person who has a representative or nomineee serving in any such capacity.".

SEC. 210. The Board of Governors of the Federal Reserve System may prescribe such rules and regulations, including authorization for a management official of a depositary institution to serve as a management official of any other depository institution, as are consistent with the purposes of this title and necessary to effectuate such purposes or to prevent evasion of this title.

TITLE III—FOREIGN BRANCHING

SEC. 301. (a) Section 3(o) of the Federal Deposit Insurance Act (12 U.S.C. 1813(o)) is amended—

(1) by inserting "domestic" immediately before "branch" the first place it appears; and

(2) by inserting before the period at the end thereof a semicolon and the following: "and the term 'foreign branch' means any office, place of business, or similar establishment located outside the United States, its territories, Puerto Rico, Guam, American Samoa, and the Virgin Islands".

(b) Section 18(d) of the Federal Deposit Insurance Act (12 U.S.C. 1828(d)) is amended—

(1) by inserting "(1)" after "(d)";

(2) by inserting "domestic" between "new" and "branch";

(3) by inserting "such" between "any" and "branch"; and

(4) by adding at the end thereof the following new paragraph:

"(2) No State nonmember insured bank shall establish or operate any foreign branch, except with the prior written consent of the Corporation and upon such conditions and pursuant to such regulations as the Corporation may prescribe from time to time.".

(c) Section 18 of the Federal Deposit Insurance Act (12 U.S.C. 1828) is amended by adding at the end thereof the following new subsection:

"(1) When authorized by State law, a State nonmember insured bank may, but only with the prior written consent of the Corporation and upon such conditions and under such regulations as the Corporation may prescribe from time to time, acquire and hold, directly or indirectly, stock or other evidences of ownership in one or more banks or other entities organized under the law of a foreign country or a dependency or insular possession of the United States and not engaged, directly or indirectly, in any activity in the United States except as, in the judgment of the Board of Directors, shall be incidental to the international or foreign business of such foreign bank or entity; and, notwithstanding the provisions of subsection (j) of this section, such State nonmember insured bank may, as to such foreign bank or entity, engage in transactions that would otherwise be covered thereby, but only in the manner and within the limits prescribed by the Corporation by general or specific regulation or ruling.".

SEC. 302. The sixth sentence of section 7 (a)(3) of the Federal Deposit Insurance Act (12 U.S.C. 1817(a)(3)) is amended to read as follows: "The correctness of said report of conditions shall be attested by the signatures of at least two directors or trustees of the reporting bank other than the officer making such declaration, with a declaration that the report has been examined by them and to the best of their knowledge and belief is true and correct.".

SEC. 303. Section 8(n) of the Federal Deposit Insurance Act (12 U.S.C. 1818(n)) is amended—

(1) by inserting in the first sentence after "this section," the first place it appears therein the following: "or in connection with any claim for insured deposits or any examination or investigation under section 10(c),";

(2) by inserting "examination, or investigation or considering the claim for insured deposits," in the first sentence after "proceeding," the second place it appears therein;

(3) by striking out "proceedings" at the end of the first sentence thereof and inserting in lieu thereof "proceedings, claims, examinations, or investigations";

(4) by inserting "such agency or any" after "Any" at the beginning of the third sentence thereof; and

(5) by striking out "section" and inserting in lieu thereof "subsection" in the fourth sentence thereof.

SEC. 304. Section (8)(q) of the Federal Deposit Insurance Act (12 U.S.C. 1818(q)) is amended to read as follows:

"(q) Whenever the liabilities of an insured bank for deposits shall have been assumed by another insured bank or banks, whether by way of merger, consolidation, or other statutory assumption, or pursuant to contract (1) the insured status of the bank whose liabilities are so assumed shall terminate on the date of receipt by the Corporation of satisfactory evidence of such assumption; (2) the separate insurance of all deposits so assumed shall terminate at the end of six months from the date such assumption takes effect or, in the case of any time deposit, the earliest maturity date after the six-month period; and (3) the assuming or resulting bank shall give notice of such assumption to each of the depositors of the bank whose liabilities are so assumed within thirty days after such assumption takes effect. Where the deposits of an insured bank are assumed by a newly insured bank, the bank whose deposits are assumed shall not be required to pay any assessment upon the deposits which have been so assumed after the semiannual period in which the assumption takes effect.".

SEC. 305. (a) Section 10(b) of the Federal Deposit Insurance Act (12 U.S.C. 1820(b)) is amended by inserting "or other institution" in the first sentence after the words "any State nonmember bank" and by striking out the last two sentences of that subsection.

(b) Section 10(c) and (d) of the Federal Deposit Insurance Act (12 U.S.C. 1820 (c) and (d)) are amended to read as follows:

"(c) In connection with examinations of insured banks, State nonmember banks or other institutions making application to become insured banks, and affiliates thereof, or with other types of investigations to determine compliance with applicable law and regulations, the appropriate Federal bank-

ing agency or its designated representatives, are authorized to administer oaths and affirmations, and to examine and to take and preserve testimony under oath as to any matter in respect to the affairs or ownership of any such bank or institution or affiliate thereof, and to exercise such other powers as are set forth in section 8(n) of this Act.

"(d) For purposes of this section, the term 'affiliate' shall have the same meaning as in section 23A of the Federal Reserve Act, except that the term 'member bank' in such section 23A and in section 2(b) of the Banking Act of 1933 shall be deemed to refer to an insured bank.".

SEC. 306. Section 18(c)(1)(B) of the Federal Deposit Insurance Act (12 U.S.C. 1828 (c)(1)(B)) is amended by inserting after the word "deposits" the following: "(including liabilities which would be 'deposits' except for the proviso in section 3(l)(5) of this Act)".

SEC. 307. Section 1114 of title 18, United States Code, is amended by inserting before "shall be punished" the following: "or any attorney, liquidator, examiner, claim agent, or other employee of the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the Comptroller of the Currency, the Federal Home Loan Bank Board, the Board of Governors of the Federal Reserve System, any Federal Reserve bank, or the National Credit Union Administrator engaged in or on account of the performance of his official duties.".

SEC. 308. Section 5 of the Bank Service Corporation Act (12 U.S.C. 1865) is amended to read as follows:

"SEC. 5. Whenever any bank which is regularly examined by a Federal supervisory agency, or any subsidiary or affiliate of such bank which is subject to examination by that agency, causes to be performed, by contract or otherwise, any bank services for itself, whether on or off its premises—

"(1) such performance shall be subject to regulation and examination by such agency to the same extent as if the services were being performed by the bank itself on its own premises, and

"(2) the bank shall notify such agency of the existence of a service relationship within 30 days after the making of such service contract or the performance of the service, whichever occurs first.".

TITLE IV—CONFLICTS OF INTEREST

SEC. 401. This title may be cited as the "Depository Institutions Conflict of Interest Act".

SEC. 402. Section 2 of the Federal Deposit Insurance Act (12 U.S.C. 1812) is amended by striking out the sixth sentence and inserting in lieu thereof the following: "The members of the Board of Directors shall be ineligible, during the time they are in office and for a period of two years thereafter, to hold any office, position, or employment in an insured bank, in a holding company of an insured bank, or in an affiliate of a holding company of an insured bank, and may not, during such two-year period, voluntarily acquire any interest in such a bank, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such a bank, company, or affiliate, except that this restriction shall not apply to any individual who has served the full term for which he was appointed.".

SEC. 403. The first sentence of the second paragraph of section 10 of the Federal Reserve Act (12 U.S.C. 242) is amended by adding at the end thereof the following: "The members of the Board of Governors shall be ineligible, during the time they are in office and for a period of two years thereafter, to hold any office, position, or employment in a member bank, in a bank holding company or in an affiliate of a bank holding company, and may not, during such two-year period, voluntarily acquire any interest in such a bank, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such a bank, company, or affiliate, except that this restriction shall not apply to any individual who has served the full term for which he was appointed.".

SEC. 404. Section 17 of the Federal Home Loan Bank Act (12 U.S.C. 1437) is amended by adding at the end thereof the following:

"(c) The members of the board shall be ineligible during the time they are in office and for a period of two years thereafter to hold any office, position, or employment in an insured institution, in a holding company of an insured institution, or in an affiliate of a holding company of an insured institution, and may not, during such two-year period, voluntarily acquire any interest in such an institution, company, or affiliate, or exercise any voting rights attributable to the ownership of any security issued by such an institution, company, or affiliate, except that this restriction shall not apply to any individual who has served the full term for which he was appointed. As used in this subsection the the term 'insured institution' has the same meaning as in section 401 of the National Housing Act.".

SEC. 405. (a) Section 5312 of title 5, United States Code, is amended by adding at the end thereof the following:

"(14) Chairman, Board of Governors of the Federal Reserve System.".

(b) Section 5313(10) of such title is amended by striking out "Chairman' and inserting in lieu thereof "Members".

(c) Section 5313 of such title is amended by adding at the end thereof the following:

"(24) Chairman, Board of Directors, Federal Deposit Insurance Corporation.

"(25) Chairman of the Federal Home Loan Bank Board.

"(26) Comptroller of the Currency.".

(d) Section 5314 of title 5, United States Code, is amended by striking out items 19, 20, 30, and 43.

TITLE V—CREDIT UNION RESTRUCTURING

SEC. 501. Section 102 of the Federal Credit Union Act (12 U.S.C. 1752a) is amended to read as follows:

"CREATION OF ADMINISTRATION

"SEC. 102. (a) There is hereby established in the executive branch of the Government an independent agency to be known as the National Credit Union Administration. The Administration shall be under the management of a National Credit Union Administration Board.

"(b) The Board shall consist of three members, who are broadly representative of the public interest, appointed by the President, by and with the advice and consent of the Senate. In appointing the members of the Board, the President shall designate the Chairman. Not more than two members of the Board shall be members of the same political party.

"(c) The term of office of each member of the Board shall be six years, except that the terms of the two members, other than the chairman, initially appointed shall expire one upon the expiration of two years after the date of appointment, and the other upon the expiration of four years after the date of appointment. Board members shall not be appointed to succeed themselves except the initial members appointed for less than a six-year term may be reappointed for a full six-year term and future members appointed to fill unexpired terms may be reappointed for a full six-year term. Any Board member may continue to serve as such after the expiration of said member's term until a successor has qualified.

"(d) The management of the Administration shall be vested in the Board. The Board shall adopt such rules as it sees fit for the transaction of its business and shall keep permanent and complete records and minutes of its acts and proceedings. A majority of the Board shall constitute a quorum. Not later than April 1 of each calendar year, and at such other times as the Congress shall determine, the Board shall make a report to the President and to the Congress. Such a report shall summarize the operations of the Administration and set forth such information as is necessary for the Congress to review the financial program approved by the Board.

"(e) The Chairman of the Board shall be the spokesman for Board and shall represent the Board and the National Credit Union Administration in its official relations with other branches of the Government. The Chairman shall determine each Board member's area of responsibility and shall review such assignments biennially. It shall be the Chairman's responsibility to direct the implementation of the adopted policies and regulations of the Board.

"(f) The members of the Board shall be ineligible during the time they are in office or for two years thereafter to hold any office, position, or employment in any credit union or in any financial institution in which a credit union owns stock, except that this restriction shall not apply to any member who has served the full term for which he was appointed.

"(g) The financial transactions of the Administration shall be subject to audit on a calendar year basis by the General Accounting Office in accordance with the principles and procedures applicable to commercial corporate transactions and under such rules and regulations as may be prescribed by the Comptroller General of the United States. The audit shall be conducted at the place or places where the accounts of the Administration are kept.".

SEC. 502. (a) Section 101 of the Federal Credit Union Act is amended—

(1) by striking out clause (2) and inserting in lieu thereof the following:

"(2) the term 'Chairman' means the Chairman of the National Credit Union Administration Board;";

(2) by inserting "Administration" after "Union" in clause (4).

(b) The Federal Credit Union Act is amended by striking out "Administrator" each place it appears and inserting in lieu thereof "Board", and by striking out the personal pronouns "he," "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "them", and "its" as appropriate wherever such words appear therein.

(c) Section 209 of the Federal Credit Union Act (12 U.S.C. 1789) is amended—

(1) by inserting in subsection (b)(1) the language "on a calendar year basis" immediately following "prepare annually";

(2) by inserting in subsection (b)(2) the language "on a calendar year basis" immediately following "set of accounts".

(d) Section 5108 of title 5, United States Code, is amended by adding the following new paragraph:

"(h) In addition to the number of positions authorized by subsection (a), the National Credit Union Administration is authorized without regard to any other provision to this section, to place two positions in the Administration at GS–18 and a total of fourteen positions in the Administration at GS–16 or GS–17.".

(e) Section 5313 of title 5, United States Code, is amended by adding the following new paragraph:

"(28) Chairman, National Credit Union Administration Board.".

(f) Section 5314(92) of title 5, United States Code, is amended by striking out "Administrator of the National Credit Union Administration" and inserting in lieu there-

of "Members, National Credit Union Administration Board (2)".

SEC. 503. (a) The Federal Credit Union Act (12 U.S.C. 1751–1790) is further amended by striking out "Administrator" and inserting in lieu thereof "Board" in the following sections:

(1) section 103 (12 U.S.C. 1753);
(2) section 104 (12 U.S.C. 1754);
(3) section 105 (12 U.S.C. 1755);
(4) section 106 (12 U.S.C. 1756);
(5) paragraphs (5), (8), (9), (10), (13), and (14) of section 107 (12 U.S.C. 1757);
(6) section 108 (12 U.S.C. 1758);
(7) section 109 (12 U.S.C. 1759);
(8) section 111 (12 U.S.C. 1761);
(9) section 112 (12 U.S.C. 1761a);
(10) section 113 (12 U.S.C. 1761b);
(11) section 115 (12 U.S.C. 1761d);
(12) paragraph (b)(2) of section 116 (12 U.S.C. 1762);
(13) the title of section 120 (12 U.S.C. 1766);
(14) section 120(a) (12 U.S.C. 1766);
(15) section 120(b)(1) (12 U.S.C. 1766);
(16) section 120(b)(2) (12 U.S.C. 1766);
(17) section 120(b)(3) (12 U.S.C. 1766);
(18) section 120(b)(4) (12 U.S.C. 1766);
(19) section 120(b)(5) (12 U.S.C. 1766);
(20) section 120(c) (12 U.S.C. 1766);
(21) section 120(e) (12 U.S.C. 1766);
(22) section 120(e) (12 U.S.C. 1766);
(23) section 120(f)(1) (12 U.S.C. 1766);
(24) section 120(f)(2)(A) (12 U.S.C. 1766);
(25) section 120(f)(2)(B) (12 U.S.C. 1766);
(26) section 120(g) (12 U.S.C. 1766);
(27) section 120(h) (12 U.S.C. 1766);
(28) section 120(i) (12 U.S.C. 1766);
(29) section 120(i)(3) (12 U.S.C. 1766);
(30) section 121 (12 U.S.C. 1767);
(31) section 125(b)(1) (12 U.S.C. 1771);
(32) section 125(b)(2) (12 U.S.C. 1771);
(33) section 127 (12 U.S.C. 1772a); and
(34) sections 201 to 210 (12 U.S.C. 1773–1775).

Such Act is further amended by striking out the personal pronouns "he", "him", and "his" when referring to the Administrator and inserting in lieu thereof "it", "they", and "its" as appropriate wherever such words appear therein.

SEC. 504. (a) Paragraph (4) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752) which begins with "The terms 'member account'" is redesignated paragraph "(5)" and the succeeding paragraphs numbered (5) through (8) are redesignated as paragraphs (6) through (9), respectively.

(b) Paragraph (5) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by subsection (a) of this section, is amended—

(1) by striking "(when referring to the account of a member of credit union)";

(2) by striking "share, share certificate, or share deposit" each time it appears therein and inserting "share or share certificate" in lieu thereof;

(3) by striking "those" and inserting "share or share certificate" in lieu thereof; and

(4) by striking all language after "political subdivisions thereof" and inserting "enumerated in section 207 of this Act: *Provided*, That for purposes of insured State credit union, referrence in this paragraph to 'share' or 'share certificate' accounts includes, as determined by the Board, the equivalent of such accounts under State law;" in lieu thereof.

(c) Paragraph (9) of section 101 of the Federal Credit Union Act (12 U.S.C. 1752), as redesignated by (a) of this section, is amended by—

(1) inserting ", including the trust territories," after "several territories"; and

(2) adding the following new sentence: "The term 'branch' also includes a suboffice, operated by a Federal credit union or by a credit union authorized by the Department of Defense, located on an American military installation in a foreign country or in the trust territories of the United States.".

SEC. 505. (a) Subsection (a) of section 201 of the Federal Credit Union Act (12 U.S.C. 1751) is amended by inserting ", including the trust territories," after "several territories".

(b) Paragraph (b)(7) of such section is amended by inserting "except for accounts authorized by State law for State credit unions" before the semicolon.

(c) Such section is further amended by striking all of subsection (d) and redesignating subsection (e) as (d).

SEC. 506. (a) Section 202 of the Federal Credit Union Act (12 U.S.C. 1782) is amended by striking out "his" in the fifth sentence of paragraph (a)(1) and inserting "such officer's" in lieu thereof.

(b) Subsection (h)(3) of such section is amended to read as follows

"(3) The term 'member account' when applied to the premium charge for insurance of accounts shall not include amounts received from other federally insured credit unions in excess of the insured account limit set forth in section 207(c)(1).".

SEC. 507. Section 208 of the Federal Credit Union Act (12 U.S.C. 1788) is amended by striking out "SPECIAL ASSISTANCE TO AVOID LIQUIDATION" and inserting "SPECIAL ASSISTANCE FOR FEDERALLY INSURED CREDIT UNIONS" in lieu thereof.

SEC. 508. Section 105 of the Federal Credit Union Act (12 U.S.C. 1755) is amended to read as follows:

"FEES

"SEC. 105. (a) In accordance with rules prescribed by the Board, each Federal credit union shall pay to the Administration an annual operating fee which may be composed of one or more charges identified as to the function or functions for which assessed.

"(b) The fee assessed under this section shall be determined according to a schedule, or schedules, or other method determined by the Board to be appropriate, which gives due consideration to the expenses of the Administration in carrying out its responsibilities under this Act and to the ability of Federal credit unions to pay the fee. The Board shall, among other things, determine the periods for which the fee shall be assessed and the date or dates for the payment of the fee or increments thereof.

"(c) If the annual operating fee is composed of separate charges, no supervision charge shall be payable by a Federal credit union, and the Board may waive payment of any or all other charges comprising the fee, with respect to the year in which its charter is issued, or in which final distribution is made in its liquidation or the charter is canceled.

"(d) All operating fees shall be deposited with the Treasurer of the United States for the account of the Administration and may be expended by the Board to defray the expenses incurred in carrying out the provisions of this Act including the examination and supervision of Federal credit unions.".

SEC. 509. Section 106 of the Federal Credit Union Act (12 U.S.C. 1756) is amended to read as follows:

"REPORTS AND EXAMINATIONS

"SEC 106. Federal credit unions shall be under the supervision of the Board, and shall make financial reports to it as and when it may require, but at least annually. Each Federal credit union shall be subject to examination by, and for this purpose shall make its books and records accessible to, any person designated by the Board.".

SEC. 510. The amendments made by this title take effect upon enactment, except that the functions of the Administrator of the National Credit Union Administration under the provisions of the Federal Credit Union Act, as in effect on the date preceding the date of enactment of this title, shall continue to be performed by him in accordance with such provisions until such time as all the members of the National Credit Union Administration Board, established under the amendments made by this title, take office. All rules, regulations, policies, and procedures of the Administrator in effect on the date of enactment of this title shall remain in effect until amended, superseded, or repealed.

TITLE VI—FINANCIAL INSTITUTIONS

SEC. 601. Section 7 of the Act of September 21, 1966 (Public Law 89–597), is amended by striking out "December 15, 1978" and inserting in lieu thereof "December 15, 1980".

SEC. 602. Section 602 of Public Law 94–200 (12 U.S.C. 461 note) is amended by adding at the end thereof the following new subsection:

"(c) In any State where any provision of State or Federal law authorizes any savings and loan, building and loan, or homestead association (including any cooperative bank) the deposits or accounts of which are insured by the Federal Savings and Loan Insurance Corporation or any mutual savings bank, as defined in section 3(f) of the Federal Deposit Insurance Act (12 U.S.C. 1813(f)), to offer any third-party payment account, there shall be no differential in the maximum interest rate payable between (1) banks (other than savings banks) the deposits of which are insured by the Federal Deposit Insurance Corporation, and (2) savings and loan, building and loan, or homestead associations (including cooperative banks) the deposits or accounts of which are insured by the Federal Savings and Loan Insurance Corporation or mutual savings banks, as defined in section 3(f) of the Federal Deposit Insurance Act (12 U.S.C. 1813(f)), with respect to savings deposits or accounts from which automatic transfers to the institution itself or to a demand or other deposit account of the same depositor or accountholder at such institution may be made as a normal practice, pursuant to a prearranged agreement with the depositor or accountholder to make such transfers to cover checks, drafts, or similar instruments drawn by the depositor or accountholder on such institution. Notwithstanding any of the provisions of subsection (b) of this section, the maximum rate of interest payable on a savings deposit or account described in the preceding sentence shall be the rate which banks (other than mutual savings banks) the deposits of which are insured by the Federal Deposit Insurance Corporation may pay on such accounts.".

SEC. 603. Section 2(a) of Public Law 93–100 is amended by inserting "New York," after "Vermont,".

TITLE VII—CHARTERS FOR THRIFT INSTITUTIONS

SEC. 701. Section 2(d) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1462(d)) is amended to read as follows:

"(d) The term 'association' means a Federal savings and loan association or a Federal mutual savings bank chartered by the Board under section 5, and any references in any other law to a Federal savings and loan association shall be deemed to be also a reference to a Federal mutual savings bank, unless the context indicates otherwise.".

SEC. 702. Section 5(a) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(a)) is amended to read as follows:

"SEC. 5. (a) In order to provide local mutual thrift institutions in which people may invest their funds and in order to provide for the financing of homes, the Board is authorized, under such rules and regulations as it may prescribe, to provide for the organization, incorporation, examination,

operation, and regulation of associations to be known as 'Federal Savings and Loan Associations', or 'Federal mutual savings banks' (but only in the case of institutions which, prior to conversion, were State mutual savings banks located in States which authorize the chartering of State mutual savings banks provided such conversion is not in contravention of State law), and to issue charters therefor, giving primary consideration to the best practices of local mutual thrift and home-financing institutions in the United States. An association which was formerly organized as a savings bank under State law may, to the extent authorized by the Board, continue to carry on any activities it was engaged in on December 31, 1977, and to retain or make any investments of a type it held on that date, except that its equity, corporate bond, and consumer loan investments may not exceed the average ratio of such investments to total assets for the five-year period immediately preceding the filing of an application for conversion and such an association shall only be permitted to establish branch offices and other facilities in accordance with the limitations imposed by State law controlling applications of a savings bank organized under such State law, except that such an association (1) shall be exempt from any numerical limitations of State law on the establishment of branch offices and other facilities, and (2) may, in any case, subject to the approval of the Board, establish branch offices and other facilities in its own Standard Metropolitan Statistical Area, its own county, or within thirty-five miles of its home office, but only in its State of domicile. An association which was formerly organized as a savings bank under State law shall be subject to the requirements of State law (including any regulations promulgated thereunder and any sanction for the violation of any such law or regulation) in effect at the time of conversion, in the State of its original charter—

"(A) pertaining to discrimination in the extension of home mortgage loans or adjustment in the terms of mortgage instruments based on neighborhood or geographical area, or

"(B) pertaining to requirements imposed under the Consumer Credit Protection Act,

if the Board determines that State law and regulations impose more stringent requirements than Federal law and regulations.".

SEC. 703. Section 403(a) of the National Housing Act (12 U.S.C. 1726(a)) is amended by inserting after "Federal savings and loan associations" the following: "and Federal mutual savings banks".

SEC. 704. The first paragraph of section 5(i) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(i)) is amended by inserting "(including a savings bank)" after "member of a Federal Home Loan Bank".

SEC. 705. The Federal Deposit Insurance Act is amended by adding at the end thereof the following new section:

"CONVERSION OF MUTUAL SAVINGS BANKS

"SEC. 26. With respect to any state-chartered insured mutual savings bank which converts into a Federal savings bank or merges or consolidates into a Federal savings bank or a savings bank which is (or within sixty days after the merger or consolidation becomes) an insured institution within the meaning of section 401 of the National Housing Act, the Corporation shall indemnify the Federal Savings and Loan Insurance Corporation against any losses incurred by it which arise out of losses incurred by the converting bank prior to conversion as follows: 100 per centum of such losses incurred by the Federal Savings and Loan Insurance Corporation during the first two years after conversion, 75 per centum during the third year, 50 per centum during the fourth year, and 25 per centum during the fifth year. The Corporation and the Federal Savings and Loan Insurance Corporation shall within six months after enactment hereof, mutually agree on what shall be treated as 'losses incurred by it which arise out of losses incurred by the converting bank prior to conversion' for purposes hereof and, failing such agreement, the General Accounting Office shall prescribe the meaning of those terms. Any conversion, merger, or consolidation covered by this section shall not be deemed a termination of insured status under section 8(a) of this Act.".

EFFECTIVE DATE

SEC. 706. This title takes effect upon the expiration of six months after the date of enactment of this Act.

TITLE VIII—INSURANCE OF IRA AND KEOUGH ACCOUNTS

SEC. 801. (a) Section 11(a) of the Federal Deposit Insurance Act, as amended (12 U.S.C. 1821(a)), is amended by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any limitation in this Act or in any other provision of law relating to the amount of deposit insurance available for the account of any one depositor, time and savings deposits in an insured bank made pursuant to a pension or profit-sharing plan described in section 401(d) of the Internal Revenue Code of 1954, as amended, or made in the form of individual retirement accounts as described in section 408(a) of the Internal Revenue Code of 1954, as amended, shall be insured in the amount of $100,000 per account. As to any plan qualifying under section 401(d) or section 408 (a) of the Internal Revenue Code of 1954, the term 'per account' means the present vested and ascertainable interest of each beneficiary under the plan, excluding any remainder interest created by, or as a result of, the plan.".

(b) Section 405(d) of the National Housing Act, as amended (12 U.S.C. 1728(d)), is amended by adding at the end thereof the following new paragraph:

"(3) Notwithstanding any limitation in this title or in any other provision of law relating to the amount of deposit insurance available for any one account, funds invested in an insured institution pursuant to a pension or profit-sharing plan described in section 401(d) of the Internal Revenue Code of 1954, as amended, and funds invested in an insured institution in the form of individual retirement accounts as described in section 408(a) of the Internal Revenue Code of 1954, as amended, shall be insured in the amount of $100,000 per account. As to any plan qualifying under section 401(d) or section 408(a) of the Internal Revenue Code of 1954, the term 'per account' means the present vested and ascertainable interest of each beneficiary under the plan, excluding any remainder interest created by, or as a result of, the plan.".

(c) Section 207(c) of the Federal Credit Union Act, as amended (12 U.S.C. 1787(c))), is amended by adding at the end thereof the following paragraph:

"(3) Notwithstanding any limitation in this title or in any other provision of law relating to the amount of insurance available for the account of any one depositor or member, funds invested in a credit union insured in accordance with this title pursuant to a pension or profit-sharing plan described in section 401(d) of the Internal Revenue Code of 1954, as amended, and funds invested in such an insured credit union in the form of individual retirement accounts as described in section 408(a) of the Internal Revenue Code of 1954, as amended, shall be insured in the amount of $100,000 per account. As to any plan qualifying under section 401(d) or section 408(a) of the Internal Revenue Code of 1954, the term 'per account' means the present vested and ascertainable interest of each beneficiary under the plan, excluding any remainder interest created by, or as a result of, the plan.".

TITLE IX—CENTRAL LIQUIDITY FACILITY

SEC. 901. This title may be cited as the "National Credit Union Central Liquidity Facility Act".

SEC. 902. The Federal Credit Union Act (12 U.S.C. 1751 et seq.) is amended by adding at the end thereof the following new title:

"TITLE III—CENTRAL LIQUIDITY FACILITY

"FINDINGS

"SEC. 301. The Congress finds that the establishment of a National Credit Union Central Liquidity Facility is needed to improve general financial stability by meeting the liquidity needs of credit unions and thereby encourage savings, support consumer and mortgage lending, and provide basic financial resources to all segments of the economy.

"DEFINITIONS

"SEC. 302. As used in this title, the term—

"(1) 'liquidity needs' means the needs of credit unions primarily serving natural persons for—

"(A) short-term adjustment credit available to assist in meeting temporary requirements for funds or to cushion more persistent outflows of funds pending an orderly adjustment of credit union assets and liabilities;

"(B) seasonal credit available for longer periods to assist in meeting seasonal needs for funds arising from combination of expected patterns of movement in share and deposit accounts and loans; and

"(C) protracted adjustment credit available in the event of unusual or emergency circumstances of a longer term nature resulting from national, regional, or local difficulties;

"(2) 'Central Liquidity Facility' or 'Facility means the National Credit Union Central Liquidity Facility;

"(3) 'paid-in and unimpaired capital and surplus' means the balance of the paid-in share accounts and deposits as of a given date, less any loss that may have been incurred for which there is no reserve or which has not been charged against undivided earnings, plus the credit balance (or less the debit balance) of the undivided earnings account as of a given date, after all losses have been provided for and net earnings or net losses have been added thereto or deducted therefrom, but for the purpose of this paragraph, reserves shall not be considered as part of surplus; and

"(4) 'member' means a Regular or an Agent member of the Facility.

"ESTABLISHMENT OF THE NATIONAL CREDIT UNION ADMINISTRATION CENTRAL LIQUIDITY FACILITY

"SEC. 303. There is hereby created the National Credit Union Administration Central Liquidity Facility. The Central Liquidity Facility shall exist within the National Credit Union Administration and be managed by the Administrator. The United States district courts shall have original jurisdiction over any case to which the Administrator on behalf of the Facility is a party, without regard to the amount in controversy.

"MEMBERSHIP

"SEC. 304. (a) A credit union primarily serving natural persons may be a Regular member of the Facility by subscribing to the capital stock of the Facility in an amount not less than one-half of 1 per centum of the credit union's paid-in and unimpaired capital and surplus.

"(b) A credit union or group of credit unions, primarily serving other credit unions, may be an Agent member of the Facility by—

"(1) obtaining the approval of the Administrator;

"(2) subscribing to the capital stock of the Facility in an amount not less than one-half of 1 per centum of the paid-in and unimpaired capital and surplus of all those credit unions which primarily serve natural persons and which are members of such credit union or of any credit union comprising such credit union group;

"(3) agreeing to comply with rules and regulations the Administrator shall prescribe with respect to, but not limited to, management quality, asset and liability safety and soundness, internal operating and control practices and procedures, and participation by natural persons in the affairs of such credit union or credit union group; and

"(4) agreeing to submit to the supervision of the Administrator which shall include, but not be limited to, reporting requirements and periodic unrestricted examinations.

"(c) Stock subscriptions provided for in subsections (a) and (b)(2) of this section shall be—

"(1) based on an arithmetic average of paid-in capital and surplus over the six months preceding application for membership; and

"(2) adjusted at the close of each calendar year in accordance with an arithmetic average of paid-in capital and surplus over a period determined by the Administrator.

"(d) An Agent member of the Facility shall perform for its member credit unions those functions required by the Administrator to carry out this title.

"(e)(1) A member of the Facility whose capital stock subscription constitutes less than 5 per centum of such stock outstanding, may withdraw from membership in the Facility six months after notifying the Administrator of its intenton to do so.

"(2) A member of the Facility whose capital stock subscription constitutes 5 per centum or more of such stock outstanding, may withdraw from membership in the Facility twenty-four months after notifying the Administrator of its intention to do so.

"(3) The Administrator may terminate membership in the Facility if, after opportunity for a hearing the Administrator determines a member has failed to comply with any provision of this title or regulation issued pursuant thereto.

"CAPITAL STOCK

"SEC. 305. (a) As soon as practicable, the Administrator shall open books for subscriptions to the capital stock of the Facility. The minimum subscription shall be $50.

"(b) The capital stock of the Facility—

'(1) shall be divided into shares having a par value of $50 each;

"(2) shall be paid for with cash or with securities of the United States or any agency thereof in accordance with requirements the Administrator may impose;

"(3) shall share in dividend distributions without preference and at rates to be determined by the Administrator; and

"(4) shall not be transferred or hypothecated except as provided for herein.

"(c) When circumstances require that all or a portion of a member's stock be redeemed by the Facility, the Administrator shall pay an amount equal to what the member originally paid for the stock less any amount owed by the member to the Facility.

"(d) At least one-half of the payment for the subscription amount required for membership under section 304 of this title shall be transferred to the Facility. The remainder may be held by the member on call of the Administrator and shall be invested in assets designated by the Administrator.

"(e) A credit union or credit union group that becomes a member of the Facility later than six months after the date the Administrator opens books for capital stock subscriptions, may not borrow or receive advances from the Facility without approval by the Administrator for a period of six months after becoming a member.

"EXTENSIONS OF CREDIT

"SEC. 306. (a)(1) A member may apply for an extension of credit from the Facility to meet its liquidity needs. The Administrator shall approve or deny any such application within five working days after receiving it.

"(2) The Administrator may advance funds to a member on terms and conditions prescribed by the Administrator.

"(b) The Secretary of the Treasury is authorized to lend to the Facility up to $500,000,000, in the event the Administrator certifies to the Secretary that the Facility does not have sufficient funds to meet liquidity needs of credit unions. Any such loan shall bear an interest rate not greater than one-eighth of 1 per centum above the current average market yield on outstanding obligations of the United States with remaining time to maturity comparable to the maturity of such loan. The authority of the Secretary to lend under this subsection shall be limited to such extent or in such amounts as are provided in advance in appropriation Acts.

"POWERS OF THE ADMINISTRATOR

"SEC. 307. The Administrator on behalf of the Facility shall have the authority to—

"(1) prescribe the manner in which the general business of the Facilty shall be conducted;

"(2) prescribe rules and regulations to carry out this title;

"(3) determine the expenditures incurred by the Administration to carry out this title, and the expenditures incurred by the Facility to carry out titles I and II of this Act, and annually assess the Facility and the Administration accordingly;

"(4) borrow from—

"(A) any source with or without the guarantee of the United States as to principal and interest. The total face value of those obligations guaranteed by the United States shall not exceed twenty times the subscribed capital stock and surplus of the Facility; and

"(B) the National Credit Union Share Insurance Fund up to $500,000 to defray initial organizational and operating expenses of the Facility at such rates and terms consistent with prevailing market conditions;

"(5) guarantee performance of the terms of any financial obligation of a member but only when such obligation bears a clear and conspicuous notice on its face that only the resources of the Facility underlie such guarantee;

"(6) purchase any asset from a member with the member's endorsement;

"(7) invest in obligations of the United States or any agency thereof;

"(8) make deposits in federally insured financial institutions and make investments in shares or deposits of credit unions;

"(9) sue and be sued, complain, and defend, in any State or Federal court;

"(10) adopt a seal;

"(11) pursue to final disposition by way of compromise or otherwise claims both for and against the United States (other than tort claims, claims involving administrative expenses, and claims in excess of $5,000 arising out of contracts for construction, repairs, and the purchase of supplies and materials) which are not in litigation and have not been referred to the Attorney General;

"(12) appoint officers and employees to assist in carrying out this title, who shall be appointed subject to the provisions of title 5, United States Code;

"(13) conduct business, carry on operations, have offices, and exercise the powers granted by this title in any State or territory;

"(14) lease, purchase, or otherwise acquire and own, hold, improve, use, or otherwise deal in and with property, real, personal, or mixed, or any interest therein, wherever situated; and

"(15) enter into contracts with any public or private organization, partnership, corporation, or individual, to the extent or in such amounts as are provided in advance in appropriation Acts.

"AUDIT OF FINANCIAL TRANSACTIONS

"SEC. 308. The Comptroller General of the United States shall audit the Central Liquidity Facility under such rules and regulations as the Comptroller General may prescribe.

"ANNUAL REPORT

"SEC. 309. The annual report required by section 102(e) shall include a full report of the activities of the Facility.".

SEC. 903. (a) Paragraph (6) of section 107 of the Federal Credit Union Act (12 U.S.C. 1757) is amended by inserting "from the Central Liquidity Facility," after "prescribed,".

(b) Paragraph (7) of such section is amended by striking the word "and" preceding "(H)", and adding at the end thereof the following: "and (J) in the capital stock of the National Credit Union Central Liquidity Facility;".

(c) Paragraph (9) of such section is amended by inserting ", except as authorized by the Administrator in carrying out the provisions of title III," after "exceeding".

SEC. 904. Section 709 of title 18, United States Code, is amended by striking the fourth paragraph and inserting in lieu thereof the following new paragraph:

"Whoever, other than a bona fide organization or association of Federal or State credit unions or except as permitted by the laws of the United States, uses as a firm or business name or transacts business using the words 'National Credit Union', 'National Credit Union Administration', 'National Credit Union Board', 'National Credit Union Share Insurance Fund', 'Share Insurance', or 'Central Liquidity Facility', or the letters 'NCUA', 'NCUSIF', or 'CLF', or any other combination or variation of those words or letters alone or with other words or letters, or any device or symbol or other means, reasonably calculated to convey the false impression that such name or business has some connection with, or authorization from, the National Credit Union Administration, the Government of the United States, or any agency thereof, which does not in fact exist, or falsely advertises or otherwise represents by any device whatsoever that his or its business, product or service has been in anyway endorsed, authorized, or approved by the National Credit Union Administration, the Government of the United States, or any agency thereof, or falsely advertises or otherwise represents by any device whatsoever that his or its deposit liabilities, obligations, certificates, shares, or accounts are insured under the Federal Credit Union Act or by the United States or any instrumentality thereof, or being an insured credit union as defined in that Act falsely advertises or otherwise represents by any device whatsoever the extent to which or the manner in which share holdings in such credit union are insured under such Act; or".

SEC. 905. Section 201 of the Government Corporation Control Act is amended—

(1) by striking out "and" before "(8)"; and

(2) by inserting before the period at the end thereof a comma and the following: "and (9) the National Credit Union Administration Central Liquidity Facility".

SEC. 906. This title shall take effect on October 1, 1979.

TITLE X—FEDERAL BANK EXAMINATION COUNCIL

SHORT TITLE

SEC. 1001. This title may be cited as the "Federal Bank Examination Council Act of 1978".

SEC. 1002. It is the purpose of this title to establish a Bank Examination Council which shall prescribe uniform principles and standards for the Federal examination of banks by the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Board of Governors of the Federal Reserve System and make recommendations to promote uniformity in the supervision of these banks. The Council's actions shall be designed to promote consistency in such examinations and to insure progressive and vigilant supervision.

DEFINITIONS

SEC. 1003. As used in this title—

(1) the term "Federal bank regulatory agencies" means the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, and the Federal Deposit Insurance Corporation; and

(2) the term "Council" means the Bank Examination Council.

ESTABLISHMENT OF THE COUNCIL

SEC. 1004. (a) There is established the Bank Examination Council which shall consist of—

(1) the Comptroller of the Currency,

(2) the Chairman of the Board of Directors of the Federal Deposit Insurance Corporation, and

(3) the Chairman of the Board of Governors of the Federal Reserve System.

The Chairman of the Federal Home Loan Bank Board and the Chairman of the National Credit Union Administration Board shall serve as advisory members.

(b) The members of the Council shall select the first chairman of the Council. Thereafter the chairmanship shall rotate among the members of the Council.

(c) The term of the Chairman of the Council shall be two years.

(d) The members and advisory members of the Council may, from time to time, designate other officers or employees of their respective agencies to carry out their duties on the Council.

(e) Each member and advisory member of the Council shall serve without additional compensation but shall be entitled to reasonable expenses incurred in carrying out his official duties as such a member or advisory member.

EXPENSES OF THE COUNCIL

SEC. 1005. One-third of the costs and expenses of the Council, including the salaries of its employees, shall be paid by each of the Federal bank regulatory agencies. Annual assessments for such shares shall be levied by the Council based upon its projected budget for the year, and additional assessments may be made during the year if necessary.

FUNCTIONS OF THE COUNCIL

SEC. 1006. (a) The Council shall establish uniform principles and standards and report forms for the examination of banks which shall be applied by the Federal bank regulatory agencies.

(b)(1) The Council shall make recommendations for uniformity in other supervisory matters, such as, but not limited to, classifying loans subject to country risk, identifying banks in need of special supervisory attention, and evaluating the soundness of large loans that are shared by two or more banks. In addition, the Council shall make recommendations regarding the adequacy of supervisory tools for determining the impact of holding company operations on the banks within the holding company and shall consider the ability of supervisory agencies to discover possible fraud or questionable and illegal payments and practices which might occur in the operation of banks or their holding companies.

(2) When a recommendation of the Council is found unacceptable by one or more of the applicable Federal bank regulatory agencies, the agency or agencies shall submit to the Council, within a time period specified by the Council, a written statement of the reasons the recommendation is unacceptable.

(c) The Council shall develop uniform reporting systems for federally supervised banks, their holding companies, and nonbank subsidiaries of such institutions or holding companies. Such reporting systems shall be consistent with the requirements of section 12(i) of the Securities Exchange Act of 1934.

(d) The Council shall conduct schools for examiners and assistant examiners employed by the Federal banking regulatory agencies. Such schools shall be open to enrollment by employees of the Federal Home Loan Bank Board and the National Credit Union Administration Board and employees of State bank supervisory agencies under conditions specified by the Council.

(e) Nothing in this title shall be construed to limit or discourage Federal bank regulatory agency research and development of new bank supervisory methods and tools, nor to preclude the field testing of any innovation devised by any Federal bank regulatory agency.

(f) Not later than April 1 of each year, the Council shall prepare an annual report covering its activities during the preceding year.

STATE LIAISON

SEC. 1007. To encourage the application of uniform examination principles and standards by State and Federal supervisory agencies, the Council shall establish a liaison committee composed of five representatives of State agencies which supervise financial institutions which shall meet at least twice a year with the Council. Members of the liaison committee shall receive a reasonable allowance for necessary expenses incurred in attending meetings.

ADMINISTRATION

SEC. 1008. (a) The Chairman of the Council is authorized to carry out and to delegate the authority to carry out the internal administration of the Council, including the appointment and supervision of employees and the distribution of business among members, employees, and administrative units.

(b) In addition to any other authority conferred upon it by this title, in carrying out its functions under this title, the Council may utilize, with their consent and to the extent practical, the personnel, services, and facilities of the Federal bank regulatory and supervisory agencies and Federal Reserve banks, with or without reimbursement therefor.

(c) In addition, the Council may—

(1) subject to the provisions of title 5, United States Code, relating to the competitive service, classification, and General Schedule pay rates, appoint and fix the compensation of such officers and employees as are necessary to carry out the provisions of this title, and to prescribe the authority and duties of such officers and employees; and

(2) obtain the services of such experts and consultants as are necessary to carry out the provisions of this title.

ACCESS TO INFORMATION BY THE COUNCIL

SEC. 1009. For the purpose of carrying out this title, the Council shall have access to all books, accounts, records, reports, files, memorandums, papers, things, and property belonging to or in use by Federal bank regulatory agencies, including reports of examination of banks or their holding companies from whatever source, together with workpapers and correspondence files related to such reports, whether or not a part of the report, and all without any deletions.

TITLE XI—ELECTRONIC FUND TRANSFERS

SEC. 1101. The Consumer Credit Protection Act (15 U.S.C. 1601 et seq.) is amended by adding at the end thereof the following new title:

"TITLE IX—ELECTRONIC FUND TRANSFERS

"§ 901. Short title

"This title may be cited as the 'Fair Fund Transfer Act'.

"§ 902. Findings and purpose

"(a) The Congress finds that the use of electronic systems to transfer funds provides the potential for substantial benefits to consumers. However, due to the unique characteristics of such systems, the application of existing consumer protection legislation is unclear, leaving the rights and liabilities of consumers, financial institutions, and intermediaries in electronic fund transfers undefined.

"(b) It is the purpose of this title to provide a basic framework establishing the rights, liabilities, and responsibilities of participants in electronic fund transfer systems. The primary objective of this title, however, is the provision of individual consumer rights.

"§ 903 Definitions

"As used in this title—

"(1) the term 'accepted card or other means of access' means a card, code, or other means of access to a consumer's account for the purpose of initiating electronic fund transfers when the person to whom such card or other means of access was issued has requested and received or has signed or has used, or authorized another to use, such card or other means of access for the purpose of transferring money between accounts or obtaining money, property, labor, or services;

"(2) the term 'account' means a demand deposit, savings deposit, or other asset account (other than an occasional or incidental credit balance in an open end credit plan as defined in section 103(i) of this Act), as described in regulations of the Board, established primarily for personal, family, or household purposes, but such term does not include an account held by a financial institution pursuant to a bona fide trust agreement;

"(3) the term 'Board' means the Board of Governors of the Federal Reserve System;

"(4) the term 'business day' means any day on which the offices of the consumer's financial institution involved in an electronic fund transfer are open to the public for carrying on substantially all of its business functions;

"(5) the term 'consumer' means a natural person;

"(6) the term 'electronic fund transfer' means any transfer of funds, other than a transaction originated by check, draft, or similar paper instrument, which is initiated through an electronic terminal, telephonic instrument, or computer or magnetic tape so as to order, instruct, or authorize a financial institution to debit or credit an account. Such term includes, but is not limited to, point-of-sale transfers, automated teller machine transactions, direct deposits or withdrawals of funds, and transfers initiated by telephone. Such term does not include—

"(A) any check guarantee or authorization service which does not directly result in a debit or credit to a consumer's account;

"(B) any transfer of funds, other than those processed by automated clearinghouse, made by a financial institution on behalf of a consumer by means of a service that transfers funds held at either Federal Reserve banks or other depository institutions and which is not designed primarily to transfer funds on behalf of a consumer;

"(C) any transaction the primary purpose of which is the purchase or sale of securities or commodities through a broker-dealer registered with or regulated by the Securities and Exchange Commission;

"(D) any automatic transfer from a savings account to a demand deposit account pursuant to an agreement between a consumer and a financial institution for the purpose of covering an overdraft or maintaining an agreed upon minimum balance in the consumer's demand deposit account; or

"(E) any transfer of funds which is initiated by a telephone conversation between a consumer and an officer or employee of a financial institution which is not pursuant to a prearranged plan and under which periodic or recurring transfers are not contemplated,

as determined under regulations of the Board;

"(7) the term 'electronic terminal' means an electronic device, other than a telephone operated by a consumer, through which a consumer may initiate an electronic fund transfer. Such term includes, but is not limited to, point-of-sale terminals, automated teller machines, and cash dispensing machines;

"(8) the term 'financial institution' means a State or National bank, a State or Federal savings and loan association, a mutual savings bank, a State or Federal credit union, or any other person who, directly or indirectly, holds an account belonging to a consumer;

"(9) the term 'preauthorized electronic fund transfer' means an electronic fund transfer authorized in advance to recur at substantially regular intervals;

"(10) the term 'State' means any State, territory, or possession of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or any political subdivision of any of the foregoing; and

"(11) the term 'unauthorized electronic fund transfer' means an electronic fund transfer from a consumer's account initiated by a person other than the consumer without actual authority to initiate such transfer and from which the consumer receives no benefit, but the term does not include any electronic fund transfer (A) initiated by a person other than the consumer who was furnished with the card, code, or other means of access to such consumer's account by such consumer, unless the consumer has notified the financial institution involved that transfers by such other person are no longer authorized, (B) initiated with fraudulent intent by the consumer or any person acting in concert with the consumer, or (C) which constitutes an error committed by a financial institution.

"§ 904. Regulations

"(a) The Board shall prescribe regulations to carry out the purposes of this title. In prescribing such regulations, the Board shall—

"(1) consult with the other agencies referred to in section 917 and take into account, and allow for, the continuing evolution of electronic banking services and the technology utilized in such services;

"(2) prepare an analysis of economic impact which considers the costs and benefits to financial institutions, consumers, and other users of electronic fund transfers, including the extent to which additional documentation, reports, records, or other paper work would be required, and the effects upon competition in the provision of electronic banking services among large and small financial institutions and the availability of such services to different classes of consumers, particularly low income consumers;

"(b) The Board shall issue model clauses for optional use by financial institutions to facilitate compliance with the disclosure requirements of section 905 and to aid consumers in understanding the rights and responsibilities of participants in electronic funds transfers by utilizing readily understandable language. Such model clauses shall be adopted after notice dully given in the Federal Register and opportunity for public comment in accordance with section 553 of title 5, United States Code. With respect to the disclosures required by section 905 (a) (3) and (4), the Board shall take account of variations in the services and charges under different electronic fund transfer systems and, as appropriate, shall issue alternative model clauses for disclosure of these differing account terms.

"(c) Regulations prescribed hereunder may contain such classifications, differentiations, or other provisions, and may provide for such adjustments and exceptions for any class of electronic funds transfers, as in the judgment of the Board are necessary or proper to effectuate the purposes of this title, to prevent circumvention or evasion thereof, or to facilitate compliance therewith. The Board shall by regulation modify the requirements imposed by this title on small financial institutions if the Board determines that such modifications are necessary to alleviate any undue compliance burden on small financial institutions and such modifications are consistent with the purpose and objective of this title.

"(d) In the event that electronic fund transfer services are made available to consumers by a person other than a financial institution holding a consumer's account, the Board shall by regulation assure that the disclosures, protections, responsibilities, and remedies created by this title are made applicable to such persons and services.

"§ 905. Terms and conditions of transfers

"(a) The terms and conditions of electronic fund transfers involving a consumer's account shall be disclosed at the time the consumer contracts for an electronic fund transfer service, in accordance with regulations of the Board. Such disclosures shall be in readily understandable language and shall include, to the extent applicable—

"(1) the consumer's liability for unauthorized electronic fund transfers and, at the financial institution's option, notice of the advisability of prompt reporting of any loss, theft, or unauthorized use of a card, code, or other means of access;

"(2) the telephone number and address of the person or office to be notified in the event the consumer believes that an unauthorized electronic fund transfer has been or may be effected;

"(3) the type and nature of electronic fund transfers which the consumer may initiate, including any limitations on the frequency or dollar amount of such transfers, except that the details of such limitations need not be disclosed if their confidentiality is necessary to maintain the security of an electronic fund transfer system, as determined by the Board;

"(4) any charges for electronic fund transfers or for the right to make such transfers;

"(5) the consumer's right to stop payment of a preauthorized electronic fund transfer and the procedure to initiate such a stop payment order;

"(6) the consumer's right to receive documentation of electronic fund transfers under section 906;

"(7) a summary, in a form prescribed by regulations of the Board, of the error resolution provisions of section 908 and the consumer's rights thereunder. The financial institution shall thereafter transmit such summary at least once per calendar year;

"(8) the financial institution's liability to the consumer under section 910; and

"(9) under what circumstances the financial institution will in the ordinary course of business disclose information concerning the consumer's account to third persons.

"(b) A financial institution shall notify a consumer in writing at least twenty-one days prior to the effective date of any change in any term or condition of the consumer's account required to be disclosed under subsection (a) if such change would result in greater cost or liability for such consumer or decreased access to the consumer's account. A financial institution may, however, implement a change in the terms or conditions of an account without prior notice when such change is immediately necessary to maintain or restore the security of an electronic fund transfer system or a consumer's account. Subject to subsection (a) (3), the Board shall require subsequent notification if such a change is made permanent.

"(c) For any account of a consumer made accessible to electronic fund transfers prior to the effective date of this title, the information required to be disclosed to the consumer under subsection (a) shall be disclosed not later than the earlier of—

"(1) the first periodic statement required by section 906(c) after the effective date of this title; or

"(2) thirty days after the effective date of this title.

"§ 906. Documentation of transfers; periodic statements

"(a) For each electronic fund transfer initiated by a consumer from an electronic terminal, the financial institution holding such consumer's account shall, directly or indirectly, at the time the transfer is initiated, make available to the consumer written documentation of such transfer. The documentation shall clearly set forth to the extent applicable—

"(1) the amount involved and date the transfer is initiated;

"(2) the type of transfer;

"(3) the identity of the consumer's account with the financial institution from which or to which funds are transferred;

"(4) the identity of any third party to whom or from whom funds are transferred; and

"(5) the location or identification of the electronic terminal involved.

"(b) For a consumer's account which is scheduled to be credited by a preauthorized electronic fund transfer from the same payor at least once in each successive sixty-day period, except where the payor provides positive notice of the transfer to the consumer, the financial institution shall elect to provide promptly either positive notice to the consumer when the credit is made as scheduled, or negative notice to the consumer when the credit is not made as scheduled, in accordance with regulations of the Board. The means of notice elected shall be disclosed to the consumer in accordance with section 905.

"(c) A financial institution shall provide each consumer with a periodic statement for each account of such consumer that may be accessed by means of an electronic fund transfer. Except as provided in subsection (d) and (e), such statement shall be provided at least monthly for each monthly or shorter cycle in which an electronic fund transfer affecting the account has occurred, or every three months, whichever is more frequent. The statement, which may include information regarding transactions other than electronic fund transfers, shall clearly set forth—

"(1) with regard to each electronic fund transfer during the period, the information described in subsection (a), which may be provided on an accompanying document;

"(2) the amount of any fee or charge assessed by the financial institution during the period for electronic fund transfers or for account maintenance;

"(3) the balances in the consumer's account at the beginning of the period and at the close of the period; and

"(4) the address and telephone number

to be used by the financial institution for the purpose of receiving any statement inquiry or notice of account error from the consumer. Such address and telephone number shall be preceded by the caption 'Direct Inquiries To:' or other similar language indicating that the address and number are to be used for such inquiries or notices.

"(d) In the case of a consumer's passbook account which may not be accessed by electronic fund transfers other than preauthorized electronic fund transfers crediting the account, a financial institution may, in lieu of complying with the requirements of subsection (c), upon presentation of the passbook provided the consumer in writing with the amount and date of each such transfer involving the account since the passbook was last presented.

"(e) In the case of a consumer's account, other than a passbook account, which may not be accessed by electronic fund transfers other than preauthorized electronic fund transfers crediting the account, the financial institution may provide a periodic statement on a quarterly basis which otherwise complies with the requirements of subsection (c).

"(f) In any action involving a consumer, any documentation required by this section to be given to the consumer which indicates that an electronic fund transfer was made to another person shall be admissible as evidence of such transfer and shall constitute prima facie proof that such transfer was made.

"§ 907. Preauthorized transfers

"(a) A preauthorized electronic fund transfer from a consumer's account may be authorized by the consumer only in writing, and a copy of such authorization shall be provided to the consumer when made. A consumer may stop payment of a preauthorized electronic fund transfer by notifying the financial institution orally or in writing at any time up to three business days preceding the scheduled date of such transfer. The financial institution may require written confirmation to be provided to it within fourteen days of an oral notification if, when the oral notification is made, the consumer is advised of such requirement and the address to which such confirmation should be sent.

"(b) In the case of preauthorized transfers from a consumer's account to the same person which may vary in amount, the financial institution or designated payee shall, prior to each transfer, provide reasonable advance notice to the consumer, in accordance with regulations of the Board, of the amount to be transferred and the scheduled date of the transfer.

"§ 908. Error resolution

"(a) If a financial institution, within sixty days after having transmitted to a consumer documentation pursuant to section 906(a), (c), or (d) or notification pursuant to section 906(b), receives oral or written notice in which the consumer—

"(1) sets forth or otherwise enables the financial institution to identify the name and account number of the consumer;

"(2) indicates the consumer's belief that the documentation, or, in the case of notification pursuant to section 906(b), the consumer's account, contains an error and the amount of such error; and

"(3) sets forth the reasons for the consumer's belief (where applicable) that an error has occurred,

the financial institution shall investigate the alleged error, determine whether an error has occurred, and report or mail the results of such investigation and determination to the consumer within ten business days. The financial institution may require written confirmation to be provided to it within ten business days of an oral notification of error if, when the oral notification is made, the consumer is advised of such requirement and the address to which such confirmation should be sent. A financial institution which requires written confirmation in accordance with the previous sentence need not provisionally recredit a consumer's account in accordance with subsection (c), nor shall the financial institution be liable under subsection (e), if the written confirmation is not received within the ten day period referred to in the previous sentence.

"(b) If the financial institution determines that an error did occur, it shall promptly, but in no event more than one business day after such determination, correct the error, subject to section 909, including the crediting of interest where applicable.

"(c) If a financial institution receives notice of an error in the manner and within the time period specified in subsection (a), it may, in lieu of the requirements of subsections (a) and (b), within ten business days after receiving such notice provisionally recredit the consumer's account for the amount alleged to be in error, subject to section 909, including interest where applicable, pending the conclusion of its investigation and its determination of whether an error has occurred. Such investigation shall be concluded not later than forty-five days after receipt of notice of the error. During the pendency of the investigation, the consumer shall have full use of the funds provisionally recredited.

"(d) If the financial institution determines after its investigation pursuant to subsection (a) or (c) that an error did not occur, it shall deliver or mail to the consumer an explanation of its findings within 3 business days after the conclusion of its investigation, and upon request of the consumer promptly deliver or mail to the consumer reproductions of all documents which the financial institution relied on to conclude that such error did not occur. The financial institution shall include notice of the right to request reproductions with the explanation of its findings.

"(e) If in any action under section 915, the court finds that—

"(1) the financial institution did not provisionally recredit a consumer's account within the ten-day period specified in subsection (c), and the financial institution (A) did not make a good faith investigation of the alleged error, or (B) did not have a reasonable basis for believing that the consumer's account was not in error; or

"(2) the financial institution knowingly and willfully concluded that the consumer's account was not in error when such conclusion could not reasonably have been drawn from the evidence available to the financial institution at the time of its investigation,

then the consumer shall be entitled to treble damages determined under section 915 (a)(1).

"(f) For the purposes of this section, an error consists of—

"(1) an unauthorized electronic fund transfer;

"(2) an incorrect electronic fund transfer from or to the consumer's account;

"(3) the omission from a periodic statement of an electronic fund transfer affecting the consumer's account which should have been included;

"(4) a computational error by the financial institution;

"(5) the consumer's receipt of an incorrect amount of money from an electronic terminal;

"(6) a consumer's request for additional information or clarification concerning an electronic fund transfer or any documentation required by this title; or

"(7) any other error described in regulations of the Board.

"§ 909. Consumer liability for unauthorized transfers

"(a) A consumer shall be liable for any unauthorized electronic fund transfer involving the account of such consumer only if the card or other means of access utilized for such transfer was an accepted card or other means of access and if the issuer of such card, code, or other means of access has provided a means whereby the user of such card, code, or other means of access can be identified as the person authorized to use it, such as by signature, photcgraph, or fingerprint or by electronic or mechanical confirmation. In no event, however, shall a consumer's liability for an unauthorized transfer exceed the lesser of—

"(1) $50; or

"(2) the amount of money or value of property or services obtained in such unauthorized electronic fund transfer prior to the time the financial institution is notified of, or otherwise becomes aware of, circumstances which lead to the reasonable belief that an unauthorized electronic fund transfer involving the consumer's account has been or may be effected. Notice under this paragraph is sufficient when such steps have been taken as may be reasonably required in the ordinary course of business to provide the financial institution with the pertinent information, whether or not any particular officer, employee, or agent of the financial institution does in fact receive such information.

Notwithstanding the foregoing, reimbursement need not be made to the consumer for losses the financial institution establishes would not have occurred but for the failure of the consumer to report within sixty days of transmittal of the statement (or in extenuating circumstances such as extended travel or hospitalization, within a reasonable time under the circumstances) any unauthorized electronic fund transfer or account error which appears on the periodic statement provided to the consumer under section 906. In addition, reimbursement need not be made to the consumer for losses which the financial institution establishes would not have occurred but for the failure of the consumer to report any loss or theft of a card or other means of access within two business days after the consumer learns of the loss or theft (or in extenuating circumstances such as extended travel or hospitalization, within a longer period which is reasonable under the circumstances), but the consumer's liability under this subsection in any such case may not exceed a total of $500, or the amount of unauthorized electronic fund transfers which occur following the close of two business days (or such longer period) after the consumer learns of the loss or theft but prior to notice to the financial institution under this subsection, whichever is less.

"(b) In any action which involves a consumer's liability for an unauthorized electronic fund transfer, the burden of proof is upon the financial institution to show that the electronic fund transfer was authorized or, if the electronic fund transfer was unauthorized, then the burden of proof is upon the financial institution to establish that the conditions of liability set forth in subsection (a) have been met, and, if the transfer was initiated after the effective date of section 905, that the disclosures required to be made to the consumer under section 905(a) (1) and (2) were in fact made in accordance with such section.

"(c) In the event of a transaction which involves both an unauthorized electronic fund transfer and an extension of credit as defined in section 103(e) of ths Act pursuant to an agreement between the consumer and the financial institution to extend such credit to the consumer in the event the con-

sumer's account is overdrawn, the limitation, on the consumer's liability for such transaction shall be determined solely in accordance with this section.

"(d) Nothing in this section imposes liability upon a consumer for an unauthorized electronic fund transfer in excess of his liability for such a transfer under other applicable law or under any agreement with the consumer's financial institution.

"(e) Except as provided in this section, a consumer incurs no liability from an unauthorized electronic fund transfer.

"§ 910. Liability of financial institutions

"(a) Subject to subsections (b) and (c), a financial institution shall be liable to a consumer for all damages proximately caused by—

"(1) the financial institution's failure to make an electronic fund transfer, in accordance with the terms and conditions of an account, in the correct amount or in a timely manner when properly instructed to do so by the consumer, except where—

"(A) the consumer's account has insufficient funds;

"(B) the funds are subject to legal process or other encumbrance restricting such transfer;

"(C) such transfer would exceed an established credit limit;

"(D) an electronic terminal has insufficient cash to complete the transaction; or

"(E) as otherwise provided in regulations of the Board;

"(2) the financial institution's failure to make an electronic fund transfer due to insufficient funds when the financial institution failed to credit, in accordance with the terms and conditions of an account, a deposit of funds to the consumer's account which would have provided sufficient funds to make the transfer; and

"(3) the financial institution's failure to stop payment of a preauthorized transfer from a consumer's account when instructed to do so in accordance with the terms and conditions of the account.

"(b) A financial institution shall not be liable under subsection (a)(1) or (2) if the financial institution shows by a preponderance of the evidence that its action or failure to act resulted from—

"(1) an act of God or other circumstance beyond its control, that it exercised reasonable care to prevent such an occurrence, and that it exercised such diligence as the circumstances required; or

"(2) a technical malfunction which was known to the consumer at the time he attempted to initiate an electronic fund transfer or, in the case of a preauthorized transfer, at the time such transfer should have occurred.

"(c) In the case of a failure described in subsection (a) which was not intentional and which resulted from a bona fide error, notwithstanding the maintenance of procedures reasonably adapted to avoid any such error, the financial institution shall be liable for actual damages proved.

"§ 911. Issuance of cards or other means of access

"(a) No person may issue to a consumer any card, code, or other means of access to such consumer's account for the purpose of initiating an electronic fund transfer other than—

"(1) in response to a request or application therefor; or

"(2) as a renewal of, or in substitution for, an accepted card, code, or other means of access, whether issued by the initial issuer or a successor.

"(b) Notwithstanding the provisions of subsection (a), a person may distribute to a consumer on an unsolicited basis a card, code, or other means of access for use in initiating an electronic fund transfer from such consumer's account, if—

"(1) such card, code, or other means of access is not validated;

"(2) such distribution is accompanied by a complete disclosure, in accordance with section 905, of the consumer's rights and liabilities which will apply if such card, code, or other means of access is validated;

"(3) such distribution is accompanied by a clear explanation, in accordance with regulations of the Board, that such card, code, or other means of access is not validated and how the consumer may dispose of such code, card, or other means of access if validation is not desired; and

"(4) such card, code, or other means of access is validated only in response to a request or application from the consumer, upon verification of the consumer's identity.

"(c) For the purpose of subsection (b), a card, code, or other means of access is validated when it may be used to initiate an electronic fund transfer.

"§ 912. Suspension of obligations

"If a system malfunction prevents the effectuation of an electronic fund transfer initiated by a consumer to another person, and such other person has agreed to accept payment by such means, the consumer's obligation to the other person shall be suspended until the malfunction is corrected and the electronic fund transfer may be completed, unless such other person has subsequently, by written request, demanded payment by means other than an electric fund transfer.

"§ 913. Compulsory use of electronic fund transfers

"No person may—

"(1) condition the extension of credit to a consumer on such consumer's repayment by means of preauthorized electronic fund transfers; or

"(2) require a consumer to establish an account for receipt of electronic transfers with a particular financial institution as a condition of employment or receipt of a government benefit.

"§ 914. Waiver of rights

"No writing or other agreement between a consumer and any other person may contain any provision which constitutes a waiver of any right conferred or cause of action created by this title. Nothing in this section prohibits, however, any writing or other agreement which grants to a consumer a more extensive right or remedy or greater protection than contained in this title or a waiver given in settlement of a dispute or action.

"§ 915. Civil liability

"(a) Except as otherwise provided by this section and section 910, any person who fails to comply with any provision of this title with respect to any consumer, except for an error resolved in accordance with section 908, is liable to such consumer in an amount equal to the sum of—

"(1) any actual damage sustained by such consumer as a result of such failure;

"(2)(A) in the case of an individual action, an amount not less than $100 nor greater than $1,000; or

"(B) in the case of a class action, such amount as the court may allow, except that (i) as to each member of the class no minimum recovery shall be applicable, and (ii) the total recovery under this subparagraph in any class action or series of class actions arising out of the same failure to comply by the same person shall not be more than the lesser of $500,000 or 1 per centum of the net worth of the defendant; and

"(3) in the case of any successful action to enforce the foregoing liability, the costs of the action, together with a reasonable attorney's fee as determined by the court.

"(b) In determining the amount of liability in any action under subsection (a), the court shall consider, among other relevant factors—

"(1) in any individual action under subsection (a)(2)(A), the frequency and persistence of noncompliance, the nature of such noncompliance, and the extent to which the noncompliance was intentional; or

"(2) in any class action under subsection (a)(2)(B), the frequency and persistence of noncompliance, the nature of such noncompliance, the resources of the defendant, the number of persons adversely affected, and the extent to which the noncompliance was intentional.

"(c) Except as provided in section 910, a person may not be held liable in any action brought under this section for a violation of this title if the person shows by a preponderance of evidence that the violation was not intentional and resulted from a bona fide error notwithstanding the maintenance of procedures reasonably adapted to avoid any such error.

"(d) No provision of this section or section 916 imposing any liability shall apply to—

"(1) any act done or omitted in good faith in conformity with any rule, regulation, or interpretation thereof by the Board or in conformity with any interpretation or approval by an official or employee of the Federal Reserve System duly authorized by the Board to issue such interpretations or approvals under such procedures as the Board may prescribe therefor; or

"(2) any failure to make disclosure in proper form if a financial institution utilized an appropriate model clause issue by the Board,

notwithstanding that after such act, omission, or failure has occurred, such rule, regulation, approval, or model clause is amended, rescinded, or determined by judicial or other authority to be invalid for any reason.

"(e) A person has no liability under this section for any failure to comply with any requirement under this title if, prior to the institution of an action under this section, the person notifies the consumer concerned of the failure, complies with the requirements of this title, and makes an appropriate adjustment to the consumer's account and pays actual damages or, where applicable, damages in accordance with section 910.

"(f) On a finding by the court that an unsuccessful action under this section was brought in bad faith or for purposes of harassment, the court shall award to the defendant attorney's fees reasonable in relation to the work expended and costs.

"(g) Without regard to the amount in controversy, any action under this section may be brought in any United States district court, or in any other court of competent jurisdiction, within one year from the date of the occurrence of the violation.

"§ 916. Criminal liability

"(a) Whoever knowingly and willfully—

"(1) gives false or inaccurate information or fails to provide information which he is required to disclose by this title or any regulation issued thereunder; or

"(2) otherwise fails to comply with any provision of this title;

shall be fined not more than $5,000 or imprisoned not more than one year, or both.

"(b) Whoever—

"(1) knowingly, in a transaction affecting interstate or foreign commerce, uses or attempts or conspires to use any counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument to obtain money, goods, services, or anything

else of value which within any one-year period has a value aggregating $1,000 or more; or

"(2) with unlawful or fraudulent intent, transports or attempts or conspires to transport in interstate or foreign commerce a counterfeit, fictitious, altered, forged, lost, or fraudulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained; or

"(3) with unlawful or fraudulent intent, uses any instrumentality of interstate or foreign commerce to sell or transport a counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained; or

"(4) knowingly receives, conceals, uses, or transports money, goods, services, or anything else of value (except tickets for interstate or foreign transportation) which (A) within any one-year period has a value aggregating $1,000 or more, (B) has moved in or is part of, which constitutes interstate or foreign commerce, and (C) has been obtained with a counterfeit, fictitious, altered forged, lost, stolen, or fraudulently obtained debit instrument; or

"(5) knowingly receives, conceals, uses, sells, or transports in interstate or foreign commerce one or more tickets for interstate or foreign transportation, which (A) within any one-year period have a value aggregating $500 or more, and (B) have been purchased or obtained with one or more counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument; or

"(6) in a transaction affecting interstate or foreign commerce, furnishes money, property, services, or anything else of value, which within any one-year period has a value aggregating $1,000 or more, through the use of any counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained debit instrument knowing the same to be counterfeit, fictitious, altered, forged, lost, stolen, or fraudulently obtained—shall be fined not more than $10,000 or imprisoned not more than ten years, or both.

"(c) As used in this section, the term 'debit instrument' means a card, code, or other device, other than a check, draft, or similar paper instrument, by the use of which a person may initiate an electronic fund transfer.

"§ 917. Administrative enforcement

"(a) Compliance with the requirements imposed under this title shall be enforced under—

"(1) section 8 of the Federal Deposit Insurance Act, in the case of—

"(A) national banks, by the Comptroller of the Currency;

"(B) member banks of the Federal Reserve System (other than national banks), by the Board;

"(C) banks insured by the Federal Deposit Insurance Corporation (other than members of the Federal Reserve System), by the Board of Directors of the Federal Deposit Insurance Corporation;

"(2) section 5(d) of the Home Owners' Loan Act of 1933, section 407 of the National Housing Act, and sections 6(i) and 17 of the Federal Home Loan Bank Act, by the Federal Home Loan Bank Board (acting directly or through the Federal Savings and Loan Insurance Corporation), in the case of any institution subject to any of these provisions;

"(3) the Federal Credit Union Act, by the Administrator of the National Credit Union Administration with respect to any Federal credit union;

"(4) the Federal Aviation Act of 1958, by the Civil Aeronautics Board with respect to any air carrier or foreign air carrier subject to that Act; and

"(5) the Securities Exchange Act of 1934, by the Securities and Exchange Commission with respect to any broker or dealer subject to that Act.".

"(b) For the purpose of the exercise by any agency referred to in subsection (a) of its powers under any Act referred to in that subsection, a violation of any requirement imposed under this title shall be deemed to be a violation of a requirement imposed under that Act. In addition to its powers under any provision of law specifically referred to in subsection (a), each of the agencies referred to in that subsection may exercise, for the purpose of enforcing compliance with any requirement imposed under this title, any other authority conferred on it by law.

"(c) Except to the extent that enforcement of the requirements imposed under this Act is specifically committed to some other Government agency under subsection (a), the Federal Trade Commission shall enforce such requirements. For the purpose of the exercise by the Federal Trade Commission of its functions and powers under the Federal Trade Commission Act, a violation of any requirement imposed under this Act shall be deemed a violation of a requirement imposed under that Act. All of the functions and powers of the Federal Trade Commission under the Federal Trade Commission Act are available to the Commission to enforce compliance by any person subject to the jurisdiction of the Commission with the requirements imposed under this Act, irrespective of whether that person is engaged in commerce or meets any other jurisdictional tests in the Federal Trade Commission Act.".

"§ 918. Reports to Congress

"(a) Not later than twelve months after the effective date of this title and at one-year intervals thereafter, the Board and the Attorney General shall, respectively, make reports to the Congress concerning the administration of their functions under this title, including such recommendations as the Board and the Attorney General, respectively, deem necessary or appropriate. In addition, each report of the Board shall include its assessment of the extent to which compliance with this title is being achieved, and a summary of the enforcement actions taken under section 917 of this title. In such report, the Board shall particularly address the effects of this title on the costs and benefits to financial institutions and consumers, on competition, on the introduction of new technology, on the operations of financial institutions, and on the adequacy of consumer protection. The report of the Attorney General shall also contain an analysis of the impact of this title on the operation, workload, and efficiency of the Federal courts.

"(b) In the exercise of its functions under this title, the Board may obtain upon request the views of any other Federal agency which, in the judgment of the Board, exercises regulatory or supervisory functions with respect to any class of persons subject to this title.

"§ 919. Relation to State laws

"This title does not annul, alter, or affect the laws of any State relating to electronic fund transfers, except to the extent that those laws are inconsistent with the provisions of this title, and then only to the extent of the inconsistency. A State law is not inconsistent with this title if the protection such law affords any consumer is greater than the protection afforded by this title. The Board shall, upon its own motion or upon the request of any financial institution, State, or other interested party, submitted in accordance with procedures prescribed in regulations of the Board, determine whether a State requirement is inconsistent or affords greater protection. If the Board determines that a State requirement is inconsistent, financial institutions shall incur no liability under the law of that State for a good faith failure to comply with that law, notwithstanding that such determination is subsequently amended, rescinded, or determined by judicial or other authority to be invalid for any reason. This title does not extend the applicability of any such law to any class of persons or transactions to which it would not otherwise apply.

"§ 920. Exemption for State regulation

"The Board shall by regulation exempt from the requirements of this title any class of electronic fund transfers within any State if the Board determines that under the law of that State that class of electronic fund transfers is subject to requirements substantially similar to those imposed by this title, and that there is adequate provision for enforcement.

"§ 921. Effective date

"This title takes effect upon the expiration of eighteen months from the date of its enactment, except that sections 909 and 911 take effect upon the expiration of ninety days after the date of enactment.".

TITLE XII—TRUTH IN LENDING SIMPLIFICATION

SHORT LIFE

SEC. 1201. This title may be cited as the "Truth in Lending Simplification and Reform Act".

DEFINITIONS

SEC. 1202. (a) Section 103(f) of the Truth in Lending Act is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following: "The term 'creditor' refers only to a person who both (1) regularly extends, whether in connection with loans, sales of property or services, or otherwise, consumer credit which is payable by agreement in more than four installments or for which the payment of a finance charge is or may be required; and (2) is the person to whom the debt arising from the consumer credit transaction is initially payable on the face of the evidence of indebtedness or, if there is no such evidence of indebtedness, by agreement. Notwithstanding the foregoing, a person who regularly arranges for the extension of consumer credit, which is payable in more than four installments or for which the payment of a finance charge is or may be required, from persons who are not creditors is a creditor, and in the case of an open end credit plan involving a credit card the card issuer and any person who honors the credit card and offers a discount which is a finance charge are creditors."; and

(2) by redesignating the references to sections 127(a)(6), 127(a)(7), 127(a)(8), 127(b)(9), and 127(b)(11) in the next succeeding sentence as references to sections 127(a)(5), 127(a)(6), 127(a)(7), 127(b)(8), and 127(b)(10), respectively.

(b) The first sentence of section 103(g) of the Truth in Lending Act is amended to read as follows: "The term 'credit sale' refers to any sale in which the seller is a creditor.".

EXEMPTED TRANSACTIONS

SEC. 1203. (a) Section 103(h) of the Truth in Lending Act is amended by striking out "household, or agricultural" and inserting in lieu thereof "or household".

(b) Section 103 of the Truth in Lending Act is amended by redesignating subsection (s) as subsection (x), and by inserting a new subsection (s) as follows:

"(s) The term 'agricultural purposes' includes the production, harvest, exhibition, marketing, transportation, processing, or manufacture of agricultural products by a natural person who cultivates, plants, propagates, or nurtures those agricultural products, including but not limited to the acquisition of farmland, real property with a farm residence, and personal property and services used primarily in farming, and the term 'agricultural products' includes agricultural, horticultural, viticultural, and dairy products, livestock, wildlife, poultry, bees, forest

products, fish and shellfish, and any products thereof, including processed and manufactured products, and any and all products raised or produced on farms and any processed or manufactured products thereof.".

(c) Section 104 of the Truth in Lending Act is amended—

(1) by amending paragraph (1) to read as follows:

"(1) Credit transactions involving extensions of credit primarily for business, commercial, or agricultural purposes, or to government or governmental agencies or instrumentalities, or to organizations.";

(2) by amending paragraph (3) to read as follows:

"(3) Credit transactions, other than those in which a security interest is or will be acquired in real property, or in personal property used or expected to be used as the principal dwelling of the consumer, in which the total amount financed exceeds $25,000."; and

(3) by striking out paragraph (5).

OPEN END CREDIT PLAN

SEC. 1204. Section 103(i) of the Truth in Lending Act is amended to read as follows:

"(i) The term 'open end credit plan' means a plan under which the creditor reasonably contemplates repeated transactions, which prescribes the terms of such transactions, and which provides for a finance charge which may be computed from time to time on the outstanding unpaid balance. A credit plan which is an open end credit plan within the meaning of the preceding sentence is an open end credit plan even if credit information is verified from time to time.".

MODEL FORMS

SEC. 1205. (a) Section 105 of the Truth in Lending Act is amended by inserting "(a)" before "The", and by adding at the end thereof the following:

"(b) The Board shall publish model disclosure forms and clauses for common transactions to facilitate compliance with the disclosure requirements of this title and to aid the borrower in understanding the transaction by utilizing readily understandable language to simplify the technical nature of the disclosures. In devising such forms, the Board shall consider the use by creditors of data processing or similar automated equipment. Nothing in this title may be construed to require a creditor to use any such model form or clause prescribed by the Board under this section. A creditor shall be deemed to be in compliance with the disclosure provisions of this title with respect to other than numerical disclosures if the creditor (1) uses any appropriate model form or clause as published by the Board, or (2) uses any such model form or clause and changes it by (A) deleting any information which is not required by this title, or (B) rearranging the format, if in making such deletion or rearranging the format, the creditor does not affect the substance, clarity, or meaningful sequence of the disclosure.

"(c) Model disclosure forms and clauses shall be adopted by the Board after notice duly given in the Federal Register and an opportunity for public comment in accordance with section 553 of title 5, United States Code.

"(d) Any regulation of the Board, or any amendment or interpretation thereof, requiring any disclosure different from that previously required by this chapter, chapter 4, or chapter 5, or regulation of the Board promulgated thereunder shall have an effective date of that October 1 which follows by at least six months the date of promulgation, except that the Board may at its discretion take interim action by regulation, amendment, or interpretation to lengthen the period of time permitted for creditors to adjust their forms to accommodate new requirements or shorten the length of time for creditors to make such adjustments when it makes a specific finding that such action is necessary to comply with the findings of a court or to prevent unfair or deceptive disclosure practices. Notwithstanding the foregoing, any creditor may comply with any such newly promulgated disclosure requirements prior to the effective date of the requirements.".

COMPONENTS OF FINANCE CHARGE

SEC. 1206. (a) Section 106(a) of the Truth in Lending Act is amended by striking out ", including any of the following types of charges which are applicable" and inserting in lieu thereof the following: ". The finance charge does not include charges of a type payable in a comparable cash transaction. Examples of charges which are included in the finance charge include any of the following types of charges which are applicable".

(b) Section 106(d) of the Truth in Lending Act is amended by striking out paragraphs (3) and (4).

ACCURACY OF ANNUAL PERCENTAGE RATE

SEC. 1207. (a) Subsection (c) of section 107 of the Truth in Lending Act is amended to read as follows:

"(c) The disclosure of an annual percentage rate is accurate for the purpose of this title if the rate disclosed is within a tolerance not greater than one-eighth of 1 per centum more or less than the actual rate or rounded to the nearest one-fourth of 1 per centum. The Board may allow a greater tolerance to simplify compliance where irregular payments are involved.".

(b) Subsection (e) of section 107 of the Truth in Lending Act is amended by striking out "(c) or".

(c) Subsection (f) of section 107 of the Truth in Lending Act is repealed.

ADMINISTRATIVE ENFORCEMENT; RESTITUTION

SEC. 208. (a) Section 108 of the Truth in Lending Act is amended by adding at the end thereof the following:

"(e)(1) In carrying out its enforcement activities under this section, each agency referred to in subsection (a) or (c), in cases where an annual percentage rate or finance charge was inaccurately disclosed, shall notify the creditor of such disclosure error and is authorized in accordance with the provisions of this subsection to require the creditor to make an adjustment to the account of the person to whom credit was extended, to assure that such person will not be required to pay a finance charge in excess of the finance charge actually disclosed or the dollar equivalent of the annual percentage rate actually disclosed, whichever is lower.

"(2) Each agency shall require such an adjustment when it determines that such disclosure error resulted from (A) a clear and consistent pattern or practice of violations, (B) gross negligence, or (C) a willful violation which was intended to mislead the person to whom the credit was extended. In the case of other such disclosure errors, each agency may require such an adjustment.

"(3) Notwithstanding the above paragraph (2), no adjustment shall be ordered (A) if it would have a significantly adverse impact upon the safety or soundness of the creditor, but in any such case, the agency may require a partial adjustment in an amount which does not have such an impact (B) if the amount of the adjustment would be less than $1, except that if more than one year has elapsed since the date of the violation, the agency may require that such amount be paid into the Treasury of the United States, or (C) except where such disclosure error resulted from a willful violation which was intended to mislead the person to whom credit was extended, in the case of an open-end credit plan, more than two years after the violation, or in the case of any other extension of credit, after the later of (i) the expiration of the life of the credit extension, or (ii) two years after the agreement to extend credit was consummated.

"(4)(A) Notwithstanding any other provision of this section, an adjustment under this subsection may be required by an agency referred to in subsection (a) or (c) only by an order issued in accordance with cease-and-desist procedures provided by the provision of law referred to in such subsections.

"(B) In the case of an agency which is not authorized to conduct cease-and-desist proceedings, such an order may be issued after an agency hearing on the record conducted at least thirty but not more than sixty days after notice of the alleged violation is served on the creditor. Such a hearing shall be deemed to be a hearing which is subject to the provisions of section 8(h) of the Federal Deposit Insurance Act and shall be subject to judicial review as provided therein.

"(5) Except as otherwise specifically provided in this subsection and notwithstanding any provision of law referred to in subsection (a) or (c), no agency referred to in subsection (a) or (c) may require a creditor to make dollar adjustments under this title, except with regard to the requirements of section 165.

"(6) A creditor shall not be subject to an order to make an adjustment, if within sixty days after discovering a disclosure error, whether pursuant to a final written examination report or through the creditor's own procedures, the creditor notifies the person concerned of the error and adjusts the account so as to assure that such person will not be required to pay a finance charge in excess of the finance charge actually disclosed or the dollar equivalent of the annual percentage rate actually disclosed, whichever is lower.

"(7) The provisions of this subsection do not apply to any loan or extension of credit consummated prior to October 28, 1974.".

EFFECT ON OTHER LAWS

SEC. 1209. Section 111(a) of the Truth in Lending Act is amended to read as follows:

"(a)(1) This title does not annul, alter, or affect the laws of any State relating to the disclosure of information in connection with credit transactions, except to the extent that those laws are inconsistent with the provisions of this title, and then only to the extent of the inconsistency. The Board shall, upon its own motion or upon the request of any creditor, State, or other interested party, submitted in accordance with procedures prescribed in regulations of the Board, determine whether such inconsistencies exist. If the Board determines that a State-required disclosure is inconsistent, creditors located in that State may not make disclosures using the inconsistent term of form, and shall incur no liability under the law of that State for a good faith failure to use such term or form, notwithstanding that such determination is subsequently amended, rescinded, or determined by judicial or other authority to be invalid for any reason.

"(2) The Board shall, upon its own motion or upon the request of any creditor, State, or other interested party, submitted in accordance with procedures prescribed in regulations of the Board, determine whether any disclosure required under the law of any State is substantially the same in meaning as a disclosure required under this title. If the Board determines that a State-required disclosure is substantially the same in meaning as a disclosure required by this title, then creditors located in that State may make such disclosure in compliance with such State law in lieu of the disclosure required by this title, except that the annual percentage rate and finance charge must always be disclosed as required by section 122.".

ANNUAL REPORTS

SEC. 1210. (a) Section 114 of the Truth in Lending Act is amended by striking out "not later than January 3 of each year after

1969" and inserting in lieu thereof "Each year".

(b) Section 18(f)(5) of the Federal Trade Commission Act (15 U.S.C. 58a(f)(5)) is amended by striking out "not later than March 15".

(c) Section 707 of the Equal Credit Opportunity Act is amended by striking out "Not later than February 1 of each year after 1976" and inserting in lieu thereof "Each year".

GENERAL DISCLOSURE

SEC. 1211. Sections 121 and 122 of the Truth in Lending Act are amended to read as follows:

"§ 121. General requirement of disclosure

"(a) Subject to subsection (b), a creditor or lessor shall disclose to the person who is obligated on a consumer lease or a consumer credit transaction the information required under this title. In a transaction involving more than one obligor, a creditor or lessor, except in a transaction under section 125, need not disclose to more than one of them if the one given disclosure is a primary obligor.

"(b) If a transaction involves one creditor as defined in section 103(f), or one lessor as defined in section 181(3), that creditor or lessor shall make the disclosures. If a transaction involves more than one creditor or lessor, only one creditor or lessor shall be required to make the disclosures. The Board shall by regulation specify which creditor or lessor must make the disclosures.

"(c) The Board may provide by regulation that any portion of the information required to be disclosed by this title may be given in the form of estimates where the provider of such information is not in a position to know exact information.

"(d) The Board shall determine whether tolerances for numerical disclosures other than the annual percentage rate are necessary to facilitate compliance with this title, and if it determines that such tolerances are necessary to facilitate compliance, it shall by regulation permit disclosures within such tolerances.

"§ 122. Form of disclosure; additional information

"(a) Information required by this title shall be disclosed clearly and conspicuously, in accordance with regulations of the Board. The terms 'annual percentage rate' and 'finance charge' shall be disclosed more conspicuously than other terms, data, or information provided in connection with a transaction, except information relating to the identity of the creditor. Regulations of the Board need not require that disclosures pursuant to this title be made in the order set forth in this title and, except as otherwise provided, may permit the use of terminology different from that employed in this title if it conveys substantially the same meaning.

"(b) Any creditor may supply additional information or explanation with any disclosures required under chapter 4 and, except as provided in section 128(b)(1), under this chapter.".

RESCISSION

SEC. 212. (a)(1) Subsection (a) of section 125 of the Truth in Lending Act is amended to read as follows:

"(a) Except as otherwise provided in this section, in the case of any consumer credit transaction (including opening or increasing the credit limit for an open end credit plan) in which a security interest, including any such interest arising by operation of law, is or will be retained or acquired in any property which is used as the principal dwelling of the person to which credit is extended, the obligor shall have the right to rescind the transaction until midnight of the third business day following the consummation of the transaction or the delivery of the information and rescission forms required under this section together with a statement containing the material disclosures required under this title, whichever is later, by notifying the creditor, in accordance with regulations of the Board, of his intention to do so. The creditor shall clearly and conspicuously disclose, in accordance with regulations of the Board, to any obligor in a transaction subject to this section the rights of the obligor under this section. The creditor shall also provide, in accordance with regulations of the Board, appropriate forms for the obligor to exercise his right to rescind any transaction subject to this section.".

(2) Section 103 of such Act, as amended by section 1203(b), is amended by adding at the end thereof the following:

"(v) The term 'material disclosures' means the disclosure, as required by this title, of the annual percentage rate, the method of determining the finance charge and the balance upon which a finance charge will be imposed, the amount of the finance charge, the amount to be financed, the total of payments, the number and amounts of payments, and the due dates or periods of payments scheduled to repay the indebtedness.".

(3) Subsection (b) of section 125 of the Truth in Lending Act is amended by striking out "ten" in the second and final sentences thereof, and inserting in lieu thereof "20".

(4) Subsection (b) of section 125 of the Truth in Lending Act is amended by adding at the end thereof the following new sentence: "The procedures prescribed by this subsection shall apply except when otherwise ordered by a court.".

(5) Subsection (c) of section 125 of the Truth in Lending Act is amended by inserting "information, forms, and" after "whom".

(6) Section 125 of the Truth in Lending Act is amended by striking out subsections (e) and (f) and inserting in lieu thereof the following:

"(e) This section does not apply to (1) a residential mortgage transaction as defined in section 103(u); (2) a transaction which constitutes a refinancing or consolidation (with no new advances) of the principal balance then due and any accrued and unpaid finance charges of an existing extension of credit by the same creditor secured by an interest in the same property; (3) a transaction in which an agency of a State is the creditor; or (4) advances under a preexisting open end credit plan if a security interest has already been retained or acquired and such advances are in accordance with a previously established credit limit for that plan.
